CONCLUDING REMARKS.

Concluding Remarks 218

STATISTICAL RETURNS.

Statistical Returns ... ... 1—144

REVIEW BY THE CHIEF COMMISSIONER OF THE ANNUAL REPORT ON THE ADMINISTRATION OF JUSTICE IN MYSORE DURING 1869.

1. The statements for the year have been compiled according to the forms recommended by the Statistical Committee, modified, as noticed by the Judicial Commissioner.

CRIMINAL JUSTICE.

2. The total number of cases decided during the year was 14,344 or 815 in excess of that during 1868, the increase being chiefly in petty cases. The total number of persons tried was 31,521, against 28,739 in 1868, and of this number 20,742 were acquitted or discharged; 10,502 were convicted; and 277 remained for trial at the close of the year, the proportion of acquittals and convictions being 66·4 and 33·6 per cent respectively, while in 1868 it was 61·4 and 38·6, and in 1867 56·8 and 43·2.

Duration.

3. It is satisfactory to find that the duration of trials continues to diminish, it being 7·83 days during the past year, against 10 days in 1868. In the Superintendents' Courts the duration has been reduced from 32 days in 1868 to 26½ during the past year.

Witnesses.

4. The number of witnesses examined was 47,658, shewing an increase of 5,599 over 1868. The average number in each case was 3·32, against 3·11 in the previous year.

5. Under the heads of murder, attempt to murder, and culpable homicide, there have been 48 convictions, against 34 in 1868.

Under the head of "hurt," there has been an increase of 151 convictions, chiefly in the Nagar Division.

Seven persons were tried for wrongful restraint, and the same number for unlawful compulsion to labor. Of the former, only one was convicted, and none of the latter.

The crime of abortion is stated to be apparently on the increase; but the Judicial Commissioner explains that this is probably more apparent than real.

6. For offences against the person, 17,277 persons were tried, and 4,921 convicted, against 14,562 tried and 5,136 convicted in 1868.

For offences against property, 9,799 persons were tried, and 2,746 convicted, against 10,484 tried, and 3,610 convicted in 1868.

The convictions for dacoity and robbery were 68 and 38 respectively, against 73 and 42 in 1868.

The convictions for house-breaking and house-trespass numbered 211, against 208 in the previous year.

7. Of the total number of cases dealt with, the Amildars disposed of about one half, and Péshkars of nearly one-fourth.

8. The large proportion of persons acquitted or discharged is explained as being due to a general belief that a person may be taken up on any complaint, whether *primâ facie* ascertained to be well founded or not. The proper correction of such a belief and practice rests with the Magistrates, who are fully empowered by the Criminal Procedure Code to exercise their discretion in such cases.

9. The number of capital sentences was 20, against 7 in 1868, this large increase being due to an extraordinary number of murders in the Nagar Division. The exceptional circumstances of this division, as regards its liability to crime of a predatory character, was noticed by Mr. Bowring in his remarks on the Judicial Report for 1868, and they cannot be removed till the remedy alluded to therein is adopted, *viz.*, the establishment of a strong and well paid Police composed of people of the country, who can withstand the feverish climate, with European superintendence, but it will take time to introduce it.

10. The number of criminal appeals was 62, against 710 in 1868, the decrease being chiefly in appeals from decisions of Magistrates to the Sessions Judges, which is justly regarded as a satisfactory indi-

cation of the justice of such decisions. Appeals to the Judicial Commissioner's Court have, however, increased, being 118 against 75 in 1868. The percentage of appeals in appealable cases was 5·62 against 5·92 in 1868.

The average duration of appeals was 24 days, which is less favorable than that for 1868, which was 19¼ days. Assessors served in 206 trials, against 139 in 1868. Trial by jury has not been introdueed.

11. The total number of miscellaneous cases was 310,657, against 294,216 in 1868. The increase was in petitions, representations, &c., much of which class of business ought not, it is considered, to appear on the files of the Courts. The Judicial Commissioner has issued instructions which will, it is hoped, reduce the number of these proceedings, and simplify the procedure of the Courts.

12. The number of European British subjects brought before the Magistrates during the year was 110, against 122 in 1868, of these 96 persons were arraigned before the Cantonment Magistrate of Bangalore. Of the total number, 54 were discharged.

CIVIL JUSTICE.

13. The leading feature in the Judicial Administration under this head of 1869 has been the introduction of the Revised Rules of Civil Procedure, published under Notification dated 13th April 1869, by which several important changes were made in the constitution and powers of the various Civil Courts in Mysore.

Certain supplementary Rules were added by Notification dated 25th May and 3rd December 1869.

14. The nature of the changes introduced by these several orders is fully explained in paras 48 to 54 of the Judicial Administration Report and the appendices referred to in para 59, and it will be sufficient to describe them here as including the application to Mysore of the greater part of the Civil Procedure Code (Acts VIII of 1859 and XXIII of 1861) which had been previously in use only as a book of reference, the appointments of Judicial Assistant Superintendents, and certain important alterations in the jurisdiction of the existing Courts.

15. The appointment of Assistants for the sole discharge of Judicial duties has been a highly important and useful measure. The Officers nominated to these responsible situations were carefully selected with reference to their special qualifications for them, and the result has been satisfactory—the general opinion expressed, the Judicial Commissioner observes, being favorable to the change.

16. The increased charge incurred by the adoption of this measure was very considerable; but it has been brought within a reasonable amount by reductions in the talook establishments, which these new arrangements have rendered practicable. The receipts of the Courts of this class are shewn to have exceeded the expenditure under all heads, including the salaries of the Judges, by the large sum of *Rupees 40,624, which must be regarded as highly satisfactory.

	Rs.
*Receipts	91,554
Expenditure	50,930
Surplus Receipts	40,624

17. The total number of suits instituted in all the Civil Courts was 16,835, against 14,702 in the previous year, shewing an increase of 2,133, chiefly in suits varying from 20 to 100 Rs. The number of suits of between Rs. 5,000 and Rs. 1,00,000 is stated to have been the same as in 1868, while those under Rs. 5 in value have decreased.

18. The percentage of the total number of suits as above instituted in the several Courts was as shewn in the margin, from which it will be seen that nearly 98 per cent of all the litigation in the Province is carried on in the Courts of Small Causes, Péshkars and Amildars, and Judicial Assistants.

Small Cause	34·2
Péshkars & Amildars'	41·6
Judicial Assistants	21·6
Other Courts	2.6
Total	100·0

19. In 1868 there was a large increase of suits on unwritten promises, but in the year under report the number of suits of this class has decreased by 255, while those on written promises have increased by the large figure of 2,503. There was an increase of 104 in suits "for money due on account stated," of 188 in suits "relating to immovable property," and of 484 in "other suits" not classified,—while there was a falling off of 114 under "money paid or received"—of 382 "for goods sold and delivered" —"and of 450 in suits "for or relating to real property not shewn under any special head."

There was an increase in suits for defamation.

20. The aggregate value of the suits instituted was Rs. 18,60,932, against Rs. 17,48,350 in 1868, shewing an increase of Rs. 1,12,582.

21. The whole number of suits on the files during the year were:—

	No.
Arrears of 1868	432
Instituted in 1869	16,835
Received by transfer or remand	761
	18,028
And were thus disposed of;	
Withdrawn, struck off and transferred	5,789
Decreed without contest	7,104
Contested and decreed for plaintiff in whole or part..	3,497
,, for defendants	564
	16,954
Pending at close of year	1,074
Total....	18,028

22. The average duration of each suit was 32·96 days, against 41·05 in the previous year.

23. The percentage of suits decided in the several Courts was as shewn in the margin, the proportion being very similar to that of suits instituted, noticed in para 18 of these remarks.

Small Cause ...	35·25
Pêshkars and Amildars...	41·16
Judicial Assistants ...	21·51
Other Courts ...	2·08
Total.....	100·00

24. The number of appeals shew a considerable aggregate decrease, being 884 against 1,075 in 1868; but there was an increase of 90 in the appeals to the Judicial Commissioner's Court.

The remand cases numbered 70, against 138 in 1868, which is satisfactory as indicating greater care by the Courts in the conduct of suits. The average duration of appeals shews a falling off, being 39·32 days, against 30·78 in 1868.

25. Applications for execution of decrees were 9,897, against 8,980 in 1868, and the large number of 1,118 were pending at the close of the year.

26. Miscellaneous cases numbered 139,638, against 183,993 in 1868, shewing a decrease of 44,295. Only 528 cases under this head remained pending at the close of the year, indicating commendable diligence in the disposal of proceedings of this class.

27. In his remarks on the annual report of the Judges of the Bangalore Small Cause Court, the Judicial Commissioner notices the remarkable decrease in the number of native suits from the Pété of Bangalore as shewn in the margin, amounting to 30·25 per cent of that instituted in 1868, but is unable to assign any reason for this large falling off; the number of suits from the Cantonment having slightly increased during the year under report.

Instituted in 1868	3,266
„ 1869	2,278
Decrease	988

The arrangements by which all the Court costs and charges of suits are covered by stamps, instead of being paid in cash, are favorably reported on by the Judges.

POLICE.

28. The total number of Police employed throughout the Province in 1869 as compared with the previous year was as shewn in the margin.

No. of Men.	Cost.
1868—24,875	Rs. 6,26,499
1869—24,950	„ 6,79,016
Increase 75	„ 42,517

29. The condition of this department of the administration is admitted by officers of all grades to be defective, and its complete reorganization on the system which has been introduced experimentally into the Bangalore District and which is considered to have fairly succeeded, is strongly advocated; but the difficulties that will attend the adoption of so general a measure will probably be found so serious that it may be advisable for the present to limit the further changes in this direction to the extension of the revised system to the whole of the Nandidroog Division, or if such be deemed preferable to one district in each of the other divisions, by which arrangement a nucleus would be formed for the subsequent application of the measure to the whole Province.

30. The revised system has been in force in the Bangalore District since 1st April 1869, and its general results are now under special report by the Judicial Commissioner, in accordance with the orders of the Government of India.

The officiating Superintendent of Police reports favorably on this head, and the figures given by him shewing the operations of the revised Police for the last 9 months of 1869 are satisfactory.

The area of the District of Bangalore, into which the revised Police has been introduced, is about 2,902 square miles with a population of 651,357.

The strength of the Police was 1,022, and its total cost Rs. 1,41,578, or about Rs. 138 per head.

31. The number of persons arrested without warrant throughout the Province was 10,473, against 8,824 in 1868. Of the former number, 5,275 were convicted and 5,198 discharged or acquitted.

The number of arrests with such a result appears very excessive, and the subject demands the serious attention of those whose duty it is to check such needless proceedings.

32. The number arrested or summoned by Magistrates was similarly out of all proportion to that convicted, being 14,671 of the former, and only 4,116 of the latter. The principal cause of defective proceedings on this head by the Magistrates has been already referred to in para 8 of these observations; but the subject requires the special attention of the controlling authorities.

33. The number of deaths throughout the Province from accidents, self-destruction, &c., aggregated 1,856, against 2,644 in 1868. In addition to it 37 persons were wounded by wild beasts, of which latter 260 were destroyed, against 242 in the previous year.

Suicides ...	138
Accident...	1,666
By wild Beasts ...	52
Total.....	1,856

PRISONS.

34. The offg. Judicial Commissioner's report on the prisons of Mysore shews that there was a considerable decrease in the number of convicts during the past year as compared with 1868, with a corresponding reduction of expenditure, which is no doubt correctly ascribed to the return of plenty after the scarcity of previous years.

35. The general condition of the jails and of the prisoners incarcerated in them is favorably reported on, and the improvements in these respects, described in the last Administration Report as having chiefly emanated from the Central Jail at Bangalore, have been maintained and extended.

36. The statements appended to the report contain full particulars of the working of the system, so far as such can be illustrated by figures; and it will be seen from them and the offg. Judicial Commissioner's remarks that the total number of convicts in the jails of the Province during the year was 5,292, the daily average being 1795·8, and that 1689 remained in confinement at its close, being upwards of one sixth less than the number remaining at the close of 1868.

37. Of the convicts sentenced during the past year, 308 had been once or oftener in jail before.

There were 427 breaches of jail rules, of which 196 were punished by whipping.

Of the total number of convicts, 77 per cent were wholly unable to read and write, 20 per cent were able to read or write a little, and only 3 per cent to read and write well.

38. The gross expenditure incurred in the guarding and maintenance of the convicts aggregated Rs. 1,44,769, or an average of Rs. 80—10—8 for each.

The estimated value of work of all kinds performed by the convicts was Rs. 79,316, being an average of Rs. 45—2—0 per head, while the actual cash earnings of the prisoners sentenced to labor averaged Rs. 7—2—4 per head.

39. The present liberal scale of diet is stated to continue to exhibit good results in the generally improved health of the prisoners, and a marked abatement of the former high death rate that prevailed.

The total admissions into hospital during the year were 2,030, the daily average number of sick being 64·7. The number of deaths was 95, or rather less than 18 per thousand of the total number of prisoners, which contrasts favorably with the death rate of former years.

40. The Report of the Bangalore Central Jail submitted by Doctor Heard, the offg. Superintendent, is very complete, and contains full information regarding that in all respects model institution, the condition and management of which reflect the highest credit on the Superintendent and his subordinates.

Central Jail.

The accommodation of the jail is excellent, the buildings are in good order, and the conveniences generally that have been adopted are all that could be desired.

The labor of the prisoners was well regulated and discipline was duly enforced.

The number of prisoners in this jail during the year aggregated 1,694, the daily average being 900·3, and 750 remained in prison at the close of the year.

Full details are given of the various classes of crime, &c., for which the prisoners in jail during the year were under sentence, as also regarding their classification and the discipline enforced.

The conduct of the prisoners is stated to have improved, the number of punishments having fallen from 323 in 1867 and 223 in 1868 to 152 in the year under report: while Dr. Heard remarks that they are beginning to appreciate the distinctions made between the evil and the well disposed, the idle and the industrious, and that many of the prisoners take a pride in maintaining discipline and in doing good honest work.

Under the head "Labor and employment," there are some general observations meriting attention, and this section of the report is illustrated by 30 photographs of the several classes of criminals under sentence in the jail with a description of each.

The number of Europeans committed to this jail during the year was 18, all for drunkenness and vagrancy.

The progress made in the workshops during the year was fair, though the greatly increased cost of cotton interfered seriously with the employment of the men that had been trained to cotton manufactures, and necessitated their being put to other work. Some of the carpets and rugs turned out have been bought for the English market.

The establishment of a Printing Press has proved successful, and will give a profitable return if it can command a sufficiency of work.

The total earnings on manufactures including the articles and materials in store at the end of the year, most of which have since been sold, amounted to Rs. 16,951, or an average of Rs. 46—9—1 per man employed on them. The indirect earnings of the prisoners amounted to Rs. 1,891—3—6.

The general results under this head appear to be highly satisfactory, and it is gratifying to find the Superintendent able to state that a large proportion of the older residents of the jail are acquiring habits of steady industry and that they take a pride in their work.

The average number of women and juvenile convicts during the year was only 19 and 16 respectively, and the arrangements for both classes were very suitable. Dr. Heard describes the manner in which the juvenile delinquents are employed, and makes some humorous remarks on the disapproval thereof entertained by certain persons. It is sufficient to state here, that no reasonable objection can be raised to the arrangements referred to, though it may no doubt be urged that many poor people might perhaps look with some little degree of envy on the advantages enjoyed by these little criminals.

The section on diet, clothing and conservancy, calls for no remark.

The indifference and threatened failure of the water-supply within the walls of the jail are a serious matter; but if the water-supply scheme for the Cantonment is carried out, it is hoped it may be extended to the jail.

The health of the prisoners was not so good as during the previous year. The total number treated was pretty much the same—789 against 799, the daily average being 26½; and there were 24 deaths, against 9 in 1868. The season was however certainly an unhealthy one, and the death rate in 1868 was unusually low.

The total expenditure during the year was Rs. 60,323, the average cost per head being 66—11—6, against Rs. 71—11—11 in 1868, and Rs. 82—14—3 in 1867. Deducting the value of returns from the prisoners' labor, the cost per head was Rs. 45—2—4.

The account of the measures adopted for the general education of the prisoners in jail is interesting, and some progress is being made in this respect.

The report is well and thoughtfully drawn up, and merits special acknowledgment here.

41. Of the other jails in the Province, those at Shimoga and Kolár are new buildings, and are well suited for the purpose for which they have been constructed, and that at Mysore, though faulty, is on the whole in fair order. The health of the prisoners in the Shimoga Jail has greatly improved since the adoption of a more liberal diet, and the death rate which was previously most excessive, being 13·9 per cent on average strength during the past year, has fallen correspondingly. The total number of deaths in this jail during 1869 was 52 out of an average strength of 405·5; but the enquiries instituted as to the cause of so excessive a mortality failed to elicit any satisfactory reason therefor, beyond the fact that it was heaviest amongst the prisoners employed on out-door labor in certain localities.

In the Mysore Jail also the death rate has been excessive, being 6 per cent on average strength, the total number of deaths being 16 on a daily average in jail of 264. This rate, though large, contrasts favorably with that for 1868, which was 14 per cent, the deaths in that year numbering 52 out of a daily average in jail of 356.

The health of the prisoners in the Kolár Jail was good, and there were no deaths among them. The other jails in the Province at Hassan, Chituldroog, and Chikkamagalúru, have been free from serious sickness during the past year, and only three deaths occurred in all three.

It is proposed to construct a new jail at Hassan, one being much required there.

42. The total expenditure on jails during the past year, in new works and repairs, was Rs. 26,868—4—1, as shewn in the margin.

	Rs.	As.	P.
New Works	22,542	8	11
Repairs	4,325	11	2
Total Rupees	26,868	4	1

43. The submission of the report on prisons has been most unreasonably delayed, and has retarded the completion of the General Administration Report of the Province for a period of between two and

three months. It is hoped that the Judicial Commissioner will in future insist on the due submission of their reports by the Officers concerned by the dates fixed there for.

GENERAL REMARKS.

44. There is every reason to believe from the report of the Judicial Commissioner under the various heads treated in this section, that the favorable progress in the administration of criminal and civil justice and attention to the condition of the jails in the Province, adverted to in the last Annual Report, has been fairly maintained, and that the results on the whole continue to be satisfactory and encouraging.

The condition of the Police is no doubt, as stated therein, seriously defective, and the question of its reorganization on the system that has been adopted as an experiment in the Bangalore District, is under enquiry and consideration.

45. The able and careful supervision exercised by Mr. Kindersley in all branches of the Department over which he presides, has been warmly acknowledged in previous reports, and the thanks of Government are due to him for the care and success with which he has continued to perform the responsible functions and duties of his important office.

R. J. MEADE,
Chief Commissioner.

BANGALORE,
8th December 1870.

PART I.

REPORT ON THE
JUDICIAL ADMINISTRATION OF MYSORE
FOR 1869.

BY THE OFFICIATING JUDICIAL COMMISSIONER.

I. JUDICIAL.

The statements for the year 1869 have been compiled according to the forms recommended by the Statistical Committee, with the exception of the jail returns which have been modified in accordance with those received from the Chief Commissioner with the Secretary's docket No. 202—15, dated 3rd March 1870, prescribed by Government in Resolution No. 367, dated 21st February 1870.

CRIMINAL JUSTICE.

2. The number of Criminal Courts in the Province is shewn in the subjoined statement.

Courts.	Ashtagram.	Nandidroog.	Nagar.	Judicial Commissioner.	Total.
Péshkars and Amildars—Exercise powers of a 2nd Class Sub-Magistrate	24	34	26	...	84
Sar-Amíns do do	1	1	...	...	2
Town and Cantonment Magistrates—Exercise full powers of a Magistrate	1	1	...	...	2
Assistant Superintendents.—Some exercise full powers of a Magistrate, and others powers of a 1st Class Sub-Magistrate ...	6	8	6	...	20
Deputy Superintendents.—Exercise powers of a Magistrate of the District, and some have powers under Section 445 A of Act VIII of 1869.	2	3	3	...	8
Superintendents—Exercise powers of a Session Judge	1	1	1	...	3
Judicial Commissioner.—Powers of High Court	...	...	...	1	1
Total.....	35	48	36	1	120

3. The Courts have disposed of 815 more criminal cases in 1869 than in 1868, the proportion decided by each class, and the relative increase and decrease during the past year, being as follows:—

No. of Criminal Cases decided.

Courts.	Cases.				Persons.			
	1868	1869.	Increase.	Decrease.	1868.	1869.	Increase.	Decrease.
Péshkars } Sub-Magistrates of the	3,177	3,461	284	...	6,816	7,560	744	...
Amildars } 2nd class	6,821	6,907	86	...	14,836	15,553	717	...
Sar-Amíns }	878	1,247	369	...	1,579	2,434	855	...
Cantonment and Town Magistrates... ...	394	384	...	10	655	618	...	37
Assistant Magistrates generally with full powers	1,845	1,923	78	...	3,754	4,277	523	...
District Magistrates	252	215	...	37	582	378	...	204
District Magistrates with powers under Section 445 A of Act VIII of 1869	26	16	...	10	59	25	...	34
Session Judges	129	178	49	...	276	362	86	...
Judicial Commissioner on reference... ...	7	13	6	...	9	24	15	...
Total.....	13,529	14,344	872	57	28,566	31,231	2,940	275
Deduct Decrease...	...	...	57	...	...	...	275	...
Net Increase	...	...	815	...	...	...	2,665	...

4. As 739 of these 815 cases were tried in the Courts of the Sub-Magistrate of the 2nd Class, the principal increase has evidently been in petty cases; but 78 additional cases have this year been tried by Assistant Magistrates with full powers and 49 by Session Judges.

5. The returns shew an increase in the number of offences reported and of persons tried as compared with 1868, the persons tried being also more numerous than in 1867, though the offences reported in 1868 are fewer than in 1869.

Crime.

6. The statement below shews this in detail, as also the number of prisoners remaining for trial at the close of the year.

Year.	Offences reported.	Persons tried.	Acquitted or discharged.	Convicted.	Remaining.
1867	19,899	29,098	16,488	12,542	68
1868	17,651	28,739	17,560	11,039	140
1869	18,160	31,521	20,742	10,502	277

7. It is satisfactory to observe that the duration of cases continues to diminish. In 1868 the duration of each averaged rather less than 10 days, which in 1869 has been reduced to 7·83 days.

Duration.

8. On analysing statement No. 3, it appears that the Sar-Amíns and Town Magistrates have disposed of their cases on an average of 3 days to each.

9. Trials before Péshkars and Deputy Superintendents stand next followed by those before the Amildars, Assistant Superintendents, and Superintendents.

10. Compared with 1868, cases have occupied a shorter time before the Péshkars, Deputy Superintendents, and Superintendents, and longer before the Sar-Amíns, Town Magistrates, Amildars, and Assistant Superintendents.

11. The latter Courts have taken on an average of 9·19 days for each case instead of 7; whereas the duration of trials has been reduced in the Superintendents' Courts from 32 days to 26·49.

12. The length of trials before the Sessions Court of Ashtagram was 46 days instead of 54 as in 1868. The Superintendent observes that "the average duration of each case in the Sessions Court was less by "8 days than in 1868, and the difference would have been greater, had it "not been for four cases of considerable importance, which had frequently "to be postponed owing to the absence of witnesses who had to come a "long way from other districts and whose whereabouts were not easily "ascertained.

"The convictions in these cases, I may here remark, has led to at "least a temporary suspension of professional drugging and poisoning, "once so rife on the roads leading to Mysore from Manantoddy and "Mercara."

13. At the close of the year the date of the oldest case pending was 13th July 1869 in the Cantonment Magistrate's Court of Bangalore.

14. 47,658 witnesses were examined against 42,059 in 1868, being an increase of 5,599; but owing to the increase of cases the average number examined

Witnesses.

in each remains nearly the same as in 1868. The number was 3·11 and 3·32 in 1868 and 1869 respectively.

15. It was observed in the Report of 1868 that the Deputy Superintendent and Magistrate of Toomkoor had dealt with 302 defendants and with only 133 witnesses; but it has been since ascertained that the returns conveyed an incorrect impression, as the number of cases included those transferred by the Magistrate to other Courts, while the number of witnesses shewn were those examined in the cases retained and tried by the Magistrate himself. This number was 28, in which 55 defendants were tried, and 133 witnesses examined.

Character of Crimes.

16. The number of persons tried under charges of offences against the person has been greater than in 1868, but the convictions fewer. Under the heads murder, attempt to murder, and culpable homicide however, there have been 48 convictions against 34 in 1868. Three persons were convicted of murder as robbers in the Nandidroog Division, and two of murder by poison in Nagar.

17. The list of convictions for murder has been swelled by an exceptionally large number which has occurred in the Nagar Division, in some of which several persons were implicated. No explanation can be given why more should have been committed than usual.

18. The offence of producing abortion is seemingly on the increase; but the increase is probably more apparent than real. Beforethe introduction of the codes, the Police were interdicted from taking up cases of the nature, as it was considered that greater harm would be done owing to their untrustworthiness than good would result from proper convictions, and consequently it is not possible to judge of the extent to which the offence prevailed formerly. The Police, and especially the village authorities from whom information on these points is usually derived in the first instance, are only gradually becoming aware that they can legitimately institute enquiries in cases of this nature.

19. There has been an increase of 151 convictions under the head of hurt. The greatest number of convictions has occurred in the Nagar Division, and I am therefore disposed to believe that the variations in this respect arise more from inaccuracy in classification than from any

particular results attained by the Police in detection and reporting, as was suggested in consequence of the increase of offences of this description in the Nandidroog Division in 1868.

20. Mr. Kindersley remarked, in the Report of 1868, as significant of the degree in which minor offences are reported in Mysore when persons in authority are concerned, that in the two years 1867—1868 there were no convictions of wrongful restraint to extort property or confession, nor of wrongful compulsion to labor, and that few such charges are ever brought to trial.

21. It appears that seven persons charged with offences of the first class were tried in 1869, and that one was convicted. The same number of persons were tried for unlawfully compelling labor without conviction.

22. The return below shews in detail the results remarked on.

Offences against the person.	Number of Persons.			
	1868.		1869.	
	Tried.	Convicted.	Tried.	Convicted.
Murder	144	20	162	28
Attempt to Murder	24	3	44	6
Culpable Homicide	45	11	56	14
Abetment of suicide	2	...	3	...
Attempt at suicide	65	16	32	13
Abortion	35	5	94	11
Exposing infants or concealing birth	16	13	23	10
Grievous hurt	138	64	133	62
Hurt	3,500	1,396	4,610	1,547
Hurt for extortion	76	24	21	5
Wrongful restraint or confinement	753	268	1,055	247
Do. do. to extort property or confession ...	...	...	7	1
Assault or criminal force	6,588	2,075	6,811	1,533
Intimidation or insult	2,758	1,155	3,706	1,340
Drunken annoyance	52	45	68	55
Compulsion to labor	...	...	7	...
Slavery, kidnapping, or abduction	170	11	168	12
Adultery	36	7	30	6
Rape	17	4	28	1
Defamation	143	19	219	30
	14,562	5,136	17,277	4,921

23. There has been a diminution both in the number of persons tried and in the convictions under charges of offences against property. The former number was 10,484 in 1868, and 9,799 in 1869. The convictions were 3,610 and 2,746, being a decrease of 864.

24. The convictions of dacoity were 68 and of robbery 38, but until steps are taken for distinguishing between technical and real dacoities the return will always shew results more unfavorable than is consistent, with the actual facts.

25. In the Madras Presidency, a distinction is drawn between torch light gang robberies, the most formidable of this class of crimes, and dacoities committed in houses, jungles or highways.

26. Robberies have been similarly classified, and it is only after this has been done that the real character of the offences can be estimated; since technical dacoity is dependent merely on the number of persons implicated without reference to the varied circumstances of each case. There were 211 convictions of house-breaking and house trespass against 208, and 8 cases of extortion against 6 in 1868. The other offences of theft, receiving stolen property, misappropriation, breach of trust, and mischief of various kinds, all diminished as shewn below:—

Offences affecting property.	Number of Persons.			
	1868.		1869.	
	Tried.	Convicted.	Tried.	Convicted.
Dacoity	570	73	392	68
Robbery with hurt, or deadly weapon... ...	...	...	1	...
Robbery	197	42	285	38
Extortion...	31	6	57	8
House-breaking and house-trespass of various kinds	531	208	580	211
Theft	5,861	2,262	4,846	1,526
Receiving stolen property	124	51	119	32
Misappropriation	497	175	320	98
Breach of trust	144	32	148	31
Cheating	224	21	157	30
Mischief of various kinds	1,676	566	1,900	479
Trespass	629	174	994	225
	10,484	3,610	9,799	2,746

General Results.

27. The number of persons dealt with during the year was 33,623, being apparently 2,139 less than in 1868; but in the return of 1869 the persons "Transferred" have been excluded in the returns of the Nandidroog Division.

28. The total disposed of by discharge without trial, acquittal or conviction, was 31,231 persons.

29. The percentages of the different Courts under each head were as follow:—

Courts.	No. disposed of.	Discharged without trial.	Acquitted.	Convicted.
		Per Cent.	Per Cent.	Per Cent.
Péshkars	7,560	22·14	42·10	35·76
Amildars	15,553	21·37	47·34	31·29
Sar-Amíns...	2,434	2·75	60·06	37·19
Town-Magistrates	618	24·76	30·10	45·14
Assistant Superintendents	4,277	12·93	56·39	30·68
Deputy Superintendents	378	1·85	44·45	53·70
Do. with enhanced powers under Section 445 A, Act VIII of 1869	25	00·00	56·00	44·00
Superintendents	362	00·00	44·48	55·52
Judicial Commissioner...	24	00·00	8·33	91·67

30. Out of the total number of 31,231 persons, 18·50 per cent were discharged before trial, 47·87 were acquitted, and 33·63 only were convicted.

31. In all the divisions there has been a slight falling off in the number of convictions obtained compared with those of 1868 which were 38·64 per cent. As in 1868 the ratio of convictions in Nagar was higher than in Nandidroog or Ashtagram.

32. The Superintendent of Ashtagram notices the difficulty that is experienced in enforcing a proper administration of the Procedure Code, in consequence of the general belief that a person may be taken up on any complaint whether *primâ facie* ascertained to be well founded or not, in the following words.

"The proportionate number of persons discharged, and acquitted, to "the number brought to trial, is about 74 per cent. This reflects un- "favorably on the Magistracy as shewing they have not as a rule exercised "the discretion given them by Sections 67 and 180 of the Criminal "Procedure Code, but have been too ready to respond to the general "belief of the people that they have only to make a complaint, and that "the Courts are bound thereupon to send for and try the persons accu- "sed. The Deputy Superintendent of Mysore attributes this tendency "on the part of Amildars to their being afraid of improper motives being "afterwards imputed to them by the parties or anonymously, for refusing "to entertain the complaint. This is more particularly the case with "regard to charges of criminal trespass and wrongful restraint which, "Captain Hill remarks, are frequently vexatiously brought by parties

"who hope to obtain their ends without incurring the expense of civil "prosecutions."

33. The same defect was pointed out by the Superintendent of Nagar in 1868; and there is no doubt that it is one of the chief causes of the numerous improper arrests and unnecessary trials.

34. There is a decrease in the number of punishments of all descriptions inflicted, except as regards sentences of death, the increase in which arose from the extraordinary number of murders in the Nagar Division noticed above.

Punishments.

35. Fewer sentences of fine were inflicted, and a larger proportion of the amount was realized than in 1868.

36. From the detail of sentences of imprisonment, it appears that 20 sentences of imprisonment exceeding 2 years have been passed more than in 1868.

37. The following table exhibits the punishments inflicted during the year.

I. Nature of Punishments.

Year.	Fined.	Imprisoned.	Flogged.	Ordered to find Security.	Imprisoned and fined.	Imprisoned and flogged.	Death.	Penal Servitude.	Transportation.	Solitary Confinement in addition to imprisonment.	Forfeiture of property.
1868	7,481	2,187	170	93	1,068	33	7	...	18	11	...
1869	7,454	1,828	104	117	953	26	20	...	7	4	...

III. Detail of Sentences of Imprisonment.

Year.	Not exceeding 15 days.		Not exceeding 6 months.		Not exceeding 2 years.		Not exceeding 7 years.		Exceeding 7 years.		Total.	
	Rigorous.	Simple.	Rigorous.	Simple.	Rigorous.	Simple.	Rigorous.	Simple.	Rigorous.	Simple.	Rigorous.	Simple.
1868	736	826	1,078	180	311	34	101	...	4	...	2,230	1,040
1869	656	796	852	146	219	6	114	...	11	...	1,852	948
Increase	...	...	...	...	...	...	13	...	7	...	...	...
Decrease	80	30	226	34	92	28	...	...	...	...	378	92

Criminal Appeals.

38. The number of persons who appealed against criminal sentences during the year was 562. This is a smaller number than in 1868, when 710 persons appealed.

39. The greatest decrease is in the appeals from Magistrates to Session Judges, and this must undoubtedly be taken as a sign that the decisions of the Magistrates are considered conclusive against the prisoners as the right of appeal is now well known and freely exercised.

40. The number of appeals to the Judicial Commissioner has been greater, but I can assign no reason for this, as the Session Judges' decisions appear to be confirmed in more cases, and reversed and modified in fewer, than in 1868.

41. Statement shewing the number of persons whose appeals were—

	Presented or called for.	Rejected.	Sentence confirmed.	Sentence modified.	Reversed.	Returned.	Pending.
Appeals to Magistrates,							
1868	382	28	157	43	133	19	2
1869	316	31	103	41	128	1	12
Session Judges,							
1868	253	64	96	21	66	5	1
1869	128	36	12	15	25	...	10
Judicial Commissioner,							
1868	75	...	44	20	9	...	2
1869	118	14	72	11	6	2	13

42. There were 6,085 cases in which appeals might have been preferred, but only 342 appeals were made, being 5·62 per cent of the ap-

pealable cases. In 1868 the percentage was 5·92. The average duration of appeals was 24 days, and the date of the oldest case pending at the close of the year was 11th October 1869. Twenty appeals remained for disposal.

Juries and Assessors.

43. No trial by jury took place. Assessors served in 206 trials against 139 in 1868, and in 186 cases their opinion was concurred in by the Judges, who differed from them in 20 cases.

Miscellaneous Criminal Cases.

44. The number of miscellaneous cases increased, but the number remaining for disposal was less. The increase has occurred not in miscellaneous cases properly so called, but in petitions, representations, &c., from Public Officers. In November 1869, Mr. Kindersley issued instructions and suggestions with a view to simplify the procedure of the Civil and Criminal Courts, and to reduce the number of miscellaneous proceedings, the result of which will be ascertained at the close of the present year.

45. The following is a statement of miscellaneous proceedings received and disposed of.

	Miscellaneous Cases.		Petitions.		Representations, requisitions or orders from Public Officers.		Total.	
	1868	1869	1868	1869	1868	1869	1868	1869

CIVIL JUSTICE.

47. The leading feature in the Judicial administration of 1869 has been the introduction of several important changes in the constitution and powers of the various Civil Courts in Mysore.

48. It was evident that alteration was necessary in order that the Superintendent of Nandidroog might be relieved from the heavy pressure of Judicial work in that division, and Mr. Kindersley in August 1867 after examining several proposals which were made to meet this end, came to the conclusion that it was advisable to introduce generally throughout Mysore considerable modifications in the system of appeal, the powers of the various Courts, and the appointment of Judicial Assistants, with a view to remedy admittedly existing defects, the principal of which were,

The incompetence of the Courts of first instance,
The multiplicity of appeals, and
The conflicting duties of the executive officers sitting as Judges.

49. The matter was not, however, brought before Government till July 1868, and some further discussion took place on the subject, leading ultimately to the introduction of the greater part of the Civil Procedure Code (Act VIII of 1859 and Act XXIII of 1861) which had previously been in use as a book of reference only, to the appointment of Judicial Assistant Superintendents, and to the alterations in the jurisdiction of the former Courts shewn below.

50. Revised Rules of Civil Procedure for the Province of Mysore in which these changes were embodied received the sanction of the Government of India, and were promulgated by a Notification on the

13th April 1869. A copy is attached to this report, appendix A, as also of Notifications, dated 25th May and 3rd December 1869, sanctioning the adoption of certain supplementary rules of Civil Procedure, giving final jurisdiction to the Judicial Assistants and Amildars in certain suits when the claim did not exceed Rs. 100, and 20, respectively, and authorizing the officers presiding in all Civil Courts except at Bangalore and Mysore to permit parties to appear by agent. Under the last Notification the Judicial Assistants were also permitted to refer cases in which no appeal would lie, for the opinion of the Judicial Commissioner on doubtful points of law or usage having the force of law.

51. Rules regarding the enrollment and practice of Pleaders were issued in January 1867, and the number enrolled is now 64; 10 were enrolled during 1869.

See Appendix B.

Former Courts.			Revised Courts.		
Title.	Pecuniary limit of original jurisdiction.	Appeal.	Title.	Pecuniary limit of original jurisdiction.	Appeal.
Sar-Kázi ...	Up to 50 Rs.	...	Amildars. ...	Up to 50 Rs. with Small Cause powers up to 20 Rs.	
Péshkars and Amildars. ...	Up to 300 Rs. to 2nd Class, and 500 Rs. to 1st Class Amildars.	...	Small Cause Court. ...	Up to 1,000 Rs...

Judicial Commissioner ...	...	Special and additional special appeals from the appeal and special appeal decisions of Superintendents.			

* These officers had jurisdiction only in cases referred to them by the Deputy Superintendents.

52. The appointment of Assistants for the exclusive performance of Judicial duties under rule 6, was no novelty in Mysore, as previous to the general re-organization of the Commission in 1863, Munsiffs' Courts had existed for some years, and their abolition was not regarded with favor by the people, who had become accustomed to them, and preferred them to the newly established Courts of the Assistants with general powers.

53. The principle is so unquestionably sound that nothing need be said on the subject. The Assistants recommended were carefully selected with reference to their qualifications, and though the Courts have been in existence for only a short time, the general opinion expressed is favorable to the change. Their working is referred to below.

54. The establishment sanctioned was as follows :—

Courts at	No. of Judges.				Strength of the Establishment.							Amount sanctioned for establishment per mensem exclusive of the Judges' salaries.		
	Europeans.													
	Commissioned Officer.	Uncovenanted.	Native.	Total.	Sheristadar.	Clerks.	Record-keeper.	Munshis.	Nâzir.	Peons.	Other Servants.	Rs.	A.	P.
Nandidroog. Bangalore	1	...	...	1	1	2	1	4	...	5	3	355	0	0
Kolâr	...	...	1	1	1	1	1	3	1	5	3	261	0	0
Toomkoor	...	...	1	1	1	1	1	3	1	5	3	261	0	0
Ashtagram. Mysore	...	1	...	1	1	2	1	4	...	5	3	355	0	0
Hassan	...	...	1	1	1	1	1	3	1	5	3	261	0	0
Nagar. Shimoga	...	...	1	1	1	1	1	3	1	5	3	261	0	0
Kadoor	...	...	1	1	1	1	1	3	1	5	3	261	0	0
Chitaldroog	...	...	1	1	1	1	1	3	1	5	3	261	0	0
Total.....	1	1	6	8	8	10	8	26	6	40	24	2,276	0	0

But it was found that reductions could be made in the talook establishments, and the financial result was a net increased charge of Rs. 1,061.

55. With the single exception of the Judicial Assistant's Court at Hassan, the receipts have exceeded the expenditure, the total surplus amounting to Rs. 40,623—15—0, the details of which are here given:—

Courts at		Receipts. Value of stamps on plaints, &c., and penalties recovered on unstamped documents.			Expenditure. Value of stamps refunded.			Salaries of the Judges and establishment and contingent expenses.			Total.			Receipts over expenditure.			Expenditure over receipts.

No. of Suits.

56. The number of suits instituted in 1869 was greater than in 1868 by 2,133. This increase has arisen entirely in suits for amounts between Rs. 5 and Rs. 5,000, and mainly in suits varying from 20 to 100 Rs.

57. There has been a decrease in the number of suits under Rs. 5 in value, while the number of suits above Rs. 5,000 and not exceeding Rs. 1,00,000 was the same as in 1868. It appears therefore that the increase has been in suits of the same class as occasioned the increase in 1868 over the number instituted in 1867.

58. The establishment of the Judicial Assistants' Courts having deranged the former procedure, a comparison cannot conveniently be drawn between the number of suits instituted in 1869 and in 1868 in the various Courts of the Province; but the suits instituted during 1869 were filed in the Courts as shewn below:—

Number of suits instituted before the Courts of—

Small Causes	5,761
Sar-Kázi	176
Péshkars and Amildars	7,006
Assistant Superintendents	171
Judicial Assistants	3,644
Deputy Superintendents	69
Superintendents	8
	16,835

59. The following statement affords a comparison between the litigation of 1869 and 1868 in respect to the description of suits.

Classification of Suits.

	Description of Claim.	In 1868.	In 1869.	Increase.	Decrease.
Money due.	On written promise for sum certain	6,710	9,213	2,503	...
	On unwritten promise	1,500	1,245	...	255
	On account stated	870	974	104	...
	Money paid or received	240	126	...	114
	For goods sold and delivered	3,198	2,816	...	382
	For breaches of contract, not included in the above ...	269	237	...	32
Suits for rent		189	214	25	...
„	for recovery of personal property or value thereof ...	598	578	...	20
„	for injuries to person	3	...	...	3
„	for injuries to property	68	45	...	23
„	for defamation	2	12	10	...
„	for other injuries not included in the above	19	25	6	...
„	to compel specific performance of contracts	41	48	7	...
„	to set aside contracts and obligations on account of fraud, mistake or accident	...	2	2	...
„	to compel or prevent particular acts by way of mandamus or injunction	4	...	...	4
„	to settle partnership and other accounts.	22	26	4	...
„	connected with religion and caste	2	3	1	...
„	relating to marriage, dower and divorce	9	6	...	3
„	to establish or dispute adoption	5	5	...	...
Other suits to declare or establish personal rights		72	128	56	...
Suits to establish or contest wills		1	...	...	1
Claims to inheritance.	Under Hindu Law	86	72	...	14
	Under Mahomedan Law	12	5	...	7
Suits to establish or contest the acts of Hindu widows ...		...	1	1	...
„	relating to the revenue	...	16	16	...
„	relating to mortgage of immovable property	37	225	188	...
„	in right of pre-emption	2	2	...	...
„	to resume or assess rent-free lands	10	38	28	...
„	regarding the relative rights of superior and inferior holders of land (other than rent suits.)	3	4	1	...
„	for partition of immovable property	40	32	...	8
„	for or relating to real property not included in the above ...	690	240	...	450
„	for contribution	...	4	4	...
„	for maintenance	...	9	9	...
Other suits		...	484	484	...
	Total.....	14,702	16,835	3,449	1,316
				1,316	
	Net Increase.....			2,133	

60. There is a remarkable difference between the litigation of 1868 and 1869, as regards claims secured by writing and those founded on oral promises. The increase in suits of the former description is 2,503, while in 1868 the reverse was the case.

61. Suits relating to mortgages of immovable property continue to increase in number, and several additional suits for defamation have

been instituted. Probably the last mentioned class of suits will gradually increase as the people become better aware that defamation is actionable.

Value of Suits instituted.

62. The aggregate value of the suits instituted in 1869 was Rs. 18,60,932—7—11, being an increase over 1868 of Rs. 1,12,582—13—9. In 1868 moreover the value was exceptionally raised by the institution of one suit exceeding a lac of rupees in value.

Value disposed of.

63. The value of suits disposed of in 1869 was Rs. 15,90,499-0-½, which was distributed as follows :—

	Rs.	As.	P.
In the Small Cause Court at Bangalore	2,15,255	10	½
„ Ashtagram Division	4,72,524	9	11
„ Nandidroog Division	4,62,497	11	8
„ Nagar Division	4,40,221	0	5
Total value disposed of in 1869.....	15,90,499	0	½
The value disposed of in 1868 was.....	17,03,488	6	10
Shewing a decrease in value of	1,12,989	6	9½
The average value of each suit instituted was...	110	8	7
„ „ „ disposed of	98	15	3

	1868.	1869.	Increase.	Decrease.
Of the suits disposed of, the number of those not exceeding 5 Rs. in value was	2,016	1,856	...	160
„ 20 „ „	4,174	4,660	486	...
„ 100 „ „	5,909	6,530	621	...

			161	
Net Increase... ...			1,313	

General Results.

64. The general result of the trial of the Civil suits is shewn in the following statement. The great increase in the number of transferred cases arises of course from the appointment of Judicial Assistants and the alterations in the jurisdictions of the Courts.

	1868.	1869.
Arrears of Suits	339	432
Instituted during	14,702	16,835
Received by transfer or remand	460	761
Total for disposal.....	15,501	18,028
These suits were disposed of as follows:—		
Withdrawn and struck off	4,873	4,908
Transferred	309	881
	5,182	5,789
Decreed without contest, *exparte*	2,373	3,125
„ by confession	3,267	3,274
„ by compromise and consent	753	684
„ by arbitration	14	21
	6,407	7,104
Contested and decreed for Plaintiffs in whole	1,854	2,417
„ „ „ in part...	1,158	1,080
„ „ for Defendants	468	564
	3,480	4,061
Total disposed of.....	15,069	16,954
Pending at the close of the year.....	432	1,074
	15,501	18,028

65. The average duration of each suit was 32·96 days against 41·05 of the previous year.

Duration.

The date of the oldest case pending in the Bangalore Small Cause Court was.. .. .. .. 23rd August 1869.

Ashtagram Division .. .. 1st May 1869.
Nandidroog Division ... .. 4th May 1869.
Nagar Division .. .. .. 28th August 1869.

Thus the oldest case pending in the Province had been filed 8 months before the close of the year. 642 cases more than in 1868 remained pending.

66. The percentage of suits decided by the Courts and of work done is shewn in the following statements.

Percentage of work done by	1868. Cases.	1868. Per-centage.	1869. Cases.	1869. Per-centage.
Péshkars	210	1·42	80	0·49
Amildars	6,662	45·14	6,537	40·67
Sar Kházi of Mysore	537	3·64	126	0·78
Assistant Superintendents	645	4·37	143	0·89
Judicial Assistants	...	...	3,457	21·51
Deputy Superintendents	68	0·46	62	0·39
Superintendents	...	...	3	0·2
Bangalore Court of Small Causes	6,638	44·97	5,665	35·25
	14,760	100·00	16,073	100·00

By the	Percentage of Cases decided.		
	In favor of Plaintiff.	In favor of Defendant.	Non-suited or otherwise disposed of.
Small Cause Court	50·20	3·94	45·86
Ashtagram Division	67·40	3·21	29·39
Nandidroog Division	73·71	3·75	22·54
Nagar Division	83·03	2·54	14·43
Total.....	65·95	3·51	30·54

67. As the new system has only been in operation since May, these returns afford only a partial view of the probable results of the change; but the work of the Amildars and Péshkars, the Sar Kházi of Mysore and the Assistant Superintendents shews a decrease. In future the Péshkars, Sar Kházi and Assistant Superintendents will not appear in this return.

68. There is no material difference in the percentage of cases decided as regards the proportion in favor of plaintiffs.

Civil Appeals.

69. The total number of appeals preferred continues to diminish. In 1868 the number was 1,075, being 118 less than in 1867; and in 1869 there was a further decrease compared with 1868 of 191 appeals.

70. The decrease shewn in the statement below as occurring in the Courts of the Assistant Superintendents with general powers, arose from the cessation of their civil jurisdiction and from the Judicial Assistants not being vested with appellate powers.

71. Fewer appeals were instituted in the Courts of the Superintendents of Nandidroog and Ashtagram, the decrease being 34 and 15 respectively. There was a small increase of 5 appeals in Nagar, and an increase of 90 in the Judicial Commissioner's Court.

72. The number of regular and special appeals in civil suits instituted is as follows:—

Courts.	1868.	1869.	Increase.	Decrease.
Assistant Superintendents	369	123	...	246
Deputy Superintendents	342	351	9	...
Superintendents...	245	201	...	44
Judicial Commissioner	119	209	90	...
	1,075	884	...	191

73. At the close of 1868, the appeals remaining on the file were. 54
Disposal. Instituted in 1869 884
938

Withdrawn, transferred, or struck off.	.. 186	
Decided on trial for appellants in whole	.. 162	
„ „ „ in part	.. 50	
In favor of respondents	.. 371	
Remanded	.. 70	
		839
Remaining		99
		938

74. The remand cases are becoming less frequent, as the returns shew that this procedure was followed in only 70 cases throughout the Province, instead of in 138 in 1868.

The decrease has occurred principally in Ashtagram, where 30 cases were remanded in 1869 against 71 in 1868.

75. The Courts disposed of appeals in the following proportions:—

Courts.	No of Cases	Percentage.
By Assistant Superintendents	96	13·03
By Deputy Superintendents	280	37·99
By Superintendents	153	20·76
By Judicial Commissioner.	208	28·22
	737	100·00

76. The average duration of each appeal was 39·32 as compared with 30·78 of the previous year.
Duration.

Date of the oldest appeal remaining on the file at the close of the year.

Ashtagram Division	15th July 1869.
Nandidroog „	4th May 1869.
Nagar „	5th December 1869.
Judicial Commissioner	25th April 1868. The commis-

sion which was issued for the examination of a witness in this appeal case has not been as yet returned executed.

Execution.

77. The number of applications for execution of decrees has increased from 8,980 to 9,897; 1,118 were pending at the close of the year.

78. 37 more decrees than in 1868 were completely executed; but there was a decrease of 253 in the number partially executed, and the number in which no execution followed was greater by 944.

79. Sales of real property were more numerous, and of personal property less than in 1868.

80. The cases of imprisonment were 118. In 1868 they were 176.

Miscellaneous Proceedings.

81. It is satisfactory to observe that miscellaneous proceedings have diminished by 44,295. The decrease has been effected chiefly by a diminution of 36,873 references from public Officers. 8,563 fewer petitions were received. 528 papers remained for disposal at the close of the year.

	Miscellaneous Cases.		Petitions.		Representations Requisitions, or Orders from Public Officers.		Total.

Small Cause Court.

82. The Judges of the Bangalore Court of Small Causes have submitted the usual Annual Report, upon which Mr. Kindersley has remarked as follows.

"The most remarkable point in the returns of the Court of Small Causes for the year 1869, is the decrease of native suits from the Pété

of Bangalore from 3,266 to 2,278. And this decrease is the more remarkable, because at the same time there has been a slight increase in suits arising in the Cantonment, and a considerable increase in what are called English suits. The simultaneous increase of suits arising in the Cantonment would seem to indicate that the decrease of those arising in the Pété is due to no alteration in the procedure of the Court. But I confess that I am unable to trace the causes which have led to the falling off. The facilities afforded by the Judicial Assistant's Court to mortgagees proceeding against immovable property may have withdrawn a few suitors from the Court of Small Causes, where they could not enforce the mortgage; but I do not think that this would account for a decrease of 14 per cent.

"It may be observed that the jurisdiction of the Court of Small Causes was made exclusive in the pété only from and after the 1st of May 1866, whereas the exclusive jurisdiction of the same Court in the Cantonment dates from 1863. The more recent introduction of the jurisdiction into the pété, may be one of the causes of the fluctuation in the number of suits from the pété observable in the last 5 years, as noted in the margin. These fluctuations are difficult to account for, because they are due to a great variety of causes, but there is no reason why they should occasion any uneasiness.

Year.	Suits.
1865	1,511
1866	2,372
1867	2,976
1868	3,266
1869	2,278

"The average value of the suits was Rs. 36—15—11, or nearly the same as in 1868. The statement No. 8 of the Government series was a decrease of nearly 20 per cent in the decisions passed *exparte*; the number having fallen from 1,753 to 1,429. At the same time the decrease in the total number of suits was little more than 13 per cent. This shews that greater care must have been taken by the Judges, Chief Clerk, and Bailiffs in securing the attendance of defendants. As a necessary consequence of this, a larger proportion of suits have been contested in Court. And of the number of suits contested, the proportion of those decided entirely in favor of the defendants has risen from 16⅓ per cent to 22½ per cent. It appears to have been in the smaller cases that the defendants have been most successful, for the amount allowed to plaintiffs aggregates nearly as much as before, notwithstanding the decrease in the number of suits in which plaintiffs have been successful.

"The Judges report favorably of the arrangements under which, from

the commencement of the financial year, the commission and fees on the institution of suits are covered by stamps, instead of being paid in cash. This simplifies accounts and removes temptation from the subordinate officials. At the same time arrangements have been made for keeping the bulk of the cash in the District Treasury, and the guard of sepoys over the court cash chest has been discontinued."

83. It is only necessary in conclusion to state that the Superintendents and Acting Superintendents of the three Divisions concur in stating that though the short time which has elapsed since the changes in the judicial system alluded to above, prevents the expression of a decided opinion as to the future, the results already attained have been sufficient to shew that the changes have been highly beneficial, and that steady progress and improvement may be anticipated.

84. The incompetence of many of the Amildars, and the irregularity of their proceedings are noticed, while it is reported that, although when the Judicial Assistants' Courts were first established, some dissatisfaction was expressed in consequence of the parties and witnesses having to travel further than they would have done formerly, the Courts are gaining ground in the opinion of the people.

BANGALORE,
14th June 1870.

A. C. HAY,
Offg. Judicial Commissioner.

APPENDIX A.

NOTIFICATION.

The 13th April 1869.

The following revised Rules of Civil Procedure for the Province of Mysore having been sanctioned by the Government of India are hereby promulgated for guidance.

"By Order,"

(Signed) T. CLARKE,
Offg. Secretary.

Rules of Civil Procedure for the Province of Mysore.

The Civil Courts in Mysore shall have power respectively to try and determine original suits not exceeding in amount or value the following limits :—

The Court of the Amildar ..	..	..	Rs. 50
,,	Assistant Superintendent	..	,, 3,000
,,	Deputy Superintendent	..	,, 10,000

The Court of the Superintendent, without limit.

2. Every suit shall be instituted in the Court of the lowest grade competent to try it. But the Judicial Commissioner, or the Superintendent of the Division, may withdraw any suit instituted in any Court subordinate to him, and try it himself, or refer it for trial to any other such subordinate Court competent in respect of the value of the suit to try the same.

3. The local jurisdiction of the Amildar shall extend throughout the Talook or Town in which he is employed. That of the Deputy Superintendent and Assistant Superintendent throughout the District, and that of the Superintendent throughout the Division.

4. With the exception of suits cognizable only by the Inam Commissioner, by the Revenue Courts, or by a Court of Small Causes, the Civil Courts shall try and determine all suits of a civil nature: if in the

case of suits for land, or other immovable property, such land or property shall be within the limits to which their respective jurisdictions extend; and in all other cases, if the cause of action shall have arisen, or the defendant at the time of the commencement of the suit shall dwell, or personally work for gain, within such limits.

5. The plaint shall shortly state the names and description and place of abode of the parties. What is asked for, and on what ground. The value of the claim, and if the cause of action arose beyond the period ordinarily allowed by the law for the limitation of suits, the ground of exemption from that law. When the claim is for land or any immovable property, its tenure and boundaries, and the nature of the interest claimed in such property must be clearly stated.

6. No Assistant Superintendent shall exercise any civil jurisdiction under this regulation, except such Assistants as shall from time to time be invested by the Chief Commissioner with civil jurisdiction by an order published in the *Mysore Gazette.*

7. No Assistant Superintendent shall exercise any appellate jurisdiction.

8. Any person aggrieved by a decision of an Amildar may appeal to the Deputy Superintendent of the District. And any person aggrieved by the decision of an Assistant Superintendent in a civil suit may appeal to the Superintendent of the Division. Any person aggrieved by the decision of a Deputy Superintendent, or of a Superintendent in an original suit, may appeal to the Judicial Commissioner.

9. Except as hereinafter provided, a special appeal shall lie to the Judicial Commissioner from all decisions passed by a Superintendent or Deputy Superintendent on appeal, on the ground of the decision being contrary to some law, or usage having the force of law, or of a substantial error or defect in law in the procedure or investigation of the case, which may have produced error or defect in the decision of the case upon the merits, and on no other ground.

10. Provided that no special appeal shall lie in any suit for money due on a bond, or other contract, or for rent, or for personal property, or for damages against the decision of a Deputy Superintendent on appeal,

where the debt, damage or demand shall not exceed in value rupees 20, nor against the decision of a Superintendent on appeal when the debt, damage, or demand shall not exceed rupees 100.

11. Whenever a Deputy Superintendent, or Superintendent, may perceive that, on the facts of a case on appeal before him in which no special appeal would lie, any doubtful question of law, or of usage having the force of law, or of the construction of a document, affecting the merits of the case, arises, he may, of his own motion, or on the application of either of the parties to the suit or appeal, draw up clearly and concisely a statement of the facts of the case, and of the point of law or of usage in question, and submit such statement with his own opinion for the decision of the Judicial Commissioner.

12. All suits, appeals, and petitions shall be heard and determined as far as practicable in the order of their institution, the oldest being taken first. Remanded suits shall be heard before those more recently instituted.

13. Any person aggrieved by a decision of an Assistant Superintendent, or of a Deputy Superintendent, or of a Superintendent, or of the Judicial Commissioner, against which no appeal shall have been admitted, and who, from the discovery of new matter of evidence, which was not within his knowledge, or could not be adduced by him at the time when such decision was passed, or from any manifest error or omission in the judgment, may desire a review of judgment, may apply to the Court which passed the decision for a review of judgment. No more than one application for review of one and the same judgment shall be received.

14. No Amildar shall review his own judgment, nor that of his predecessor in office.

15. The following portions of the Code of Civil Procedure shall have the force of law in the Territories of Mysore.

CHAPTER I.
Sections 2, 3, 7, and 12.

CHAPTER II.
Except Section 23.

CHAPTER III.

Except Sections 26, 33, 67, 70, 71, 133, 150, 193, and the last clause of Section 198.

But the following portions of this chapter shall have no application to the Courts of Amildars, *viz.*, Sections 74 to 96, and 180 to 182.

CHAPTER IV.

Except Sections 215, 274, and 283

CHAPTERS V, VI, and VII.

The whole.

CHAPTER VIII.

Except Sections 332, 339, 358.

CHAPTER IX.

The whole.

CHAPTER X.

Except Section 375

CHAPTER XI.

The whole. But this Chapter shall have no application to the Courts of Amildars.

16. Act XXIII of 1861 shall have the force of law in the Territories of Mysore, with the exception of the following Sections:—

Sections 12, 27, 28, and 43, and so much of Section 23, as follows the words " decisions of those Courts."

17. In construing the Code of Civil Procedure and Act XXIII of 1861 as applied to Mysore, the words "Sudder Court" shall be taken to mean "the Court of the Judicial Commissioner" and the words " the British Territories in India" shall be read as "the Territories of Mysore" and the " Collector " shall be taken to mean the " Chief Revenue Officer of a District."

NOTIFICATION.

No. 30. *The 25th May* 1869.

The following Rules in modification of those published in Chief Commissioner's Notification, dated 13th April 1869, are promulgated under the direction of the Government of India for guidance.

1. In suits for money due on a bond or other contract, or for rent, or for personal property or the value of such property, or for damages, in which the debt, damage, or demand, shall not exceed in value the sum of Rs. 100, every decision or order of an Assistant Superintendent invested with Civil jurisdiction shall be final, and shall not be subject to appeal. And in such suits, as aforesaid, in which the debt, damage, or demand, shall not exceed in value the sum of Rs. 20, every decision or order of an Amildar shall be final, and shall not be subject to appeal.

2. In suits in which his decision would be final under these Rules, an Amildar may review his own judgment within 30 days after its date, in order to correct any manifest error or omission in such judgment.

3. In such suits, the summons to the defendant shall be for the final disposal of the suit.

"By Order,"
(Signed) T. CLARKE,
Offg. Secretary.

FOREIGN DEPARTMENT.

NOTIFICATION.

JUDICIAL.

Fort William, the 3rd December 1869.

No. 260.—In modification of the Notification of this Department No. 47, dated the 25th March 1869, His Excellency the Viceroy and Governor General in Council is pleased to sanction the adoption of the following Supplementary Rules of Civil Procedure in the Province of Mysore :—

The officer presiding in any Civil Court in Mysore except at the stations of Bangalore and Mysore, may exercise his discretion in permit-

ting any party to a suit or other civil proceeding to appear by an agent duly appointed in writing, notwithstanding that such agent is not an enrolled Pleader; Section 18 of the Code of Civil Procedure shall apply to such an agent in the same manner as if he were a Pleader.

Whenever an Assistant Superintendent exercising civil jurisdiction may perceive that on the facts of a case before him, in which no appeal would lie, any doubtful question of law, or of usage having the force of law, or of the construction of a document affecting the merits of the case, arises, he may, of his own motion, or on the application of either parties to the suit, draw up clearly and concisely a statement of the facts of the case and of the point of law or of usage in question, and submit such statement, with his own opinion, for the decision of the Judicial Commissioner.

APPENDIX B.

Rules for the Enrollment of Pleaders.

I. From and after the 1st day of March 1867, no person will be permitted to practise as a Pleader in any Civil Court at Bangalore superior to that of an Amildar, unless he be an Advocate of one Her Majesty's High Courts of Judicature in India, or unless he shall have been admitted and enrolled in the Judicial Commissioner's Office as a Pleader in the Courts of Mysore and Coorg.

II. Advocates of any of Her Majesty's High Courts of Judicature in India, and persons enrolled as Pleaders in the Courts of Mysore and Coorg, will be entitled to appear and plead for parties in any civil proceeding in any Court, superior to that of an Amildar, in any part of the Territories of His Highness the Rája of Mysore, or in the Courts of the Superintendent of Coorg subject to the Rules of the Courts.

III. Persons possessing the following qualifications are qualified to apply to be admitted and enrolled in the Judicial Commissioner's Office as Pleaders in the Courts of Mysore and Coorg.

1. Attorneys or Vakíls of any of Her Majesty's High Courts of Judicature in India, on the production of the certificate of their enrollment in Her Majesty's High Court.

2. Bachelors or Masters of Laws of the University of any Presidency Town.

3. Persons who shall have passed the Special Test Examination prescribed for District Munsiffs, or Pleaders in the Presidency of Madras, and who may be able to read the English language fluently and correctly.

4. Persons who shall have passed any examination which the Commissioner of Mysore may prescribe for candidates for the office of Pleader in the Courts of Mysore and Coorg.

5. Persons who have exercised Criminal jurisdiction not inferior to that of a Magistrate with full powers.

IV. No person will be enrolled as a Pleader, nor admitted to the examination for the office of Pleader, unless he can produce satisfactory testimonials of the respectability of his character, and of the sufficiency of his general education. If the candidate has been employed in the service of Government, he must shew why he left the service.

V. Every Pleader before his enrollment, will be required to pronounce and sign the following solemn declaration before the Judicial Commissioner:—

I, A. B., hereby solemnly declare and promise that in my practice before the Courts I will not plead or appear in behalf of any prosecution, or suit, or defence which I know to be false or fraudulent, and that I will not knowingly misrepresent the facts of any case in which I shall act as a Pleader, and I further promise to pay due respect to the several Courts of Justice established in Mysore and Coorg, and to observe all such laws, regulations and rules of practice, as may be in force in those Provinces.

VI. Pleaders will be at liberty to make their own arrangements with their clients for their remuneration; but in the decree the costs will be reckoned as prescribed in Regulation XIV of 1816 of the Madras Code as modified by Act I of 1846. Agreements for the remuneration of Pleaders may be enforced in the Courts of Mysore and Coorg, subject to the general rules of law and practice in such cases.

VII. The Commissioner for the Government of the Territories of His Highness the Rája of Mysore, and of Coorg, has authority to prohibit any person from practising in the Courts of those Territories.

VIII. It will be the duty of the Superintendents of Divisions to bring to the notice of the Judicial Commissioner, the case of any Pleader who may be guilty of gross or repeated misconduct in their Courts or in the Courts subordinate to theirs.

IX. The Judicial Commissioner may suspend any Pleader from the practice of his profession in the Courts of Mysore and Coorg for a limited time.

X. The Judicial Commissioner may strike off the roll the name of any Pleader who, in his judgment, has been guilty of wilful disrespect to any officer acting judicially, or of gross or repeated misconduct in the practice of his profession, and no person whose name has thus been struck off the roll, will afterwards be permitted to appear as a Pleader in any Civil Court of Mysore, or of Coorg, unless the Judicial Commissioner shall restore his name to the roll.

(Signed) J. R. KINDERSLEY,
Offg. Judl. Commissioner.

REPORT

ON THE

PRISONS IN MYSORE

FOR 1869.

The year 1869 has been marked by a considerable decrease in the number of convicts with a consequent reduction of expense. The return of plenty after the scarcity of 1866 has probably been the principal cause of this result. It is also to be noted that sentences of imprisonment are generally shorter than before. The decrease may therefore be expected to continue.

2. The following is an abstract of Statement No. 1.

Statement No. 1.

Number and Disposal of Convicts during 1869.

The number of Convicts who remained on the 31st December 1868 was ...			2,039	
Do do imprisoned during the year.			3,253	
				5,292
Do do received from other Jails ...	To undergo sentence		150	
	In transit for transportation *en route* to other jails, &c., &c.		14	
				119
				5,411
Do do transferred to to other Jails ...	To undergo sentence		135	
	For transportation beyond seas, &c. ...		3	
	On appeal		75	
Do do released during the year ...	„ expiry of sentence		3,020	
	„ payment of fine		346	
	By order of the Chief Commissioner.			
	On account of sickness ...		3	
	For good conduct... ...		15	
Do do Transported beyond seas			6	
Do do Transferred to a Lunatic Asylum			1	
Do do Escaped			3	
Do do Executed			20	
Do do Died			95	
				3,722
Do do Remaining on 31st December 1869...				1,689
				5,411

Daily average number ..... 1795·845

3. The returns now submitted being drawn up in a form different from those of the previous year, a comparison of the figures of both years can be made only in a few special instances.

4. The above abstract shews that there were in prison on the 31st December 1869, 350 convicts less than on the last day of the previous year. This is a decrease of more than one sixth on the numbers of 1868.

5. Statement No. 2 refers to the religion, age and previous occupation of the convicts.

Statement No. 2.

6. The religion professed by the convicts does not appear to have any special influence upon their conduct, all denominations being represented in the jail, nearly in the proportion in which they are found in the free population. Of 5,292 convicts, only 130 were under 16 years of age, and of these, 50 were in the juvenile prison at Bangalore.

7. The following is a statement of the previous occupations of the convicts. But the figures are probably inaccurate, for it appears from the Statement No. 2 that, while no convict in the Central Jail was a professional man, there were 63 professional men among the convicts at Kolár, and 74 at Shimoga, while in the district of Kadoor the great majority of the convicts are reported as professional.

Previous Occupation.		No.	Total,
Of independent property		12	
Agriculturists		1,820	
Laborers		1,476	
Shop keepers and Traders		285	
Artizans		446	
Domestic Servants		235	
Professional		307	
Government Servants		125	
No occupation		170	
			4,876
Females	Married	353	
	Unmarried	36	
	Prostitutes	27	416
			5,292

8. The information contained in Statement No. 3 cannot be accurately compared with the returns of 1868, as the latter shew the length of sentences and the nature of the imprisonment which the convicts were undergoing on the last day of the year, while the former exhibits the classes of convicts according to sentences for the whole period of 1869.

Statement No. 3.

9. An abstract of statement No. 3 is subjoined for facility of reference.

Number of persons sentenced to not exceeding six months	... 3,380
Exceeding six months and not exceeding 3 years	... 983
Exceeding 3 years and not exceeding 10 years	... 726
Exceeding 10 years	... 134
Transportation { For life...	... 21
beyond seas { For shorter periods	... 33
Death	... 25
	5,292

Nature of Imprisonment.

Number sentenced to simple imprisonment			... 1,354
„ to rigorous imprisonment { Hard labor	3,669	... ...	... 3,938
{ Medium „	234		
{ Light „	35		
			5,292

10. The following comparison is made of convicts who had been previously in jail.

Statement No 4.

	1868.	1869.
Once before on 2nd conviction	138	191
Twice before on 3rd conviction	65	61
More than thrice „	40	56
Total.....	243	308

11. Only three convicts escaped during the year, and of those one was recaptured. It is well known that a Kanarese speaking native of Mysore must be hard pressed indeed before he will pass the frontier of the Province or descend the ghâts.

Statement No. 5.

12 The number and description of punishments inflicted on prisoners in jail are exhibited below.

Statement No 6.

Offences committed by prisoners while in jail.

Breach of Jail Rules	... 427

Punishments inflicted on the above Prisoners.

Corporal Punishment { Under ten stripes	84	
{ 10 & nuder 20 „	94	
{ 20 to 30 „	18	
Solitary confinement	91	
Reduction of diet	136	
Reduction of good conduct marks	1	
Other punishments	3	
	427	

13. In 1868, the total punishments were 382. The punishments of whipping and reduction of diet were had recourse to chiefly in the

Shimoga Jail. Solitary confinement was enforced in the Central Jai which is provided with suitable cells. No prisoner was punished with reduction of diet in the Central Jail.

14. Particulars regarding the education of convicts and their employ-
Statements Nos. 7 & 8. ment as overseers will be found abstracted below.

It is difficult, for reasons above stated, to compare the results with those of the previous year.

Number employed during the year	Warders	41	
	Work overseers	19	
	Intramural guards ...	14	
	Extramural guards ...	6	
			80
Period of imprisonment accomplished by the above on date of 1st appointment.	One year	9	
	Above 1 and not exceeding 2 years	14	
	Above 2 and not exceeding 5 years	18	
	Above 5 years	3	
			44
Portion of sentence remaining unexpired on date of 1st appointment.	Under one year	7	
	Above 1 and under 2 ...	10	
	Above 2 and under 5 ...	19	
	Above 5	8	
			44
Number reduced for misconduct. ...			2

State of education of the Convicts.

Of those received during the year there were,—	Unable to read or write ...	2,948	
	Able to read or write a little ...	258	
	Able to read and write well ...	47	
			3,253
Of the total of the year there have learned while in Jail—	Neither to read nor write ...	4,093	
	To read or write a little ...	1,040	
	To read and write well ...	159	
			5,292

15. The expenditure in guarding and maintaining convicts during
Statements Nos. 9&10. 1869 is shewn in the subjoined tables, but the details of the previous year cannot be furnished under the heads prescribed.

The total gross cost per head of average strength is calculated to be Rs. 80—10—8. In 1868, it was Rs. 80—4—8.

Expenditure incurred in the guarding and maintenance of the convicts.

	Rs.	As	P.
Rations	49,041	15	6
Fixed Establishment	31,800	5	4
Police Guard	38,298	14	4
Extra Establishment	9,458	8	8
Hospital Charges	2,727	13	10
Clothing	5,351	9	10
Contingencies	8,089	10	7
Grand Total.....	1,44,768	14	1
Cost per head Rs.....	80	10	8

16. The value of work of all kinds performed by each convict during the 1s tyear, is estimated to be Rs. 45—2—0 per man, and in the case of manufactories the average actual cash earnings per head of the average number of prisoners sentenced to labor is rupees 7—2—4.

Statements Nos. 11 & 12.

Some particulars are given below.

Employment of the Convicts and their estimated Earnings.

	Rs.	A.	P.
As Jail servants	16,840	3	0
On building and repairing Jails	6,470	6	0
Grinding wheat and making clothing or other articles for prison use ...	2,846	10	0
On the roads employed by Public Works Department or by Municipalities ...	19,240	12	0
On Jail Garden	9,371	4	0
On manufactures	24,546	13	0
Total Rs...	79,316	0	0
Average estimated earnings per head of prisoners sentenced to labor	45—	2—	0

Results of the Manufactures.

	Rs.	A.	P.	Rs.	A.	P
Balance at close of previous year	385	14	1			
Cash receipts during the year	41,702	9	7			
				42,088	7	8
Expended during the year	28,070	7	8			
Cash remitted to the Treasury	12,837	8	3			
Balance on hand at close of this year	1,180	7	9			
				42,088	7	8
Outstandings due by the Jail				1,000	0	0
„ „ to the Jail				7,959	14	10
Value of stock at close of the year in raw materials ...	926	1	0			
Manufactured goods	4,322	13	0			
Plant and machinery	5,557	2	8			
Average actual cash earnings per head of average number of prisoners sentenced to labor				7	2	4

17. This statement shews the diet scale and the average cost of articles of food.

Statement No. 13.

The more liberal scale of diet which has been introduced into the Central and District Jails, and which was noticed with approval by Government when reviewing the Report for 1868, continues to exhibit good results in the improved health of the prisoners and in the consequent abatement of the formerly very high death rate among them.

18. Expenditure incurred in the construction of new jails, &c.

Statement No. 14.

		Rs.	As.	P.	Rs.	As.	P.
Expended on new Jail during the past year ...	By Jail Department	1,923	6	0			
	By P. W. Department	20,619	2	11	22,542	8	11
„ on additions, alterations and repairs of Jails ...	By Jail Department	4,257	11	2			
	By P. W. Department	68	0	0	4,325	11	2
„ Maintenance and guarding as shewn in statement No. 9					1,44,768	14	1
				Total Rs....	1,71,637	2	2
Cash remitted to the Treasury					12,837	8	3
				Balance...	158,799	9	11

Net cost to Government per convict Rs.....95 9 2

19. The remarks above made regarding the satisfactory condition of the health of the convicts will be found to be borne out by the figures in Statements No. 15 to 20 inclusive.

The admissions into hospital during the year were ...	...2,030
Daily average number of sick	... 64·69
Deaths	... ·95·
Rates of deaths to total number in jail	... 1·76

20. Fever was the prevailing illness, but diarrhœa appears to have been the chief cause of death.

21. From 30 to 40 is the period of life during which sickness among the convicts has most frequently had a fatal termination.

22. Nearly half the number of deaths have occurred among prisoners whose sentences did not in each case exceed 12 months.

23. Out of 3,604 prisoners discharged throughout the year, 3,233 gained weight during the period of their imprisonment.

24. The number of civil prisoners confined during the year was 140, of whom 129 were released. The average cost per head was Rs. 3—15—11.

Statement No. 21.

25. There were 10,855 persons in confinement under trial in the past year, and the average cost of each was Rs. 99—11—9.

Statement No. 22.

26. The statement which accompanies this report gives particulars regarding the numbers convicted, and those who were released; but comment on these figures is unnecessary here, it having been more appropriately made in connection with the working of the courts, under the head of "Criminal Justice."

MYSORE JUDL. COMR.'S OFFICE,
Bangalore, 7th December 1870

J. A. CAMPBELL,
Offg. Judicial Commissioner.

REPORT

ON THE

POLICE OF MYSORE

FOR 1869.

The total number of Police throughout the Province including village Police, was 24,950, and the cost was Rs. 6,79,016—4—4. In 1868 the number of men was 24,875, and the cost Rs. 6,26, 499—5—11.

2. With the exception of the Bangalore District, the Police of Mysore remains much the same as it has been for many years. There is a general concurrence of opinion among officers of all grades that until the Police is reorganized and properly trained, little improvement can be looked for, and that reorganization is absolutely necessary, if it is desired that the Codes introduced into Mysore should be properly worked. Some minor changes were made in particular localities which are believed to have led to partial improvement; among which may be mentioned a revision of the Police of Shimoga Town, the cost of which hereafter will be borne by the Municipality.

3. An Inspector was appointed, the number of Police peons was reduced by getting rid of superannuated and inefficient men, the pay was raised, and the men clothed in a uniform dress.

4. In Hassan a force was raised for service in the town, the Municipal funds being charged with the cost, by which a small reduction was made in the number of men paid from the general revenues.

5. The Police statements prescribed for general adoption are applicable to districts in which a regular Police has been established, and the information required in them can only be given for the Cantonment and District of Bangalore in which the Police has been revised.

6. The revision of the Cantonment and Town Police was carried out on the 1st May 1868, and that of the Bangalore District on 1st April 1869. The operations of the District Police therefore have only extend-

ed over 9 months of 1869, and a report for this period has been submitted by the officiating Superintendent of Police, which is enclosed.

7. The cost of the newly organized Police would seem to be Rs. 136 per head at the sanctioned strength of 1,038 of all ranks.

8. According to the figures given by the officiating Superintendent of Police, the results of the revision have been satisfactory.

9. The table below shews the number of offences committed and the percentage of detections.

		No. of offences committed.	Percentages of detection.
I.	Offences against public peace and justice	11	90·00
II.	Offences against currency	6	87·00
III.	Offences against the person	53	72·00
IV.	Offences against property with violence..	11	70·00
V.	Offences against property without violence	606	65·00
VI.	Offences not included in the above classes	2,321	94·00

10. In regard to grave crimes the greatest number committed was in the Pété or Town of Bangalore, being 212, of which 160 or 75 per cent were detected. The smallest number was in Closepété, being 11, of which 4 or 36 per cent were detected.

11. The largest percentage of detections, *viz.*, 91 was in the Hosakóté Talook, and the smallest 36 in Closepété.

12. 2,682 offences were committed in the Cantonment and Town, against 2,429 in 1868. 95 per cent were prosecuted to conviction against 92 per cent in the previous year. 3,640 persons were proceeded against of whom 3,578 or 98 per cent were finally convicted.

13. From 1st April to 31st December the number of offences committed in the district was 326, of which 207 or 63 per cent were convicted. 580 persons were sent up for trial, of whom 342 or 58 per cent were convicted. 39 per cent of stolen property was recovered.

14. The officiating Superintendent of Police accounts for the number of unnecessary arrests, by stating that these chiefly occurred in the district where the men were not sufficiently educated and instructed.

15. In the neighbouring district of Kolár only 383 persons were convicted out of 1,955 brought to trial, and in Toomkoor 207 out of 713.

These give percentages of convictions to persons brought to trial of 19 and 29.

16. The number of the Bangalore Cantonment, Town and District Police was 1,022, and the total cost 1,41,578 Rs.

17. The revision extended over an area of 25 square miles with a population of 132,160, watched by the Bangalore Police force, and over 2,902 square miles containing a population of 519,197 watched by the District Police.

18. The number of persons arrested without warrant throughout the Province was 10,473, against 8,824 in 1868, of whom 5,275 were convicted.

19. The number arrested or summoned by Magistrates was 14,671, of whom 4,116 were convicted.

20. The table below gives the number of accidental deaths, &c., which occurred during the year.

Division.	Suicides.	Accidental deaths.	Deaths by wild beasts.	Total.	Wounded by wild beasts.	Wild beasts killed.
Ashtagram...	14	376	9	399	3	28

BANGALORE,
14*th June* 1870.

A. C. HAY,
Offg. Judicial Commissioner.

APPENDIX I.

REGISTRATION OF ASSURANCES.

The Annual Report on the operations of the Registration Department for the past year has been submitted by the officiating Registrar General, Mr. H. Hudson.

Registration Work.

The returns, as compared with those of last year, shew a falling off in the amount of work performed under some of the heads, which is explained by the officiating Registrar General in his separate consideration of each; but they also shew a satisfactory increase in the case of some of the more important class of instruments presented for registration. The aggregate under all heads was 11,195 during the past, against 11,481 during the previous year.

Compulsory Registration.

As regards documents subject to compulsory registration there is an increase of upwards of 18 per cent.

Optional Registration.

The class of voluntary registrations relating to immovable property under Rs. 100 in value shews an increase of 9 per cent.

Registrations of bonds, contracts, and miscellaneous documents not relating to immovable property, shew an increase of upwards of 30 per cent, and are stated to be likely to be more numerous, as the advantages secured thereby under Section 51 of the Act are more generally known.

Registrations under Penalty.
Do. Special.

Registrations under penalty have decreased by 45 per cent, which is satisfactory; while special registrations under section 52 of the Act shew an increase of 33 per cent.

Sealed Covers and Wills.

The transactions as regards sealed covers and wills have been few in number.

Memoranda of Court decrees under section 41 of the Act shew an increase of 43 per cent, while those issued by Courts to Registrars under section 42 and copies of ditto sent by Registrars to Sub-Registrars under section 75 have decreased by 35 and 37 per cent respectively. The causes that probably led to an abnormal increase in the registration of this latter class of documents in 1868, and to a decrease during the year under report, are stated to have been due to the measures taken in 1867 to enforce the provisions of the Act on this head, which were apparently not then fully understood ; while in December 1868 it was pointed out that such memoranda should only be prepared in cases in which they were required to give effect to those provisions. The decline may therefore fairly be partly ascribed to more correct procedure in this respect ; but it is now the subject of investigation in the Courts.

Memoranda of Court Decrees.

The number of searches was more than double than during the previous year.

Searches made.

Registration of powers of attorney number considerably less than one-third of those in 1868. The cause of this decline was explained in last year's report as arising from a more correct procedure.

Powers of Attorney.

The number of refusals to register under section 82 of the Act has increased by 58 per cent ; appeals against orders of refusal numbered 16, of which 8 were confirmed, and registration was ordered in 7, *viz.*, 6 by the Registrars and 1 by a Court.

Orders of Refusal to register.

The number of copies of documents forwarded by the Registering Officers to those of other districts has greatly declined, owing to the measures taken to ensure registrations being performed in the offices of the talooks concerned.

Copies of Documents sent to other Registration Offices.

The number of summonses issued has increased by 9 per cent ; but it is hoped that this unfavorable symptom will not be permanent.

Summonses.

On a review of the results of the operations of the Department

during the past as compared with previous years, there is undoubted progress in all the districts in the class of compulsory and optional registrations, excepting in Bangalore, which shews a decrease under both heads of 5 per cent as compared with the returns of 1868.

The financial results of the year are as follows:—

Financial Results.

Disbursements.							Receipts.						
	Rs	A.	P.	Rs.	A.	P.		Rs.	A.	P.	Rs.	A.	P.
Salaries and Establishment													
Allowances	8,237	0	0				Receipts by Fees...	19,651	0	0			
Commission to Registrars ...	2,404	5	4										
Do. to Sub-Registrars	6,640	3	8				„ Penalties ...	499	0	0			
Refund of Fees ...	8	0	0										
Contingencies	922	12	6	18,212	15	6	„ Miscellaneous.	97	6	9			
											20,247	6	9
Balance of Surplus...				2,034	7	3							
Total.....				20,247	6	9	Total.....				20,247	6	9

shewing a surplus of receipts over expenditure of Rs. 2,034—7—3 or rather more than 10 per cent.

Some reduction of expenditure has been made since the commencement of the current year by the substitution of fixed establishments for the District Registrars' offices, under the orders of the Government of India, for the arrangement previously in force by which a separate commission and establishment allowance was paid for the purpose to those officers. The new system will, it is expected, not merely affect a saving in expense, but will also add greatly to the efficiency of the department.

Remuneration of Sub-Registrars.

The remuneration of the Sub-Registrars is, as heretofore, a commission of 40 per cent on the fees collected by them, which covers all charges for establishment. The officiating Registrar General recommends that a fixed portion of the commission shall be assigned to the writers employed, who belong to the local cutcherries, and are now paid entirely according to the pleasure of the Sub-Registrars, who are also the Talook Amildars. The proposal shall receive due consideration.

The general average of the fee on registered documents of all classes, except memoranda of decrees, wills, &c., was Rs. 2—0—4 in 1869—70 against Rs. 21—9—0 the previous year. On compulsory documents alone,

the average fee during the past year was Rs. 2—0—6, and on optional documents Rs. 1—5—0.

All the Sub-Registry offices were inspected during the year, and a marked improvement is reported in the quality of their work.

Registration Manual.

The Registration Manual printed in English and Kanarese at the cost of Government, referred to in last report, has doubtless been of great service to the Sub-Registrars. 572 copies of the work (200 in English and 372 in Kanarese) have been sold during the past year.

Index Books.

The arrangements for the compilation of index books in the Registrar General's and District Registrars' offices, also referred to in last report, are reported to have been duly carried out.

New Scale of Fees for Coffee Grants.

A new and special scale of fees for the registration of coffee pattás was sanctioned by Notification of Government of India in Home Department, No. 2,709, dated 10th June 1869, and the issue of fresh pattás, in certain cases in which registration had been previously neglected owing to a misconception on the part of the holders, was authorized by the Chief Commissioner in a notice dated 20th August 1869, subject to the payment of a fee of Rs. 2 in each case.

Arrangements have also been made to secure the due registration of all new coffee grants which can only fail through the wilful neglect of the grantee: and by these measures provision has been made for remedying neglect of registration of such pattás in the past, and for preventing delays or misconception for the future on the part of holders of these grants which would render them liable to the penalties leviable under the Act for a neglect of its provisions.

Registration under Act X of 1866.

Four Companies have been registered under Act X of 1866, during the year under report.

The officiating Registrar General commends the exertions of the District Registrars, all of whom are stated to have taken an interest in their duty, and to have rendered him valuable aid.

APPENDIX II.

BANGALORE CENTRAL JAIL REPORT.

As in last year's report, the subjects to be reported on will be arranged under the following heads:—

I. Buildings and accommodation.
II. Number of prisoners, classification and discipline.
III. Labor and employment.
IV. Diet.
V. Water supply.
VI. Clothing.
VII. Conservancy.
VIII. Health.
IX. Establishment.
X. Financial.
XI. General summary.

I. BUILDINGS AND ACCOMMODATION.

Works accomplished.

No fresh works of any importance have been commenced during the year. The night latrines have been removed to the exterior of all the barrack rooms, and separated from them by closely fitting doors, and the gratings which separated the four rooms of each block, but which offered no obstacle to the circulation of foul air, or to the free communication of the prisoners, have been replaced by brick walls. The printing room was completed early in the year. It occupies one side of the right hand group of solitary cells. These cells being in excess of the requirements of the jail, the partition walls which separated them were removed, and a room 82½ feet in length by 13 feet in breadth, was thereby formed, which, with the addition of a few windows, and a tiled floor, has been found to answer all the present requirements of the Press.

A well, 53 feet in depth, has been sunk outside the enclosure of the Juvenile Reformatory and lined with stone. The water is conveyed to the Reformatory through permanent channels of brick and chunam. These channels are 1,087 feet in length. As stated in last year's report, no water could be found within the Reformatory enclosure, and the want of it was much felt.

Two wells were also sunk in the vegetable garden; but these were not lined with stone.

Works in progress.

The beds of the men who sleep in the neighbourhood of the ground ventilators are being raised on pyalls. The currents of air from these ventilators proved a fruitful source of rheumatic and febrile affections.

Fresh sleeping places of sun-burnt bricks are being laid down in the intermediate spaces, and in four of the barrack rooms these works are now completed. It is necessary in my opinion to renew the sleeping places at least once in every three or four years, as the porous brick flooring without doubt absorbs organic matter, to a greater or less extent, wherever it comes into contact with the bodies of the sleepers.

The Printing Office is being enlarged for the purpose of affording room for the working of two new presses now on their way from England.

All these works have been carried out by prison labor, and the amount actually disbursed upon them has been Rs. 4,180—6—8.

Accommodation.

The amount of cubic space allotted to each prisoner has been as heretofore 500 cubic feet only. I have seen reason to modify the opinion expressed in last year's report that this space was "in the cool climate of Mysore and with the ample ventilation of the jail," sufficient.

The ventilation is doubtless ample, and in a cold climate where the external temperature is several degrees lower than that of a heated ward, the air is of course more rapidly renewed than it can be in a barrack in the plains, where the temperature of the outer air reaches to or exceeds 100 degrees, and where there can consequently be but little interchange between it and the air within the ward. But the ventilation even in this jail, can only be adequately maintained by causing the men to sleep in

a draught of greater or less force. This has proved a fruitful source of rheumatism, fever and diarrhœa, and even though the air be renewed with sufficient frequency, the evil which follows from the aggregation of a number of men in a limited space, must not be left out of consideration. I shall however discuss this subject more fully under another head.

The hospital accommodation has been ample.

Hospital.

The buildings are in good order, and in as fair a state of repair as can be expected when the nature of the materials of which they are constructed is taken into account.

Repairs.

A portion of the outer wall, which is composed of stone and mud to the height of 10 feet, and of mud only, with a coping of bricks, for the remaining 5 feet, fell down during the rains, and had to be rebuilt. The upper or mud portion will sooner or later have to be replaced by stone, as it is undergoing a somewhat rapid decay.

II. NO. OF PRISONERS, CLASSIFICATION, AND DISCIPLINE.

On the 31st December 1868, there were remaining in the Central Jail 927 prisoners, and during the year there have been 697 admissions; making a total prison population of 1,624.

The aggregate number for the year has been 328,630, giving a daily average strength of 900·356.

Of the total prison population there have been—

Released on expiry of sentence, &c., (Civil inclusive)	767
Transported or transferred	70
Died	24
Released on account of sickness	2
Do. for good conduct	9
Sent to Lunatic Asylum	1
Escaped	1
There are remaining	750
The highest number locked up	957
The lowest	750

Of those remaining, 740 are convicted, 5 are civil prisoners, and 5 under trial.

Remaining.

Of the convicted prisoners, 725 are sentenced to rigorous, and 15 to simple imprisonment.

Convicted Prisoners.

Of the convicted, 731 are men and boys, and 9 women.

Sex.

Crimes.

37 are against the State or justice.
79 are against the person.
598 are against property.
26 other crimes not included in the above.

740

Offences against the State or Public Justice.

...	19	....	11	18	48

A very considerable alteration in the relative proportions of crimes may be noticed as compared with the past year.

Last year 9 men were convicted of altering and counterfeiting coin. This year there have been none, but 6 men have been sentenced for passing bad coin against 1 in the previous year. Whether the 9 prisoners of the year 1868 manufactured the coin, which 6 men were this year detected in passing, or whether the coiners of this year have been able to evade the vigilance of the Police, I cannot say.

Forgery has risen from 2 to 4. Murders have fallen from 18 to 9. Culpable homicide has risen from 7 to 10, and criminal force from 21 to 30.

Dacoity has fallen from 54 to 14. Robbery from 21 to 1. Lurking house trespass from 75 to 10, and ordinary theft has risen from 200 to 209.

The accompanying table will shew the difference in the total of crimes of each description :—

Years.	Against the State.	Against the Person.	Against Property.	Other Offences.
1868	30	63	406	71
1869	44	101	32	26

The sentences of more than ¾ths are for under a year as seen below.

Under 1 year.	2 to 3.	3 to 5.	5 to 7.	7 to 10.	10 and above.	Life transportation.	Not do.	Capital Punishment.	Total.

Weavers	8	Compositor	1
Butlers	11		538

Re-committals.

Of the admissions, 95 were re-committals, of whom 90 were imprisoned in the Central Jail, and 5 elsewhere.

The great majority of them came from the Cantonment, and the District of Bangalore.

A considerable diminution is to be noticed in the number of re-committals; this class of criminal having fallen from 133 to 95. On the last day of the year there were but 65 remaining in jail, a fact which demonstrates pretty clearly, that the comforts of the jail have not been adequately appreciated by the professional thieves, to which class most of the re-committals belong. To them, I have endeavoured during the past year to render the jail as odious as possible, by assigning to them the most distasteful work, and as much of it as they could bear without injury to their health.

Most of the re-committals (the petty thieves especially) are imprisoned but for a short time, and these men I employ during each alternate week of their sentence, upon the cleaning of the latrines (a work both laborious and unsavoury) and upon the grinding of rági, a labor which from its monotony, and from the impossibility of evading the full tale of work, is of all occupations the most detested.

As they are also from previous experience well acquainted with the jail rules, any breach of discipline is visited with swift and severe punishment, so that on the whole their sojourn in the jail is neither pleasant to themselves, nor unprofitable to the establishment, and I have reason to think that during the coming year their periodic seasons of retirement will either diminish in frequency, or that they will betake themselves to fresh fields and pastures new.

Classification.

As mentioned in last year's report, I am very desirous that the above mentioned class should be altogether isolated from the rest of the jail population; but I am unable with the limited number of buildings at my disposal, to carry out this most desirable object. As stated in that report, there can be no question, that a few habitual criminals do an immense amount of evil, when mixed with the body of the prisoners, and corrupt and lead astray men who would otherwise be willing to reform. I would therefore request permission to build a number of

huts, in the angle between the debtor's prison and the outer wall, and to enclose them with a palisade. The cost will be comparatively trifling, as the only outlay will be for timber, chunam, firewood for burning tiles, and tar. The wood, &c., for a palisade and gate would cost Rs. 589-10-0 and for all the other buildings, including a cook room and work sheds, Rs. 1,628-15-4, as per estimate.

I would confine no more than 10 men in each hut, and would promote a steady prisoner whose sentence had nearly expired, and who had been promised a remission of a portion of the remainder, to the post of warder, and make him responsible for the safe custody of the inmates of the hut.

Each hut should be 30 feet in length by 15 in breadth, with a small latrine attached, and separated from it by a door.

A hut of these dimensions affording to each prisoner the regulation number of cubic feet—648, and a superficial area of 450 feet, would, according to the estimate which I have caused to be drawn out, cost Rs. 132 only, and should last with ordinary care for many years.

The walls should be built of sun-dried bricks, and the roof formed of tiles and bamboos. The walls should be 12 feet in height, and I would leave an aperture of 6 inches between the wall and the rafters for purposes of ventilation. Each kitchen with work shed would cost Rs. 31.

I would earnestly recommend whether this scheme be approved of or not, that one hut be built as an experiment, which could be used as a quarantine in epidemic seasons; and I attach an estimate of cost, in which the tiles and bricks are of course not included, as they would be made by the prisoners themselves.

Abstract of Estimate for constructing ten separate Huts, each 30 feet long by 15 broad with Latrines.

I am confident that if this method of lodging prisoners were to receive a fair trial, it would be found more satisfactory, both in the interests of economy, of discipline, and above all of health, than the present system of housing a large number of men in one barrack, which from its great cost cannot be abandoned, should the site prove unhealthy, or should the failure of the water supply (as will I fear be the case with this jail) render the adoption of another site advisable.

First.—As to expense—By the plan proposed 100 men can be lodged at the cost of Rs. 1,945, whereas the original cost of this jail, which is capable of lodging 730 persons only (allowing to each man the regulation number of 648 c. ft.), amounted to Rs. 2,18,167.

It will doubtless be objected, that these huts would not be sufficiently secure, but they will at least be as secure as the solitary cells, from which 2 men have already escaped, one by wrenching off the door hasp, and the other by digging holes in the wall with a piece of broken chatty, and then removing the tiles from the roof and dropping to the outside; and the bamboo palisades* would be quite as secure as the expensive wooden ones at present in use, up which any active native, or even a European with shoes on, can climb without difficulty. I would however render escape more difficult, by laying down broken glass on either side of the enclosure, and on the outside of the huts; and it must be remembered that ten men cannot enter into as powerful a combination as can one hundred, and that the warder for his own sake would be certain to give the alarm.

Second.—Discipline.—Under the present system where 100 men are housed in one barrack, it is impossible to classify the men either with reference to the crimes committed previous to their admission, or to their conduct in jail; whereas with only ten men in a hut, nothing would be more simple. Men could be promoted from one hut to another, as easily as boys from a lower to a higher class. The hut-keeper should be a man whose sentence had almost expired, and who had been promised a remission, contingently upon his keeping his hut in good order, and a spirit of emulation would soon spring up between the keepers, and the inmates of different huts, which would be attended with the most satisfactory effects upon the moral and indeed the physical health of the men.

Third.—Health.—It is in this last respect that the superiority of the proposed system would be most marked.

There can be no doubt that in the present day amongst scientific men, a growing distrust is springing up, of the system of massing large bodies of men in great barracks, in great jails, or in great hospitals.

* If properly tarred and set in a composition of lime and arsenic, such as I am in the habit of laying down around rose and other cuttings, they would resist the attacks of white-ants.

It has been clearly proved by statistics recently collected by Sir J. Y. Simpson, that the death rate of hospitals increases in a direct ratio to the number of patients confined in them.

This distinguished authority points out, that "As shewn by Dr. Farr of London, Dr. Duncan of Liverpool, and Dr. Gairdner of Glasgow, the average mortality of the country, and of town districts, of cities and their more crowded districts, increases with marked regularity according to the density of the inhabiting population. When men are in numbers aggregated or compressed into rooms or wards of hospitals, the same law, in a marked measure, overrules the result. For example, when soldiers, men in the prime of life, and selected for their healthy constitutions, are shut up in crowded barracks, they begin to suffer and die in numbers disproportionate to the civil population, chiefly from phthisis and typhoid in this country, and from fever, cholera, and dysentery in India. The different Government commissions which have made inquiries into the health of the British troops in barracks leave no doubt on this point, as one cause of the otherwise unaccountable mortality in our army. In treating of the subject of barracks, Professor PARKES observes (p. 304): At all times the greatest care is necessary to counteract the injurious effects of compressing a number of persons into a restricted space. In the case of soldiers the compression has been extreme.' 'No expense,' he adds, 'has of late years been spared, but yet the fact remains, that the very habitations erected for their shelter and comfort have proved to the soldiers a source of suffering and death.'"*

The air, either of a prison or a barrack-room, must to a certain extent approximate to that of an hospital ward.

In either, there will at any given moment be found men whose health is below par, and who may possibly be in the first stage of a contagious or infectious disease, and even though no man suffering from actual disease may be present, still the emanations from the body of a man in low health, and the air expelled from his lungs, which come into contact with his neighbour, and are respired or swallowed by him, must expose him to a certain amount of danger.

* In the case of cavalry horses, where the question is more simple than in the case of soldiers in consequence of the absolute similarity, in different places, of their food, water, exercise, and treatment, the effect on the health and life of these animals from diminution of numbers in the stables and increased ventilation and cleanliness, has proved very striking: see DR. PARKES'S Treatise, p. 84.

"Every human being" says Sir J. Y. SIMPSON "seems to exhale from his body an aroma, so far individually distinct, that the dog can trace by it the footsteps of his master; and more organic effluvia are given off, to quote Dr. BARKER, from the bodies of sick men—through the inhalation of such materials floating in the atmosphere or in some such way in all probability certain diseases are propagated."*

Again in the air of prisons, LEMAIRE detected various round and oval bodies of the same form as in uncleanly persons exists in the sweat, and these observations have been confirmed by many independent observers.

Granting these facts, it must of necessity follow, that if each prisoner, or each soldier, could be kept during his sleeping hours completely apart from his neighbours, his chances of maintaining sound health would be thereby increased, but as this is impossible, it is sufficiently apparent, that the smaller the number of men confined in one room, the less will be the chance of any man suffering from contact with the unhealthy emanations of his neighbours; for in a room containing 20 men the chances are twice as many in favor of one diseased person being present, than in one containing but ten, and in epidemic seasons, or when infectious diseases prevail, the importance of this fact cannot be too highly estimated.

Should cholera break out in a jail, and should it make its appearance in a certain ward, from lack of space it is now difficult to dispose of the prisoners of the ward, and the larger the ward the more difficult is the task of disinfection; whereas an infected hut can be easily abandoned, cleansed, and if necessary demolished, at a slight expense.

Again, certain diseases can be traced to a hut, the cause discovered, and a remedy applied, which in a large barrack is difficult and often impossible.

But that I should be wandering from my proper province, I could shew how the same reasoning might be applied but with still greater force to the massing of soldiers in large and expensive buildings, however well ventilated and airy, (for in the foregoing remarks it will be observed

* This hypothesis has received a remarkable confirmation from the recent observations of Professor TYNDAL upon the organic dust present in the atmosphere.

that the question of aggregation has been kept distinct from that of overcrowding upon which all men are agreed,) but I am confident that the system proposed by me admits of considerable expansion, and is applicable not only to the construction of jail buildings, many of which are now suspended for lack of funds, * but to barracks for European soldiers, at any rate in the comparatively temperate climates of India.

No change has been made in the classification of prisoners since last year and for the reason already given, *viz.*, lack of room.

Conduct of Prisoners.

In the conduct of the prisoners there has been considerable improvement; and the number of punishments has fallen since 1868 from 223 to 152, or from 21½ to 17 per cent, as will be seen by a reference to the following tables.

List of Punishments for the years 1868 *and* 1869.

Years.	Dirtying Dress.	Being in possession of forbidden drugs.	Making Noise.	Attempt to escape.	Committing nuisance.	Stealing Vegetables, &c.	Disobedience to Orders.	Stealing Cotton.	Possessing Coin.	Skulking.	False Complaints.	Using bad language.	Quarrelling.	Breaking Govt. Property.	Pretending Madness.	Total.
1868	...	87	...	1	...	25	34	...	...	41	7	20	...	2	6	223
1869	6	49	4	2	2	26	13	5	4	10	2	2	15	2	10	152

In the year 1867 the number of punishments amounted to 323 or 27½ per cent.

Nature of Punishments.

Years.	Cells with hard labor.	Cells without work on non-laboring diet.	Flogging.	Total.
1868	114	86	73	223
1869	91	...	61	152

* As the Mercara Jail in this province for example.

The number of prisoners actually punished during the year amounted to 131, for it must be borne in mind that some bad characters have been punished more than once, for example, the man who simulated madness was punished ten times before he recovered his right mind.

It will be noticed that there has been a remarkable falling off in the number of punishments for being found in possession of forbidden articles, and this is to be attributed to a rule which I have lately introduced, of fining the whole of the peons in proportion to their rank, (to wit, the peons 2 annas, the daffadars 4 annas, and the jamadars 8 annas) upon each occasion when a prisoner was detected in this offence; and as such detections were invariably made, even previous to the introduction of the rule, by the European officials, the diminution in the number of detections is a fair index of the diminution of the offence. The regulation may appear to be a harsh one, but as contraband articles can only be introduced by some one of the peons, and as his comrades know pretty well who the offender is in each particular instance, I have reason to suspect, that he is assessed by them in most cases, to the full amount of the fine, so that smuggling has ceased to be profitable or alluring, to any but the most adventurous spirits; and although the daffadars and jamadars may be acquitted of all suspicion of the offence in their own persons, still, as I pointed out to them, it is their sole duty to maintain discipline, in which if they fail they must be content to suffer.

On the whole I think that there can be noticed a growing improvement in the conduct of the prisoners, and in the general tone of the jail; and that the men are beginning to appreciate the distinctions made between the evil and the well disposed, the idle and the industrious, there can be little doubt. As amongst the unconvicted classes in civilized communities, the force of habit is beginning to tell, and many men having contracted habits of industry, cleanliness, and subordination, at first through compulsion, and afterwards in many cases from observation of the advantages attending them, they now feel little inclination to break through those habits, and give but little encouragement to others to do so, for as in a well organized school, the moral tone of the boys asserts itself against dishonorable conduct, so in this jail, from whatever cause the idle and the ill conducted, receive no moral (or rather immoral) support from the great mass of the prisoners, very many of whom take a pride in maintaining discipline, and in doing good honest work. This s

a fact which comes daily under my notice, and which will not admit of dispute.

Remissions.

I regret that the regulated scheme for granting remissions on account of good conduct, and for allowing well conducted prisoners a per centage on their earnings, which was proposed in my report of last year was not sanctioned by the Chief Commissioner, nor has any modification of it been adopted.

The Judicial Commissioner, though considering the amount of remission proposed as too liberal, was still in favor of such indulgences being granted upon some settled plan, so that each well conducted prisoner might know with certainty the rewards which he could earn by good conduct; but the Chief Commissioner did not pass any orders on the subject, the Secretary in his letter to the Judicial Commissioner's address dated July 9th, General No. 1188, Judicial No. 60, stating, that "The element of uncertainty is perhaps rather an advantage than otherwise, and a system of rewards within the jail may be preferable to a remission of part of the sentence." He however considered it "probable that orders might shortly be expected from Government on this subject," but as these orders have not yet arrived, I respectfully beg again to draw attention to the matter, for I would venture with great deference to submit, that no other system of rewards within the jail, can for a moment weigh against a graduated system of remission, which a well behaved prisoner could claim with certainty, or that no punishment would be so severe as the deprivation of such an indulgence; and as jail discipline can only be maintained by a system of rewards and punishments, the element of uncertainty is not an element which can be expected to exercise a beneficial influence. In all civilized communities, the certainty not only of punishment for offences, but of reward for industry and obedience to the laws, is one of the strongest incentives to industry and to virtue, for even by theologeans, the certainty of rewards and punishments in the next world is proposed as the most powerful incentive to virtuous living in the present.

Escapes.

There has been one escape, against 3 in the previous year; the man was allowed to escape from the Printing Office by the gross carelessness of one of the peons, whom I sentenced to two months' imprisonment.

Executions.

No criminals were executed during the year.

III. LABOR AND EMPLOYMENT.

The manner in which hard-labor prisoners newly arrived in jail are employed, is regulated—

1st, By the state of the prisoner's health.

2nd, By the fact of his being a man convicted for the first time or an old offender.

3rd, By his caste, trade, or previous occupation.

1st, His health. The prisoner on admission, or as soon as possible after he has been washed and clothed, is medically inspected; if he be in good health, he is at once drafted into the hard-labor gang, if in bad health, he is transferred to the medium, or the light-gang or to the hospital. The average numbers of the three first named classes during the year have been—

Hard	620
Medium	95
Light	27

2nd, With reference to his previous convictions. The manner in which the recommittals are employed has been already detailed in page 50.

3rd, Caste, trade, or previous occupation. It being admitted that the first duty of a Jail Superintendent is to carry out the sentence of the law, and to see that no man sentenced to hard labor be allowed to pass his time in idleness, the next question which demands consideration is, in what manner may the labor of the prisoner be so utilized, that he may cause the smallest amount of expense to the State, or in other words best defray the cost of his board and lodging; and lastly, if the prisoner belong to no trade, and if his term of imprisonment be of sufficient length to enable him to learn one, what trade can he be taught, the exercise of which will not interfere with his caste prejudices after his release, which he will be therefore likely to practise with profit, and for that reason be less liable to lapse into crime, and to become again an expense to the State.

The question of what is, and what is not hard labor, is one upon which the public is apt to speak dogmatically, though with little consi-

deration. The jail visitor, I observe, is often much exercised on this point. He walks into the garden, and sees a stout malefactor, lusty and muscular, digging with a pick-axe, or assisted by his fellows drawing a cart, and he is content. He next goes into the Printing Office (I take an extreme case) and sees another prisoner sitting on a bench and picking up little bits of metal off a desk, and his soul is vexed, and he says "it is no wonder that crime abounds, when criminals are fed and pampered, and allowed to idle, while honest folk have to work for their living."

But there is also something to be said on the other side. The muscular digger is doing work to which he has been accustomed from his youth, and which is by no means hard work to him, though it would, after a few days or weeks, kill the effeminate writer, whose heaviest tool has been his pen, and whose most violent exertion has been his daily walk to and from his office; whilst the compositor who has acquired a foreign alphabet by diligent and close attention (and he who translates into type during 9 hours of the day, a foreign and not always too legible manuscript,) can scarcely be called an idler. And if the loss of tissue as indicated by the difficulty of repair, be any test of work performed, I have little doubt that the amount of brain substance expended, and of phosphates excreted by the compositor, who has been kept to his work for 9 hours, will cover far more than the value (as tested by the difficulty of repair,) of the nitrogenous compounds expended within the same time by the delver of the soil. Upon this point I speak with some authority, as I can bear witness, that the number of men employed on garden duty who come to hospital for diseases of debility *cæteris paribus*, falls below in a marked degree, those admitted from sedentary employments which require the exercise of intelligence and attention.

But after all, the question is somewhat narrowed, if the fact be considered that the punishment of imprisonment in the case of Indians, (Hindus, or Musalmáns,) does not so much depend upon the amount or the quality of the labor (if the latter be not utterly monotonous, distasteful, useless, and unhealthy as is the case with the shot liftings, crank turnings and treadmills of English prisons) as in the utter severance of all the ties which bind to life the most conservative and custom-ridden, yet irregular and Bohemian of people. The Brahman, deprived of his recurring festivals, his ceremonies, his respectable and recognized debaucheries, his intellectual ascendency, and of the field for intrigue

in which his keenly set spirit finds its proper exercise, without taking into consideration the actual amount of pecuniary charges which he must after his release undergo for purification,* suffers dolours of which the common European criminal has no conception; whilst the low caste prisoner, deprived of his little luxuries, his bang, his pan, his arrack, his more than little debaucheries and dissipations, and separated from his family, to whom in most cases he bears that instinctive attachment which advanced civilization has in a great measure improved away, turns, I have no manner of doubt, to hard bodily labor as a resource and an opiate, which the visitor who wishes to render the prisoner's life completely miserable, should in all consistency forbid him; and to every caste and tribe, the mere fact of being obliged not only to work, but to eat and to drink, to rise up, to lie down and to wash, at stated times and by rules from which there is no appeal, proves a sore and heavy punishment.

Caste.

I will now proceed to detail the manner in which the different castes have been employed during the past year, but to enable me to do so more clearly I purpose to add a very brief description of each with a statement of the manner in which they have been accustomed to earn their living previous to committal.

I beg also to append †photographs of typical representatives of the most interesting of the before named castes, which have been taken with considerable success by Mr. Hutson, the Chief Jailor.‡ to whom I also owe the other photographs with which this report is illustrated. The photographs of the wandering tribes especially may, I think, prove interesting for comparison with those of the same or of allied races in different districts. If this plan were carried out on an extended scale through the different jails of India, and if, in addition, a graduated scale of colored papers (similar to those with which the intensity of ozone in the atmosphere is recorded) were furnished to the officers in charge, so that the varieties of color, introduced by varying climate in the same race, could be accurately observed, I am of opinion that the result would not only be interesting, but valuable in an ethnological point of view.

---

* Varying from Rs. 25 to 400.

† Necessarily omitted in this reprint.

‡ He also takes photographs of the recommittals and bad characters upon their release and sends them to the Superintendent of Police.

Europeans.—18 men have been committed during the year, the entire number for a few days only, and all for drunkenness and vagrancy. They are nearly all residents of Bangalore and pensioners by profession.

* A female prisoner.

Mahomedans 81.

The attached portrait is that of an average specimen of the low caste Musalmáns of Mysore. As a rule their features approximate more to the Turanian than the Aryan type, although, possibly from their eating animal food whenever they can get it, their habit of body is more robust than that of the ordinary Hindu. Their color is very dark, often nearly black; many of them are doubtless descendants of the converts of that practical theologian Tippu Sáib. The Labbé Musalmáns, many of whom are to be found in the Nagar Division, are said to have been originally Vellálas of the Coromandel coast who were converted by Hyder.

Employment in Jail.

17	Were employed	as tailors.
17	„	„ On wool and carpet work.
9	„	„ On cloth weaving.
6	„	„ As gardeners.
5	„	„ Printing and book binding.
2	„	„ Carpenters.
4	„	„ Rági grinding.
3	„	„ Water carrying.
4	„	„ Sweeping.
1	„	„ Dyeing.

The remainder being short-term men were principally employed on the current work of the jail.

The man, whose portrait is attached, is employed as a gardener, his crime was murder. Of the history of the two thuggs nothing is known, except that they were condemned for thuggi some 30 years ago.

East Indian.—Of the East Indians, one a weakly man is employed in the office, a second has been taught carpentering, and can do useful work. The third is employed on the press, and has turned out a first class workman both as a compositor and reader. The 4th is also employed as a compositor, but has not yet thoroughly learned his trade.

Brahman, ಬ್ರಾಹ್ಮಣನು.

The Brahman of Mysore will bear no comparison in point of physique with his castemate of northern India or Oudh. He is, as a rule, of low stature, and slight frame, and is in my opinion a shade or two darker.

The Brahmans are as a class exceedingly orderly and well behaved, being rarely convicted of infraction of the jail rules. They give no trouble on the score of caste; they are of course allowed to mess together as are all the distinctive castes. They omit all their ceremonies while in jail, even the Gáyatrí,* which has been for three thousand years the daily morning prayer of every Brahman, being dispensed with.

I have been unable to ascertain whether the Brahman prisoners pay a puróhitha or priest to perform their prayers vicariously during their imprisonment. I am informed that many of the wealthy Brahmans in the Province pursue this practice. A puróhitha goes round to their houses, and performs the prayers and ceremonies of the morning, for a monthly dole of Rs. 5.

I am rather inclined to think that they also perform their ablutions in a like vicarious manner, as I have noticed that very many Brahmans, some even in high Government employ, suffer from the itch.

The Brahman on release from jail has to pay heavily for purification before he is re-admitted to caste privileges; I believe Rs. 400 is about the average charge for a well-to-do Brahman. When a prisoner is poor, the fine is made up by subscriptions from wealthy castemates.

Employment in Jail.

1	has been	employed as a moulder.
2	„	Press and book binding.
1	„	Warder.
2	„	Cooks.
2	„	Account-keepers.

The man whose portrait is attached is a Brahman of the Smártha sect, many of whom are to be found in this Province. They acknowledge the Sringéri Swámi as their guru, and are worshippers of Sivá. They hold the doctrine of Adwaitam, which teaches that God and matter are identical, or rather, that everything is ideal and non-existent except God, hence they are sometimes called Mithyavádís, from Mithya—delusion. The two other Brahmanical sects, Vaishṇavás or Mádhvas and Shrivaishṇavás, are worshippers of Vishṇu; they hold the doctrine of Dwaitam, which teaches that the Creator is distinct from the creature;

* The famous Védic hymn commencing 'Tatsavitur varenyam bhargo devasya dhimahi, dhiyó yó nah prachodayát' 'Let us meditate on the adorable light of the divine Creator; may He rouse our minds.'

but they believe that the latter will be eventually absorbed into the divine essence. The prisoner in question is undergoing an imprisonment of 7 years for receiving stolen property. He is employed in the office.

Agasar, ಅಗಸರವನು.

Or washermen are employed in the exercise of their own trade, and in bleaching tent cloth.

Bestar, ಬೆಸ್ತನು.

The Bestars are palanquin bearers and fishermen. They are of dark complexion, and though of rather short stature, are powerful and muscular men. They worship Gangamma and pay reverence to water but drink toddy. During the year, 2 were employed on cloth weaving. The remainder were employed on the garden and jail duty. The man whose portrait is attached is undergoing a sentence of 3 years for dacoity. He is employed in superintending the weighing and issue of rations.

Gánigar, ಗಾಣಿಗನು.

The Gánigars are stout, broad faced, dark brown men of moderate stature. Their principal employment is the cultivation and extraction of oil. They are divided into two sects. One sect worships Vishnu, the other the Linga. One sect yokes one bullock to the mill, the other two; they are called Gadigava in the Nagar Division.

One man of this caste has been taught book binding and one cloth weaving.

Golla, ಗೊಲ್ಲನು.

The Gollars are cow-keepers. Their complexion is dark, heads rather narrow. They worship Krishna. One man has been employed on the press, and 7 on weaving.

Pariah, ಹೊಲೆಯನು.

11 Pariahs have been taught cloth weaving, 12 are employed on wool. The rest on jail duties, gardening, &c.

The man whose portrait is attached may be taken as a fair representative of this useful but not ornamental class.

Jaina, ಜೈನನು.

There was only one Jain confined in jail during the year. She was a respectable woman, who, from grief for the loss of her children, attempted to commit suicide.

Kumbára, ಕುಂಬಾರನು.

Or pot-makers are employed generally at their own trade.

Kurubar, ಕುರುಬನು.

The Kurubars are shepherds, as the derivation of their name (kuri ಕುರಿ a sheep) indicates. They are a dark hardy race. They must not be confounded with the Kád Kurubars, who haunt the skirts of the Nílgirís and Biligirirangana hills, and the jungles of Coorg. They worship Bhyra, an incarnation of Sivá.

They are generally employed in the garden as they lack intelligence, but 5 have been employed on wool and cumbly work.

Láda, ಲಾಡರವನು.

Ládas are a fair race of moderate stature; they somewhat resemble Rajpoots in appearance. Their favorite deity is Bhaváni. In their customs and ceremonies they resemble Brahmans.

The original of the above portrait is undergoing a sentence of five years' imprisonment for abstracting Rs. 500, the property of his mother; he is employed as a book binder.

Uppára, ಉಪ್ಪಾರವನು.

Dark, muscular men of the Madava caste. They are lime-burners and salt-makers by trade; they worship the Goddesses Gangamma and Ellamma. They are employed in jail on general duty.

Banajigar, ಬಾಣಜಿಗನು.

A Telugu race of average stature, and fair complexion; their features are good, hands and feet well shaped; they are generally cultivators and tradesmen; they worship Vishnu, drink liquor, and eat meat.

The Balégárs or makers of glass bangles are a sub-division of this caste; they neither eat meat, nor drink wine.

One man of this caste has been taught bookbinding; one is a carpenter; one a carpet maker; one is a warder; the remainder are employed on general duty.

Wakkaligars, ವಕ್ಕಲಿಗನು.

The Wakkaligars are cultivators. Dark complexioned men of average height, and rather intelligent. There are 62 different varieties of this caste in Mysore. Many of them are Lingáyets by

religion, others worship demons of the woods. Amongst some tribes "Aliya santána" or succession in the female branch, prevails. In jail they are generally orderly and industrious.

Employment in Jail.

1 was taught carpet making.
2 employed on the press.
4 carpentering.
5 cumbly weaving.
4 gunny do.
2 ornamental pottery.
2 cloth weaving.

The original of the attached portrait is undergoing a sentence of 10 years for dacoity; he is a well conducted man, and is employed as a warder.

Bádar, ಬಾಧರು.

Generally of good stature, hardy and muscular, of dark complexion, with square heads and high prominent foreheads. The Bédars are some of our best men. They are employed as carpenters and blacksmiths principally, or as warders, and work and garden superintendents. They are very intelligent and tractable, and excel even the Lambánís in their faculty for acquiring trades.

In their native state, they are good huntsmen. They appear to be identical in race with the Vedars of Tamil and Malayalum districts. A large number of them are settled in the Nagar Division, where they formerly lived under their own Pálégars who carried on an incessant predatory warfare with their neighbours. "The terrible spearsmen of Chituldroog" were recruited principally from this class. In the present more settled times, many of them employ their leisure in robbery; but I believe them to be a well disposed race, who only require a proper vent for their abundant energy. They are said to have migrated originally from the Deccan.

Of the men whose portraits are attached, one is undergoing a sentence of 10 years for dacoity, and is employed as a carpenter. The older and stouter has been sentenced to 5 years for dacoity, and is employed as civil warder.

Chuckler, ಚಂಬಾರರು.

In Kanarese Mádiga—Black, muscular, ugly men. The very lowest of the low castes; even the full blooded Pariah will not eat with them. The Dhers of the Nagar Division, who are little better

than slaves to the land-owners, being in fact *adscriptus glebæ*, are an allied tribe. They are to a certain extent a civilized class. They remarry their widows, eat meat, and drink anything they can get.

During the year

Employment in Jail.
- 1 has been taught cumbly making.
- 4 employed at tent making.
- 1 carpet making.
- 8 carpentering.

The original of the above portrait was sentenced to 7 years for highway robbery. He is employed as a barber.

Dávánga, ದೇವಾಂಗದವರು.

A fair race of moderate height, but are not very robust. They are cloth weavers by profession. They wear the sacrificial thread, and consider themselves superior to Brahmans. They worship Vishṇu, and in some respect resemble Lingáyets, who will not, however, eat with them.

Four men of this caste were employed at cloth weaving during the year.

Kómati. ಕೋಮಟಿಗರು.

A fair race resembling in some respects the Brahman. They worship Kannikáparaméshwari, the wife of Sivá. They are proverbially penurious. Their women are obliged as a rule to marry their maternal uncle's son. Their general employment is merchandize and money lending; in Bangalore many wealthy Kómatís are engaged in silk merchandize.

One man was taught carpentering, another carpet weaving; a third was employed as a warder.

Nagarthá. ನಗರತವರು.

A rather dark muscular race of good stature. They are divided into two classes who worship Vishṇu and Sivá respectively. These sects sometimes, however, intermarry, the tongue of the woman being first burned with a hot iron. They neither eat meat nor drink wine. They are cultivators and shop-keepers.

Two of them were employed in jail as weavers.

A dark, spare, and hardy race, by profession gardeners, and very good

Tigalar, ತಿಗಳರು.

ones. The vegetable market of Bangalore is entirely supplied by this class. They eat meat, but do not drink wine.

They worship Dharmarája, the son of the eldest of the Pándus. The men are very industrious, but the women are quarrelsome, and so noisy, that a "Tigaļá's whisper" has become a proverb.

They are generally employed in the garden, though one man was taught cloth weaving.

Agasáléi, ಆಗಸಾಲರು.

Light brown men with well cut intelligent faces. They belong to the Pánchāļa or five allied crafts of goldsmiths, coppersmiths, blacksmiths, carpenters, and masons, supposed to be descended from the five sons of Vishvakarma, the Hindu Vulcan. Kāļi is their favorite divinity. They wear the triple cord and consider themselves superior to Brahmans with whom they will not eat. The Brahmans of course look down on them in turn.

They work in jail at their own trade. One was, however, employed in type casting, at which he did valuable work.

Lambáṇí, ಲಂಬಾಡರು.

Lambáṇís are employed principally as gunny makers, carpet makers, blacksmiths, and carpenters. They are identical with the Brinjaries of Northern India. They resemble them in features and dress, except that their women do not wear the remarkable horn which forms so distinctive a part of the northern woman's dress. They speak amongst themselves a peculiar dialect of Hindustani, which the inhabitants of the country do not understand. They are found all over the Province in small communities called tands, each under the pastoral government of a Náyek.

Since the country has been opened out by good cart roads, numbers, of them have abandoned their wandering habits and settled down in village communities, in many instances in the neighbourhood of coffee plantations, where they find readyemployment. Their favorite divinity is Banishankari, the Goddess of woods and forests. In jail, though somewhat energetic and enterprizing, they are nevertheless as a rule orderly and well disposed. They have a ready faculty of acquiring

handicrafts, and become excellent carpet makers and weavers. They also make fair carpenters and blacksmiths.

The man whose portrait is attached was leader of a gang of robbers, and was condemned to 12 years' imprisonment for a dacoity committed in the Nagar Division. He has been six years in jail. He is employed as a warder in the Juvenile Reformatory, and has developed great taste for gardening. He is most inoffensive and active, and the boys seem much attached to him.

Chátáli, ಚಾಟಾಲಿ.

A bamboo colored able bodied race, wandering mendicants by profession, worshippers of Vishṇu. They are looked upon as priests by Pariahs and inferior Hindus; as a rule they drink. They are said to have come from the Coromandel coast.

Darji, ದರ್ಜಿ.

Slight fair men of rather low stature, tailors by trade. They are principally Mahrattas as is the original of the above portrait. Krishna is their favorite divinity. In jail they are employed at their own trade.

Dombar, ದೊಂಬರು,

The Dombars are jugglers, tumblers, and beggars by profession, and they are held in bad repute by their neighbours. They are supposed to have come from Northern India. Their dialect resembles the Hindustani. Their habits in some respects bear the marks of civilization, as they eat meat, and drink strong drink.

The above is the only specimen of his race who has been confined in jail, his countenance speaks for itself. He seems almost devoid of intelligence, and is employed generally in attendance on the bricklayers, as he is strong and can carry a good weight. He is quiet and docile. He was sentenced to 7 years' imprisonment for dacoity.

Idiga. ಈಡಿಗರು.

Dark complexioned, tall, active men, by profession drawers and sellers of toddy. In the Nagar Division they are called Halépaika and are good sportsmen. They worship the Hindu deities generally, but pay reverence to them under the form of earthen pots, many of which of divers forms may be seen heaped upon their shrines. They believe that

men who die before marriage become Virakas ; them they propitiate with frequent offerings, as they believe them to be (when slighted) of a revengeful disposition.

Employment in Jail. { 2 cloth weavers. 1 Tóti.

Koracher, ಕೊರಚರು.

They are a dark and ugly race with flat noses, retreating foreheads, and as the table shews, of diminutive stature. Their ostensible employments are carrying salt and grain, and basket making, but they are all thieves and robbers by profession and practice, and bring their children up to the same trades from early childhood. Their language is a dialect of the Tamil. In jail they are as a rule ill conducted and utterly untrustworthy ; they are employed principally in basket making at which they are expert, and on garden and cooly work. One only was taught a trade during the year, and he proved a fair carpet maker. Their intelligence is low, and their moral faculties seem quite undeveloped.

The original of the portrait is undergoing a sentence of 3 years for dacoity. He is employed as a weaver.

Mahratta, ಮಹರಾಷ್ಟ್ರರು.

Brown colored active men of about the middle height with intelligent features. They are of Kshetriya origin, though amongst many of them traces of a mixture of blood may be detected. Formerly for the most part soldiers ; they have since the Province became settled betaken themselves to cultivation, though many still find employment in the local corps and in the police. They usually speak the Kanarese tongue. They eat meat, but do not drink wine. In the wilder districts they will eat the cheetul or spotted deer, but not the sambur. In the Nagar Division, the Kumari Mahrattas, who cut down the jungles and cultivate the land for 2 or 3 years' nd then abandon it, belong to this caste.

The Mahratta Gollars also, who live in the jungle and keep large herds of buffaloes upon the milk of which they live, are another subdivision.

Employment in Jail. . . { 3 tailors. 1 carpenter. 2 pressmen. 1 binder.

Súdras of the Lingáyet persuasion, whose customs have been already described.

Shiváchár, ಶಿವಾಚಾರದವರು.

Employment in Jail.
- 2 pressmen.
- 4 wool work.
- 4 carpet making.
- 4 cloth making.
- 1 cook.
- 1 store-keeper.

Sáligar, ಸಾಲಿಗರು.

A very dark race with features of a somewhat Ethiopian caste; they are principally found in the Ashtagram Division along the skirts of the Biligirirangana hills, where some of them have settled down as cultivators; others earn a precarious subsistence by cutting and selling wood. The Iraḷás and Kád Kurubas are allied tribes. The latter are found always in the thick jungle on the skirts of the Nilgirís and Biligirirangana ranges, and in Coorg. I have not observed them along the Western Ghâts. They are divided into two classes, the Betta (or hill) Kurubas, and the Jénu Kurubas who live for the most part by collecting honey.

The Iraḷás again are found in the plains, and a clan of them is located not far from this in the Mágadi Talook. They also are skilled honey collectors and hunters. The whole three tribes have many points of resemblance. They all resemble each other in features and in the shape of their heads, having flat noses, large mouths, retreating foreheads, and woolly hair; but these points are much more marked in the Iraḷás, who are also the most muscular and athletic. The Kád Kurubas again appear to be one of the lowest types of humanity, being of diminutive stature and very savage in their habits. They build their huts in the most remote and dense jungles, and desert them if they are even approached by Europeans. All worship Bhútás or wood demons, and are supposed (the Kád-Kurubas especially) to be skilled in magic; they are frequently sent for by the Badigas of the Nilgirís to discover thieves by their incantations. They are much dreaded by the Badigas on account of their magical powers.

The Hassalas of the Nagar Division closely resemble the Sóligas; they are found like them on the skirts of the hills, and like them are sometimes employed in cultivating betel and pepper gardens.

All these tribes are doubtless allied, they are all well acquainted with the habits of wild animals, and make good trackers.

The original of the above portrait is a most favorable specimen of his class, and I do not think that he is a pure Sóliga. He has nearly completed a sentence of 7 years for dacoity, and is employed as a warder.

Principal Manufactures.

The principal manufactures at which the prisoners have been employed during the year were,—woollen and cotton weaving, tailoring, tent-making, printing, type-casting, book-binding, carpenter's and blacksmith's work, and pottery.

Woollen.

In wool the principal products are horse-rugs and cumblies, from which source a profit of Rs. 1,472 has been realized, and carpets, the returns from which have amounted to Rs. 713-2-8, making a total from woollens of Rs. 2,185-8-3. The carpet manufacture has been considerably improved during the year, through a more careful selection of wool, and a better assortment of colors; and during the coming year I have no doubt that it will prove more profitable than heretofore.

Five carpets and five rugs were bought by Messrs. Arbuthnot and Co., of Madras, for the English market.

Cotton.

The profit realized from this source has been Rs. 2,915-2-10, of which Rs. 2,047 are to be credited to the tent manufactory. The number of tents sold during the year was 43, of which 20 were sold to Government. The cost of carriage for these 20, had they been bought at Jubbulpore, would have amounted to Rs. 820-2-10.

The tent manufactory has, however, proved by no means so remunerative as I had once reason to hope it would have done, owing to the enormous rise in the price of cotton. Spun cotton which last year could be bought for Rs. 7 per maund, having this year risen as high as Rs. 13½. The raw material of a hill tent of 12 feet square was thereby increased in price from Rs. 175—4—9 to Rs. 263—3—6, and a diminution in the anticipated profits of the year in cotton goods, of no less than

Rs. 4,238 was the result. This caused me much disappointment, as I had succeeded in training a body of skilled workmen, whose labor under ordinary circumstances would have been most profitable, and to whom I could not teach a new trade without much loss of time. I however removed 70 men from the cotton manufactory, and put them to other employments, principally to blacksmith's, carpenter's, and carpet work.

Printing.

In last year's report I stated that 12 men were being taught English with a view to their being employed as printers. Early in January they began to work, and during that month the profits of the press amounted to Rs. 107—14—8 after paying all expenses.

Since then I have gradually increased the number of printers to 24, and the profits have amounted from Rs. 107—14—8 in the month of January to Rs. 943—12—6 in December.

The total earnings of the press during the year have amounted to Rs. 4,853—2—9.

The earnings of each man employed on the press averaged Rs. 243—2—6 for the year, and as each prisoner cost during that time for food, clothing, guarding, and superintendence Rs. 66—11—6, he has earned a clear net profit of Rs: 176—7—0 ; which is far more than I can say for men employed on any other branch of manufacture ; the work done also has for the most part given satisfaction, and the printing of this report,* as compared with that of 1868 which was printed in April of this year, will shew how great has been the progress made by the men.

Two new presses are expected from England early in the coming year, and should we find it as easy to procure work next year as we have hitherto done, I have no doubt that the press will clear at least Rs. 10,000.

† The whole cost of the establishment during the year including the pay of the Instructors and the cost of ink, &c., amounted to Rs. 758—10—0 only.

* Has also been printed separately at the Central Jail Press.

† The paper has been always supplied by Government, or by the persons sending work.

A list of the principal works executed during the year is appended :—

7,600 Forms for Dy. Supt.'s Court, Shimoga.
700 „ Military Assistant's Office.
3,000 „ Post Master, Bangalore.
20,000 Statements and Returns for Coorg Revenue Survey.
1,400 Office Statements for Superintendent of Coorg.
12 Cases for Judicial Commissioner's Court.
20 Copies of Survey Assessment for Chief Commissioner of Mysore.
40 „ Forest Report for Secretary to Chief Commissioner of Mysore.
100 „ Kolár District Gazetteer.
80 „ Coorg Budget for 1870—71.
300 „ Police Manuals for 1870—71 in Kanarese.
54,350 Kanarese Anché Chellans.
1,750 „ Receipts do.
1,000 Copies, Act XXVII of 1860.
1,000 „ Act XIV of 1859.
2,000 „ "Bálagraha"
} In Kanarese.
300 „ Treatise on "Asiatic or Epidemic Cholera."
16 Examination Papers, Engineering School.
200 Report on Irrigation.
20,000 Blank forms for Districts.
36 Copies, Catalogue, Mysore Museum.
100 „ „ Books in Small Cause Court.
24 „ Municipal Proceedings for 1865—66.
20,000 Blank forms for Police.
5,000 „ for Dy. Acctt. General.

Type Casting.

As a good deal of Kanarese work is required by Government, and by private individuals, and as Kanarese type is not to be bought in any of the shops, I procured a set of matrices, which were kindly lent me by the Superintendent of the Government Press, and cast a full fount of Kanarese type weighing 1,160 lbs ; the value of which after deducting the cost of raw material amounts to Rs. 2,084—11—0. In addition I have cast 220 lbs of pica quadrats and leads of the value of Rs. 140.

Statement shewing the Value of work done by the Central Jail Press during the year 1869.

	Receipts.			Expenditure.			Net Profit.			Daily No. of Prisoners.	Earnings per man.	
											Rs.	As P

Total.....	5,511	12	9	758	10	0	4,853	2	9	19	243	2 6

The amount realized by Kanarese printing was Rs. 441—2—0

Book Binding.

The amount realized by book-binding was Rs. 251—2—2. The number of men employed thereat averaged 10.

Blacksmiths.

The number of men employed in the smithy has been 18, and the value of their earnings Rs. 806—6—3; but in addition, the current work of the jail, (that is to say, the repair of all the garden tools, the repairs of iron work of barracks, of carpenter's tools, &c., was carried on by them. A photograph of a specimen of their work is attached.

Carpenter.

The number of carpenters employed was 29 ; but as a considerable part of their time was taken up in jail work, the sum realized by the sale of articles manufactured amounted to Rs. 474—2—0 only.

Specimen photographs of works are attached.

	Rs.	As.	P.
a Sums realized by blacksmiths	806	6	3
b Carpenters	474	2	0
c Pottery and miscellaneous	700	15	3
Total..	1,981	7	6

Potters.

The number of potters was sixteen. Much of their time also is taken up in jail work; but they have nevertheless made some advance in the art of ornamental pottery as the accompanying photograph of some of their flower vases will shew.

The number of jewellers averaged 16, and I append a specimen photograph of their work.

Results.

The results of the manufactory have been by no means so satisfactory in a financial point of view as I had reason to expect at the close of last year that they would have been.

In the first place the year has not been a healthy one, as I shall presently shew, and I was obliged by the state of the prisoners' health to shorten the working hours of many men, and to remove some from the hard labor to the medium and light gangs. Secondly, at the close of last year, one hundred able-bodied men were removed to Kolár, and in the month of November a further body of 50 was sent to the same place, while 40 weakly men were received on the eve of 31st December 1868 from Mysore, of whom 4 were sent at once to hospital, and 21 were subsequently admitted; whilst of the remaining 15, 8 only were fit for hard work; thus the average strength of 900 men represents a strength of 789 able-bodied men plus the sick and infirm of 100 additional. And lastly, as already pointed out, the tent manufactory was almost swamped by the high price of cotton, which caused a diminution in the profits from that source, of Rs. 4,238.

I have reason to believe, however, that this depression is only temporary, and I look by no means despondingly to the future.

The progress made by the manufactory is shewn by the following table:—

Earnings for	Average strength.	Rs.
1866	1,021	5,768
1867	1,173	7,234
1868	1,043	11,361
1869	900	14,380

*The average earnings of each man employed on manufactures for the last 4 years are given below:—

	Rs.	A.	P.
1866	15	5	2
1867	21	0	0
1868	28	1	1
1869	39	8	1

In calculating the value of the direct returns from the prisoners' labor however, it will be necessary to take into account the value of the articles remaining in store on the 31st December, and of the raw material, all of which was purchased *from the profits of the current year*, with the exception of stock to the value of Rs. 1,300 remaining in store from the year 1868.

†Value of manufactured articles in store on the 31st December 1869	Rs. 3,000	As. 0	P. 0
Raw material...	871	0	0
Total Rs.....	3,871	0	0
Deduct remaining from 1868.....	1,300	0	0
Rs.....	2,571	0	0

This added to Rs. 14,380—0—0 raises the prisoners' earnings in a legitimate manner to Rs. 16,951, and increases the amount earned by each man employed on manufactures to Rs. 46—9—1.

The indirect earnings of the prisoners amounted to Rs. 1,891—3—6.

	Rs.	A.	P.
Tools made and repaired for the manufactories	117	6	6
Do. for garden	155	8	0
Repairs	195	8	6
Pottery	191	14	0
Baskets	119	6	0
Miscellaneous	356	8	6
Labor of men employed on white-washing, tarring, &c.	755	0	0
Total Rs.....	1,891	3	6

*As stated in last year's report, a number of weakly and infirm men are employed on the manufactures whose labor is almost useless, and who therefore diminish considerably the average earnings from the manufactory and garden works. I would instance the wool pickers, cotton reelers, weed pickers, frighteners of birds and such like.

† Most of these articles have been since sold. (March 15th, 1870.)

The following table will shew roughly to what branches of manufacture the sum of Rs. 14,370 is to be credited.

Description.	Amount.	Average No. of Men employed.
Tents	2,047	141
Other cotton goods	868	
Carpets	713	30
Horse rugs, cumblies, &c.	1,472	25
Book binding	251	10
Printing	4,853	19
Chases, &c., for Press	109	4
Type casting and quadrats	2,085	4
Blacksmiths	806	18
Carpenters	474	29
Potters	588	16
Miscellaneous	113	19

It will be observed that I have credited the manufactures with the value of the type cast, and chases made for the press. This is I consider a legitimate proceeding, and for the following reason,—type is not like pots and baskets made for jail use, a perishable article. It would at this moment fetch to the full the value which I have put upon it. Had I not cast it, I should have had to purchase it, and as I before remarked Kanarese type is not procurable; whilst its value to the manufactures is proved by the fact of Rs. 441—2—0 having been already cleared from Kanarese printing alone.

Moral aspect of the Manufacture.

It is now time to consider the manufactory in its moral aspect, and I am of opinion that as far as its civilizing influence is concerned, the effects have been satisfactory. There can be no reasonable doubt that many, indeed I may say a large proportion of the older residents of the jail, are beginning to acquire habits of steady industry. They require less constant looking after than before. They take a pride in their work, and the quality of the work has much improved in consequence. I have already adverted to this matter in page 57.

I know that it is maintained by many, that these effects are only temporary; that, as soon as the prisoner is released, he will return to his evil ways; that he will never employ himself at a trade learned in jail; that except inasmuch as his earnings are devoted to a reduction of the jail expenses, the time expended in teaching him is time thrown away,

and the labor is labor in vain. But what then, I would ask, is the use of education, I mean the higher education which instils self-control, industry, subordination and self-respect. Is the mind of the prisoner (I do not mean the habitual criminal, but the criminal of whom so large a proportion of the jail population is composed) so utterly diseased and rotten, that there is no prospect of its cure? It appears to me somewhat reasonable to expect, that the prisoner upon his release will be actuated by the same motives which govern the actions of his unconvicted fellows, to wit by habit and self interest. If he has acquired in jail, habits of industry and the order of cleanliness and self-control, (of which qualities I have no hesitation in saying that many prisoners have given unmistakable indications) he cannot surely throw them off, as he puts away the prison clothes upon his release; and if he finds that by means of a trade acquired in jail, he can earn a decent and comfortable livelihood, it seems to me improbable that he will at once revert for his living, to the precarious wages of crime.

But I am in a position to bring forward a few facts in confirmation of the foregoing argument.

It will be readily understood that I have but little opportunity of keeping a prisoner in view after his release, or of ascertaining the course of his future life.

During the past year however, accident made me acquainted with the movements of one or two men. One of these men who learned the art of book binding, received employment in the Mission Press after his release. Four men were imprisoned for dacoity; they served in jail for 13 years, and the remainder of their sentence (one year) was remitted in consequence of my having brought their uniform good conduct to notice; these men were all Bédars by caste. One of them who was trained in jail as a blacksmith and was an excellent workman, has opened a blacksmith's shop in his village near Chituldroog. The three others combined to set up a carpenter's shop, and as they were all skilled workmen I have no doubt that they will do well.

A fifth man, a Musalmán by caste, was taught carpet weaving. His village was Benkipura near Shimoga, and he requested me after his release to recommend him to Doctor Marcrae, the Superintendent of the Shimoga Jail, in order that he might be entertained for the purpose of

teaching the prisoners carpet making. As he was a very well conducted man, I did so, but I have not heard the result. Another man was taught printing and received employment as a compositor in one of the Bangalore presses, at Rs. 8 a month, immediately upon his release. One of the juvenile prisoners, a Musalmán, was released about 6 months since. I took him into my own employment. He is an excellent gardener, and makes himself generally useful, and I have every reason to be satisfied with his conduct.

It is not fair to assume that these are the only instances of men who have derived benefit from their sojourn in jail, because they are the only ones which have come to my notice, for from the character and conduct of many of the men released, I have little doubt that they have done equally well.

In teaching a man a trade, his caste prejudices must of course be taken into consideration. It is of no use to teach a Brahman harness-making, or a dhóbi carpentering ; but even if a man be taught a trade to which he will not apply himself after his release, his intelligence is developed by the very act of learning, and certain of his prejudices are shaken or worn away, and his education so far progresses.

Garden and Earth Work.

The garden returns shew a slight increase which would have been considerably higher, but for the unusual drought which prevailed during the months of May and June.

During those months (when vegetables fetch the highest prices) a considerable portion of the garden had to be thrown out of cultivation for lack of water ; indeed more than half the garden suffers from this cause, and even in favorable seasons produces but one crop in the year, whereas other portions produce two and sometimes three.

To relieve this want in some measure, I sunk three wells during the year, one, a very fine one lined with stone, 58 feet in depth, and the other two about 25 feet. These works diverted the labor of a considerable number of the garden hands for some months, and necessiated an expenditure of Rs. 197—8—0 for stone, &c.

The amount realized from the labor of men employed on the garden was Rs. 2,461—6—0, of which Rs. 419—8—3, was expended in stone

for the wells, seed, &c., leaving a balance of Rs. 2,041—13—9 to the credit of the jail, which, added to Rs. 424—7—1, value of stock remaining in store on the 31st December, gives Rs. 2,476—4—10. The accounts for the previous year shewed cash realized 2,157—14—11, stock in hand Rs. 412—4—0, total Rs. 2,570—2—11. But to this year's account should be added the sum expended in stone, and the value of the wells, which justifies me in saying that there has been a slight advance on the previous year.

The number of men employed on garden works was 76, against 80 in the previous year; the value of each man's earnings, without taking into account the sum sunk in the wells, was 37—15—9, against Rs. 26—10—3.

As during the previous year, a considerable proportion of the manufactured articles was sold to Government, a mode of proceeding which (for the reasons detailed in my report for that year) is in every way desirable. In it however, I omitted to notice the great difficulty sometimes experienced in recovering the price of articles from private individuals; whether they labor under the idea that a paternal Government is bound to provide them with horse jhúls and other comforts gratis, I know not; but that many of them do exhibit a costiveness in the payment of debts to the jail, which is not apparent in their dealings with private manufactures, is I regret to say the case; to such an extent did this habit manifest itself in the case of a Judge in the Madras Civil Service, that after sending him seven official memorandums, to which he did not condescend to reply, I was obliged to threaten him with legal proceedings. This communication also having failed to attract his attention, I was reluctantly obliged to file a suit against him in the Judicial Assistant's Court, when the amount of the debt (Rs. 60—3—0 only,) was immediately paid into Court with costs.

Jail Service.

The jail duties of warding, cooking, sweeping, grinding, washing, &c., have this year occupied 27 per cent of the convicts, against 29 during the previous year.

The warders are all prisoners selected on account of good behaviour. There is one warder to each room, or four to each block of barrack. Three of these however work during the day, the other is employed in

looking after the barrack and its work-shed, and in superintending the issue and cooking of the rations.

* Nine prisoners are employed as work overseers, as per attached list. When not superintending the work to which they are attached, or teaching new hands, they are expected themselves to work.

Work Overseers on Manufactures.

Carpet making	1 man
Wool spinning	1 „
Tailors	1 „
Weaving	2 „
Cumbly do	1 „
Potters	1 „
Blacksmiths	1 „
Carpenters	1 „

Machines. One printing press was bought, and three carpet looms, and twenty nine spinning wheels were constructed during the year.

Women. The average number of women was 19 only. Of these one has learned to work the sewing machine with some skill, and the remainder have been employed as heretofore in spinning, grinding, and jail duties.

They are as a rule orderly and well behaved, and comparatively healthy. They are all being taught to read, but, as will be seen by the education report, have not made very satisfactory progress; they do not appear to possess an equal faculty with the men of concentrating their attention upon the work in hand; possibly the presence of the male instructor proves too distracting.†

They are kept completely apart from the male prisoners in an enclosure outside the inner palisade of the prison, and are altogether

* These nine are included in the 27 per cent.

† They are taught by one of the boys, a young person of ten years of age, under the superintendence of the Schoolmaster. Notwithstanding his tender years he is a strict disciplinarian. He is a korcher by caste, and is exceedingly intelligent and seems to have the teaching faculty strongly developed.

superintended by the Matron, Mrs. Rodgers, whose management of them has given me every satisfaction.

Juveniles.

The average number of juveniles imprisoned during the year was 16; as usual most of them were committed for short terms, and for petty offences, thieving, lurking house trespass, and the like.

They are employed from 6 to 8 A. M., at garden work, from 8½ to 12 at school, from 12½ to 2½ at carpentering, and for the rest of the day till 5½ P. M. at gardening, cleaning the enclosure, and the like.

They have made fair progress in learning.

5 Can read English.
6 Can write and cypher.
4 Can read the 1st Book (*Kanarese.*)
5 Know the alphabet.

Ten were taught to do useful carpenter's work, and three learned to print ; of these 7 were released, two of whom were printers.

Their conduct has been very good. One received 6 stripes for disobedience of orders, and three were kept in solitary confinement for short periods.

I stated in last year's report that I had laid out the enclosure of their prison which is situated without the jail wall and quite apart from the adult jail, as a flower garden, which was altogether kept in order by their labor.

This garden has made great progress during the past year, though like the main garden it was somewhat damaged by the drought. I hope next year that it may be made contribute its share to the payment of the jail expenses through the sale of seeds and plants.

The boys take great interest in this garden, and the older residents have without exception turned out excellent gardeners. The senior boy, by name Móta, of the chuckler caste, has become a first rate gardener and skilfully superintends the new comers.

This garden is much admired by visitors, but I cannot say that the influence of flowers has had a civilizing effect upon many of them, especially upon the males of the ornamental class. Many of these persons, who in

their previous lives have given no indication of virtue, are here moved to righteous indignation at seeing young criminals lodged in so nice a place, (although its condition be due altogether to the labor of the little malefactors,) and their language on those occasions would be by no means edifying to the youthful inmates did they understand it.

But there is another class of mankind which is even more moved to indignation than that which is represented by the ornamental male. Of this class the wrong-headed conscientious man may be taken as the type. He is generally the most estimable of men, and often the most mischievous. Impressed with a sense of the dignity of man, as represented in his own person; from the height of his moral superiority, he looks down upon the young criminal as a creature so infinitely below him, as to be unworthy of any attention, save in the way of punishment, or of any discipline but stripes. Or because he is well acquainted with the laws of mechanics or with the rules of hygiene, he deems it impossible that he should be at all unlearned in the workings of the human mind. I have heard members of this useful class gravely assert, that the young prisoner upon his release would be in a worse position than when admitted to the jail; because, although he had been taught to read and to work at a trade, he had also been taught the cultivation of flowers, and had taken to it *con amore*, and had succeeded to a marvel. These men draw the line at vegetables, the cultivation of which they consider a legitimate employment for the young prisoner, and one likely to be practised with advantage in his future career; I do not exactly know why, because the young prisoner unless of the Tigalar caste is most unlikely to become a market gardener, whereas a love of flowers, if inculcated in early youth, will very rarely disappear in mature age, and it is of all loves, certainly the most innocent.

As far as the financial view of the question is considered, now that the garden is firmly established, and that a good stock of seeds has been laid in, and a number of plants collected from which to propagate young plants for sale, it should return a far greater profit than a piece of ground thrice its size if planted with vegetables, and cultivated by boys who can never be made to take kindly to that description of work.

But as to the humanizing influence of the system which I have pursued, I cannot speak too highly; and in dealing with this aspect of the

question, it must be borne in mind that the juvenile prisoner does not stand upon the same footing as the adult criminal, nor should his treatment be similar. For the most part City Arabs, often friendless, always hungry, they come to the jail in a condition more fit to excite compassion than to stimulate virtuous wrath; and when they find that though placed under a strict discipline, and, as shewn in the foregoing pages, kept constantly at useful employments from early morning till dark, still that they are treated as human and reasoning beings, that every word is not followed by a blow, and that a real interest is taken in their welfare; the change that comes over them in a few days is most marked and touching. The docility with which they take to learning and to work, and their progress in both is more quick than could be expected; and their desire to please and to obey the rules laid down for their guidance, is most satisfactory. With reference to the civilizing influence of flowers I may perhaps be considered a prejudiced witness; but that the boys with very rare exceptions take the greatest delight in their cultivation, and watch their progress and growth with affectionate interest, that the pursuit is a most harmless one, that it keeps them out of mischief, and finally that it may be made to pay, is beyond question. It may be said, in spite of the discipline maintained, and the confinement enforced, and the work done; that the juvenile prison is not a *prison*, but it cannot be asserted that it is not a Reformatory in the truest sense of the word, and that it has not done good*. And as I am clearly of opinion after an experience of two years, that the flower garden has been an important agent in promoting the good that has been done, by affording a humanizing and interesting employment, and stimulating a healthy spirit of emulation, I think it must be apparent, that the wrong headed conscientious man, or the ornamental male, who would uproot the flower garden and plant it with the chillie of commerce, would not do wisely, and would not do well.

*In addition to the boy whose case I have referred to in page 81 and whom I took into my own employment upon his release, I may mention, (as I am about to give over charge of the Jail to Dr. Henderson and shall not again have an opportunity of doing so,) that the head boy Móta has since been released, a portion of his sentence having been remitted for good conduct. On his release I made him a peon on Rs. 4 a month (to be paid from the garden fund.)and appointed him to the charge of the Juvenile prison. He has done remarkably well and given me great satisfaction. I have since had an application from an officer in the station for a released juvenile to be employed as a gardener, and as good gardeners are always in demand in Bangalore, I have little doubt that any of the boys who had done well may readily find employment upon their release.

IV. DIET.

There has been no alteration in the diet scale, except that I have substituted one ounce of rice, for three of baller on Thursdays. The baller I found was not eaten by the men. Unless cooked with peculiar care, it is neither a palatable, nor digestible grain.

The curry powder was also altered towards the close of the year, but no expense was incurred upon either head, as the rice supplied equalled in value the baller for which it was substituted, and the new curry powder was not more expensive than the old.

I did not think it necessary to issue the 3rd ration of meat sanctioned for the cold weather until the 30th of November.

After a more lengthened experience of the new stoves, I have still to report most favorably upon them, both as causing a great saving in the item of firewood, which has fallen from Rs. 4-7-2 per man to Rupees 3-12-11, and as ensuring the cooking of the rations in a more healthy and cleanly manner than could be attained by the old method.

The whole of the food of one barrack taken at hap-hazard is weighed every week, by the second Jailor, and the full tale has never been found wanting.

The rations, both raw and cooked, are continually inspected by all the Jail officials as heretofore.

V. WATER SUPPLY.

The water supply has been for the greater part of the year most scanty. During the months of May and June, the greater part of the water had to be brought from outside the jail enclosure, as the three wells within the walls, from which the drinking water had hitherto been drawn, became so loaded with salts, that I was obliged to abandon one of them altogether.

This circumstance was to be attributed in some measure to the lateness of the rains, but even during the past month (December) the water supply has again become scanty, and many of the wells are exhausted by 10 A. M.

I greatly fear that at no very distant period this jail will have to be

abandoned through failure of the water supply. The whole of the plateau, on which the jail and the pété of Bangalore are built, is being so persistently tapped by the sinking of new wells in every direction, to meet the wants of an increasing population, that the supply is daily becoming less and less, and even in localities comparatively distant from this, it has been observed for some time that the wells give in after four or five years, as the many dry wells (which even within my memory were full of water) abundantly testify.

VI. CLOTHING.

There has been no change in the prisoners' clothing during the past year.

The men, however, have been taught to take such good care of their clothes that they have lasted longer than before, and a considerable saving has been effected on this head, which will be noted in another chapter.

VII. CONSERVANCY AND DRAINAGE.

The dry earth system is still carried out, and has proved in every way satisfactory. The poudrette is buried for three or four months, and is then laid out on the garden (eleven acres) which it is just sufficient to keep well, but not heavily manured; after being buried for the period indicated, it is quite devoid of any offensive smell except in very wet weather.

The night closets have all been removed to the exterior of the wards at a cost of Rs. 2,676. This work was performed by the prisoners.

VIII. HEALTH OF THE PRISONERS.

On the 31st December 1868, there remained in hospital 25 sick, and during the year, 764 were admitted for treatment, against 775 in the previous year, and 1,003 in the year 1867.

Average Daily Sick for the three last years.

1867	17,126	Daily average,	46
1868	9,672	Do.	26½
1869	9,667	Do.	26½

Of the total treated during the years 1867—1868 and 1869—

1867	Cured	969	Released for sickness	6
	Died	63	Remained.	24
1868	Cured	759	Released for sickness.	2
	Died	9	Remaining.	25
1869	Cured	748	Released for sickness.	2
	Died	24	Remaining.	16
			Transferred to other Jails.	3

It will be seen from the foregoing table, that the health of the prisoners was (having reference to the comparative strength) considerably in a worse condition than in the year 1868, and that the death rate was much higher, although in both respects the jail contrasts most favorably with the condition of things not only in the year 1867, but in the two previous years of the jail's history, during which the death rate averaged 50·356 per thousand, while during the past year it was 26·6.

The cause of the excellent condition of the prisoners' health during the year 1868, as compared with the three previous years, was explained by me in my report for that year, and I shall now proceed to assign some cause for the falling off during the year under review. In the first place I would observe, that as already stated, 100 *able-bodied* men were despatched to Kolár at the close of last year, and 50 others were despatched to the same place in the month of November, with a view to relieve the overcrowding of this jail, which can accommodate 889 men only, at the low rate of 500 cubic feet per man. In addition 40 men were received from Mysore, of whom 4 were immediately consigned to the hospital and but 8 were fit for hard labor. So that the strength of the 900 of this year cannot be fairly compared, as far as the chances of sickness are concerned with those of an average 900 of the previous year.

But in addition to this, the year was a most unhealthy one. Cholera and dysentery prevailed in the district during the months of June and September, and from a return kindly furnished to me by the Deputy Superintendent, I find that the deaths in the town of Bangalore, amounted to 732, against 376 in the previous year.

During the months of May and June again, as previously stated, the wells were very low; one after a reference to the Chemical Examiner was abandoned, and much of the water for drinking and cooking

purposes had to be brought from a well without the jail enclosure, over which we had no control, and the cleanliness of which could not be effectually secured.

During these months dysentery and diarrhœa prevailed ; after the rains had fairly set in they gradually disappeared, and since the month of August no case of dysentery has occurred.

The following table will shew the diseases to which the 24 deaths are to be attributed with the ages of the deceased.

No.	Age.	Anæmia.	Asthenia.	Atrophia.	Bronch. Ch.	Diarrhœa.	Dysenteria.	Pneumonia.	Pericarditis.	Remarks.

Total.....		1	12	1	1	3	2	3	1	

Total deaths during the year 24.

Two of the deceased had been in jail for over 30 years and succumbed to the ordinary course of nature ; and though the death rate of 2·6 per cent as compared to the unusually low rate of the previous year is somewhat disappointing, still the sickliness of the season must be taken into account, and after all I doubt if the death rate will be found much in excess of that of the civil population.

I have again the pleasure to bring to notice the intelligence and zeal of the Hospital Assistant S. Arókyam Pillé. In addition to attending to his duties in an exemplary manner, he has published a practical and useful Manual on the nature and treatment of cholera, (both in English and Kanarese) which has met with the approval of the local and Madras Governments.

IX. ESTABLISHMENT AND OFFICE.

The establishment consists of 3 divisions:—

1. The permanent establishment
2. Contingent establishment which is liable to reduction when the number of prisoners decreases.
3. The Bár or local Infantry guard.

Both the permanent and contingent establishments have worked well. They are much steadier and better disciplined, and the punishment roll shews a falling off from 95 to 52.

I have the pleasure to report favorably upon the Chief Jailor, Mr. Hutson, whose conduct during the latter half of the year has given me great satisfaction, and whose intelligence and energy are at all times remarkable.

Mr. Brown, the Second Jailor, also, who is in sole charge of the garden, has done well, keeping up a supply of vegetables during the greater part of the hot weather in a most creditable manner.

Bár. The Bár guard is composed of 2 Subédárs, 2 Jamádars, 10 Havildars, 10 Náigues, 60 Privates, 4 Drummers of the local Infantry.

If they were but as efficient and alert as they are quiet and well behaved, they would be a most useful body of men.

X. FINANCIAL.

The total jail expenditure for the year 1869 has been Rs. 60,323—3—1, which is thus accounted for :—

	Rs.	As.	P.
1. Building	4,180	6	8
2. Diet	26,243	0	3
3. Clothing	3,432	10	6
4. Hospital	369	1	8
5. Miscellaneous	2,114	11	10
6. Superintendent's house-rent	1,200	0	0
7. Guards :—			
a. Permanent Establishment ..	16,319	5	8
b. Contingent guard	5,372	12	6
c. Clothing for do	831	2	0
8 Interest at 10 per cent on money advanced for purchase of presses and type	202	0	0

The average annual cost of each man has been Rs. 66—11—6 or Rs. 5—9—0 per mensem, or annas 3 per diem.

Office.

I have reduced the office by one Head Writer, and am about to pension one Mutsaddi. A saving of Rs. 50 per mensem will thereby by effected. A good deal of the work of these men is done by prisoners.

For the year 1867 the annual average cost per man was Rs. 82—14—3.

For 1868, Rs. 71—11—11.

The total expenditure per man, per annum, is thus divided :—

	Rs.	As.	P.
1. Building	4	8	3
2. Diet	29	3	4
3. Clothing	3	13	6
4. Hospital necessaries	0	6	7
5. Guarding and Establishment	25	0	10
6. Miscellaneous	3	11	1

This, if compared with the items of the previous year's expenditure, shews—

A decrease per man upon—	Rs.	As.	P.
Diet	9	5	1
Clothing	0	14	9
Miscellaneous	0	13	4
Total Rs.	11	5	2

An increase upon—	Rs.	As.	P.
Building	0	11	11
Hospital necessaries	0	0	9
Guards and Establishment	5	9	4
Total Rs.	6	6	11

Explanation of the Cause of the Increase.

Upon Building.

Rs. 2,676 were expended upon the night latrines. It is true that some of them were completed during the previous year, but all of them were paid for in this year's accounts.

Rs. 371—12—0 were expended on the cooking stoves.

	Rs.	As.	P.
Tarring Jail	355	0	0
White-washing	551	0	0
Repairs	226	10	1

Comparative Table of Expenditure.

Items.	1867.			1868.			1869.			Increase.			Decrease.		
	Total.	Per man.		Total.	Per man.		Total.	Per man.		Total.	Per man.		Total.	Per man	
Building	1,576	1	5 0	3,933	3	12 4	4,190	4	8 3	247	0	11 11	...	...	...
Diet	52,530	44	12 0	40,094	38	6 5	26,293	29	3 4	...	...	...	13,801	9	3 1
Clothing	6,788	5	12 0	5,042	4	12 3	3,433	3	13 6	...	...	...	1,609	0	14 9
Hospital necessaries...	400	0	5 5	381	0	5 10	369	0	6 7	...	0	0 9	12	...	...
Miscellaneous ...	3,482	2	15 0	4,885	4	14 5	3,315	3	11 1	...	...	...	1,570	1	3 4
Guarding and Estabt.	31,953	27	3 0	20,565	19	7 6	22,581	25	0 10	1,966	5	9 4	...	...	...
Total.....	97,272	82	12 5	74,900	71	10 9	60,121	66	11 7	2,213	6	6 0	16,992	11	5 2

Unless some more of the jail wall should fall down, it is to be hoped that the building account during the coming year will not exceed Rs. 1,000.

Hospital necessaries.

The increase in this account was very slight being only 9 pies per man, and is wholly accounted for by the increased sickness as compared with the previous year.

Guards and Establishments.

The increase under this head is accounted for by the higher rate of pay passed to the Superintendent on promotion, and by the reduction in the number of prisoners, which, of course, caused the pay of the whole permanent establishment to be divided amongst a lesser number.

The last item demanding explanation is that of Rs. 202, the interest for money advanced for the purchase of a press and type.

	Rs.	A.	P.
The cost of the press was	650	0	0
Old type bought at 10 per cent under cost price	420	14	4
New type at prime cost	947	6	2
Total Rs.	2,018	4	6

Now as this press has paid for itself twice over, and as it would fetch nearly, if not quite, as much as I paid for it, if now sold, and has also saved a large sum to Government in the hire of compositors, I do not think it fair to debit the expenses of the year with the entire cost, but I have allowed 5 per cent for the loan of the Government money, and 5 per cent for wear and tear of type, and as Government has saved more than another 5 per cent in the hire of compositors, I think it has made rather a good bargain.

The value of the prisoners' labor has now to be taken into account.

	Rs.	A.	P.
The out-turn from manufactures during the year amounted to	14,380	0	0
Value of manufactured articles in store, and raw material purchased during the year from manufacturing profits deducting value of stock remaining on the 31st December 1868.	2,571	0	0
Vegetables sold	2,042	3	9
Garden stock in hand	424	0	1
Total Rs.	19,417	3	10

Deducting this sum from the total expenses of the jail, the actual cost of each man will be reduced to Rs. 45—2—4.

The cost of each prisoner after deducting the value of his labor for the last four years is shewn below :—

The Value of the Labor of each Man employed on Manufactures for the last four years.

1866.	1867.	1868.	1869.
15—5—2	22—10—0	31—5—1	46—9—1

The Value of Labor of Men employed on the Garden for the same period.

1866.	1867.	1868.	1869.
...	8—4—11	32—2—0	37—15—9

*The Cost of each Prisoner after deducting the value of returns from his labor.**

1866.	1867.	1868.	1869.
86—5—8	75—3—2	55—8—8	45—2—4

The remarks made in last year's report as to the heavy weight with which the large number of aged and infirm, of life-prisoners, simple imprisonment men, thuggs, and transportation prisoners awaiting a passage to the Andamans, have burthened the jail resources, apply with equal force to the year under review; but in spite thereof, and of the sickly season, and of the unhealthy state of the cotton market, the manufactures have made some progress.

* That is to say the price of articles sold and value of stock in hand at the end of the year.

Do read a little	6	...	3	Thuggs and infirm 21.
Do do fluently	10	...	1	

The foregoing table will shew the progress made in education during the past year.

In last year's report I described the system pursued by me through which a large number of prisoners were being taught to read from 5 to 6 P. M., the only idle hour of the day.

This year I have extended the system to the instruction of the whole of the men, with the exceptions marginally noted. The men have made much progress in learning, and many men were discharged during the year who had learned to read and a still larger number who knew their letters.

Sweepers ...	... 29
Cooks ...	... 27
Warders ...	... 24

The men appear thoroughly to appreciate the efforts made for their instruction, and during the hour of study it is rare to see a man in any of the classes whose attention appears to be wandering.

NOTE—As soon as the adults have mastered the Second Book they are taught writing and arithmetic in a separate class.

Each class numbers 15, and is taught by a monitor generally selected from the more advanced scholars, and the whole are superintended by the school master who is in charge of the Juvenile Reformatory, and whose pay is Rs. 20 per mensem; this (with a small outlay for books or rather for the paper on which they are printed) is the sole cost of the educational establishment.

The progress made by the boys is noted in another place.

The women have not made much progress as already stated.

It is stated in the table that the thuggs and infirm are not being taught, by this it is meant that they are not *obliged* to learn as they are all old and will pass the rest of their lives in jail; but six of them have nevertheless of their own proper motion requested to be allowed to learn, and considering their advanced age they have not done badly, as one of them who knew a little Hindustani on admission can now read the first book in Kanarese, and 5 others know the alphabet.

As stated in the last year's report I placed the native Christians in a barrack room by themselves. Their number during the year averaged 9.

The Revd. De Kerezout, or one of his catechists, holds a weekly service for the Roman Catholics.

The Revd. P. Webber ministers to the Protestants, 5 in number (who are all East Indians) on Sundays, and frequently visits them through the week.

XI. GENERAL SUMMARY.—CONCLUDING REMARKS.

In conclusion I have not much to say. That the jail has made progress in discipline, in education, in economy and in manufactures, the figures which I have submitted sufficiently prove. That the health of the men, though worse than during the year 1868, is far better than it was during the three previous years and falls little if at all below that of the civil population is also I think apparent.

In proof of the moral effects of the system of discipline and education upon the minds of the prisoners and of the benefit which a great number of them are likely to derive from it, I can of course produce no figures. I can only state my own convictions, and trust that time will prove them to have been well-founded.

CENTRAL JAIL
SUPERINTENDENT'S OFFICE,
BANGALORE, *March* 1869.

S. T. HEARD, M. D., *Surgeon,*
Officiating Superintendent.

PART II.

REPORT ON THE
REVENUE ADMINISTRATION OF MYSORE
FOR THE YEAR 1869-70.

I. REVENUE.

The year opened with an outstanding balance of Rs. 3,58,601—9—2, and the total demand for the year amounted to Rs. 1,08,29,932—12—4, making an aggregate demand of Rs. 1,11,88,534—5—6. The demand for the year is shewn under the following heads :—

	Rs.	As.	P
1. Land Revenue including Forest and Abkári	86,13,054	8	4
2. Assessed Taxes	3,36,984	5	8
3. Customs	7,57,210	15	1
4. Opium	500	0	0
5. Salt	13,200	2	2
6. Stamps	4,25,156	13	4
7. Post Office	39,974	11	1
8. Law and Justice	91,318	9	5
9. Police	1,698	13	9
10. Public Works	64,770	4	8
11. Miscellaneous	1,21,984	10	4
12. Mint	13,600	0	0
13. Local Funds	1,64,990	3	11
14. Municipal Funds	1,85,488	10	7
	1,08,29,932	12	4
Add Balance of previous year	3,58,601	9	2
Grand Total	1,11,88,534	5	6

2. Of this amount, Rs. 95,27,154—0—4 were collected within the year, and Rs. 16,249—15—0 were remitted, leaving a balance of Rs. 16,45,130—6—2 outstanding at the close of the year. This large balance was due as shewn in the section on finance, to the postponement of the payment of the khists from March to May, which was sanctioned by Mr. Bowring on its being ascertained that the rents were collected from the ryots before the crops could be brought into the market and that they had consequently often to borrow money to pay up their assessment. This measure virtually reduced the actual receipts of the year by Rs. 24,00,000 or .33 per cent; but I fully concur in the wisdom of its adoption as one of important relief to the ryots.

Collection and Balance.

3. The demand on account of land revenue amounted to Rs. 72,69,272—9—0, against Rs. 73,53,180 in the year previous, shewing a decrease of Rs. 83,908. The subjoined statement will shew the particulars of the increase and decrease in the several items of land revenue resulting in the net decrease as above.

Land Revenue.

DECREASE.

	Rs.	As.	P.
By conversion of 899 kandís of Batáyi land into assessment	4,163	8	3
,, relinquishments of 14,607 kandís of land ..	1,81,386	10	6
,, reduction of rates of assessment on lands ..	27,327	14	8
,, sugar cane cultivation	3,240	5	1
,, decrease in coffee hálat	37,428	3	11
Total	2,53,546	10	5

INCREASE.

	Rs.	As.	P.
By 401 kandís of land found unassessed on remeasurement and assessed	8,850	15	9
,, 412 kandís of land on which the assessment was enhanced ..	3,084	1	2
,, 205 kandís of land held at progressive rates on which maximum rates have been fixed during the year	12,718	2	1
,, 9480 kandis of waste brought under cultivation	95,201	7	2
,, Cess on water	1,149	6	1

	Rs.	As.	P.			
By Increase in cultivation of Batáyi land	8,044	10	4			
„ Levy of assessment on cocoanut and supári trees not previously brought to account . .	6,210	15	7			
„ Recovery of full assessment on certain lands on completion of the repairs to the Lókáni aqueduct . .	10,343	9	4			
„ Amaráyi and renewal of coffee pattás	21,958	9	3			
„ Miscellaneous	2,075	15	3			
Deduct Increase. . . .				1,69,637	12	0
Net Decrease. . . .				83,908	14	5

4. It will be observed that the decrease is chiefly attributable to the large relinquishment of lands. This was due no doubt to some extent to the decline in the prices of grain ; but it was remarked in the report for 1868—69, that relinquishments of land had occurred especially in parts of the country where the survey and settlement had not been introduced, owing to the inequality of the assessment rates, which the Survey Department was expected to rectify. It was also stated that the effect of the revision of assessments in the settled talooks had led to the more highly assessed lands being given up in favor of those on which a low rate had been fixed. This supposition is borne out by the fact that lands assessed at Rs. 38,223 were thrown up in the surveyed and assessed talooks. Of the total decrease under this head, *viz.*, Rs. 1,81,386, no less than Rs. 1,33,213 occurred in the Nagar Division ; but on the other hand waste lands, bearing an assessment of Rs. 57,700 were taken up for cultivation in that division. Formerly the assessment on the cultivated portion of the holdings was only collected in many districts ; but of late years the collection on the whole area has been rigidly enforced, except in exceptional cases, and has doubtless led to the resignation of a large proportion of the lands included in this account. The season in the Nagar Division was also more or less unfavorable, and the absence of rain in the early part of the year caused the gravest apprehensions amongst the ryots. In the Chituldroog District of this Division the dry crops, with the exception of rági and jawari, are stated to have totally failed. Another cause for the relinquishment of lands was the limited period allowed, within which the ryots had to tender their resignation

of lands for the year. This prevented their being able to form an opinion as to the favorable prospects, or otherwise of the season, and led them to throw up their lands rather than run the risk of a recurrence of the bad seasons from which they have lately suffered. The period has been extended during the current year from March to April and May, and in the case of the Chituldroog District, which the monsoon does not reach till late, to the 15th of June, and it is hoped that this measure will have the effect of preventing in future such extensive resignations as those under advertence.

5. The area of the land newly taken up during the year under review in the settled talooks was 16,203 acres, assessed at Rs. 8,571, or at an average of 8 annas and 5½ pies per acre. The area of land relinquished during the same period was 53,893 acres, bearing an assessment of Rs. 28,166, or an average of 8 annas and 4 pies per acre. The assessment on the lands thrown up in the settled talooks of the Nagar Division only amounted to Rs. 28,166, whilst in the unsurveyed talooks of that division it aggregated Rs. 1,05,047.

6. The decrease shewn under the head of reduction of rates of assessment was due to a great extent to remissions on the mulberry gardens maintained for the rearing of silk worms, which had to be granted consequent on the failure of this branch of industry, owing to the epidemic that has for some time existed amongst the silk worms, and which has almost annihilated the breed in Mysore. The measures adopted to remedy this misfortune are detailed in another section on silk culture. The decrease under coffee hálat was due to a diminished out-turn of crops, caused by a bad season aggravated by the ravages of the borer.

7. The subjoined statement exhibits the distribution of the land revenue in the various divisions and districts of the Province.

Division.	District.	Amount. Rs.	As.	P.
Nandidroog . . .	1. Bangalore	9,80,402	3	1
	2. Toomkoor	9,12,964	12	9
	3. Kolár	10,49,392	9	4
Ashtagram . . .	4. Mysore	9,73,948	13	11
	5. Hassan	10,03,752	2	0
Nagar	6. Shimoga	10,73,615	6	11
	7. Kadoor	5,89,516	5	4
	8. Chituldroog	6,85,680	3	8
	Total	72,69,272	9	0

8. Of this amount, Rs. 24,90,012—11—8 were derived from the cultivation of wet lands, Rs. 30,02,746—0—4 from that of dry lands, and Rs. 11,47,746—8—8 from that of gardens. The several proportions of these sums derived from each division of the Province are shewn below:—

	Dry lands.	Wet lands.	Gardens.
1. Nandidroog Division. .	13,21622 0 9	7,99,556 7 8	5,37,305 15 1
2. Ashtagram. ,,	9,53,733 12 8	7,16,916 7 3	1,68,594 11 0
3. Nagar ,,	7,27,390 2 11	9,73,539 13 9	4,41,845 14 7
Total. .	30,02,746 0 4	24,90,012 11 8	11,47,746 8 8

Inam Lands.

9. The revenue derived from inam lands amounted to Rs. 3,76,019 8—3, being a net increase of Rs. 2,442—9—10 on that of the previous year.

10. The result of the settlement by the Inam Commissioner in the talooks named in the margin has been to raise the quit rent payable on inam holdings which have been enfranchised, or in which excess land has been brought to light, by an aggregate sum of Rs. 6,254-6-2.

Harihara. Dodéri.
Dávanagere. Molakálumúru.
Kanakuppá. Soraba.
Chitaldroog. Chennagiri.
Hosadurga. Honnáli.
Hiriyúru. Sirá.
Búdihálu. Toomkoor.
Pávagada. Koratagere.

Coffee.

11. Seventeen unauthorized coffee holdings were discovered in the Hassan District during the past year, and 334 new plantations were opened by natives in the Kadoor and Hassan Districts, causing an aggregate area of 4,100 acres. The total number of plantations was 21,845, comprising an area of 100,992 acres.

12. The proportion of these plantations as held by European and native proprietors was as follows :—

	No.	Area.
Europeans . . .	282	32,533 Acres.
Natives . . .	21,563	78,459 ,,

13. These statistics give an average of 115 acres for every plantation held by an European, and of 3*a*. 25*g*. for each native holding. The largest estate is estimated to contain 1,100 acres, and the smallest 20 yards.

14. The quantity of coffee exported during the year was 3,348 tons and 19 cwts which gave an excise duty at 4 annas a maund of 28 lbs of Rs. 66,978—13—3; whilst in the year previous it amounted to Rs. 1,04,407—1—2 on an export of 5,220 tons, 5 cwts and 86¾ lbs. The decrease is attributed to scanty crops, caused by the ravages of the "Borer" insect and bad seasons. The proportion in which this revenue was contributed by the European and native planters is noted below:—

	Tons.	Excise.
Europeans ..	590 2 35	11,802 5 5
Natives ..	2,808 16 5	55,176 7 10

Pasturage.

15. Under the settlement rules all assessed waste land is annually leased at public auction for pasturage. The amount realized under this head was Rs. 66,661—4—6, against Rs. 64,971—7—5 in the year previous. The increase of Rs. 1,689—13—1 accrued chiefly in the surveyed portions of the Nagar Division.

Sale of Government waste lands.

16. The amount realized by the sale of lands for coffee cultivation was only Rs. 382—9—0, a sign of the depreciation in the value of land for such cultivation owing to the panic caused by the ravages of the borer. The sale of building sites realized Rs. 3,159—2—8, giving a total of Rs. 3,341—11—6 obtained by the sale of waste lands against Rs. 5,292—2—10 in the year previous.

Miscellaneous.

17. The revenue realized under this head amounted to Rs. 1,15,765—14—10, shewing an increase of Rs. 19,777—8—1 above the receipts of the previous year, which aggregated Rs. 95,988—6—9. The increase was chiefly due to the item of "Amaráyi" or rents from groves, fruit trees, &c. During the year previous there had been a falling off of no less than Rs. 40,000 in the Nandidroog Division, which was ascribed to the unfruitfulness of the trees, owing to bad seasons.

Forests.

18. Under the head of forests the collections amounted to Rs. 3,70,815—7—5, against Rs. 3,46,668—4—9 in the year previous, giving an increase of Rs. 24,137—2—8, which was chiefly caused by a larger quantity of timber having been disposed of, and to better prices

having been obtained for sandalwood. The operations of the Forest Department are given in detail in a subsequent section of this report.

Abkári.

19. The abkári revenue for the year amounted to Rs. 9,72,976—7—11, against Rs. 9,17,815—8—4 in 1868—69, exhibiting an increase of Rs. 55,160—15—7. There was an increase of Rs. 28,072—12—6, under the item of toddy, owing to the high rates of the contracts tendered for the Toomkoor, Mysore and Hassan Districts. In the Nagar Division there was a falling off in consequence of the failure of the contractors during the year previous.

20. The revenue from arrack is now raised under the sudder distillery system by a still head duty, which realized Rs. 3,63,211—11—0 during the past year, or an excess of Rs. 31,305—10—4 over the receipts of the year previous. The number of distilleries remained the same as the previous year. There are 1,395 wholesale and retail shops for the vend of arrack, the license fees levied therefrom amounted to Rs. 71,251—13—8, being an increase of Rs. 758—9—3, on the amount realized during the year previous.

21. The cost of supervision (inclusive of contingencies) amounted Rs. 21,544, or 2—3—5 per cent of the revenue under this head.

Assessed Taxes.

22. The assessed taxes, which comprise the mohatarfa tax on houses, shops, oil-mills, &c., realized Rs. 3,36,984—5—8, shewing a net decrease of Rs. 8,979—2—11. The decrease was due to the transfer of Rs. 1,960 to the Municipality of Hassan and to the abolition of a tax on ryots who traded on sheep.

23. The number of houses is estimated at 944,254; but nearly one-eighth of this number which are occupied by Brahmans, Mahomedans, and the Rájbíndés, who have from time immemorial enjoyed this immunity, have hitherto been exempted from taxation. These classes have lately, however, been required to pay like all other people the municipal tax on houses in those towns in which Municipalities have been established.

24. The subjoined statement exhibits the number of 818,845 exempted from the house-tax.

	No.
Agricultural	565,187
Brahmans, Musalmáns, and Rájbindés ..	172,776
Headmen of Towns, Villages, &c. ..	28,238
Houses on which shop-tax is imposed ..	19,176
Houses on which Loom-tax is imposed ..	30,595
Do Do Oil-mill do ..	2,873
Total..	818,845

25. The analysis of the returns relative to the houses on which the tax is levied, according to the classification in force in Mysore, would give the following results:—

	No.
Terraced houses	26
Tiled „	18,225
Mud built „	23,939
Thatched. „	82,180
Total. . . .	124,370

26. The tax on shops numbering 28,146 amounted to Rs. 95,604 —1—7, shewing a falling off of Rs. 3,827—12—7, which was chiefly due to the closing of several coffee agencies in the Hassan and Kadoor Districts, and to a reduction of rates in the Bélúru and Harihara Talooks.

27. The number of looms at work in this Province is returned at 40,872, against 38,921 in the year previous. The increase shews a revival of this branch of industry which had been much affected by the results of the latter crisis. The realizations from the tax on looms, however, amounted only to Rs. 74,014, or Rs. 1,786 below those of the preceding year.

28. The tax on oil-mills ranges from 8 annas to Rs. 40, and the number of mills was reckoned at 3,492. The amount realized under this head was a slight increase of Rs. 213—12—0, shewing over that of the previous year Rs. 14,658—3—3.

29. A mohatarfa tax on the carts of traders, and all holding lands in addition to their shops, the purely agricultural classes being exempted, was authorized in January 1869, and Rs. 5,418—8—0 were realized from this source. In the Hassan and Kadoor Districts the tax was not levied owing to some misconception of the scope of the order.

30. The subjoined comparative statement will exhibit the realizations of the customs on sáyer duties for the years 1868—69 and 1869—70.

Customs.

	1868—69.	1869—70.
Supári	4,97,318	5,42,529
Tobacco	1,61,273	1,55,892
Opium	410	210
Pepper	1,378	3,264
Cardamoms	1,761	1,530
Cocoanuts, dry	7,471	7,614
Do fresh . ..	41,455	38,094
Betel-leaves	49,886	49,053
Piece goods	57,976	57,946
Miscellaneous	6,839	6,107
Total Rs.	8,25,767	8,62,239

31. After deducting the assignments as per margin to inam funds and to certain inam villages, the net balance credited to Government was Rs. 7,57,211 or $5\frac{5}{8}$ per cent in excess of the year previous. This result was due to a brisk trade in supári in the Nagar Division and to the recovery of certain arrears for 1868—69 of the duty on cardamoms and pepper, which had been reimposed during the year previous.

Municipal Funds	71,626
Inam villages	33,406
Total Rs.	1,05,032

32. Out of the total receipts, Rs. 2,76,300 were levied on goods exported, and Rs. 58,573 on imports from Her Majesty's Territories.

33. The cost of the collection of the sáyer dues amounted to Rs. 4—13—0 per cent on the collections. There has been no change in the agency employed, but it is in contemplation to farm out the octroi duties in the towns of Bangalore and Mysore.

34. The revenue under this head has never exceeded Rs. 500 for the past four or five years, and is derived from the annual lease of the monopoly to sell opium in the Ashtagram Division.

Opium.

Salt.

35. The receipts under this head during the year amounted to Rs. 13,200 or Rs. 847 in excess of the previous year's realizations. The excess was due to the opening out of 41 new pans in the Kolár and Chituldroog Districts. There were 2,703 persons engaged in the manufacture of salt, and 2,798 pans were worked during the year.

Stamps.

36. Contrasted with the receipts of the previous year, which aggregated Rs. 3,42,399—0—2, an increase of Rs. 82,757—13—2 was realized under the head of stamps during the year under report; more than Rs. 70,000 of this excess were due to the sale of stamps in the districts of Bangalore, Mysore and Shimoga. It is also to be noted that nearly one-third of the excess realizations represents the institution fees on suits filed in the Bangalore Court of Small Causes, since the introduction of stamp paper payments in lieu of the former system of cash payments, which were credited to the head of judicial and not to stamps.

37. The receipts under the head of stamps for the year are classified below :—

	Rs.	As.	P.
Sale of stamp papers	4,10,616	7	0
„ Labels	9,223	11	11
Penalties	5,316	10	5
Total. . .	4,25,156	13	4

Law and Justice.

38. The sum realized under this head amounted to rupees 91,318—9—5, or Rs. 21,764—9—5 less than the collections of the year previous. In the Bangalore District a heavy falling off of Rs. 27,663—14—10 is shewn; but this is only nominal, as it represents approximately the amount which had diverged from this head to that of stamps since the abolition of the system of ready money fees in the Small Cause Court at Bangalore.

39. The several items comprising this source of revenue are noted below :—

	Rs.	As.	P.
Fees and fines	57,078	7	6
Registration fees	20,310	0	7
Sale of Registration Act	430	8	3
Fines in Registration Department ..	208	0	0
Proceeds of manufactures in prisons ..	4,737	10	4
Realized from convict labor	1,655	5	2
Sale of property of convict labors ..	1,663	15	9
Sale of unclaimed property	4,220	4	11
Miscellaneous	1,014	4	11
Total.....	91,318	9	5

Post Office.

40. The operations of the Post Office will be found in detail under the section for that head. The receipts amounted to Rs. 31,974—11—1, against Rs. 37,514 in 1868—69, shewing an increase of Rs. 2,460—7—1.

Police.

41. Receipts Rs. 1,698—13—9 ; decrease rupees 1,116—15—7.

Public Works.

42. Receipts Rs. 64,770—4—8 ; increase Rs. 15,761—8—3, chiefly from refunds.

Miscellaneous.

43. The total receipts under this head amounted to rupees 1,21,984—10—3, against Rs. 1,07,281—10—8 realized in the preceding year, being an increase of Rs. 14,702—15—7. The several items are noted below :—

	Rs.
Refunds and draw-backs	6,836
Fines	17,660
Sale of Government stock	4,033
Revenue from Island of Seringapatam, leased from the British Government	27,654
Educational fees	9,257
Sale of books in Educational Department ..	11,561
Subscriptions to Mysore Gazette	2,275

	Rs.
Ferry Fund	4,213
Sale proceeds of plants, &c., in the Lál Bág Horticultural Gardens	1,801
Job work in Government Press	6,378
Fines, forfeitures and savings in military force ..	14,736
Miscellaneous	15,574
Total Rs.	1,21,978

Mint.

44. A sum of Rs. 13,600 is shewn under this head, being the value of old copper coins mutilated and sold during the year under report.

Local Funds.

45. The aggregate collections of the local funds amounted to Rs. 1,64,990—3—11 or Rs. 14,089—2—6 in excess of the receipts of the year previous. This increase arose chiefly in the Shimoga District, where through some misconception the local fund cess was levied from inam villages in unsurveyed talooks at the rate of one anna in every rupee of the assessment, instead of at the authorized rate of one per cent on the recorded value.

46. The local funds are raised from the following items.

	Amount.
Plough-tax	86,894
One Anna Cess in surveyed talooks ..	39,770
Tank fund for repair of irrigation works ..	5,296
Sale proceeds of unclaimed cattle ..	19,017
Fines on stray cattle	5,515
Ferries	5,108
Miscellaneous	3,387
Total Rs.	1,64,987

Municipal Funds.

47. The aggregate realizations during the year, by the several Municipalities, amounted to Rs. 1,85,488—10—7, exceeding the previous year's receipts by Rs. 5,915—2—3.

The following items comprise this fund:—	Amount.
Octroi on tobacco, piece goods, &c. ..	91,000
Mohatarfa..	49,918
Municipal house-tax	8,247
Sale of waste land	5,747
Fines, and by sale of unclaimed cattle ..	8,331
Rents of markets, &c.	9,889
License fees	1,166
Amaráyi or village tópes	1,382
Fines, &c.	2,431
Rents from bazar sites.	63
Sale of manure	2,672
Miscellaneous	4,636
Total. Rs. ..	1,85,482

Revenue Suits.

48. Formerly suits were admitted on the files of the Revenue Courts on a stamp paper in each suit of 8 annas, without any reference to the value litigated; but the introduction of the new Stamp Acts No. XXVI of 1867 and No. XVIII of 1869, has caused a marked decline in the business of these Courts as noted below, and has checked unnecessary litigation, which the former system tended to foster.

	Original.	Appeal.	Referred.
Suits filed in 1867—68.	2,020	1,003	305
Do. 1868—69.	1,223	613	127
Do. 1869—70.	790	402	134

49. The above figures shew a falling off in the number of suits instituted in the original and appellate sides of 1,017, 610, and 388, and 51, 51, and 55 per cent respectively within the last three years. The percentage of correspondence disposed of was 93½, against 96 in the year previous.

50. The miscellaneous correspondence of all descriptions amounted to 2,70,667; out of which only 4,745 remained undisposed of at the close of the year.

II. EDUCATION.

51. Mr. J. Garrett, Director of Public Instruction, returned from leave to Europe on the 12th May 1869, and has submitted the report on the progress of education for the year.

52. The extension of educational operations in the Province, as compared with the returns of the year previous, is exhibited in the subjoined statement:—

	1868—69:		1869—70.	
	Schools	Scholars.	Schools.	Scholars.
Government Schools.	89	4,839	98	5,527
Sub-Talook Schools.	146	5,088	239	5,837
Grant-in-aid.	74	5,202	78	5,773
Total.	309	15,129	415	17,137

53. It will be seen from the above that there has been an addition of 102 schools (9 Government and 93 sub-talook) to the number open in 1868—69, and that 4 more private schools were brought under the operation of the grant-in-aid rules during the past year.

54. The number of children receiving instruction in all these schools shews an increase of 2,008.

Analysis of school statistics.

55. An analysis of the statistics for the several descriptions of schools shews that 15,066 boys and 2,071 girls were under instruction. This gives a proportion of four per thousand to the population. Classified by race there were 13,715 Hindus, 1,999 Mahomedans and 1,423 Europeans or Eurasians.

56. The classification of schools was as follows:—

Classification of Schools.

	Government.	Aided.
Higher Class, ..	7	5
Middle „ ..	10	9
Lower „ Talook ..	69	36
Lower „ Sub-Talook.	239	
Female Schools „ ..	5	28
Normal „ ..	4	0
Special ..	3	0
Total.	337	78

57. The scheme for the establishment of hóbli and village schools has made fair progress during the past year.

58. Three new female schools have been opened; one at Chituldroog by the people themselves.

Controlling Agency.

59. There has been no change in the controlling agency during the year. At present the Province is divided into two Circles of Inspection; but owing to the large increase of schools consequent on the introduction of the scheme for the hóbli or sub-talook schools, the Director of Public Instruction thinks it will soon be requisite to appoint a third Inspector when the Circles can be made to correspond with the three Divisions of the Province.

Financial Statistics.

60. The expenditure in education during the year under review amounted in the aggregate to Rs. 2,83,911 under the following heads :—

	Rs.
Direction	13,070
Inspection	19,720
Instruction and all other educational expenditure.	2,51,121

of the last item, a sum of Rs. 74,637 was from local funds, and the rest from the public revenue. The cost of direction and inspection was five and seven per cent respectively to the total expenditure.

University Examinations.

61. The Director of Public Instruction has brought to notice that the branch examinations of the Madras University held at Bangalore and Mysore, have had a marked effect on education in this Province, and have tended to raise the character of the superior schools. There were 114 candidates examined in the Matriculation standard, and 35 for the First Arts examination; nearly 43 per cent passed for the latter, and nearly 25 for the former. The Government High School at Bangalore maintained its place as the head of the list of schools in the Province, which furnished the successful candidates. Four candidates from this Province have distinguished themselves during the year, two in having obtained the degree of Bachelor of Arts, and two that of Bachelor of Laws.

62. The Bangalore High School has taken its place as the highest

Higher Class Schools.

Government Schools.

educational institution in the Province. The attendance of students was somewhat less than last year; but this arose from changes made in the constitution of the lower classes, and from having fixed periods for admission of scholars. Ten students out of fifteen who were sent up, passed the Matriculation examination. The fees have increased from Rs. 2,811—12—0 in 1868—69, to Rs. 3,148—8—0 during the past year.

63. The progress of the Rája's School at Mysore is reported to have been eminently satisfactory, a result due to the meritorious exertions of the Head Master Mr. Dunning. The number of students in attendance has risen from 262 to 356, and the fees collected during the year amounted to Rs. 780, against Rs. 554 the year previous. Two students, out of three sent up, passed the First Arts test, and four out of seventeen the Matriculation test.

64. Amongst the district schools, the school at Hassan is considered to be the best, both in regard to number and efficiency. The Kolár School has attained a place in the University list, and is favorably reported on. The school at Shimoga has improved, and the number of scholars has risen from 70 to 120. The backward condition of the school at Chituldroóg, which is attributed to the want of system and effort on the part of the Head Master, is to be regretted.

Middle Class Schools.

65. There are 11 Anglo-vernacular schools established at talook kasabás with an average number of 287 pupils. The school at Dévanahalli was abolished, and the saving thus effected was devoted to raising the standard of the school at Chikka Ballápura. The result of the measure has been favorable. It is proposed to transfer the school at Harihara, as the place is no longer a military station, and has lost its importance.

Lower Class Schools.

66. The talook Kanarese schools were increased from 57 to 65, and including the 4 Hindustani schools, the average attendance was 2,419. The school at Dodda-Ballápura has maintained its place as first in this class. The school at Mysore and most of the other schools of this class are favorably reported on. The school at Nyámti in the Nagar Division was the second school in the list in point of numbers, but the attendance had fallen to 62.

many of the parents objected to history and geography being taught, and refused to purchase the books on these subjects.

67. Of the four Hindustani schools, the one at Kolár still holds its place as the best. The attendance amounts to 81 pupils, and in general attainments the boys of this school are reported to be equal to any in the Province. The school at Mysore continues to be unfavorably reported, and measures will probably have to be taken for the removal of the present master.

Hóbli or Sub-Talook Schools.

68. The term hóbli is not known out of Mysore, and it may be as well to state that it means a sub-division of a talook, and comprises several villages. There are 645 such hóblís, each with an average area of 41 square miles, and a population of 6,040 persons. The scheme for the establishment of this class of schools was introduced during the year previous, and no less than 168 were opened during the year under review. In some places upwards of 70 pupils attend, which may be taken as a criterion of their popularity. The school-houses have all been built or purchased by the people, or else some suitable house is rented. In some instances the schools have been built at the expense of a single individual.

69. It was estimated that at least 200,000 boys in Mysore, who were of an age to attend school, were left without instruction of any sort. The necessity for the extension of education amongst the rural population had long been felt, and that not only were due arrangements required for the training of the youthful Mahárája, but also for the people being so educated as to place them on a par with the rest of the people of India; and there is every reason to hope that the measures that have been initiated in the establishment of the class of schools under consideration, will produce satisfactory results in this latter respect.

Female Schools.

*Bangalore.
Chintámani.
Srínivâspura
Mágadi.
Hassan.

70. There are schools of this class for girls in the places marginally noted. The school at Bangalore was opened about 2 years ago, and is so well attended that an assistant master had to be appointed. It was considered that female schools might have been indefinitely increased; but the Director of Public Instruction remarks that we may be too eager for reform and for the introduction of what is in itself good,

when it involves changes which to the native mind are very great. Time and a just perception of the advantages of female education will assuredly arouse a desire amongst the people for its extension; but till such is the case, it would be unwise to press forward the formation of schools of this class. Aid has, therefore, only been granted where the establishment of female schools has originated with the people themselves.

Normal Schools.

71. The teachers from the General Normal School have generally turned out fairly. Their qualifications for teaching are well spoken of, and some of them especially are bringing their pupils on very well. There are 11 students in the English class, and 26 in the vernacular branch, some of the latter are Vaidika Brahmans, who are peculiarly fitted for the work from their knowledge of native literature, and their devotion by tradition and custom to a life of study.

72. There are also 3 Hóbli or Sub-Talook Normal Schools, one for each Division of the Province. In these schools no less than 163 students trained and passed during the year.

73. It is impossible to over estimate the importance of the effect that the establishment of this class of schools may be expected to have in furthering education amongst the masses; for in Mysore, as elsewhere in most parts of India, nothing could be more defective than the qualifications for their duties of the class of men on whom the task of teaching had previously devolved throughout the State.

Engineering School.

74. This school is intended to train up a subordinate class of skilled méstris amongst natives. The ten scholarships are said to be eagerly sought after, and nine of the youths had come up to the standard. The last examination was not, however, satisfactory.

Jail Schools.

75. In the Central Jail at Bangalore, 200 adults had been placed under instruction, and are reported to be remarkably attentive and to shew interest in the work. This year the female prisoners were also included, but with no very satisfactory results as yet.

76. The boys in the Reformatory attached to the Central Jail, Bangalore, made fair progress. They work also daily in the garden attached to the jail.

Juvenile Reformatory.

77. The following results relative to the schools brought under the grant-in-aid system are gleaned from the report of the Director of Public Instruction, in which full details will be found.

Private Institutions under Government Inspection.

	No.		No. of Pupils average monthly.		Average daily attendance.	
	1868—69.	1869—70	1868—69.	1869—70.	1868—69.	1869—70.

Total.....	74	78	4,939	5,162	4,257	4,539

78. The public grants-in-aid to these schools during the past year amounted to Rs. 34,564, and the expenditure from all sources, other than Government grants-in-aid to Rs. 73,797, the latter in the year previous was Rs. 59,822. The fees collected amounted to Rs. 19,333. The progress in these schools during the year is reported to have been satisfactory. Eight of the pupils passed the University First Arts, and eight the Matriculation examinations. Amongst the female schools the London Mission Day Schools have the large attendance of 600 girls. The useful and important work carried on by this class of schools in Mysore merits special notice and acknowledgment in these remarks. The unwearied labor of those controlling and directing them are beyond all praise, and cannot be too highly appreciated and commended.

79. The indigenous schools were fully described in the report of the Director of Public Instruction for the year previous, and call for no particular remark.

Private Un-aided Schools.

The following Statement contains statistical information regarding all the several classes of Government and other Schools which receive Public Grants-in-aid.

No.	Class of Schools.	No. of Pupils.					Fees realized.		Cost charged to or provided from			Amount Cost of educating each Pupil.

80. In addition to the above, the several missions maintain 32 unaided schools at an aggregate annual cost of nearly Rs. 6,000, at which 1,272 children are educated. There is also a large number of indigenous unaided native schools in Mysore, almost wholly Kanarese, which are attended by many pupils. The education given at them is of the most elementary character.

Scholarships.

81. Additional Government scholarships to the extent of Rs. 600 have been founded during the past year, in connection with the Rája's School at Mysore.

Employment of Students in the Public Service.

82. Employment under the Mysore Government is not contingent on having passed an examination, but appointments are now seldom bestowed on any who have not received some amount of education at school. The fact that the two Native Deputy Superintendents in charge of districts, and several of the Native Assistant Superintendents of the Mysore Commission, owe their high positions to the superior education they have received in the schools of Mysore, has proved a great stimulus in the cause of education. Many voluntarily pass the General and Special Test examinations of the Madras Uncovenanted Civil Service, so as to possess a certificate of their attainments. Upwards of 300 candidates were examined at the last examinations.

The English language in Indian Education.

83. While the study of English in a thorough manner has been extended, it is considered that all attempts to teach a mere smattering of the language, by the multiplication of inferior schools, are injurious to the cause of education. The masses of the people must be reached through the medium of their own language, and, however desirable it is to encourage the study of English amongst the natives of Mysore, it would be a grievous injustice to the mass of the people to allow vernacular education to be neglected with that object, or to devote to the latter more than a reasonable proportion of the public funds available for the general purposes of education. The increase of suitable vernacular test books will greatly advance the progress of general native education.

Book Department.

84. The demand for school books has steadily increased. The number of books brought in stock for the year was 63,333 at a cost of Rs. 23,147. The sale proceeds amounted to Rs. 19,235.

85. The following Kanarese books and maps were published during the year :—

	Copies.
Bhúvivaraṇé, Geography	5,000
Vágvidhúyini, Grammar	5,000
The Bhagavat Gíta	1,000
India Désha Charitré, History of India	5,000
England Désha Charitré, History of England ..	5,000
Large wall map of the World	1,000

86. The several gentlemen and others connected with the educational department, named by the Director in the conclusion of his report as having rendered zealous and efficient service in the performance of their duties during the past year, merit acknowledgment therefore here, as do also the exertions of the Director, Mr. Garrett, himself.

III. PUBLIC WORKS.

87. The amount of the original Budget estimate for the year was Rs. 18,91,440 ; but the expenditure was, by order of the Government of India, subsequently limited to Rs. 17,00,000; of which Rs. 15,00,000 was provided out of the current income in the Provincial Budget.

88. The actual outlay was Rs. 17,34,525, or Rs. 34,525 in excess of the sanctioned expenditure, which was caused by an unexpected call for the payment to Coorg of Rs. 50,000 on account of stores from England.

89. The expenditure under the different heads, as contrasted with the Budget provision for the same, is shewn in the following table:—

Class of Works.	Budget Provision.			Expenditure.			Difference.	
	Original Works.	Repairs.	Total.	Original Works.	Repairs.	Total.	Less.	More.
1. Military	...	...	...	...	910	910	...	910
2. Civil Buildings ...	1,27,000	5,000	1,32,000	1,76,301	10,407	1,86,708	...	54,708
3. Agricultural... ...	2,81,800	2,50,000	5,31,800	80,749	2,19,047	2,99,796	2,32,004	...
4. Communications ...	2,91,900	3,40,000	6,31,900	3,21,409	3,53,196	6,74,605	...	42,705
5. Miscellaneous Public Improvements ...	78,200	3,000	81,200	35,178	3,526	38,704	42,496	...
6. Establishment... ...	...	...	4,84,540	...	...	4,57,073	27,467	...
7. Tools and Plant ...	...	...	30,000	...	...	77,878	...	47,878
8. Profit and Loss ...	...	...	...	...	...	1,783	...	1,783
Decrease in Stock Balances...	...	...	...	...	...	17,37,457	1,53,983	
						2,932	2,932	
	7,78,900	6,43,000	18,91,440	6,22,637	5,87,086	17,34,525	1,56,915	

90. It will be seen from the entries in this table that the outlay on "Civil Buildings" was Rs. 54,708, (or 41·4 per cent); on "Communications" Rs. 42,705 (or nearly 6·7 per cent); and on "Tools and Plant," Rs. 47,878 (or 159·5 per cent) in excess of the original Budget estimate, the excess on the last item being due, as explained above in para 88, to an unexpected call for the payment of Rs. 50,000 to Coorg, under that head.

91. On the other hand, there was a saving on the total original allotment for " Agricultural, " of Rs. 2,32,004 (or 43·6 per cent), the proportion of the lapse on the assignments for original works and repairs being 71·3 and 12·4 per cent respectively,—under the head of " Miscellaneous Public Improvements " of Rs. 42,496 (or 52·3 per cent), and under that of estimates of Rs. 27,467 (or 5·7 per cent).

92. The excess outlay under the heads of " Civil Buildings" and "Communications," appears to have occurred through a laxity of practice in adhering to the Budget rules, which has been strictly interdicted in future, and will not again occur.

93. The causes of the large lapse under the head of "Agricultural" "Original Works" will be explained when considering that part of the Progress Report which refers to that class of works. It should, however, be mentioned here that the " Original " allotment of Rs. 2,81,800 from "Original Works " under this head was subsequently modified on the reduction of the general Budget grant to 17 lacs, and fixed at Rs. 1,62,102, the lapse on which was Rs. 81,353, or about one-half.

94. The revision of the original allotments for the other classes of works, which should have been made on the reduction of the grant as above, appears to have been overlooked or omitted, from some misconception as to the necessity for such a measure.

ORIGINAL WORKS.

Military.

Nil.

Civil Buildings.

95. The Deputy Superintendent's Cutcherry at Chikkamagalúru was almost completed at the end of the year, and has since been so.

96. Of the seven talook cutcherries under construction during the

year, three were finished, and the others have made fair progress excepting in the case of that at Hiriyúru, on which but little work has yet been carried out, owing to the difficulty experienced in procuring materials. Some delay has also occurred in procuring corrugated iron for the roofing of one of the other cutcherries.

97. The new Post Office at Bangalore was satisfactorily completed, and is a handsome building.

98. The stables and coach-houses attached to the new Public Offices at Bangalore have been completed, and improvements and additions made to Government House and the Executive Engineer's Office.

99. The Executive Engineer's Office at Chikkamagalúru has been finished, and, of five Inspection Lodges provided for in the Budget, two were completed, and one is in progress. The allotments for the other two were resumed, being required for other works.

100. The Shimoga Jail was nearly completed, the outlay on it up to the end of the year having been Rs. 1,08,626, out of the total estimate of Rs. 1,24,654—the work remaining to be executed being chiefly such as can be carried out by the convicts.

101. No new school-houses were commenced during the year; but those in hand, five in number at the close of the previous year, were satisfactorily completed.

102. The other items do not call for remark.

AGRICULTURAL.

103. The statements of the grants and expenditure under this section shew that the outlay was Rs. 81,353 less on original works and Rs. 25,127 on repairs, than the allotments under those heads, the total lapse thus amounting to Rs. 1,06,480, against an aggregate grant of Rs. 4,12,102.

104. The causes for this short expenditure are fully explained in detail by the Superintending Engineer for Irrigation, and are on the whole satisfactory, as a larger outlay on most of the works on which the lapse occurred, would probably have been useless for the reasons stated, and in each such instance would have been simply money thrown away.

105. The Srírámadévara anicut was almost completed at the close of the year, and has been since quite finished. The condition of its foundation has been the subject of recent report to the Government of India, and some further work will probably be needed to render it perfectly secure in this respect.

106. The old channels have been opened for use this season, and the construction of the first portion of the new channels (26 miles in length) will be proceeded with, when the estimate for the same is sanctioned. The work is a most important one, and its successful completion, with the proposed channels in full use, will be a great boon to the villagers whose lands will be irrigated by its waters.

107. The project of the Mári Kaṇavé Reservoir was necessarily allowed to remain in abeyance, the estimate as required by the Government of India not being yet completed. The sum of one lac allotted for this work in the original Budget, was consequently omitted in the modified grant. It is hoped that the information that has been collected in connection with this important project will secure its submission shortly, in a complete form.

108. The cause of delay in the submission of the estimates for the Kumbár Kaṭṭé and Kumbár Mardghere projects is explained by the Superintending Engineer, and is, I think, satisfactory. It is essential that the probable remunerative results of such works should be fully considered before a large outlay is incurred on them and the projects for their construction or repair should bear due proportion to the probable results in this respect. I entirely concur in the Superintending Engineer's views on this point.

109. The completion of the Dévasamudra tank has been satisfactorily carried out on the principle stated in the last para, at a cost of Rs. 20,000.

110. The restoration of the channels of the Súlikere tank, will be an immense boon to the occupiers of the lands traversed by them, which are now neglected, and to a great extent uncultivated.

111. An estimate of Rs. 20,000 has been framed for this work, which is now in progress.

112. The restoration of the Bágúr chain of tanks is being pushed

on, and it is hoped will be sufficiently advanced to admit of water being stored in them this season.

113. The report of the progress of the Márchalli anicut is not satisfactory; but it is hoped that it will be completed during the current year. There is much difficulty in obtaining labor for some of these works, and the delay, in the case of this anicut, has been chiefly owing to this cause.

114. The remaining works under this head do not call for remark here.

115. The Superintending Engineer notices the want hitherto of trustworthy plans and sections of the channels in the Kávéri and Hémávati Divisions, and that much of the time of the Department has been taken up in making surveys and levels of the old works, as well as of the new projects, to complete accurate data for the preparation of the necessary plans of both classes.

COMMUNICATIONS.

116. The progress on the Nelamangala—Kuṇigallu road has not been satisfactory. *

117. The road from Yediyúr to Pályem has been finished, and thence to Sakaléspura is nearly completed.

118. The bridge over the Hémávati river at Sakaléspura, has been opened since the close of the year. The progress and completion of this fine structure reflect much credit on Mr. Henderson, the Executive Engineer in charge.

119. The other works under this head call for no special remarks, several of those entered in the Budget were not taken in hand for the reasons stated in the * report of the Chief Engineer.

120. Considerable progress has been made during the year in surveying and tracing the proposed lines of communication in Nagar, which are urgently required to open up that hitherto neglected district, and a large portion of the grant for minor works under this head has been applied to this work. But little progress can, however, be made with these lines at present, owing to the want of funds.

* Printed separately.

Miscellaneous Public Improvements.

121. The project for storing up pure water for the supply of Bangalore has at length been completed and submitted to the Government of India. It is impossible to over estimate the importance of this measure, and it is hoped that when sanctioned, it may make rapid progress.

122. The completion of the sewer referred to in para 22 of the Chief Engineer's report, will materially aid in cleansing the main sewer in the Cantonment.

REPAIRS.

Civil Buildings.

123. Require no remark.

Agricultural.

124. The number of works dealt with during the year by the Revenue Officers and Executive Engineers respectively, was as follows:—

By what Officers.	No. of Works	Appropriations from Budget Grant.	Expenditure.	Difference.	
				Less.	More.
Revenue Officers	611	1,78,634	1,66,031	12,603	...
Executive Engineers ...	52	64,323	58,842	5,481	...
Total.....	663	2,42,957	*2,24,873	18,084	...

125. Of the total grant under this head of 2½ lacs, appropriations to the amount of Rs. 2,42,957 were made during the year; and of this sum Rs. 2,24,873 were actually expended, or about 92½ per cent, the outlay by the Revenue Officers and Executive Engineers, on the appropriations assigned to them being 93 and 91½ per cent respectively. This result may fairly be regarded as satisfactory, especially when compared with the proportion of expenditure to appropriations during 1868—69, and previous years. I have no doubt that the measures adopted by the Superintending Engineer, referred to in his report, had an important effect in securing this object, and similar care in future will, it is hoped, prevent a recurrence of the lapse of appropriations under this head to any large extent.

*Inclusive of contributions from ryots, *viz.*, Rs. 5,826.

126. The question of the best mode of providing for the repair and future management of the large number of tanks scattered over the Province, has been the subject of much correspondence, and the views of the Government of India thereon have been lately received in the despatch noted in the margin. It is unnecessary to enter here into detailed resumé of the instructions conveyed in that despatch, and it will be sufficient to state, with reference to my predecessor's remarks in his review of the Progress Report for 1868—69, on this important question, that, with regard to the proposal that the repairs and improvements of the minor irrigation works in Mysore should be carried out by the Revenue Officers, preparatory to their being handed over to the cultivators for subsequent management and maintenance by them, the Government of India has authorized the adoption of the measure in two districts, as an experiment, the repairs in one being carried out by the D. P. W. Officers, and in the other by the Revenue Officers, and the works when so completed being handed over, in both, to the cultivators for management and maintenance, subject to certain conditions proposed by the Committee assembled by the Chief Commissioner, to consider the question as modified in the despatch under reference—it being an essential part of the measure that the Officers of the Irrigation Department should be required to see that in the case of all such works so made over to the ryots, all needful measures are promptly taken to carry out any repairs that may be neglected by them. The actual results from both districts to be compared after a suitable period and the question as to how the other districts in Mysore should be dealt with being then reviewed.

No. 129 I, dated 12th March 1870.

Communications.

127. The expenditure on the maintenance of roads under the supervision of the Public Works Department was Rs. 3,53,196 during the year, the aggregate length of the lines being 2,365 miles. The general condition of these communications is satisfactory.

128. There are besides the above, numerous roads throughout the Province under the control of the District Officers, maintained at the charge of the Local Funds, and excepting in the hill districts, especially

the Malnád of the Nagar Division where the want of labor and funds and the great cost of the required works have hitherto prevented the opening up of the country in this respect, the facilities of communication are exceptionally good throughout the Mysore Territory.

ESTABLISHMENT.

129. The cost of establishment was a little in excess of the Budget provision as stated in para 26 of the Chief Engineer's report, the ratio of this charge to outlay is very high, but for this there appears to be no remedy at present. It will, however, be necessary to watch jealously any tendency towards an increase of the cost under this head, and every practicable effort must be made to bring it within reasonable limits, as the requirements of the service of the Department will admit of changes or reductions with that object.

GENERAL OBSERVATIONS.

130. The excess expenditure over the year's grant is noticed in para 28 of the Chief Engineer's report.

131. There has clearly been some want of proper check and control on this point, but the stringent orders that have been issued to prevent any recurrence of excess expenditure in future will, it is hoped, effect that object.

132. I concur in the opinion expressed in para 29 of the Chief Engineer's report, regarding the proceedings of the Irrigation Department during the past year, and the good results that may be expected to be achieved by a careful adherence to the system that has been lately introduced.

133. There can be no doubt that too much public money has, year after year, been spent in the repair of tanks without due examination and enquiry, and therefore in many instances without adequate benefit to the people or the Government.

134. This was quite unavoidable under the circumstances, and the want of some record of particulars of each such work, to which reference could be made, before dealing with applications for repairs; but the

system that has been introduced by the Superintending Engineer to secure this latter object, will, it is hoped, put a stop to all unremunerative outlay of this character.

135. The measures taken generally for the improvement and further development of the irrigation channels promise the best results.

136. The completion and opening to the public of the Sakaléspura iron viaduct have already been noticed in para 118. The work was carried out most successfully by the Executive Engineer in charge, Mr. Henderson, whose energy and ability were severely taxed by the difficulties he had to surmount in achieving this result. This officer merits the highest commendation for his labors and scientific skill in connection with this important project.

137. The Executive Engineers are stated to have been more active than hitherto in moving about and inspecting the works in progress. The necessity for this cannot be too much insisted on, especially where works are under construction by contractors, in the remarks regarding whom I entirely concur.

138. The changes noticed in the Department during the year do not call for remark.

139. The Chief Engineer speaks in favorable terms of the Officers and Upper and Lower Subordinates of the Department generally, and specially commends the services of Lieutenant Pole, R. E., and Mr. Olander, Executive Engineers of the Hagari and Hémávati Divisions respectively, and of his personal Assistant Lieutenant Bowen, R. E.

140. The Central Office establishment is also favorably mentioned, and the officiating Controller, Mr. Robinson, is stated to be well acquainted with his duties.

141. It only remains for me to record my sense of the energetic and valuable services of Major Johnson, the Superintending Engineer for Irrigation, which merit my hearty commendation, and to acknowledge my obligations to the Chief Engineer himself, Colonel Wilkieson, R. E., whose conduct of his duties in that important capacity, and as Public Works Secretary, has been most efficient and conducive to the interests of the public service.

CHANNEL CONSERVANCY.

142. The subjoined statement shews the amount spent on the annual repairs of channels, and channel-fed tanks in the division, during the year under report.

Expenditure.

1868—69.			1869—70.										
				Completing last year's work.		Fresh works undertaken.		Total.					
Appropriation.	Expenditure.	Lapse.	District.	Appropriation.	Expenditure.	Appropriation.	Expenditure.	Appropriation.	Expenditure.	Lapse.
51,233	36,564 15 3	14,668	Mysore...	27,530	27,529 13 7	13,352	12,599 1 0	40,882	40,128 14 7	753
11,772	7,102 5 3	4,669	Hassan...	20,185	20,184 8 11	3,270	1,183 1 0	23,455	21,367 9 11	2,087
63,005	43,667 4 6	19,337	Total...	47,715	47,714 6 6	16,622	13,782 2 0	64,337	61,496 8 6	2,840

143. It is satisfactory that the lapse of this year on amounts appropriated for expenditure has been much smaller than that of previous years.

Lapse.

144. During the year under report, accidents have been fewer than in former years in the Mysore District, and in the Hassan District there have been none. The expenditure in repairing breaches in the Mysore District was in the year 1868—69 Rs. 2,567 ; but this year it has been only Rs. 903.

Accidents.

145 The Lakshmanatírtha river generally runs so low in the latter part of the cultivation season, that it renders the keeping up of the supply of water most difficult. This difficulty has been overcome by commencing cultivation six weeks earlier than heretofore. The Lókáni aqueduct answered well.

Water Supply.

146. The timely and judicious distribution of water has been a marked feature in the management of the Channel Department during the past year.

147. No remission of kandáyam has taken place, and the water cess collected has been as shewn below :—

Remissions.

	1868—69.	1869—70.
Mysore ..	10,962 14 4	10,872 5 2
Hassan ..	2,047 1 10	2,015 1 10
Total..	13,010 0 2	12,887 7 0

148. In addition to the above works, much progress has been made in levelling bunds and forming roads thereon. Of 533 miles of channel in the Mysore District, 107 miles have had roads thus made on the bund, and in the Hassan District where there are 164 miles of channel, 42 miles have thus been made easily accessible.

Roads on Bunds.

LOCAL FUNDS.

149. The balance to credit of the district plough-tax fund at close of last official year was Rs. 1,31,989, and the amount collected under all heads during the year under review Rs. 1,00,832.

150. The total outlay of the year upon district roads, and minor works chargeable to this fund was, under all heads, Rs. 1,66,277—13—9, which shews a lapse of Rs. 38,545—2—3, on the aggregate Budget grant of Rs. 2,04,823.

151. The details of outlay are as follows :—

	Rs.	A.	P.
Original works ..	1,06,267	7	5
Repairs ..	38,386	4	5
Establishment ..	20,690	12	3
Tools and Plant .	933	5	8

152. The following statement exhibits the expenditure distributed over each district.

	Original.	Repairs.
Bangalore ..	10,841 13 2	6,456 3 10
Kolár ..	3,386 13 10	2,745 12 5
Toomkoor ..	6,832 12 9	3,698 14 7
Mysore ..	18,184 8 9	4,576 8 0
Hassan ..	26,121 9 4	6,727 10 4
Shimoga .	23,314 1 5	2,749 4 6
Kadoor ..	8,198 14 11	5,126 0 9
Chituldroog ..	9,386 13 3	6,305 14 0
	1,06,267 7 5	38,386 4 5

153. The expenditure incurred above was wholly for the opening out of new district and village roads, with the exception of small amounts expended on sinking wells and forming avenues.

154. Although a considerable percentage of the Budget allotments have remained unutilized, much statisfactory work has been done. New useful lines have been commenced or completed during the year, and the old ones have been kept in good repair. Much of the lapse complained of was occasioned by the delay unavoidably experienced by Civil Officers in preparing thoroughly reliable estimates, and by the postponement of some of the projects entered in the Budget.

MUNICIPAL.

155. In the tables attached to the "Finance" chapter of this report, are exhibited the receipts and charges of the Municipalities during the year under review. Of the institutions of this kind now established in the Province, those alone of Bangalore, Mysore, Hassan, and Shimoga are of sufficient importance to call for special notice, in the minor towns the duties of the Municipal Boards being confined merely to conservancy operations.

Bangalore Cantonment.

156. The total income of this, the most important of the Municipalities, has been Rs. 69,969, against which the expenditure has been Rs. 67,252. The details are given in the financial report. The attention of the Board has this year been chiefly taken up by minor works of improvements, such as extending the subsidiary system of drainage commenced in former years, opening out crowded and foul localities in the bazars, increasing the capacity of public wells and storage reservoirs for water, and erecting improved latrines. Much of the time of the Officers of the Municipality has also been given to the repair and maintenance of the close network of streets and roads under their charge. The general condition of these is gradually and steadily being improved, notwithstanding the heavy traffic and difficulties in the way of labor and materials that have to be contended with.

Bangalore Pété.

157. The income of the year has been Rs. 43,010, the outlay Rs. 58,398, the excess having been met from the balance at credit of the Municipality. The principal works undertaken were; a poor house, two new police stations, a new chattram, and the restoration of an old reservoir opposite the market. Several latrines and urinals have also been erected for the convenience of the public. The question of assimilating the general system of working of the Pété Municipality with that of the Cantonment, and with this view of placing the two

Boards under the presidency of the same officer to be paid proportionately by both, has lately been brought under consideration. The importance of Bangalore, both as a Military and Civil station, and its daily increasing population, appear to call for some measure of this kind, which however contemplates the two Boards remaining quite distinct and independent of each other.

158. The expenditure has been Rs. 29,455; the income Rs. 28,105. For the outlay incurred, the roads and streets have been maintained in excellent order; a new public latrine has been constructed, new stone drains have been laid down where required, the public wells have been improved, and other useful improvements carried out.

Mysore.

159. With a view to extending Municipal operations in this important place, the mohatarfa collections have been recently handed over to the Board, on the condition of the Town Police being maintained and paid therefrom. The powers and responsibilities of the Board have thus been greatly increased, and it is anticipated that material benefits will ensue from the arrangements made. It may be mentioned here that the necessity for an efficient system of drainage has long been much felt in Mysore; but the resources of the Board have not admitted of a comprehensive scheme for the whole of the town and fort being taken up. A project, however, is now under preparation by the Public Works Department, and it is hoped that some assistance may be given by Government to enable the Municipality to undertake this much needed improvement.

160. Income Rs. 5,646; expenditure Rs. 5,844. The operations carried out consisted of filling in the old fort ditch, improving the approaches to the town, opening up a foul part of the bazar, and enlarging the drinking-water reservoirs. As at Mysore, a proper system of drainage is much required here. The Municipal funds being insufficient for the purpose, provision was entered in the Public Works Budget of this year for a drainage project for the town; but it was disallowed by the Government of India. The additional income now brought in by the mohatarfa will probably, in time, enable the Board to take up the work.

Hassan.

161. Income Rs. 5,575; expenditure Rs. 7,414. A commencement was made on the proposed new market to be constructed here. The other chief works undertaken were; improving the approach to the town from Augumbi road, opening new roads, and constructing side drains.

Shimoga.

IV. POST OFFICE.

ANCHE OR PROVINCIAL POST.

Expenditure.

162. The total cost of the Department amounted to Rs. 1,45,151, against Rs. 1,30,159 in the preceding year, shewing an increase of Rs. 14,992, owing principally to the increase of pay recently sanctioned to the Junárdars and Gumástas of the establishment, and to the salary of the Bakshi, which hitherto was charged under "Administration," being now debited against the Anché Department, the late incumbent having held the appointments of Head Sheristadar and Anché Bakshi conjointly, also to the entertainment of additional establishments caused by the opening of two new post offices and two receiving houses, as well as by the extension of postal lines.

Income.

163. Taking credit for the postage exempted on service and franked letters, letters carried to and from Her Majesty's Post offices, and copies of the local Gazette, the following statement exhibits a surplus of Rs. 1,07,455, in favor of the Department.

	Rs.
Amount of postage on official letters	1,68,857
Do do on parcels	80,439
Do do on Gazettes	1,079
Do on letters and parcels of His Highness the Mahárája's Departments	43
Amount of postage on franked letters and parcels ..	4,677
Amount of postage on letters, &c., carried to and from Her Majesty's Post Offices.	7,025
	2,12,120
Amount of postage collected in cash ..	40,486
	2,52,606
Deduct Expenditure..	1,45,151
Balance Rupees	1,07,455

164. The total number of packets that passed through the Anché offices was 2,369,695, being an increase of 26 per cent on the return for the year (1863---64) following that of the re-organization of the Commission. Subjoined is a detail of the above number.

Correspondence.

	1869—70.
Chargeable packets	900,009
Service do	1,217,142
Franked do	27,718
Carried to and from Her Majesty's Post offices ..	224,826
Total ...	2,369,695

165. The above figures compared with the returns of 1868---69, exhibit an increase of 11 per cent on "chargeable packets," of 5 per cent on "service," and of 11·24 per cent on "franked covers."

166. The number of unclaimed letters has decreased to 1,026 from 1,820 in the preceding year.

Unclaimed letters.

167. The proportion of unpaid to paid letters is shewn to be about 1·16 per cent.

Unpaid letters.

168. There were only two cases of complaint against the Anché officials for making away with the contents of letters; but in both cases the charges were not established before the Sub-Magistrates.

Complaints.

169. The service of this Department has been satisfactorily performed during the year, and the Anché Bakshi Mr. M. Amurthalingam Modaliar, has supervised its working in an efficient and creditable manner.

V. POLITICAL.

170. There is but little to be noticed in the present report under this head.

171. The youthful Mahárája, Chámarájéndra Wodiyer Bahadúr has commenced a course of education under the personal direction of the Guardian, Lieutenant-Colonel Malleson, which has already greatly improved his character and manners, and which promises to have all the success that could be anticipated.

172. The jealousies and obstructive proceedings of the Palace ladies, and some of those connected with them, for a time interfered most seriously with Colonel Malleson's plans and efforts for the improvement and instruction of his youthful charge; but the difficulties thereby occasioned have been wholly surmounted by that officer's judgment and firmness, and it is hoped that there will be no recurrence of them.

173. As regards the boy-chief himself, he is thoroughly amenable to Colonel Malleson's influence and authority, while he is quite at home in his school and play ground, and evinces a natural and healthy interest in all that goes on in them, and mixes with his school mates on terms of perfect equality—vying with them with spirit, both in the school classes and in the play ground amusements and exercises.

174. As the Government of India receive periodical reports of his Highness' progress, it is unnecessary to refer further to the subject here.

175. The last Annual Report entered, under this section, fully into the measures taken for the reduction of the Palace establishments. These measures were of course unacceptable to many of the persons affected by them, and many vexatious references, setting forth their grievances, have been made by those who were thus dissatisfied. The enquiries instituted in these cases have, however, clearly shewn that they had no substantial ground for complaint, excepting the fact of the reduction of the Palace establishments, and that every case was considerately and liberally dealt with.

176. The following table shews the changes that have taken place during the year among the blood relations and family connections of the Mahárája, who receive stipends from the State:—

Detail.	1868—69.				1869—70.			
	No.	Amount of Stipends.			No.	Amount of Stipends.		
		Rs.	As.	P.		Rs.	As	P.
Ursús, male, ...	245	4,277	0	0	239	4,179	8	0
Do female	42	951	0	0	46	1,038	0	0
Komárs, male	199	3,453	0	0	198	3,441	0	0
Do female	49	1,123	0	0	49	1,039	0	0
Siváchars, male	65	1,149	0	0	65	1,149	0	0
Do female	25	510	0	0	25	510	0	0
Total.....	625	11,463	0	0	622	11,356	8	0

177. A code of rules has recently been published under the authority of the Government of India, for regulating the continuance, or otherwise, of the stipends enjoyed by these classes on the demise of the present incumbents.

178. The Budget of the Palace expenditure stood at Rs. 8,12,887 for the year, and the actual disbursements, as shewn below, amount to Rs. 7,34,829.

	Budget Allotment.	Actual Expenditure.	Difference.	
			Increase.	Decrease.
Stipendiaries	1,55,256	1,45,242	0	10,014
Pensions	1,19,250	1,03,017	0	16,233
Palace Establishments	2,40,000	2,36,313	0	3,687
Supernumeraries to be absorbed	14,868	8,184	0	6,684
Supplies, ordinary and special, gifts and donations on the occasion of marriages and deaths ...	2,40,000	2,10,933	0	29,067
Repairs and improvements of Palace ...	25,000	12,528	0	12,472
Religious and charitable grants	13,605	13,522	0	83
Civil Pension Paymaster and Establishment ...	4,908	5,090	182	0
Total..... ..	8,12,887	7,34,829	182	78,240

179. The whole of the arrangements connected with the Palace establishments, dependants and pensioners, have been placed under the control of the Guardian, with the duties connected with whose office the questions affecting these classes are much intermixed. By this arrangement, the Superintendent of the Division has been entirely relieved of all duties connected with the Palace or its occupants.

VI. MILITARY.

180. The report of the local force for the past year, submitted by the officiating Military Assistant, Captain R. C. Stewart, presents few points for notice.

Cavalry.

No. of Regiments, 6.

Officers	... 49
Non-Commissioned and Sowars	...2,089
Total.....	2,138
Horses	... 2,138

181. The strength of this arm at the close of the year was as shewn in the margin.

182. The clothing of all the regiments is stated to be excellent.

183. Three regiments have been armed with the lance during the year, and considerable progress has been made in assimilating the accoutrements of the whole force.

184. The horsemanship of many of the silladars is spoken of unfavorably.

185. The establishment of a "Chanda Fund" for the purchase of remounts has answered admirably, and will greatly improve the position of the men of this arm.

186. During the year under report there were 160 casualties amongst the horses, and 189 remounts were enrolled.

187. Stables have been built for the corps at Shimoga, and the lines of the regiment at Bangalore have been re-constructed and their drainage improved.

188. The total outlay under this head during the year was Rs. 34,129.

189. The establishment of stallions is considerably below its strength, and the question of introducing some change into the system hitherto in force, in respect of their allotment and employment, is under consideration.

190. The Depôt at Kunigallu is reported on more favorably than last year, and efforts are about to be made to improve the existing arrangements there, and to render the place more suitable for the purpose for which it is kept up.

191 The number of foals born at this Depôt during the past year was 70, against 43 the previous year.

Bár.	
No. of Regiments.	4
Officers...	92
Non-Commissioned and Rank and File	2,355
Total.....	2,447

192. The strength of this arm of the local force is as shewn in the margin.

193. The whole of the force has been provided with the new pattern clothing and accoutrements.

194. The muskets in use are reported to be quite unserviceable, and their gradual replacement by better weapons will be effected as funds are available for the purpose.

195. Additions and repairs to the lines occupied by the head quarters of regiments and detachments have been made during the year at an outlay of Rs. 17,758. The lines of the regiment at Shimoga are still incomplete, owing to want of funds.

196. Two regiments have changed stations in relief during the year.

197. The scale of pensions has been revised during the year, the new rates being more favorable to the lower grades than those of the old scale.

198. The general conduct of both arms of the local force during the past year has been satisfactory, and the duties entrusted to it have been performed with credit and efficiency.

VII. FINANCE.

199. The following abstract will exhibit the revenues under major heads for 1869—70, compared with those of the previous year and the Budget estimate.

Receipts.

Heads of Revenue.	1868—69.	1869—70.	
		Actuals.	Budget Estimate.
Land Revenue	77,53,672	61,31,401	76,31,000
Sáyer	7,19,157	7,56,069	7,24,200
Forests	3,51,476	2,95,218	2,90,500
Abkári	9,56,510	9,79,839	9,28,450
Assessed Taxes	3,79,425	2,82,673	3,57,800
Salt	14,429	10,611	17,500
Stamps	3,40,131	4,22,250	3,83,000
Mint	...	13,600	...
Post Office	37,620	39,997	38,800
Law and Justice	1,15,348	96,580	94,250
Police...	7,545	18,639	24,450
Education	20,171	25,966	24,900
Miscellaneous	1,00,147	95,380	64,650
Military Local Force	7,921	6,957	22,800
Public Works	74,726	82,514	40,000
Total.....	1,08,78,278	92,57,694	1,06,42,900

200. The year 1869—70 has been chiefly remarkable for the revision of "khists," or periods for the collection by instalments of the land revenue, a measure devised by the local Administration to enable the agricultural population to meet with convenience their engagements to the State by the timely disposal of the produce of their lands, without resorting to the intervention of money lenders. The "khists" previously observed commenced generally in November, and since the introduction of the official year of British India as the year of accounts in Mysore, the revenue demand was regarded as falling due in most districts within the financial year.

Land Revenue.

201. The months of collection now appointed are from January to May in all the districts, except those of Toomkoor and Mysore, where $\frac{1}{8}$th of the demand is to be realized a month earlier. The immediate effect of the present revision has been to authorize the

Revision and Postponement of Collections.

postponement of about 35 per cent or 26½ lacs of the land revenue demand of 1869—70, as estimated in the Budget, to the months of April and May of the year 1870—71. The Chief Commissioner's notification announcing this concession to the ryots was issued on the 15th January 1870, and could hardly have been acted on till after the close of that month, when 50 per cent or 37½ lacs had already been realized under land revenue, and about 1½ lacs under mohatarfa; but from whatever cause, a larger proportion of the demand was collected within the year 1869—70, than was contemplated by the notification; the deficient land revenue collection compared with the estimate being 15 lacs (instead of 26½ lacs,) or, compared with the actual settlement, 12¾ lacs.

202. The effect of the measure referred to on the estimates and accounts of the year 1869—70, is further shewn by the following details :—

Effect on Land Revenue and Mohatarfa.

	Budget Estimate 1869—70.	Actual settlement 1869—70, as reported by Deputy Supts. of Dts.	Collections in 1869—70.	Collections in April and May 1870.	Total Collections on account of demand.

				61,073	3,43,745

203. It will be seen from the foregoing figures that the total land revenue collections of 1869—70, including those of April, May and June as part of the year's settlement, have apparently fallen short of the Budget estimate by Rs. 94,972 ; but from the revenue returns it is found that a sum of Rs. 46,900 was still unrealized on 30th June on account of the land revenue of 1869—70 : comparing the collections actually made with those of the two previous years, the result was as follows :—

Decline in Land Revenue.

Divisions.	Districts.	1867—68.	1868—69.	1869—70, Including collections in April, May and June 1870.
Nandidroog Division ...	Bangalore ...	11,97,541	10,14,595	10,18,434
	Kolár ...	12,51,580	11,43,394	10,66,987
	Toomkoor ...	10,99,444	8,71,647	9,48,773
Nagar Division ...	Shimoga ...	11,16,017	10,96,448	11,02,267
	Kadoor ...	6,15,030	6,37,553	6,15,795
	Chituldroog ...	6,88,025	7,75,303	7,04,618
Ashtagram Division ...	Mysore ...	9,98,739	11,44,091	10,06,990
	Hassan ...	11,25,875	10,70,640	10,72,164
	Total....	80,92,251	77,53,671	75,36,028

204. In framing their Budgets for 1869—70 it was reported by the local Officers that the collections of the year 1867—68 included large arrears of the previous year in the Bangalore, Kolár, Toomkoor, and Hassan Districts ; and the apparent diminution in 1868—69 was further explained by the Superintendent of the Nandidroog Division, as mainly attributable to the great fall in the prices of produce, which induced cultivators to give up large tracts of the more highly assessed lands. From his report for the year 1869—70 it appears that to the same cause may be ascribed the decrease in the land revenue of that year. The relinquishment of land was also induced by the levy of the full assessment on all lands included in a pattá holding, instead of the cultivated portion only, under the Chief Commissioner's orders of June 1869. The enforcement of these orders occasioned a falling off in the collections of the Bangalore and Kolár Districts, although it produced an increase in that of Toomkoor. Remissions in the assessment of mulberry and betel-leaf gardens have also reduced the revenue in this division, and the gradual extinction of the batáyi system, under which the Government demand was a share of the crop, by its commutation to money payments,

Nandidroog Division.

has tended in a considerable degree to diminish it from year to year chiefly in the district of Kolár.

Nagar Division.

205. In the three districts of Shimoga, Kadoor and Chituldroog, composing the Nagar Division, the decrease in land revenue collections is Rs. 86,624, compared with 1868—69. The Superintendent in his administration report ascribes it to the relinquishment of land in consequence of the failure of the seasons; to apprehensions on the part of the ryots that the assessments would be enhanced during the survey settlement; to remissions on uncultivated wargs in some malnád talooks under special orders of the local Administration; to reduced coffee crops, and to failure of water and other approximate causes.

Ashtagram Division.

206. In the Mysore District a decrease of Rs. 1,42,264 is found under village and individual settlements, which is reduced to Rs. 1,37,101 by an improvement in the miscellaneous land revenue collections. The Superintendent of the Division however states that the land revenue settlement of the two districts comprised in it amounted to Rs. 19,77,700 in 1869—70, against Rs. 19,64,183 of the previous year, when Rs. 22,14,731 were credited at the treasury; whence it would appear that the seeming decline in 1869—70 is attributable to the collection of arrears in 1868—69 amounting to nearly 2½ lacs.

Sáyer.

207. The excise duty levied under the name of sáyer on betel-nut, tobacco, betel-leaves, cocoanuts, opium, produced in the Province, and on piece goods manufactured in it, shewed an improvement of 12,000 Rs. in 1868—69, and has brought in Rs. 37,000 more in 1869—70, when the collections amounted to Rs. 7,56,069, composed of the following items.

	Nandidroog Division		Nagar Division.		Ashtagram Division.		Total.	
	1868—69.	1869—70.	1868—69.	1869—70.	1868—69.	1869—70.	1868—69.	1869—70.

Total.....	1,26,448	1,18,214	4,99,628	5,43,913	93,080	93,942	7,19,156	7,56,069

208. In the Nandidroog Division the falling off under supári occurs in the Toomkoor District (Rs. 4,395), and under tobacco in the Bangalore District (Rs. 6,966), neither is explained. No equivalent sum has been credited to the municipal funds of either district, and no failure of crop has been reported. An octroi has been collected in the talook kasabá of Toomkoor amounting to Rs. 2,861 only on all articles of consumption, and Rs. 686 in Toomkoor town; but there has been no definite assignments to those localities of the sáyer duty on tobacco. The Superintendent of the Division has been requested to investigate the causes of the decline.

Nandidroog Division.

209. In the Nagar Division the improvement under supári is reported by the Superintendent to be owing to a good crop in the Shimoga and Kadoor Districts, adding that it suffered a little in Chituldroog. The falling off in tobacco duty is reported by him to be owing to a failure of the crops, especially in Kadoor where tobacco is more extensively cultivated than in any other district of the division.

Nagar Division.

210. The Ashtagram Division shews on the whole a slight increase in the sáyer collections.

Ashtagram Division.

211. The proceeds of timber and sandalwood, the principal sources of forest revenue, have realized more than the Budget estimate by Rs. 12,267, the estimate having been Rs. 2,46,000, the miscellaneous receipts derived from the sale of firewood, bamboos, grazing lands, permit fees, and other dues in the reserved forests amounted to Rs. 36,951, and fall short of the estimates by Rs. 7,550. The cash surplus of the department for the year, after deducting all charges, was Rs. 1,90,968.

Forests.

212. This head of revenue shews a better result by Rs. 51,388 than the estimates, both in arrack and toddy, and taken in the aggregate of all the districts the actual receipts were Rs. 9,79,838 in 1869—70; while those of the year 1868—69 amounted to Rs. 9,56,509. It is also satisfactory to observe that in the Kolár District, where a steady decline had appeared since the year 1865—66 from the sale of arrack, owing, it was believed, to the illicit importation of the liquor from the adja-

Abkári.

Nandidroog Division.

cent Madras territory, that a closer supervision has been exercised by the Talook Amildars during the year, when the subject was specially brought to the notice of the local Administration. The only district that indicates a decline in arrack is that of Mysore, in which the realizations of 1868—69 were Rs. 33,293, against Rs. 33,155 in 1869—70; while the estimate for that latter year was Rs. 44,000. This was apparently an error. Toddy shews an improvement over 1868—69 in the Bangalore and Kolár Districts, but a falling off amounting to Rs. 20,000 or 25 per-cent in Toomkoor, owing to the continued effects of the drought of 1866—67, in consideration of which remissions have since been made by the local Administration. The Districts of the Nagar Division also, the toddy revenue of which amounted to Rs. 1,59,000 in 1867—68, and 1,28,000 in 1868—69, have realized Rs. 1,07,400 only in 1869—70; of this decrease since 1868—69 Rs. 9,600 occurred in Chituldroog, Rs. 7,500 in Shimoga, and Rs. 3,500 in Kadoor. It is probably due to some extent to the drought of 1866—67; but it was explained last year by the Deputy Superintendent of Chituldroog that by the new survey guarantee, the date trees in kandáyem lands were made the absolute property of the land-holders, and being in consequence excluded from the toddy contract, the revenue fell in 1868—69. The same cause has probably operated similarly in 1869—70 in the surveyed talooks of Chituldroog and Toomkoor. The Mysore and Hassan Districts, however, shew a progressive increase under toddy, the realizations having been Rs. 1,38,558 in 1867—68, Rs. 1,84,487 in 1868—69, and Rs. 2,14,608 in 1869—70. The miscellaneous receipts from gánja and other drugs amounted in the entire Province to Rs. 4,175 only.

Assessed Taxes.

213. Excluding from this head the plough tax collections which, according to former practice were shewn on both sides of the Budget, being assigned to the local district funds to which they are credited in the accounts, the receipts during 1869—70 from the mohatarfa tax on houses, shops, looms and oil-mills amounted to Rs. 2,82,673, against an estimate of Rs. 3,57,800. The actual settlement subsequently made was Rs. 3,37,168, as reported by the Deputy Superintendents of Districts. The apparent deficiency in the collections is mainly due to the postponement of the period of collection, under the operation of the Chief Commissioner's notification regarding land revenue demands, to the months of April and

May, when Rs. 56,299 were realized; to this should be added Rs. 4,774 realized in arrears in June, and Rs. 12,800 unrealized at the end of that month, chiefly in the Toomkoor District, making the total dues on account of the year 1869—70 Rs. 3,56,545, or nearly equal to the amount anticipated in the Budget. The realizations of 1868—69 were rupees 3,79,000, and those of the previous year Rs. 3,90,000. The collections in all the districts for the two years 1868—69 and 1869—70 on account of each tax, is shewn below, including in the year 1869—70 the collections made in April, May and June 1870.

Districts.	House Tax.		Shop Tax.		Loom Tax.		Oil Mill Tax.		Total.

Arrears collected in June 1870										4,774
Total Collections on account of 1869—70										3,43,745

214. The Deputy Superintendent of the Mysore District, in which the largest decrease appears since 1868—69, attributes the falling off in house tax, partly to its being remitted in the case of ryots who formerly paid it like traders, if possessed of more cattle and carts than necessary for agricultural purposes, partly to the reduction of rates where high, and also to a falling off in the number of coffee traders who were subject to the tax. In Hassan, all the taxes were assigned to the municipality at head quarters from 1869—70 with the cost of its Police. This is the only district in which the decline is fully accounted for. In the Nagar Division the Superintendent ascribes the decline on house and shop taxes to the relinquishment of professions, deaths, desertions, &c. As, however, certain classes are known to have been exempted from these taxes, according to local usage in most districts, there is probably need for a careful revision of assessments. The loom tax indicates a depression in

the home manufacture of cotton grown in the Nandidroog Division, as well as Chituldroog and Mysore, which may be due partly to their being brought into competition with imported fabrics to which they are much inferior, and partly to the exportation of indigenous cotton.

Salt.

215. The amount collected in 1867—68 from the manufacture of earth salt was Rs. 18,025; it fell to Rs. 14,429 in the following year, and the collections of 1869—70 which were estimated at Rs. 17,500, produced in that year Rs. 10,610 only: the amount realized in the months of April and May and June was Rs. 5,200.

Stamps.

216. The stamp revenue exceeds the estimate by Rs. 40,700, and indicates, as in previous years, a rapid progress since 1865—66. The Indian Stamp Acts were introduced in supersession of local regulations in 1865 and 1867.

	1865—66.	1866—67.	1867—68.	1868—69.	1869—70. (11 months.)
Papers	2,61,582	2,54,899	2,90,763	3,24,181	4,08,744
Labels		9,061	9,070	8,575	9,180

Mint.

217. The sum of Rs. 13,600 shewn under this head represents the proceeds of obsolete copper coins of the Mysore State which were mutilated and sold as old copper, under sanction of the Government of India. The nominal value of the coins Rs. 38,300 appears on the other side of the account.

Anché.

218. The postal revenue which indicated a slight falling off in 1868—69 of about Rs. 1,400 compared with 1867—68, has recovered itself in 1869—70, shewing an improvement of 900 Rs. over that year, notwithstanding the reduction of the postage rates for letters from 1st April 1869, according to the scale adopted by the British India Post Office. The postage collections amounted to Rs. 38,679, against 36,206 in 1867—68 and Rs. 34,892 in 1868—69. The extension of postal lines and the impetus given by the reduced rates will probably afford an explanation of this improvement.

Law and Justice.

219. The receipts exceed the estimate by Rs. 15,100. The proceeds of escheated property amounted to Rs. 4,670, fees and fines and forfeitures received in cash, to Rs. 56,871, and the miscellaneous receipts, Rs. 1,432.

Jail Receipts.

220. The sale of manufactures paid into the treasury amounted to Rs. 8,925 only, against an estimate of Rs. 14,500. Of these the Central Jail, in which manufactures are carried on extensively, yielded a cash return to the treasury of Rs. 4,405 only; but the proceeds shewn by the accounts of the jail amounted to Rs. 28,481, of which Rs. 5,488 was on account of work done for Government; Rs. 14,912 was laid out in the purchase of cotton, wool, and other raw materials and contingent expenses. About Rs. 6,600 were expended in procuring presses and printing materials, for which Rs. 4,828 are still due to the treasury which advanced Rs. 5,662 for this purpose. The amount has to be liquidated from the proceeds of work. The commission paid to the Jailor during the year was Rs. 1,106. With reference to the rules of the Government of India, Home Department, dated 22nd December 1869, the importance of utilizing for public purposes the produce of the jail manufactures was pointed out in a circular of the Account Department, dated 6th January 1870, and public officers have been directed to indent on jails for such articles as tents, clothing for convicts and Police men, carpets, and any other articles required for the public service. It was arranged that no cash was to pass from the treasury, but the charges while debited against the Budget of the department supplied, are to be credited to Government as the produce of the jail manufactures. This system is not yet in complete operation; but it commends itself as a means of employing prison labor as much as possible for the benefit of the State, and thus diminishing the cost of maintaining the prisoners without unduly interfering with the interests of trade. The delay and trouble of realizing the proceeds of articles sold usually on credit to private individuals is also mitigated, and there is little risk of nominally enhancing jail profits at the expense of Public Departments, as it has been ruled in the Government Resolution quoted, that no profits are to be made out of supplies to the jails, and the Budget limits afford an efficient safe guard against excessive charges. The receipts for manufactures of the district jails were as follows :—

	Mysore.	Shimoga.	Toomkoor.	Chituldroog.	Kadoor.	Hassan.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1867-68	1,688	528	292	..	..	..
1868-69	1,950	676	294	158	..	..
1869-70	2,561	1,185	256	276	37	172

221. Besides the produce of manufactures, the hire of convicts amounted to Rs. 1,531 in Shimoga, Toomkoor, and Kadoor.

Registration Department.

222. The fees realized amounted to Rs. 20,616 only, though estimated at Rs. 26,200. They exceeded, however, the realizations of the years 1866-67 (Rs. 10,583), and 1867-68 (Rs. 17,510); but fell short of 1868-69 (Rs. 21,248). The reasons are explained in report of the Registration Department, from which it appears that there has been a considerable falling off in the memoranda of court decrees registered, and powers of attorney attested since 1868. The year 1869-70, however, shews a larger surplus of receipts over charges, namely Rs. 2,364, than any previous year; that of 1868-69 having been 1,648 Rs. and that of 1867-68 Rs. 2,282.

Police.

223. The receipts under this head were 6,000 Rs. below the estimate. The fines, forfeitures and miscellaneous items which are of a fluctuating character could not be estimated with much precision; but the principal asset is the contribution of the Bangalore Pété Municipality for the cost of its Police Rs. 16,894, which having fallen short of the estimate by about 4,000 Rs., the contribution was reduced to the same extent.

Education.

224. The estimates have been realized with remarkable exactness, the school fees being Rs. 7,617, against an estimate of Rs. 7,400, and the proceeds of school books, &c., Rs. 15,946, against an estimate of Rs. 16,000. The latter item is not a source of revenue however, the books being either purchased by Government, or printed and bound at the Government Press and sold at a moderate rate, sufficient to cover the actual cost of paper, printing, &c., with the expense of transmission to the districts, and other charges. It is almost needless to remark that the school fees are wholly incommensurate with the outlay on the maintenance of the Government schools. The High School fees amounted to Rs. 3,929 only, while the cost was Rs. 14,622. The school fees in the

district and talook schools vary from Rs. 196 in Chituldroog to Rs. 615 in Kolár. The time appears to have arrived, however, for relieving the State to a greater extent of the cost of education in those towns where the almost gratuitous tuition of the past 10 years has given the people the opportunity of appreciating the material advantage of education.

Botanical Gardens.

225. The receipts of the Government Botanical Gardens at Bangalore, estimated at Rs. 1,500, have amounted to Rs. 1,801, against a cost of Rs. 11,341.

Miscellaneous.

226. The receipts under this head can in a few instances only be estimated with any reliability. They amount to Rs. 95,380, against an estimate of Rs. 64,650; some of them call for a passing remark. The tolls levied on the Harihara bridge amounted to Rs. 4,219, the establishment employed for the purpose costing Rs. 456. The tolls in 1868—69 amounted to Rs. 2,895. The revenue of the Island of Seringaptam, for the occupation of which the Mysore State pays a quit rent to the British Government under treaty, of Rs. 50,000 per annum, has risen from Rs. 24,378 in 1868—69 to Rs. 27,305 in 1869—70, the estimate being Rs. 24,000,—an increase which is due to the levy of a mohatarfa tax at Ganjám, the only town in the Island. The receipts shewn under fines and forfeitures, savings and refunds, and escheated property, all of a casual nature, produced Rs. 31,000,—double the amount of the estimate. Unclaimed deposits transferred to credit of Government amounted to Rs. 1,500 only, though estimated at Rs. 6,000, and there is reason to apprehend from this trifling amount that the rule for transferring items of 3 years standing to credit of Government, has not been strictly attended to. The fees of the Money Order Department amounted to Rs. 3,946, against Rs. 2,565 in 1868—69, and Rs. 1,849 in 1867—68, when the Money Order System was first introduced into Mysore. The cash receipts for work done by the Government Press chiefly for the Madras and other Governments, shew the satisfactory gain to the Mysore State of Rs. 6,378. The Mysore Gazette produced by subscriptions and advertisements Rs. 2,220, against Rs. 1,448 in 1868—69, the cost of the establishment for compiling the Gazette (including translations) being Rs. 2,400 per annum. The sale of sundry articles sent by the Mysore Government Committee to the Paris Exhibition of 1866 was realized in 1869—70, and produced Rs. 794, against an outlay of Rs. 2,882.

227. The anticipated receipts from savings were Rs. 22,800, but being utilized for the purpose of constructing stables and barracks or lines for the men of the local force at stations where they were most necessary, they do not appear as an asset on the receipt side of the accounts. The rents of the lines occupied by the Sawár Regiments at Bangalore and Mysore have amounted to Rs. 2,870 in 1869—70; Rs. 3,034 were realized in 1868—69, and Rs. 1,878 in 1867—68. The question has been raised whether rent should not be charged by Government for all completed and occupied lines, both from the Infantry and Mounted Corps, in order to meet the cost of keeping the huts in repair which is likely to be considerable. The subject is under report by the Military Assistant; but it is not probable that such a measure could be introduced as regards the Infantry, whose pay would hardly admit of any reduction for this purpose.

Local Force.

228. The receipts credited to the Public Works Department amounted to no less than Rs. 82,514, against an estimate of Rs. 40,000 only, and go far to reduce the heavy outlay of the year in that Department. They are classified as follows in the civil accounts.

Public Works Department.

	Rs.	Rs.
Sums received through the Executive Engineers		42,939
Do. Civil Officers		
Surplus imprest refunded to Treasury	306	
Rent of Buildings	1,285	
Fines	6	
Sale of materials, &c.	1,161	
Contribution for works from the Public	11,450	
Recovered from District Plough Tax Funds, Cost of Establishment disbursed by Public Works Department	16,791	
Do. being cost of improving and constructing roads chargeable to District Plough Tax Funds	8,240	
Miscellaneous receipts	336	
		39,575
		82,514

The following is an abstract of the disbursements of the year 1869—70, compared with the Budget grants.

229. An abstract of the expenditure will be found in the appendix. The following remarks will elucidate the charges under each head as contrasted with the estimates for the year.

Expenditure.

230. The expenditure under this head was considerably in excess of the estimates, which must always be uncertain. The payments appear against the following sub-heads :—

Refunds.

	Charge	Grant.	Explanation of Excess.
Land Revenue	2,750	1,050	Rs. 1,763 refunded to ryots of Kunigallu and Sirá Talooks being additional assessments imposed on their lands.
Sáyer	3,777	2,250	Proceeds of Supári confiscated at Shimoga in a former year and ordered by Chief Commissioner to be refunded, Rs. 2,903.
Forest	374	550	
Abkári	6,861	1,600	Rs. 6,482 still head duty erroneously credited to Government in Mysore District and now refunded.
Stamps... ...	15,051	4,550	Rs. 5,971, half costs of suits in the Small Cause Court collected under new system in stamps instead of cash and refunded according to the rules of the Court; Rs. 4,895 refunded by order of Courts, in Bangalore 2,560 and Mysore 2,335.
Revenue Fines ...	14	3,450	*The convict hire was received in the first instance from a Public Works Contractor in cash, but not being provided for in the total of the sanctioned estimate of the works on which the convicts were employed, it was eventually refunded to him under the Chief Commissioner's authority.
Judicial do ...	1,407		
Magisterial do ...	2,233		
Registration fees...	6		
*Convict hire ...	7,129		
Miscellaneous ...	1,320		

231. The total expenditure charged to this head was Rs. 10,65,636, against a grant of Rs. 11,25,582. The regular revenue establishments, with the salaries of Superintendents of Divisions, Deputy Superintendents and Assistant Superintendents of Districts, their offices and the talook and village establishments, cost Rs. 6,86,621; the grant being Rs. 7,19,317, the net saving is Rs. 32,696. It would have been even more, but as anticipated in the report for last year, para 200, large arrears of furlough pay, disbursed to Mysore Officers at the India Office, London, in the years 1868—69 and 1869—70, were claimed by the Government of India from the Mysore State and adjusted in 1869—70 : they amounted to Rs. 68,389. The grants and charges under land revenue for the salaries of the Division and District Officers were,—

Land Revenue.

			Grant	Charge.
Salaries of Superintendents of Divisions			85,200	87,103
„ Deputy Superintendents			1,16,400	1,38,001
„ Assistant Superintendents			1,70,400	1,26,694
			3,72,000	3,51,798
Moiety charged to Law and Justice			1,86,000	1,75,899
The savings under Land Revenue from the above source was therefore Rs.				10,101
Under establishments, office contingencies and travelling allowances of the same officers, the saving was Rs.	17,556	Moiety		8,778
In talook establishments and other contingencies ...	17,977	Moiety		8,988
In village establishments	1,439	Moiety		719
In purchase and repairs of office furniture conveyance of records and binding books	1,815	Moiety		907
In repairs of civil buildings	6,404	Moiety		3,202
				32,695
In the grant of Rs. 98,906 for the Inam Commission under establishments and contingencies ...	...			17,492
Hálat on coffee establishment, grant Rs. 1,450 ...				1,003
Revenue Survey and Assessment Department, grant Rs. 2,02,000				2,206
Miscellaneous revenue charges, grant Rs. 29,460 ...				10,447
				63,843
Deduct excess charges under Channel Department, Rs.	453			3,898
„ Under Sáyer Rs.	3,445			
				59,945

Channel Department.

232. The excess under Channel Department was caused by a payment of Rs. 653, of which Rs. 507 was on account of a temporary establishment in the Mysore District, and Rs. 146 in the Hassan District.

Sáyer.

233. Under sáyer, the excess was caused by a grant of Rs. 5,000 to the Bangalore Cantonment Municipality, for the improvement of the Alsúr suburb, under sanction of the Chief Commissioner.

Forests.

234. Shews a saving on the estimates amounting to Rs. 6,386 after deducting an excess charge of Rs. 199 for travelling allowance.

Abkári and Assessed Taxes.

235. Are also within the grants.

Stamps.

236. Rs. 4,741 were disbursed in excess of the grant, which was Rs. 18,432. The excess is to be found in the charges incurred for dies of new values. Rs. 841 and Rs. 612 for the impressment and transmission from the Madras Mint to Mysore of the large supplies of

stamp papers required for use under the General Stamp Act. The commission paid to stamp vendors has exceeded the grant by Rs. 3,250, in consequence of enhanced sales of stamps which exceeded the estimated receipts by Rs. 53,000.

Mint.

237. Rs. 38,295 appear under this head, being the nominal value of 1,490 maunds of obsolete copper coins sold after mutilation in the year 1869—70, for which no provision was made in the Budget; the sale proceeds amounting to Rs. 13,600 appear on the receipt side.

Post Office.

238. The grant for the erection and repairs of anché huts, Rs. 10,000, was fully utilized, and was exceeded by Rs. 515; a fact which speaks favorably for the activity infused into the management of this Department during the year under report. On the total grant there is, however, a saving of Rs. 7,259, composed chiefly of a grant of Rs. 6,000 for additional runners which has not been trenched on.

Administration and Public Departments.

239. This head comprises among other items the charges of the Chief Commissioner's Office, the Military Assistant's Office, the Account Department and the Treasury at Head Quarters, the Money Order Department and the establishment of the Officer in-charge of Palace Duties; and shews on the whole a saving of Rs. 10,223. An excess of Rs. 75 in the Military Assistant's establishment, and of Rs. 200 in the Chief Commissioner's Treasury were caused by arrear payments, and Rs. 102 in the Deputy Accountant General's Office by an increase to the Chief Assistant's pay, which was, however, met from the contingent grant of the office.

Palace Charges.

240. No provision was made for the salaries of the Guardian of the Mahárája and the Controller of His Highness' Household, the final orders for these appointments not having been received before the Budget was framed. The payments on this account amounted to Rs. 46,659. The commutation of Palace pensions amounting to Rs. 1,56,371 was also unprovided for; deducting these sums from the total Palace charges amounting to Rs. 9,77,948, we have an expenditure of Rs. 7,74,918, against a grant of Rs. 8,12,887, or a net saving thereon of Rs.

37,969. Towards this saving the stipends of certain members of the Maharája's family contributed Rs. 9,679. The pensions paid to Palace servants shew a saving of Rs. 3,687; the pay disbursed to supernumeraries of Rs. 6,682.

241. Under the sub-head of "Supplies," which represents the contingent expenditure of the Palace proper, there was an excess expenditure of Rs. 7,862 as shewn below, which was chiefly due to the cost of accoutrements supplied from the Madras Arsenal for the Palace guard, an item which was not foreseen. But it was more than met by a saving in Palace repairs.

	Grant.	Expenditure.
Ordinary daily supplies	1,35,576	1,16,091
Do for Special Occasions	20,176	14,854
Gifts of money and clothes	44,248	30,380
Special purchases of horses, carriages, &c.	20,000	32,555
Contributions for marriages and deaths of relations ...	20,000	17,052
Ammunition and Accoutrements for Palace Guards ...	...	16,242
Miscellaneous items	...	20,698
Total Supplies...	2,40,000	2,47,872
Repairs and improvements of Palace buildings ...	25,000	12,528
	2,65,000	2,60,400

242. The sub-head of religious and charitable grants shews Rs. 2,284 paid on account of the allowances of certain Dévasthánams attached to the Palace, which were not provided for in the Budget of 1869--70; having been sanctioned after its submission.

Law and Justice.

243. The total grant under this head was Rs. 12,42,906, the expenditure, 11,29,805. In the Judicial Commissioner's Office there was an excess charge of 6,634 Rs. on account of the furlough allowances of the substantive Judicial Commissioner, the acting officer drawing the full salary under the rules. The new Judicial Assistants' Courts cost Rs. 64,964, against a grant of Rs. 60,000, the excess having been incurred on account of special contingent charges on their formation, and to the travelling allowances of the Assistants and their establishments, while the Courts were held at out-stations, an arrangement which was not anticipated. The Small Cause Court and the Cantonment Magistracy at Bangalore, the Registration Department, the Courts of the Superintendents of Divisions, of the Deputy Superintendents of Districts and of the Sar Amíns, shew each a small saving on their respective grants. Under

Jails it amounts to Rs. 76,098 chiefly in the pay of establishments, contingent guards, and the clothing, hospital expenses and rations of prisoners. There is also a saving of Rs. 6,969 in the cost of talook lock-ups, which cost Rs. 5,531 only.

Police.

244. This head comprises four sub-heads which will be separately noticed: 1st, the Bangalore Cantonment Police in which a saving accrued of Rs. 3,104, in the grant of Rs. 56,422, notwithstanding an excess payment of Rs. 3,858, on account of the pay of the Assistant Superintendent, who was appointed after the Budget was prepared. A portion of this charge as well as of the pay of the Superintendent may however be regarded as chargeable to the revised Police of the District, of which the Cantonment is only a part. 2nd, The Town Police of Bangalore cost Rs, 17,094, of which Rs. 16,894 have been received from the Municipality, leaving about 200 Rs. due on account of some contingent charges. The Town Police charges at the stations of Toomkoor, Shimoga, and Mysore, do not call for special remark, except that the cost in Shimoga and Mysore is to be borne by the respective Municipalities from the year 1870—71, certain local cesses having been assigned to them. In all the town Police establishments the cost, Rs 47,373 in 1869—70, was less than the Budget grant by Rs. 6,057. 3rd, The revised Bangalore District Police shews a saving of Rs. 6,722 in establishments, and nearly Rs. 3,000 on the grant for the repairs of tannahs. 4th, The Kandáchár Police has a saving of Rs. 25,355; Rs. 4,900 were provided for the repair and erection of Police choultries, but of this Rs. 944 only were expended.

Education.

245. The Budget provided Rs. 1,46,706 for the direction and inspection of the Department, and for the establishments of the Bangalore High School, the Normal and Engineering Schools, and the English and vernacular schools at the head quarters of districts and talooks. The outlay under these heads was Rs. 1,48,309, or Rs. 1,603 in excess of the grant. This was mainly owing to Rs. 6,015 being refunded to Her Majesty's Treasury on account of the furlough allowance of the Director of Public Instruction, which was paid at the Indian Office in the previous year. The grant for the new village schools was Rs. 66,420; but the outlay was Rs. 28,759, against Rs. 6,626 in the previous year, when the scheme for these elementary schools was

initiated. It will probably take another year to attain complete development. Under grants-in-aid, Rs. 37,000, there was a saving of Rs. 2,246.

Science and Art.

246. The cost of the Government gardens at Bangalore, which now include a menagerie and aviary, amounted to Rs. 10,641, and was kept within Budget limits, the produce of the garden realized Rs. 1,801 per contra. Rs. 700 under this head was a grant to the local Horticultural Society towards the expenses of the periodical shows. The expenses of the cinchona plantation on the Bába Buden hills amounted to Rs. 2,364, that on the Biligirirangana hills, which is a more recent experiment, to Rs. 376, an equivalent sum being also paid towards it by the Jahagírdar of Yelandúru; a sum of Rs. 2,609 was expended towards procuring photographs of antique temples and other views in Mysore. The maintenance of the Museum at Bangalore cost the moderate sum of Rs. 3,150. The buildings were much enlarged and adapted for the purposes of this useful and popular institution by a grant from Public Works funds.

Medical Services.

247. The Medical establishments with hospitals and dispensaries involved an outlay of Rs. 1,26,605, which fell short of the Budget grant by Rs. 9,979, but exceeded the charges of the previous year by Rs. 18,391. The growing cost of this Department is chiefly due to the enhanced allowances of the medical staff of all grades introduced since 1868 under orders of the Government of India. The furlough allowances of the District Surgeon of Mysore, paid by the Secretary of State, formed an additional charge of Rs. 5,450 in the year 1869—70, and the appointment of a Surgeon Major as the *locum tenens* of the Surgeon at the head quarters of the Commission, has enhanced the cost of that grant to the Mysore State by Rs. 243, being the difference in military pay of the two officers. The additional cost of hospitals and dispensaries follows on the extended usefulness of these institutions among the people and on the increase of public establishments.

Stationery and Printing.

248. This head shews a growing expenditure from year to year, in consequence of the constant growth of administrative requirements in all departments. An additional press establishment was enter-

tained for printing books for the Education Department, which are sold to the public at cost price, thus reimbursing the Government.

Allowances and Assignments, under Treaties and Engagements.

249. The head comprises the subsidy of the Mysore State to the British Government amounting to Rs. 24½ lacs, and the ½ lac rental of the Island of Seringapatam, the State pensions paid to the families and dependants of Hyder Alli and Tippu Sultan and the stipends of Pálégars. Four State pensions amounting to Rs. 536 per annum lapsed, and one at Rs. 96 per annum was renewed.

26 Miscellaneous.

250. The total of the grants under this head amounted to Rs. 82,370, and as it is only intended to comprise all expenditure of a special or extraordinary nature that can be foreseen, it is not surprizing to find some variations between the grants and the charges. The latter, Rs. 92,495, includes a sum of Rs. 20,317, which was disbursed in liquidation of a demand against the late Mahárája's estate, which was not anticipated.

Civil Repairs and petty Constructions.

251. The grant of Rs. 82,370 included Rs. 10,500 for the petty repairs and constructions of civil buildings, which was appropriated during the year, together with similar grants specially provided for the various departments. A statement of the grants for such works, and the actual expenditure under all heads is annexed, shewing an outlay of Rs. 55,408, out of an aggregate grant of Rs. 91,288. The expenditure in 1867—68 was Rs. 21,588, in 1868—69 Rs. 36,956. The increase of such expenditure in 1869—70 is mainly due to Rs. 13,608 for Palace repairs and improvements, and about Rs. 8,000 for anché houses.

Expenditure from Civil Budget Grants for Minor Repairs of Civil

252. The principal miscellaneous items of expenditure calling for notice are as follows:—

Rs.	
23,832	Travellers' Bungalow establishments and contingencies.
8,473	Rewards at enhanced rates for the destruction of animals; it was Rs. 4,700 in 1868—69. The reduction of the rates to the old scale will probably effect a curtailment of the outlay on this account in 1870—71.
1,272	Interment of paupers.
7,024	Purchase and repairs of tents.
6,753	Cost of the Bangalore Rifle Volunteers.
6,747	Planting avenues in the districts. The sum was 6,782 in 1868—69. In 1869—70 Rs. 4,764 were charged in the Nandidroog Division; only Rs. 301 in the Nagar Division; but Rs. 951 expended in the Chituldroog District was not adjusted in the year 1869—70, owing to delay in the submission of the bills. Rs. 1,660 were spent in the Mysore District; Rs. 22 only in Hassan. The total grant was Rs. 10,000, and it is to be regretted that it was not utilized in the Nagar Division and Hassan District.
6,228	For the purchase of books, maps, and advertisements on account of the General Administration.
924	Were paid for Japanese Cocoons for the encouragement of the declining silk manufacture, the expenditure on this account has been in 1867—68 Rs. 3,663, and in 1868—69 Rs. 7,162.

Superannuation, Retired and Compassionate Allowances.

253. *Superannuation Pensions.*—The expenditure was Rs. 68,554, *i. e.*, Rs. 1,500 in excess of the previous year: the grant was Rs .69,667. Donations to charitable institutions—Rs. 7,200 paid and provided. Gratuities to discharged public servants amounted to the large sum of Rs. 37,919; of this Rs. 11,582 was paid to superannuated peons of the Public Offices on a reduction of the establishment, and Rs. 23,890 to discharged Police peons on the revision of the District Police. These sums were not provided for in the Budget.

254. *Mutfarkhát Pensions.*—Rs. 3,970 disbursed against a grant of Rs. 3,586, which ought to have been 3,720; additional pensions of Rs. 132 per annum granted with arrears explain the excess.

255. *Muzaráyi Institutions.*—Comprising the Hindu and Mohomeden temples and feeding-houses are within the grant by Rs. 6,000,—a saving which is due to the non-payment of some of the allowances from various causes. There has been no accession to these endowments since the administration of the country was assumed by British Government, and as they are now subject to revision by the Inam Commissioner, some curtailment may be looked for hereafter on the allowances to the institutions; but it is to be feared that the buildings, if repaired, will entail a very large expenditure. The resumption and commutation of inams are as per margin.

	Rs. As. P.
Inams resumed	190—2—0
Do. commuted into land	360—5—3
	550—7—3.

256. The grant was Rs. 11,19,953; the expenditure Rs. 11,19,563, which included Rs. 16,729 for the construction of stables and lines for the Mounted Branch and Rs. 8,913 for the Bár or Infantry lines, which were provided out of savings in the Budget grants under authority of the local Administration. Besides these sums Rs. 25,076 were expended in 1869—70 for similar purposes from savings of previous years, which had been held in deposit under the like authority, leaving a balance at the close of the year of Rs. 2,693 in favor of the Sawár Department, and Rs. 1,832 in favor of the Bár. Under recent orders these works will in future be provided for from the Public Works grant.

Mysore Local Force.

257. The amount provided in the Budget for the Public Works Department was Rs. 14,50,000; but the total grant sanctioned by the Government of India in the Foreign and Financial Department was 17,00,000, of which 15 lacs was to be provided from the revenues of the year and 2 lacs from the surplus. The Public Works Budget was, however, framed by the local Administration on a basis of 18,91,440, and was approved by the Government of India in the Public Works Department, subject to the confirmation of the Foreign and Financial Department which was not however obtained. The advances applied for and placed at the disposal of the Public Works Department by credit orders was Rs. 17,71,935; which was not solely for Public Works expenditure, against the grant, but also to recoup the department for payment made out of the credit orders on account of local funds, deposits and contributions from private individuals.

Public Works Department.

258. The recredits to the department at the treasury amounted to Rs. 82,514, of which Rs. 10,853 consisted of Public Works revenue according to the Controller's annual account, leaving a sum of Rs. 71,661, which may be regarded as a set off against the payments on credit orders, which thus amounted to a net sum of Rs. 17,00,274.

Recoveries from District Fund on account of payments made in the P. W. D. on account of establishments.	16,791	Rs.
On account of works.	8,240	25,031
Contributions from private individuals towards works executed by P. W. D.		11,450
Remittances credited at the Treasuries from Executive Engineers and Civil Officers.	46,033	
Minus P. W. Revenue	10,853	35,180
		71,661

259. The above statement, however, does not take into view the balances of cash and drawing account in favor of the Public Works Department at the commencement of the year; and in his report on annual appropriation and outlay the Controller states that while the aggregate grant Rs. 17,00,000 was raised to Rs. 17,02,923 by a corresponding decrease in the stock balances, the actual outlay on Public Works was Rs. 17,37,457, or Rs. 34,525 in excess of the grant. He explains this excess by the circumstance that no provision was made in the Public Works Budget of 1869—70 for certain London stores for which a part payment of Rs. 50,000 was made under special orders of Government.

260. The total receipts brought to account in the year 1869—70 amounted to— Rs. 92,57,696

Financial Result of Revenues and Charges.

The total charges to	..	„ 1,07,52,749
Excess of charges during the year	..	„ 14,95,053

From the remarks on the land revenue, mohatarfa and salt receipts, it will be seen that the following sums were collected after the expiration of the year, *i. e.* in April, May, and June 1870, but on account of the year 1869—70, in consequence of the postponement of the periods of collection authorized in the Chief Commissioner's notification of January 1870 already noticed.

	Rs.
Land Revenue	14,40,627
Mohatarfa	61,073
Salt	5,200
	15,06,960
Add arrears due 30th June 1870 under Land Revenue.	46,900
Under Mohatarfa.	12,800
Total ..	15,66,600

Hence it will be seen that, had the revenue of 1869—70 been realized within the year as anticipated in the Budget, it would have left a surplus of Rs. 71,600. The postponement of the collections must, however, be regarded as entailing on the Mysore State an advance from its current cash balances during 1869-70, of about 15 lacs, which is the excess of expenditure over receipts. In the year 1870-71, when it is expected that the new periods of collection will be fully observed, it is estimated that about 10 lacs will need to be similarly advanced.

PUBLIC DEBT, 1869—70.

PUBLIC DEBT.

261. The first head comprised in public debt is the Mysore Invested Surplus Fund formerly designated "Mysore Trust Fund." The designation was altered under the sanction of the Government of India, Financial Department, No. 3977, dated 9th October 1869, on the ground that the dependants of the late Mahárája, for whose maintenance the fund was originally intended to provide from the income of the invested surplus, were on His Highness' death provided for out of the general revenues of the Mysore State. There were no charges against the fund in 1869-70, and the assets at the close of that year were as follows:—

Mysore Invested Surplus Fund.

	Rs.	As.	P.
Cash in the Chief Commissioner's Treasury on the 31st March 1869	1,19,516	4	11
Nominal value of Government Securities in the Government Treasury, Bank of Madras	25,23,300	0	0
Interest for 12 months at 4 per cent received during 1869-70 on Government Securities amounting to Rs. 23,23,300 ...	92,932	0	0
Do on Government Debentures amounting to Rs. 2,00,000 at 5 per cent, for 18 months	15,000	0	0
Total...	27,50,748	4	11

262. A detailed account of these funds will be found in the *appendix, exhibiting the state of the accounts of each Municipality. The total expenditure exceeded the receipts of the year by Rs. 15,386, the excess having been disbursed out of balances at credit.

Municipal Funds.

263. The assets of these funds are devoted to the construction and maintenance of district roads. An abstract of the accounts is given in the *appendix. The expenditure in excess of the receipts within the year 1869-70, as shewn in the margin, occurred chiefly in the districts of the Nagar Division, in carrying out an extensive system of roads devised by the Superintendent and sanctioned by the local Administration. In the Bangalore and Hassan Districts also the outlay was abnormally large, but within the available assets. Further collections on account of the year's plough tax demand were made in all the districts in the months of April, May, and June to the amount of

District Plough Tax Funds.

Balances. 31st March 1869.	Receipts. 1869-70	Charges. 1869-703	Balances. 31st March 1870.
2,02,991	1,02,333	1,73,535	1,31,989

*Not printed.

Rs. 28,900, the period of collection having been postponed like that of land revenue.

One Anna Cess for local purposes. One Anna Tank Fund.

264. In the surveyed talooks of the Shimoga and Chituldroog Districts, cesses consisting of one anna in the rupee for tank repairs and one anna for roads, education and other purposes were as follows. No portion of these cesses have as yet been expended.

	Balance. 31st March 1869.	Receipts. 1869—70.	Total. 31st March 1870.
One Anna Cess for tank repairs.	1,957	3,128	5,085
One Anna Cess for local purposes.	22,783	19,404	42,187

Personal Estate of the late Mahárája.

265. The sum of Rs. 16,307 credited to this head, accrued from the sale of 11 elephants and some shares held in the P. and O. S. N. Company belonging to the late Mahárája's estate. A charge of Rs. 553 was incurred on account of premium paid on a life policy held as security for a debt due to the estate, Rs. 4 stamp duty on a power of attorney, and Rs. 2,175 on account of 132 head of cattle, which were sold in 1868-69 to the Madras Commissariat, but returned for the use of the Palace establishment in 1869-70, when the value was charged to the personal estate account to which it had in the first instance been credited. The balance at credit of this head at the close of 1869-70 was Rs. 1,55,321.

Police Superannuation Fund.

266. This fund was formed in June 1868 for providing pensions or gratuities for the men of the revised District Police. The assets consist of a subscription of six pies per rupee of the pay of the Police men. The balance which accumulated to credit on the 31st March 1870 was Rs. 6,090, there being no disbursements from the fund.

Military Assistant's Equipments Account.

267. This account represents advances made for the purchase of equipments for the local force, chiefly cloth for uniforms, the actual cost of which is recovered by regulated instalments from the pay of the men. The balance standing against the head on 31st March 1870 was Rs. 26,489, of which Rs. 15,620 was the value of stock in store.

Bullock Dák.

268. The system under which advances were made on account of bullock dáks for travellers was abolished in August 1868, from which time ready money payments were introduced agreeably to para 233 of the Administra-

tion Report of 1868—69. During the year 1869--70 a sum of Rs. 2,106 was adjusted by the several districts under instructions of the Account Department, leaving a net balance of Rs. 542 still unsettled.

Chanda Fund.

269. This fund was provisionally sanctioned by the Chief Commissioner in June 1869, and consists of deductions made at the rate of 12 annas per month from every alternate month's pay of each native officer and sillédar belonging to the local mounted corps. It is designed for the purpose of aiding them in the purchase under given rules of horses required to supply the places of those which have died or become unfit for further service. The receipts and payments during 1869—70 on account of the fund were Rs. 34,410 and Rs. 21,212 respectively, the balance on the 31st March 1870 was Rs. 13,198.

270. The heads noted in the margin do not call for any special remark. The balances at their credit at the close of 1869—70 are noted.

	Balance 31st March 1669-70.
Surplus Funds of Dévasthánams and Chattrams...	25,099
Allowances deducted from Sáyer and other Collections.	15,708

Small Cause Court Suitors' Fund	3,021
Revenue Deposits	1,23,055
Judicial do	50,828

Advances Recoverable.

271. The next important head is that of advances recoverable, which exhibits on the disbursement side Rs. 5,45,172 and on the receipt side Rs. 5,02,170. The first sub-head styled suspense account represents Rs. 2,28,427 paid, and Rs. 2,49,213 adjusted. The balance outstanding was Rs. 57,403, as per margin.

Advance for annual supply of stationery for 1870-71 ordered from England.	22,000
Do for Medical Stores ordered from England	8,343
Do for Jail charges ...	7,861

Ordinary advances subject to adjustment in 1870-71	9,603
An old Book Balance ...	5,201
Total...	57,403

Forest Advances.

272. These advances are made from the treasuries on the authority of credits issued by the Account Department and on the cheques of Forest Officers, and adjusted by bills for conservancy and working charges. The balance outstanding was Rs. 8,988.

Revenue Survey Advances.

273. The advances made to the Survey Department for the payment of field establishments, boundary-marks, and

contingent charges amounted to Rs. 1,77,000; the sum adjusted amounted to Rs. 1,75,175. The balance outstanding on 31st March 1870, was Rs. 51,727, including Rs. 49,902, brought on from the commencement of the year.

Advances for Boundary-Marks recoverable from Ryots.

274. This head exhibits the cost of demarcating cultivated and inam lands, the amount being transferred from the foregoing head of revenue survey advances to the special head under review, as a demand against the lands concerned, which is recoverable from the occupants. The advances and recoveries from the commencement of the survey to the close of 1869—70 were as follows:—and it is to be observed that the progress of recoveries has not kept pace with the outlay.

Advances.

Districts.	Up to 1865—66.	1866—67.	1867—68.	1868—69.	1869—70.	Total.
Bangalore	...	...	...	...	15,373	15,373

Total.....	...	38,118	32,859	25,374	33,791	1,30,142

The balance outstanding on 31st March 1870 was Rs. 2,45,290, for the speedy recovery and adjustment of which orders have recently been issued.

Her Majesty's Treasury.

275. This head of account shews the sums received and paid at the Mysore Treasuries on account of Her Majesty's Government and adjusted in cash with Her Majesty's Treasury at Bangalore from month to month.

Local Remittances.

276. The total of the debits under this head was Rs. 1,51,66,279, and the credits Rs. 1,51,76,600; the difference is to be found under the sub-head of remittances between district treasuries and other talooks, arising from the debits and credits appearing in different months.

277. The cash balances were on the 31st March 1869.

			Rs.	As.	P.

Money Order Department.

279. 1869—70 was the 3rd year since the introduction of this Department into Mysore. The progress in the work is indicated by the following comparison :—

	No. of Orders issued.	Amount.	No. of Orders paid.	Amount.
1867—68	3,464	1,62,668	2,918	1,36,073
1868—69	4,595	2,28,778	3,983	1,86,542
1869—70	7,204	3,50,086	5,871	2,53,238

280. The profit in 1869—70 was Rs. 2,606, against Rs. 1,408 in 1868—69.

		Rs. As. P.	Rs. As. P.
Receipts.	Commission	3,895 4 0	
	2nd Commission for alterations, &c.	51 4 0	
	Lapsed Orders	45 8 0	
			3,992 0 0
Charges.	Controller's Establishment ...	480 0 0	
	Do Contingent charges ...	80 11 10	
	Agents' Fees	708 9 0	
	Do. Contingent charges ...	115 15 0	
			1,385 3 10
	Profit or Surplus.		2,606 12 12

281. The benefits of the Money Order system have been extended to the inhabitants of talooks, where there are no special agencies, by permitting the Talook Treasuries to receive and pay sums on account of the district agencies. The experiment was introduced in the year 1869—70, and has been so far successful, that transactions have taken place in 55 out of 74 talooks; 399 money orders were thus issued amounting to Rs. 21,907 and 226 were paid amounting to Rs. 10,935.

VIII. FOREST.

282. The report* has been drawn up, as far as practicable, in accordance with Government of India, Department Public Works, Circular No. 18, dated 4th November 1868, and is accompanied by a map which illustrates its contents.

INTRODUCTORY.

283. The introductory section (paras 2 to 64) contains much interesting information under the following heads.

I. (Paras 2 to 17) Statistics and physical features, and divisions of Mysore.

II. (Paras 18 to 55) Account of the divisions and chief towns with special reference to the sources whence the inhabitants derive their supplies of timber, and other forest produce.

III. (Paras 56 to 61) Sandalwood, in what localities found; description of the tree and wood; its propagation; new system of collection.

IV. (Paras 62 to 64) Forest Legislation. Remarks on the Rules now in force, and certain proposed amendments to them.

284. This section of the report does not call for any comment here beyond the remark that the information it gives under the above heads, appears to have been collected and recorded in a careful and creditable manner.

285. The questions connected with the fuel-supply of Bangalore, and the other principal towns, are of much importance, and demand attention; the clearances that have for long been going on in their neighbourhood having greatly enhanced the difficulties of furnishing it and the price of the article. The requirements under this head for the great station of Bangalore are enormous, and their due supply places the fuel-producing districts within a radius of 30 or 40 miles from it, under heavy and constant requisition.

286. It may be noticed here in connection with this subject, that one of the most ordinary local sources of supply of wood and fuel elsewhere, is almost wholly wanting to the ryots of the greater part of

* The Forest Conservator's report has been printed separately.

Mysore, *viz.*, hedges and trees of an inferior and fast growing description on the boundaries between the fields and holdings.

287. The attention of the District Officers has lately been drawn to this subject, and it is hoped that with their encouragement and the assurance that has been conveyed to the ryots that all such plantings will be wholly their own property to dispose of as they please, the latter may be induced to introduce them generally on the village lands, and so to lighten the existing demands on the wooded tracts of the country.

288. The measures adopted for the growth of the sandal-trees in the reserves formed for the purpose will, it is hoped, be successful, and ensure the continuance of the revenue realized from this valuable wood by placing its cultivation and supply for the market under a regular system, instead of trusting as hitherto to its hap-hazard germination and growth.

289. The proposed revision of sections 36 to 38 of the Forest Rules, referred to in para 62 of the report, has been sanctioned by the Government of India. The regulations regarding the import of wood into Mysore referred to in para 63, are still under consideration. The question of the substitution of the Draft Forest Rules for the Hyderabad Assigned Districts, for those now in force in Mysore, is now under report to the Government of India.

SPECIAL.

HEAD 1.—STATE FORESTS AND FORESTS LEASED BY THE STATE.

First Section.

290. (Paras 65 to 67) The list given under para 65, shews that there are 24 State forests, excluding those of Maddagiri, covering an area of about 370 square miles, of which 7, measuring 222 square miles, have been settled and demarcated, while three more, measuring 40 square miles, will shortly be so.

Second Section.

Requirements of the Population in the Vicinity of the State Forests in the matter of wood, &c., how provided for.

291. (Paras 68 to 70) The observations under this head call for little remark; the demarcation of the State forests, and consequent with-

drawal of the freedom to cut wood, and to collect forest produce in the tracts so reserved formerly enjoyed by the people of the neighbourhood could not but be productive of inconvenience and apparent hardship amongst them ; but there can be no question of the rights of Government in this matter.

292. The further extension of State forests is desirable, and will be undoubtedly hereafter productive of advantage to the public and the Government ; and it will be carried out as such can be effected with convenience.

Third Section.

Protection of the Forests.

293. (Paras 71 to 73) *Nagar.*—There were 20 cases of breach of Forest Rules reported, of which 3 only were of a serious character.

Ashtagram.—27 cases were reported, mostly of a trifling character. Orders have been issued for the more speedy adjudication of forest offences in the Hassan District.

Nandidroog.—There are no returns of forest offences in this Division, the late Sub-Assistant Conservator, Mr. Clarke, having neglected to keep a record of them.

294. On the whole, the breaches of Forest Rules have been few and unimportant, and the alterations in Sections 36 to 38 of the Forest Rules (already referred to) will facilitate the prompt disposal of such when they occur.

None of the Forest Officers have as yet been invested with Magisterial powers, and there does not at present appear to be any necessity for their being so.

Fourth Section.

Improvement and Extension of the Forests.

295. (Paras 74 to 87) The progress made in surveying and clearing the forests has not been as yet very great.

Nagar.—The Lakkuvalli and Shankaragudda forests, with an area of 69 square miles, have been surveyed and are being mapped ; and divi-

sion lines of the length of 43½ miles were cleared (21 feet in width) at a cost of Rs. 1,592, at between 36 and 37 Rs. per mile.

Ashtagram.—The clearings in the State forests were not finished till April, and will appear in the next Annual Report.

Nandidroog.—Nothing under this head appears to have been done.

A proper and regular system of felling cannot be introduced till the complete division of the forests into departments and blocks; and this important measure must be pushed on as speedily as possible.

296. *Plantations.*—Since the report was written, information has been received from both Mr. Dobbs, in Nagar, and Mr. Ludlow, in Ashtagram, that the teak seeds sown in the nurseries in both Divisions in the latter part of 1869—70, have at last freely germinated.

Of nearly 41,000 teak seedlings planted out in the Lakkuvalli and Vittalamakappana Kanavé's plantations, about 36,000 have survived.

297. The views expressed in para 82, as to the best plan of conserving and improving the present teak forests are deserving of attention, and should be adopted as far as possible. With proper care and arrangements, there is no reason to doubt that the resources of this and other valuable woods, may be greatly extended, due judgment being exercised as to the localities selected for nurseries and plantations, and the natural reproduction of the forests being properly aided and protected in the way proposed.

298. Of two sandal reserves selected in Nagar, one had been enclosed, and the seed sown in it broadcast last year has germinated. The other was about to be made over to the Forest Department. In Ashtagram, a reserve, 87 acres in extent, was formed, and the seed similarly sown in it also germinated; but a large proportion of the seedlings died from want of moisture at the close of the hot season. The Conservator regards this unfavorable result as exceptional, and considers that the principle on which the reserves of this valuable wood are now formed will prove successful.

No sandal reserves have yet been formed in Nandidroog; but sites are being selected for the purpose.

299. *Fuel Reserves.*—Up to the present year, little has been done in their establishment. None have as yet been formed in Nagar or

Ashtagram. In Nandidroog the report of the Hosakóté plantation is encouraging, and the Australian wattle sown in it in 1868 promises to be successful.

During the current year, amply large tracts for the formation of fuel reserves for the railway line, will have been made over to the Forest Department, and every effort shall be made to push on this most important work. The delay in obtaining the transfer of land for this important purpose ought to have been brought sooner to notice by the Conservator, when the necessary steps would have been taken for the removal of the difficulties which interfered with the measure.

Fifth Section.

Actual Yield of Forests, Disposal of Timber, &c.

300. (Paras 88 to 93) In Nagar 26,515 cubic feet of teak and other woods were felled, and 49,060 cubic feet were sold, realizing Rs. 40,772.

Teak ...	5,515
Other woods	21,000

The collection of sandalwood amounted to 1,348 kandís, of which 1,126 kandís were sold, realizing Rs. 81,906.

The average rates obtained were, 13 annas 2 pie per cubic foot for timber, and Rs. 85—10—3 per kandi for sandalwood,—Rs. 19—10—3 per kandi more than in the previous year.

In Ashtagram the felling amounted to 25,419 cubic feet of teak and other woods; the collections including previous fellings aggregating 38,432 cubic feet and 64¼ cart loads. The sales amounted to 29,699 cubic feet and 82½ cart loads, realizing Rs. 31,537. The felling was less by 16,500 cubic feet than estimated for, and much felled wood still remains to be collected, which will reduce the quantity to be felled during the current year.

Teak ...	11,693
Other woods	13,726

The collection of sandalwood was 638 kandís, and the sales amounted to 770 kandís, which realized Rs. 69,259.

The average rates obtained were, 1—0—7 per cubic foot, and Rs. 7—5—11 per cart-load for timber, and Rs. 89—15—1 per kandi for sandalwood, or Rs. 3—8—3 per kandi more than in 1868—69.

In Nandidroog no timber was felled during the year. The collections of sandalwood amounted to 428, and the sales to 458 kandís which realized Rs. 42,168 at Rs. 92—1—2 per kandi, or Rs. 6—9—2 more than in 1868—69.

The following table recapitulates the above in an abstract form.

Range.	Timber felled, &c.								Sandalwood collected, &c.				
	Felled and collected.				Sold.				Collected.		Sold.		
	Quantity in cubic feet.	Number of poles & pieces.	Cartloads.	Average cost per cubic foot.	Quantity in cubic feet.	Cartloads.	Rate per cubic foot.	Amount realized.	Number of Kandís.	Cost per Kandi.	Number of Kandís.	Rate per Kandi.	Amount realized.
				A. P.			Rs. A. P.			Rs. A. P.		Rs. A. P.	
1 Nagar ...	26,515	98	...	3-4	49,060	...	0-13-2	40,77	1,348	7-3-11	1,126	85-10-3	81,906
2 Ashtagram .	25,419	...	64	5-4	29,699	82	1-0-7	31,537	638	10-12-2	770	89-15-1	69,259
3 Nandidroog.	...	...	...	...	...	...	...	...	428	11-11-6	458	92- 1-2	42,168
Total...	51,934	98	64	4-4	78,759	82	0-14-10½	72,309	2,414	9-14-6	2,354	89- 3-6	1,93,333

The stock of timber and sandalwood in store, in the three Divisions, aggregated 9,417 logs and poles of the former, and 1,245 kandís of the latter, the estimated value of the whole being Rs. 1,63,828.

The receipts from minor forest-produce are shewn separately.

301. The arrangements for disposing of timber and sandalwood described in paras 94—95 appear to be satisfactory, and do not call for remark.

302. Para 96 describes the lines of export of the woods purchased in Mysore, and it will be seen that most of the sandalwood is forwarded by the Western Coast for Bombay, where it is in large demand for various purposes of industry and luxury.

This wood grows well in Central India; but it never seems to have been turned to account there, as in Mysore. Possibly it is not equally fragrant with that grown on the Mysore plateau.

DISTRICT FORESTS.

303. (Paras 97 to 102) The several District Forests are shewn on the map, and they are described in paras 97 to 100 under this head.

The establishment and proper supervision of a fitting number of this class of forests are of the utmost importance for the comfort and convenience of the public ; and the Conservator's remarks on this head in para 101 of his report are perfectly correct,—though there is a difference of opinion as to whether the measures proposed should be controlled by the Forest or the Revenue Department. It is hoped that the arrangements stated therein may be carried out successfully, the objects of this class of forests not being to bring in a revenue to the State, but to provide firewood and timber of an ordinary description for local consumption, at low and reasonable rates.

GENERAL.

HEAD I—FINANCIAL RESULTS.

304. (Paras 103 to 107) The following table gives an abstract of the financial results as shewn in the report under this head.

	Ranges.	Expenditure.		Receipts.		Surplus.
		Estimate.	Actuals.	Estimate.	Actuals.	
1	Nagar Range	40,640	39,355	1,33,000	1,39,209	99,854
2	Ashtagram „	41,348	34,444	1,13,600	1,10,157	75,713
3	Nandidroog „	38,648	17,077	43,900	48,852	28,775
	Total.....	1,20,636	90,876	2,90,500	2,98,218	2,04,342

The net surplus amounting to Rs. 2,04,342, which by some other small additions is stated to be made up to Rs. 2,05,368, of which Rs. 1,90,968 have been received in cash (para 107).

305. Of the sum provided in the Budget for expenditure under the head of plantations, Rs. 13,000, only Rs. 3,737 were utilized, which must be regarded as very unsatisfactory, though, as far as regards Nandidroog, the failure is due to the gross neglect, and unfitness for his post of the late Sub-Assistant Conservator in charge, Mr. Clarke.

This highly important class of works is now receiving more attention, and it is hoped that the next Annual Report will shew that it has made fair progress.

GENERAL REMARKS.

306. (Paras 108 to 110) The contemplated operations for the current year do not call for special remark ; the quantities of timber and sandalwood proposed to be collected and sold, is shewn in the following table, and appears unobjectionable.

Range.	Timber.			Sandalwood.	
	Teak.		Jungle wood cubic feet.	Kandis.	Tons.
	Cubic ft.	Poles.			
Nagar Range	9,000	1,000	20,000	1,500	375
Ashtagram „	15,000	1,000	24,000	1,20	300
Nandidroog „	...	...	...	500	125
Total.....	24,000	2,000	44,000	3,200	800

—besides 800 cart-loads of small wood in Ashtagram, and cuttings and thinnings of State forests in Nandidroog.

The fellings of teak in Ashtagram will be small, as much cut-wood remains in the forests, and will be carted in during the year.

307. The establishment of fuel plantations and sandal reserves will be pushed on with more vigor, and fresh efforts have been directed to be made to rear and plant out teak in the forests suitable for its growth.

The demarcation, clearing, and divisions of the State forests into blocks and compartments, must also be carried on with energy ; and it is expected that the next Annual Report will shew creditable progress under all these heads.

308. Para 111 of the report states the imports of timber into Mysore from Madras and Coorg during the past year to have been—

	Number.
Teak logs	3,620
Jungle logs and posts	8,958
Bamboos	24,230

There is no means of ascertaining correctly the quantity of timber exported from Mysore, excepting as regards sandalwood, the whole of which is so disposed of.

309. The working of the Department on the whole, during the past year, was satisfactory, though there are no doubt as yet many shortcomings in it, which will require the utmost attention and energy on the part of the Conservator and his subordinates to rectify. The profit on the year's transactions, as noted in para 304 of these remarks, though not so large as in previous years, is still very considerable, and the outstanding balances are not of any large amount.

The sales of sandalwood aggregated 2,354 kandis, and under the new arrangements that have been made for the collection of this article the supply will probably increase.

310. Lieutenant van Someren, the Conservator, is a zealous, painstaking, and intelligent Officer, and his services and labors merit special acknowledgment here. He has had many difficulties to contend with during the last year, the most serious of which were caused by the gross incompetence and unfitness for his duties of the Sub-Assistant Conservator, Mr. Clarke, in charge of the Nandidroog Range, who entirely neglected his work, and was at length dismissed by order of the Government of India. The charge of this range was in consequence unavoidably thrust on the Conservator, in addition to his own duties, to the detriment of the latter.

The complaint of the inefficiency of the office establishment of the Conservator, in para 118 of the report, appears to be well founded, and shall receive attention.

311. Mr. Dobbs, the Deputy Conservator, Nagar Range, is an active and steady Officer, and has performed his duties in a creditable and satisfactory manner.

Mr. Ludlow, Assistant Conservator, Ashtagram Range, has worked carefully since his transfer from Coorg to Mysore. He is an observant and intelligent Forest Officer, and will doubtless strive by future care and attention to his duties, to make amends for any neglect on this head, of which he was guilty when Assistant Conservator of Coorg.

The subordinates generally of the Department are favorably reported on. One Sandal Daróga is under trial for a gross breach of trust.

IX. REVENUE SURVEY AND SETTLEMENT.

312. Lieutenant-Colonel Anderson's Progress and Administration Reports of the Mysore Revenue Survey and Settlement bring the operations of the department under the former head up to 31st October 1869, and under the latter to 31st March 1870.

313. Major Prescott was in charge of the department up to the 10th November 1869, when Colonel Anderson rejoined from furlough.

314. The department was of the same strength as the previous year, with the addition of two supernumerary Assistant Superintendents.

315. The establishment had been increased to 214 measurers and classers, and 59 apprentices, against 162 of the two former and 72 of the latter at the commencement of the year.

316. The progress up to 31st October (1869) on which date the complete survey year closes, was, as regards final settlement operations, but little in advance of that stated in the Administration Report for 1868—69, and extended only to a part of one (the Soraba) Talook; but the preparations were far advanced for the settlement of two more * entire talooks and part of a † third, and it is expected that it will be completed in them by July 1870.

* { Búdihálu. Soraba.
† Chennagiri.

317. The total final settlement up to the 31st October 1869 included six complete talooks and part of a seventh, containing an area of 1,958,201 acres and a population of 248,795 souls. The revenue of the occupied lands in these talooks has been raised by the settlement from Rs. 4,17,998 to Rs. 4,41,106, the arable waste being further assessed at Rs. 1,41,848.

318. Measurement operations were completed in two *talooks and nearly so in a third † and were in progress in six ‡ other talooks, the cause of their introduction into so many of the latter at the same time being that it is not possible to carry on survey work in the western or Malnád districts after the middle of May, and the consequent necessary transfer at that season of the establishments employed in them to the more inland talooks where the operations can be continued.

* { 1. Bangalore. 2. Pávagada.
† 1. Kengéri.
‡ { 1. Shikáripúra. 2. Ságara. 3. Maidagiri 4. Kortagere. 5. Doddéri. 6. Molakálumúru.

319. Classing was in progress in two * talooks, and it was expected that the remainder of the Chennagiri Talook and three † other complete talooks would be ready for settlement next season.

* { Soraba. Toomkoor.
† { Soraba. Toomkoor. Bangalore.

320. The total area measured and classed up to 31st October 1869 was as shewn in the margin, the total expense, including the cost of settlement, being Rs. 6,63,433.

Measured. 4,144,436
Classed. 2,727,202

321. The extent of land measured and classed during the survey year ending 31st October 1869, as compared with the previous year, was as noted in the margin, and shews a large increase. The Survey Commissioner observes that the increase in actual work in classifications is even larger than would appear to be the case at first sight, the field being the unit by which the work under this head may be reckoned and nearly as much labor being required in classing a moderate sized field as a much larger one.

Year.	I. Measurements.					II. Classifications.				
	Fields.	Acres.	Cost per acre.			Fields.	Acres.	Cost per acre.		
1867—68.	44,620	7,89,780	0	2	0¾	27,417	6,69,521	0	0	9·9
1868—69.	53,644	9,95,428	0	2	3½	40,627	6,80,645	0	0	11·1
Increase in 1868—69.	9,024	20,5,648	0	0	2½	13,210	11,124	0	0	1·2

322. The cost of measurement shews an increase of $2\frac{3}{4}$ pies and of classification of $1\frac{1}{5}$ pies per acre, or a total cost for both operations of 3 annas $2\frac{6}{10}$ pies per acre, against 2 annas $9\frac{8}{10}$ pies the previous year. The rate of the previous year was considered high, and the increase is very considerable, but it is stated to be wholly due to the natural obstacles to rapid measurement that have been experienced.

323. The total cost for all operations during the season under report was Rs. 1,82,078, against Rs. 1,33,733 the previous year.

324. The amount of test applied by the Officers superintending the measurements and classings was considerably in excess of that carried out in the previous year, and the result is satisfactory being $\frac{26}{40}$ of an acre per cent mean average difference between test and measurement and $5\frac{1}{4}$ pies difference between test and classification, against $\frac{23}{40}$ of an acre and $6\frac{1}{4}$ pies respectively in the previous year. The increase in the former

difference is stated to be due to the increased difficulties of the season's measurements.

325. The operations of the current field season, between the 31st October 1869 and 31st March 1870, which period is not included in the year under report, are stated to be as shewn in the margin. Their results will be duly entered in the next season's report.

	Acres.
Measurements...	429,230.
Classifications ...	254,530.

326. The maps of 784 of the total number of 1,155 villages in which the settlement has been completed have been lithographed, and issued to the local Officers. The maps of 371 villages have yet to be supplied.

327. The operations of the Department are being gradually extended, and, as it is of the utmost importance that they should be pushed on as rapidly as is consistent with the primary requirements of a good and useful settlement, it is hoped that means may be found to increase the establishments needed for the purpose of expediting the completion of the work.

328. The subject of the remission of the emoluments of village officers referred to in the last Administration Report of the Province has been lately under report to the Government of India, and final orders have not yet been passed on it.

329. Colonel Anderson, and the Superintendent of the Survey (Captain Grant,) both testify to the hearty aid and co-operation afforded to the Department by the District Officers during the year under report, and the Superintendent specially notices the assistance rendered by Védántaiengar, and Kristnaiya, Amildars of Soraba and Bangalore, respectively, and the excellent manner in which Rámaiya, Amildar of Hiriyúru, prepared his settlement papers.

330. Colonel Anderson speaks in high terms of the exertions made by all the Officers of the Survey and the satisfactory manner in which they have performed their duties during the year under report, and specially notices, as deserving of commendation, the creditable manner in which Captain Grant has carried on the responsible work of Superintendent, and the diligence and attention which Captain Anderson, and Mr. Butcher, have shewn in the classing operations entrusted to them.

X. INAM COMMISSION.

331. In the previous Annual Reports, the nature and scope of the inam investigation were explained in detail, and only the operations of the year under report will be briefly reviewed here.

332. During the year the Inam Commission was strengthened by the creation of another Assistant's Office, to which Mr. Subba Rao was appointed. Sanction was also obtained for the formation of a Judicial Department in the Central Office at a cost of Rs. 160 monthly, as the judicial work had greatly increased under the operation of the Land Inam Rule 21 and of the Chief Commissioner's notification of the 5th July 1869, a copy of which is subjoined.

NOTIFICATION.

Under Rule 21 of the Mysore Land Inam Rules published in the Mysore Gazette of 12th December 1868, page 632, all suits relating to inam property are cognizable by the Inam Commissioner, and his decisions are final, subject to revision by the Chief Commissioner, should an appeal be preferred within the space of 3 months. But as a total prohibition against such suits being entertained by the District Civil and Revenue Courts would be productive of delay and inconvenience, the following Rules are prescribed for guidance under the authority of the Government of India.

1. In all talooks to which the inam enquiry has not been extended, suits regarding inam property, the value of which does not amount to 10,000 or upwards, shall be entertained and decided as heretofore by the District Civil and Revenue tribunals; but appeals from their decisions will lie to the Inam Commissioner instead of to the Courts of the Superintendents as at present. The appeal petition must be preferred within the space of 3 months.

2. Suits relating to inams of the value of 10,000 and upwards, shall be filed in the Court of the Inam Commissioner, from whose decision, however, an appeal will lie to the Chief Commissioner, if preferred within the space of 3 months.

3. In suits where a compromise between the parties is proposed, the District Civil and Revenue Courts shall forward the proceedings with their opinion to the Inam Commissioner, for review and final decision in order that the interests of Government may be duly protected.

4. Suits relating to unenfranchised inams the reversionary right of which was not compromised in the present inam settlement, shall not be entertained by the local Civil or Revenue Courts without the sanction of the Inam Commissioner.

5. The above Rules apply to inam holdings of all descriptions excepting the service tenures of Shánbhógs and Patéls, and shall have effect from 1st August 1869.

333. Additional English and Vernacular Clerks were also entertained at a cost of Rs. 300 per mensem for the preparation of title deeds and of fair copies of the Inam Registers for the offices of the Chief Commissioner, the Superintendent of the Division and the Deputy Superintendent of the District.

334. The inam investigation of the talooks noted in the margin was taken up and finished. These talooks together with those enumerated in the last report compose the entire district of Chitaldroog, the Maidán portion (or plains) of the Shimoga and Kadoor Districts, and the district of Toomkoor, with the exception of the talooks of Turivékere, Kunigallu and Huliyúrdurga, and Maddagiri and Koraṭagere in which the inam investigation was still in progress at the close of the year under review. With the exception of a portion of the Hiriyúru Talook, the talooks taken up by the Inam Department had not been settled by the Survey Department, though the operations of the latter were in progress in five of them. It cannot therefore be shewn in this report whether the results of the settlement of the Inam Department differ from those based on the measurement and assessment of the Survey Department; but Colonel Clerk, the Inam Commissioner, who is probably the most experienced Revenue Officer of this Commission, is of opinion that, taking the result on the whole of the settlement of a talook by his Department in advance of that of the Survey, there is little probability of the interests of Government being sacrificed. Indeed he expresses his fears that, if either party suffer by that arrangement, the inamdar will do so. The results of the settlement of the Hosadurga Talook, in which the difference between

1. Harihara (part.)

14. Búdihálu.
15. Chikkanáyakanahalli.
16. Honnáli.
17. Koratagere (part.)

the former assessment and jódi of inams was greatly altered, the former being reduced to the level of the latter, as quoted by the Inam Commissioner in support of his opinion--scarcely any margin being left by that settlement for the imposition of a quit-rent.

Sannads.

335. The dates of the sannads examined by the Inam Department range from the 15th century to the present era, the grants having been made by the Anégundi Rájás, the Kiládi, Ikkéri and Nagar Chiefs, Hyder Ali, Tippu Sultan, Deván Púrṇaiya and the late Mahárája respectively.

336. Paras 21--26 of the Inam Commissioner's report treat of the forest rights of inamdars and the orders that have been issued defining the same, which Colonel Clerk considers to entail much hardship on the class. These orders were, however, promulgated after full consideration of his views on the subject, and the question does not therefore call for further remark here.

337. It was considered advisable to extinguish the "Kodagi" inam tenures and to enfranchise the inams granted under this head for the repair and maintenance of the bunds of certain tanks, subject to three different rates ranging from $\frac{1}{8}$ to $\frac{1}{2}$ quit rent on the lands of such inams, the inamdars being wholly relieved from all future obligation in the above respect; but the disposal of the question has been postponed, under instructions to that effect conveyed in the despatch* from the Secretary to the Government of India in the Foreign Department, noted in the margin. The Inam Commissioner advocates the early settlement of the question, and as it seems very desirable that it should be dealt with as soon as it can conveniently be so, it is proposed to re-submit it when certain information that is required is forthcoming.

* No. 8, dated 22nd April 1870.

338. The number and value of kodagi inams in the talooks already taken up by the Department is shewn below.

	Extent.				
No. of Inams.	Dry.	Wet kandís.	Garden.	Total.	Assessment Rs.
367	1,277	582	25	1,884	4,872

Irrigation Cess on Inamdars' wells.

339. The Inam Commissioner remarks on the orders issued for the levy of the irrigation cess of one anna in the rupee of the assessment upon inam lands irrigated from wells constructed at the cost of the inamdars themselves and in no way connect-

ed with any Government work. The Survey Commissioner and Superintending Engineer of Irrigation to whom the question was referred, were of opinion that the cess should be levied on the grounds that such wells are supplied with water by the process of percolation from the Government works to which they are adjacent, that by the efficient up-keep of these works, the water supply is maintained for the country generally, and that without such up-keep private wells would be exhausted. The Inam Commissioner differs from this view, and observed that the percolation may on the contrary be from an inamdar to a Government tank or well. The circumstances of the water supply in many parts of Mysore are peculiar, and the order to which the Inam Commissioner objects was issued after very full consideration, and appears to be sound in principle though it may undoubtedly tell with hardship in some individual cases, which should be treated as exceptional, if entitled to special exemption from the cess.

340. The Inam Commissioner also discusses the question of Malnád inams, and explains the grounds for the proposals made by him for their settlement, which were not concurred in by Mr. Bowring. The subject of these inams was very fully considered before final orders were passed regarding them, and it is unnecessary here to do more than to make this brief reference to it.

Civil Jurisdiction.

341. The Land Inam Rule 21 confers civil powers on the Inam Commissioner and his Assistants, as explained in the class of cases specified in para 282 of the Administration Report for 1868—69; but till recently the Court of the Inam Commissioner alone exercised such powers, all suits being referred to the Assistants merely for preliminary investigation. This course was, however, found productive of inconvenience and delay, and, with the Chief Commissioner's sanction, all suits "inter-parties" up to the value of Rs. 3,000 are now disposed of by the Inam Assistants, subject to appeal to the Inam Commissioner.

Mortgaged Inam.

342. A question of great importance connected with the judicial portion of the inam settlement has arisen in the disposal of inams in the hands of mortgagees, the mortgager and his heirs having become extinct, or not to be found.

Inam Suits.

343. The subjoined statement exhibits the number of cases disposed of by the Inam Commissioner and his Assistants in their original and appellate capacity. The return of work shewn under this head is small, but their judicial functions were not regularly exercised till the month of September 1869.

F.

Statement shewing the Revenue and Civil Original Appeals and Special Appeal Cases filed in the Courts of the Inam Commissioner and his Assistants from 1st April 1869 up to 31st March 1870.

Description of Cases.	No. of Cases.	Value of Suits.	Value of Stamps upon Suits.	Value of Stamps upon Arzis.	Penalty.

Total of columns 4,5 and 6

659—8—11.

344. The comparative absence of litigation is attributed in a great measure to the knowledge that the parties gain from the preliminary enquiry that is always made when the inam is registered.

345. The additional cost of the Judicial Department during the months in which it was worked amounted to Rs. 1,179; but it was more than half covered by the value of the stamps used in the suits instituted.

Muzaráyi or Money Grants.

346. The value of the allowances brought under the operation of the Muzaráyi Rules, which were fully explained in para 279 of the Administration Report for 1868—69, in the year under report and the previous year is shewn in the subjoined statement. The small amount of work done under this head during the year under report has been explained by the Inam Commissioner, who has suggested a change in the mode of carrying it on, which it is expected will prove more convenient and expeditious than that hitherto adopted.

Statement.

No. of cases.	Value registered and payable in Cash.	Value of Resumptions.	Merged into Jódi.	Commuted into land.	Confirmed in kind.	No. of certificates issued.
376	Rs. 22,519-14-0	Rs. 190—2—0	Rs. 246—8—5	Rs. 262-5-11	5½ Maunds of Sandal.	150

347. The question of choultrie endowments is alluded to by the Inam Commissioner, who considers it to have been flagrantly abused and to call loudly for reform. The orders already issued for his guidance in dealing with them do not sufficiently meet the requirements of the case, and the subject is under reconsideration.

348. The cause of the falling off in the amount of quit rent imposed during the past as compared with the previous year is satisfactorily explained by the Inam Commissioner.

349. The following table gives particulars of the resumptions made during the past as compared with the previous year.

Statement shewing the resumed, &c., Inams for the years 1868—69 *and* 1869—70.

| Districts. | Number of cases resumed. | Under what Rules resumed. | | |

350. The value of inams under attachment pending the attendance of the holders was Rs. 1,039.

351. The total number of cases received in the Central Office during the year was 14,592, of which 9,695 were disposed of as follows :—

6,163 Confirmed aad enfranchised.
82 Un-enfranchised.
477 Resumed.
19 Struck off.
127 Attached.
2,814 Referred to the Survey Department.

352. The remainder, with few exceptions, were all reviewed and ready for confirmation. 4,504 title deeds were prepared and issued during the year.

353. The Inam Commissioner reports the manner in which he has disposed of certain petty taxes which have been levied for Government in inam villages and of the claims of inamdars to levy sáyer and abkári duties which do not call for remark here.

354. The financial results of the Inam Commission shew that the receipts under all heads during the year, were Rs. 14,074, against an expenditure of Rs. 86,510. The Inam Commissioner observes that the object of the commission was not to increase the revenue, but that the quit rent imposed will in a few years cover the entire outlay incurred on its account, and will thereafter remain a permanent addition to the public income.

355. The results shewn are as satisfactory in the above respect as could be looked for.

356. The small percentage 1·79 of un-enfranchised inams in the proceedings of the year under report, indicates the growing popularity of the inam settlement ; the operations of which will finally fix and dispose of many perplexing questions connected with inams, and greatly enhance the value of this description of property throughout the country.

The following table shews the total extent and other particulars of the inams confirmed and enfranchised up to the close of the year.

	No. of cases confirmed.	Inams enfranchised and confirmed.												Inams un-enfranchised.			
		Extent in Acres.				Assessment.	Former Jódi.	Quit-rent.	Excess charges.	Combined quit-rent.	No. of title deeds issued.	Extent, acres.	Assessment.	No.	Acres.	Assessment.	Jódi.
		Dry.	Wet.	Garden.	Total.												
1868—69 ...	2,733	45,699	2,361	193	48,253	35,973	8,097	3,436	896	12,396	2,054	29,805	22,267	20	331	446	51
1869—70 ...	3,440	73,810	12,272	510	86,592	57,168	20,732	2,693	...	23,438	4,302	24,785	17,984	62	435	840	316
Total.....	6,163	119,509	14,633	703	1,34,845	93,141	28,829	6,129	896	35,834	6,356	54,590	40,251	82	766	1,286	367

357. Several of the inamdars who declined enfranchisement in the first instance are now eager to obtain it, shewing that they even have begun to appreciate the advantages of the measure.

358. The Inam Commissioner refers to the subject of the orders issued regarding the supply of duplicate title deeds to the Registration Offices as required in Section 3 of Act XXXII of 1868; but these orders were subsequently modified by Notification No. 83 J., dated 27th May 1870, exempting the Province of Mysore from the operation of the said section of the Act, the requirements of the case being sufficiently provided for by duplicates of all inam registers being supplied to the offices of the Chief Commissioner and the Deputy Superintendent for permanent record therein.

359. The Inam Commissioner complains of the inadequate aid rendered by the Talook Officials and the additional labor that isin consequence thrown on his Department, which retards the progress of his work. The subject has been referred to the Officers concerned with strict injunctions to take the steps required to remove all further grounds for complaint on this head so far as such is practicable. Colonel Clerk remarks on the hearty assistance given to his Department by Captain Pearse, the late Deputy Superintendent of Toomkoor and certain Amildars whom he names.

360. In conclusion the Inam Commissioner commends the services during the year under report of his Assistants Captain Blair and Messrs. Gópálaiya, Narasimaiengar and Subba Rao, all of whom he considers have performed their work zealously and efficiently.

XI. MISCELLANEOUS.

1. POPULATION.

361. The returns of population for the Province shew an increase of 50,426 souls or 1¼ per cent in excess of the year previous. This excess, however, is probably attributable to the returns having been more carefully prepared. The classification of the population, in accordance with the Statistical Committee's forms, is shewn in the subjoined tabular statement.

	1868—69.	1869—70.
Europeans	4,132	4,151
Eurasians	2,863	2,855
Native Christians	7,949	8,186
Mahomedans	182,654	189,272
Hindus	3,793,744	3,839,679
Pársís	60	0
Budhists and Jains	13,964	12,623
Aborigines	745	0
Total ..	4,006,111	4,056,766

362. The proportion of population to area in the several divisions of the Province is shewn below :—

	Area.	Population to square mile.
Nandidroog Division, Square mile	9,095	179
Ashtagram ,, ,,	7,345	185
Nagar ,, ,,	10,563	101

363. The ratio of population to the area of the whole Province is 150 per square mile, whilst it stood at 148¼ in 1868—69. Of the total population there were 2,173,856 males and 1,872,910 females, the males being in excess by 16 per cent.

2. MORTUARY RETURNS.

364. The number of deaths reported during the year amounted to 31,104, or about 7 among a thousand of the whole population, against 6·9 in the year previous. The ratio of deaths per square mile was 1·8. In the

year 1868—69 there were only 5 deaths from cholera whilst in the year under review 607 persons died from it. It prevailed in the districts of Bangalore, Kolár, Toomkoor, Shimoga, Kadoor, and Chituldroog.

365. The subjoined statement will exhibit the causes of death as contrasted with the year previous.

	No. of Cases. 1868—69.	No. of Cases. 1869—70
Small pox	353	349
Dysentery	627	1,220
Diarrhœa	498	886
Cholera	5	607
Other diseases	25,514	27,479
Accidental or violent deaths	817	563
Total.....	27,814	31,104

366. An analysis of the returns gives 32½ per cent of deaths as having occurred to persons under 20 years of age, against 33 per cent in the year previous. The mortality amongst persons of ages between 2[illegible] and 50, and above 50 years, was 40 and 27½ respectively, against 4 and 27 in the preceding year.

367. The loss amongst cattle amounted to 115,565 head, against 119,467 in 1868—69, shewing a decrease of 3,902.

368. This result is attributed to an improvement in the season which were exceptionally bad in 1868—69; but the number is still ver large, and the losses from this cause most serious. Measures have bee lately adopted to improve the supply of forage for cattle, and the service of a special officer have been applied for in connection with this importan subject, and also in view to the general improvement of agriculture i Mysore.

369. In the Bangalore Cantonment, where the population as take by the census in 1868 is estimated at 79,301, the number of deaths du ring the year was 393 or nearly 5 per 1,000, while in the preceding yea it was 428 or 5·42 per 1,000. The particulars are as follows :—

	1868—69.	1869—70.
Europeans	63	68
Eurasians	9	9
Musalmáns	45	39
Hindus	311	277
	428	393

3. AGRICULTURE.

370. The season in the Nandidroog and Ashtagram Divisions was on the whole favorable, though the early rains did not fall till later than usual, and some loss was thereby caused to the dry crops.

371. The season in the Nagar Division is reported to have been more or less unfavorable, and the absence of rain in the early part of the year caused the gravest apprehensions. In the Chituldroog District of this Division the dry crops are reported to have been a total failure, except rági and javari which only yielded a poor crop.

372. Rain fell during 142 days of the year, and the quantity guaged in each Division, as contrasted with that for the year previous, was as follows :—

	1868—69.		1869—70.	
	In.	Cents.	In.	Cents.
Nandidroog	37	½	37	6
Ashtagram	56	25	55	0
Nagar	87	52¾	58	55

373. The area of the Province was estimated, according to calculations made by Colonel Green the Chief Engineer in 1856, at 27,004 square miles, but, according to the returns now furnished by each Division, it is considerably in excess of that estimate. These returns are, however, unreliable, and will in due course be corrected by the operations of the Survey Department. The total estimated area may be classified as follows :—

Cultivated and pasture ..	$\frac{6}{16}$
Waste (culturable) ..	$\frac{1}{16}$
„ (unculturable) ..	$\frac{1}{16}$
Mountains, Main roads, &c. ..	$\frac{8}{16}$

but these proportions are merely rough estimates.

374. The extent of land taken up under various tenures, &c., and lying waste, is shewn in the subjoined table.

	Acres.	G.	Yds.	Acres.	G.	Yds.
Area of kandáyam land under cultivation	3,393,366	3	20			
„ Batáyi	43,178	21	22			
„ under coffee cultivation	10,992	36	114			
				3,547,537	21	35

Total....	.....	.....	.....	8,072,593	2	115
Estimated area of mountains, rivers, &c. ...	.....	.....	.....	10,732,172	23	6
Total Area.....	.....	.....	.....	18,804,765	26	0

375. The extent of land cultivated with the various products, as contrasted with the year previous, was as follows :—

	1868—69. Acres.	1869—70. Acres.
Rági and other food grains	2,198,476	3,021,956
Rice.	389,692	1,333,681
Coffee	108,741	110,931
Oil seeds	77,388	118,030
Sugar-cane	38,650	22,011
Vegetables	35,718	19,660
Cotton	31,605	51,574
Tobacco	19,004	23,520
Wheat	8,976	8,677
Fibres	7,192	5,310
Mulberry	12,710	11,854
Opium	1,201	1,151

376. The average prices of food grains during the year as compared with those obtained in 1868—69, shew a downward tendency.

377. The results of the experiments continued to be made in the Nandidroog Division in the cultivation of Carolina rice were unsuccessful. The crop failed everywhere except in the talook of Gudibanda,

Carolina Rice.

where, however, the yield was only 10 fold, whilst the indigenous paddy in ordinary soils will yield from 20 to 30 fold.

Coffee.

378. Owing to unfavorable seasons and the ravages of the "Borer" the out-turn of crop was less than in 1868—69; but it is gratifying to find that there is ground for belief that this destructive insect is beginning to disappear from the estates in Mysore. The hálat, or excise duty of 4 annas per maund levied on coffee produce realized Rs. 66,970 13—3 on 267,911 maunds, against Rs. 104,407—1—2, on 417,623 maunds in the previous year.

379. In Hassan, which is the chief coffee growing district of Mysore, there were 23,062 acres cultivated by Europeans and 28,683 by natives during the year under review, against 22,905 and 28,578 acres respectively during the year previous.

380. The amount of crop produced by each class of estate in this district and the duty levied thereon are noted below :—

	1868—69.		1869—70.	
	Maunds.	Rupees.	Maunds.	Rupees.
European ..	25,852	6,463	22,580	5,645
Native ..	139,952	34,988	92,028	23,007

Cotton.

381. A further distribution of Hinganghát cotton seed was made in the Nandidroog Division during the year; but the result is reported to have been a total failure, arising partly from deficient care and partly from unseasonable rains. The task of successfully introducing foreign products into a Province like Mysore is an arduous one, and the personal efforts of the local officials are requisite and must be continually exercised to overcome the innate and deep seated prejudice against innovations, which is so prevalent amongst all classes, but especially the agricultural class in this country.

Silk.

382. The manufacture of silk, which affords occupation to a large number of the Mahomedan population of the Bangalore and Mysore Districts, has been most seriously affected by the disease amongst the silk-worms which has been generally prevalent of late in other parts of India, and elsewhere. Fresh cartoons of eggs from Japan have been re-

cently imported, and as the ryots appear to have failed on previous occasions of their distribution to pay the requisite attention during the incubation of the eggs and rearing of the young worms, Dr. deVecchj, the head of the enterprising firm at Kengéri, who arranged for the importation of the new stock, kindly undertook to rear the worms at his factory previous to their distribution; but this measure has not been attended with much success. A further supply of cartoons has been ordered for the ensuing season, and Dr. deVecchj has proceeded himself to Japan to make a selection of the eggs. It is hoped that their arrangements will lead to the revival of this branch of industry, which is of much importance to the class of people concerned. It has however been brought to notice that the raw-silk produced by the imported worms is found to be unsuited to native looms, and that in consequence it can only find a ready sale at Messrs. deVecchj and Co's factory. The possible monopoly that may thus be established has occasioned a feeling of alarm amongst the parties interested in this branch of industry.

Cardamoms.

383. This plant grows wild in the forests along the western ghâts, and the present system is to sell the produce in the Government forests annually by auction. An excise duty of Rs. 2 per maund is levied on cardamoms grown in the coffee plantations. Of late, attention has been directed to the cultivation of this plant, and it has been proposed to lease out the forests for the purpose as in Coorg, after the State forests have been marked off. The coffee planters are also now desirous of being allowed to grow other products than coffee on their plantations, such as tea, cardamoms, cinchona &c.; but as no land tax is levied on their estates, an excise duty being in lieu thereof imposed on the coffee produced only, a compliance with their wishes will necessitate the entire revision of the terms of their present grants, and the subject therefore requires consideration.

Cinchona.

384. The cinchona plantation on the Bábábudan hills consists entirely of the succirubra species, as it was found to thrive best on those hills. The Government of Madras has sanctioned the deputation of Mr. Broughton, the quinologist, for the inspection of the plantations in this Province, and it is hoped that they will be thoroughly examined by that gentleman and

their condition reported on by him. About 2,000 cinchona plants have been distributed to the Hassan, Shimoga, and Kadoor Districts.

385. A plantation was formed in 1867 on the Biligirirangana hills, which are connected with the chain of the Nílgiri hills and belong to the Jahagírdar of Yelandúr, the descendant of the famous Dewán Púrnaiya. In 1868—69, there were 1,380 trees in the plantation, and the number now is 2,388. They are reported to be thriving very well. The permanent establishment consisting of an overseer and 2 coolies only costs Rs. 48 per mensem, half of which is defrayed by the Jahagírdar.

4. ARBORICULTURE.

386. The planting of avenue trees along the roads in the Nandidroog Division was entrusted to contractors, whose agency having signally failed, the contracts had all to be cancelled. The planting and rearing of these avenues are now entrusted entirely to the ryots.

Bangalore. 387. In the Bangalore District, 15,649 trees have been planted by contractors, and 59,118 by the ryots.

Toomkoor. 388. The Deputy Superintendent reports favorably of the maintenance of the young trees; wells have been sunk wherever requisite for the purpose of watering them.

Kolár. 389. In the Kolár District, the ryots had planted 47,767 trees up to the close of the year, and 6 wells had been sunk at a cost of 1,600 Rs.

Mysore. 390. Much credit appears to be due to Mr. Ricketts, the officiating Deputy Superintendent of the Mysore District, for the zeal and energy displayed by him in personally directing the planting of some 477 miles of road, or nearly the entire roadway of the district with avenue trees. About 20 per cent of the number planted out had failed, and their places were filled up on the setting in of the rains. The work had been cheerfully done by the ryots, and Mr. Ricketts' success shews what can be effected by the display of personal interest on the part of the District Officers.

391. Out of 3,146 villages in this district, 655 had tópes previous to 1869—70, and 581 village groves were formed during the year under review.

Hassan.

392. Captain Hill, Deputy Superintendent of the Hassan District, has also displayed commendable zeal in attending to the wants of his district in this respect; 34,898 seedlings and 6,878 cuttings were planted during the year, which raised the total number planted to 164,426. 1,509 village groves were also planted, and attention has been paid to the formation of local fuel plantations.

Shimoga.

393. In the Shimoga District, 28,038 trees were planted at a cost of Rs. 511 out of a Budget grant of Rs. 1,000.

Kadoor.

394. There were 55,573 trees in existence along 388 miles of road in the Kadoor District.

Chituldroog.

395. The Chituldroog District is very barren and bare of trees, and great attention is required for the successful establishment of avenues and indeed arboriculture of any description within its limits. Six wells have been sunk in this district for the purpose of watering the young trees, of which 12,957 were planted out during the year. Of this number, 7,905 were supplies, and only 5,052 were actual additions; considering the urgent wants of the district in this respect and the great length of the lines of road to be planted, much more ought to have been done under this head in this district.

396. The teak and blackwood trees and bamboos planted in the small plantation formed in the Jógimatti hills are thriving, and promise to be successful. The number of village groves had increased from 140 to 264.

5. HORTICULTURE.

397. During the past year 2 exhibitions on a large scale were held in the Lál Bágh at Bangalore. The first and largest towards the end of the cold season for competition in fruit, vegetables, flowers, cattle, sheep, poultry, farm produce, silk, cotton, cereals, all strictly Mysore grown. This exhibition was well attended and a very successful one. The native community appear to take an increased interest in such exhibitions. On

no former occasion has there been such competition for the prizes for fine cows, bullocks, and country bred horses, or so many competitors in sheep and poultry.

398. The fruit and vegetables were excellent, shewing capabilities of the Mysore climate for growing almost every culinary vegetable of Europe and many of its fruits. The varieties of apple already introduced are considerable, and some would be worthy of exhibition in a London Market.

399. In introducing new ornamental plants and flowers the Horticultural Society has been very active, at least 70 new kinds have been imported successfully during the year.

400. Experiments are being made with a view to introducing new grasses and forage, of which there is a great want in the Province, also the true cochineal of commerce. The Society has been useful in distributing a great quantity of acclimatized seeds of different kinds to all parts of Southern and Central India. A large quantity has also been sent to Italy and Germany with a view to exchange of seeds with those countries.

401. The exertions of the Honorary Secretary of the Society, Lieutenant Colonel Boddam, in furthering its useful objects, merit special mention here.

Lál Bágh.

402. During the year a cage for the lion has been constructed. The greenhouse, the building of which was commenced last year, has been completed, and is well adapted for the growth of ferns, orchids, &c., and other plants requiring shade. Two structures for the culture of *fuchsias*, *begonias*, and the hardier class of ferns have been erected, and a stone reservoir has been placed near the central walk leading from the bandstand to the bund of the tank above the garden.

Introduction of Plants.

403. Several useful plants have been introduced, among which may be noticed the sumach (*Rhus coriaria*) which has been raised from seed, and which from the healthy appearance of the plants, promises to thrive in this climate. Experiments have also been tried with Havana and Manilla tobacco, which, there is reason to expect, will prove superior to the tobacco grown in this country. Plants of the *ficus macrophylla*, a beautiful New Zealand tree with an edible fruit, have been raised from

seeds. A collection of fruit trees consisting of olives, plums, and pears from Marseilles presented by a gentleman, arrived in good order and have since thriven well.

404. *The quasia amara, camphora officinarum willinghbeia edulis, elais guineensis, swietenia, mahogani, gynerium argenteum, and galega, officinalis*, have also been added to the collection of plants during the year.

405. The *pinus maritima* continues to grow satisfactorily. The raising of Sandalwood from seed is also receiving attention.

406. Some English flower plants have been purchased, and many have flowered. The *azaleas geranium* and few of the roses are particularly good.

Interchanges.

407. Interchanges of plants have been effected with the botanical gardens at Calcutta, and with the Madras and Ootacamund gardens.

Distribution of Plants.

408. The Vanilla and Chinese grass cloth plants have been supplied to planters in Coorg, Manjarábád, and on the Nílgiri and Shivaráyi hills, also 4,121 timber trees, fruit trees, and ornamental plants have been supplied to District Officers and to the public. The value of seeds and plants thus supplied is estimated at upwards of Rs. 2,000.

409. Much is being done to add to the usefulness and attractions of the garden, which is much frequented by both Europeans and natives.

6. MEDICAL.

410. From the reports of the Medical Officers it would appear that, with the exception of the prevalence of cholera to a slight extent in some of the districts, the general health of the community was good during the past year ; but, as the new vital statistical returns have only been introduced since its close and the mortuary returns previously in use are not considered reliable, Doctor Ranking, the Deputy Inspector General of Hospitals, is disposed to think from observations made in the districts of the Madras Presidency, also under his supervision, that the year has not been a healthy one. The admissions and deaths in the civil hospitals of the several districts are noted in the subjoined statement.

Districts.	Establishments.		Ryots and Camp Followers.	
	Sick.	Died.	Sick.	Died.
Bangalore	272	3	102	...
Toomkoor	17	...	2070	5
Kolár	41	..	3191	2
Mysore	0	...	...	...
Hassan	221	...	711	3
Shimoga	79	...	332	...
Chituldroog	103	...	3549	...
Chikkamagalúru	31	...	1848	3
Total.....	1,22	3	11,803	13

411. Cholera prevailed during the year under report to a moderate extent. It was imported by bodies of pilgrims from the annual festival at Tirpati in the Madras Presidency, and was introduced by some of them into the Cantonment and town of Bangalore, in which prompt measures to grapple with and limit the spread of the disease were adopted with markedly successful results. In the Cantonment, as soon as intimation was given of the importation of cases by rail and of their admission into the bazars, the residences of the sick were sought out, and a system of disinfection of dwellings and clothes enforced under the direction of the Municipal Sanitary Officers. By the adoption of these measures the disease was limited to a few isolated cases, whilst in the pété, in which these precautions were not enforced, it appears to have been left pretty much to work its own will amongst the population, and prevailed as a wide spread epidemic entailing for many days a loss of 20 to 30 lives per diem. Doctor Kirkpatrick attributes the outbreak in the pété to two cases, which occurred on the 9th and 14th September 1869 amongst travellers bathing on the outskirts of the town. It established itself amongst the inhabitants on the 15th September, and did not cease till the 20th of October, between which dates 349 seizures and 171 deaths occurred. The epidemic is said to have attained its zenith between the 22nd and 29th of September, and to have prevailed mostly in a circumscribed part of the town which, though high and well drained, is densely populated. The houses in this locality are low pentroofed and ill-ventilated, closely packed together and separated by narrow and very dirty lanes. It should be added that similar measures to those adopted in the Cantonment last year for checking the spread of this fatal epidemic were enforced with marked success during the present season in both the Cantonment and pété. At the suggestion of Doctor Ranking, the

Deputy Inspector General of Hospitals, Indian Medical Department, the Rules in force throughout the Madras Presidency for the sanitation of fairs and festivals have been adopted in this Province, in which some such regulations were much required in the case of the larger gatherings of this class.

Sanitation at Fairs and Festivals.

412. The forms of returns for exhibiting sickness and mortality in the several jails have hitherto differed, and, on the Deputy Inspector General's recommendation, the Madras form, which has already been introduced into the Central Jail at Bangalore, will be adopted in future. The average daily strength of the prisoners' increase rated in all the jails of the Province was 1767·5 with 2,148 admissions into hospitals and 101 deaths. The ratios per mille were:—

Jails.

Sick to strength	..	1215·2
Deaths ,,	..	57·14

413. The average daily number of prisoners in jail during the year under report was 857. The admissions into hospital amounted to 726, the average daily sick to 25·31 and the deaths to 26. The health of the prisoners incarcerated in this jail was not considered to have been so good as during the year previous. The great sickness and mortality are attributed to some occult agencies connected with the atmosphere as exemplified by the prevalence of cholera, to overcrowding of the jail, and to the failure of the water supply in the wells and consequent deterioration of its quality.

Central Jail.

414. The subjoined statement gives the ratios of admissions into hospital and of deaths.

Years.	Rates per mille of strength.		
	Sick.	Died.	Average daily sick.
1865—66	632·6	47·11	30·3
1866—67	908·5	54·06	34·39
1867—68	799·9	39·56	36·3
1868—69	788·4	10·04	26·4
1869—70	871·7	30·34	29·5

415. These statistics for the other local jails in the Province are given in the following table :—

Jails.	Daily average No. of Prisoners.	Admissions.	Deaths.	Per mille ratio.	
				Sick.	Deaths.
Toomkoor	108·7	136	1	1,251·	9·2
Kolár	107·4	256	4	2,383·6	37 2
Mysore	252·0	295	15	1,250·	59·92
Hassan	19·5	22	1	...	...
Shimoga	353·7	432	51	1,221·4	144·19
Chituldroog	47·0	187	2	3,978·7	42·55
Chikkamagalúru ...	22·2	73	1	3,978·7	45·0

416. The mortality of 59·92 per mille in the jail at Mysore is very high, though favorable, compared with the ratio during the year previous, when it was as high as 117·5 per thousand. The mortality was most excessive amongst the women, one-third of the whole having died. The Civil Surgeon in charge was unable to offer any special explanation to account for so many deaths in this jail, which appears to have been in all respects well looked after. In the Hassan Jail the improved state of health of the convicts is attributed to the introduction of the new improved and varied scale of diet.

417. The rate of mortality in the jail at Shimoga was most excessive, being upwards of 15 per cent of strength. No sufficient reason has been assigned for this extraordinary death rate. The accommodation provided for the prisoners appears to have been ample, the new wards having been occupied and there being no overcrowding, while the paving of the barrack yards was completed before the monsoon set in. The scale of diet was the same as that in force in the Central Jail at Bangalore, and vegetables were for some months issued in excess of the regulated allowance. The clothing was also considered generally sufficient. On an investigation of the daily labor exacted, it was considered that, as compared with that performed by ordinary labor, the bulk of the prisoners had been overworked. This conclusion seems to have been supported by the fact that the gangs employed on out-door labor, into which only healthy men were admitted, furnished the greatest number of sick; but it is probable that exposure to malarious influences outside the jail had something to do with this result. The Judicial Commissioner concurred with the Medical Officers that the standard of work should be

reduced, and this was ordered accordingly. The state of health of the prisoners in this jail, has since improved, and the ratio has been reduced for the half year subsequent to 46·97 per mille.

Hospitals and Dispensaries.

418. The number of in and out patients treated in the several hospitals and dispensaries in the Province, exclusive of the Lunatic Asylum and Leper Hospital, is shewn in the following statement:—

Stations.	Hospitals and Dispensaries.	Total treated.		Died.		Per mille ratio of In-patients.
		In.	Out.	In.	Out.	
Bangalore ...	Pété Hospital ..	672	20,062	55	...	81·8
Do. ...	Bowring Civil „ ...	1,195	10,362	130	1	108·9
Mysore ...	Rájás „ ...	460	23,091	57	4	123·9
Shimoga ...	Civil „ ...	358	4,972	24	3	67·04
Hassan ...	Dispensary ...	...	711	...	3	...
Kolár ...	„ ...	...	3,191	...	2	...
Toomkoor ...	„ ...	26	2,044	1	4	38·4
Chituldroog ...	„ ...	...	3,549	...	...	...
Chikkamagalúru ...	„ ...	...	1,848	...	3	...
	Total.....	2,711	69,830	267	20	94·8

In-patients 161
Out „ 10,413.

419. There was a considerable increase in the number of patients treated during the past, compared with the previous year, which the Deputy Inspector General notices as indicating a growing appreciation by the poorer classes of the benefit of these institutions. Venereal disease, of which a very formidable type exists in the peté, was rather less prevalent during the year under report. It is hoped that the measures under adoption for the more effective suppression of this terrible scourge at Bangalore will prove efficacious.

Bowring Civil Hospital.

420. Doctor Ranking describes this valuable institution as the model Civil Hospital of Southern India, and is of opinion that the progress made by it in the estimation of the people is most satisfactory and encouraging. He considers that this hospital offers peculiar advantages as a school of instruction for the education of a body of medical practitioners for the Government of Mysore, and it is hoped that a medical school may in due time be established with this object in connection with it. At present it is proposed to train up a certain number of native medical pupils at it for the local service, preparatory

to their being sent with the sanction of the Madras Government for the completion of their medical education to the Medical College at Madras.

Leper Hospital.

421. There were 42 lepers in the hospital at the end of 1868—69, and 9 were admitted during the past year; of this number 5 died, 3 absconded, and 43 remained under treatment at the close of the year. The general health of the lepers, irrespective of their special malady, was good: treatment as regarded leprosy in its various forms, is reported to have been of little avail. The majority of the cases being too far advanced for any thing more than palliative measures.

422. The expenditure during the year amounted to Rs. 2,092—15—10 or Rs. 263—15—10 less than in the year previous.

Lunatic Asylum.

423. The conversion of the range of buildings known as the old "Pété Jail" which adjoin the asylum, into suitable quarters for the increasing number of insanes was carried out during the year.

424. The number of patients at the asylum is noted below:—

	Males.	Females.	Total.
Remaining, 31st March 1869	77	27	104
Admitted in 1869—70.	32	12	44
Total ...	109	39	148

Of these were discharged as cured	17
Delivered to the care of friends	10
Died	10
Transferred to Leper Hospital	1
Escaped	none.

425. The mortality of 10 deaths was high, the percentage to strength having been 6·75, or 67·5 per mille. Drinking, and smoking intoxicating drugs, are alleged to have been the cause of insanity in 16 out of 44 instances.

426. The total expenditure amounted to Rs. 13,532—9—0 or an increase of Rs. 1,252—4—0 over that of the year previous, which is subject to a reduction by Rs. 750—9—2 realized by recoveries on account of diet and the sale of articles—the produce of the labor of some of the inmates, the net expenditure being Rs. 12,782.

427. The results of vaccine operations during the year are reported to have been satisfactory. The total number of operations was 93,616, of which 88,596 were successful and 5,020 failures, being in the proportion of 946 and 54 respectively. An abstract of the results in the several divisions is noted below :—

Vaccination.

Division	No. of Operations.	Successful.	Failures.
Nandidroog.	42,491	40,941	1,550
Ashtagram.	28,687	28,083	604
Nagar.	22,438	19,572	2,866

428. The system of inspection of the Vaccinators by the District Apothecaries was not carried out as efficiently as could be desired, owing partly to some Apothecaries not having been able to accompany the District Officers during their annual tours, and partly to the Account Department having ruled that mileage allowance was not authorized for medical subordinates except when ordered to proceed on emergent duty. Doctor Ranking observes that such duty may not certainly be considered as of an emergent nature ; but it is very valuable in promoting good vaccination and may be regarded as well worth a small outlay in the way of travelling allowance. The subject is under consideration. Several cases of small-pox occurred in several talooks of the Ashtagram Division, and in the Kolár District; but the disease does not seem to have been severely epidemic any where during the year.

7. EMIGRATION.

429. The number of persons belonging to this Province who are said to have emigrated during the year, was 191 ; of whom 120 were men, 55 women, and 16 children. Of this number 161 embarked at Pondicherry for the island of Reunion and the West Indies, 3 at Karikal for the same places, and 27 at Madras for the Mauritius.

430. The number in 1868—69 was 366, or nearly double that shewn in the returns furnished for the year under review.

8. ECCLESIASTICAL.

431. Fifteen agents are employed in this Mission, and the number of Native Christians is 350. Instruction in English and the vernacular is imparted to

London Mission.

1,183 pupils of both sexes, and of that number 678 are girls. The fees amounted to Rs. 1,314 during the year. At the last examination, 4 students passed the Matriculation, and 3 the First in Arts examination. A few new works have been published during the year, *viz.*, new editions of a Kanarese grammar, a geography, and an arithmetic, also a Kanarese hymn book, and an epitome of church history in English.

Wesleyan Mission.

432. The work of this Mission during the past year has been one of success. In the schools belonging to it, instruction is imparted to 2,792 pupils, in English and the vernacular, of these 610 are native girls. The Mission maintains a printing establishment, and the report states that five presses are fully employed in the printing of useful books for distribution in the Province.

433. There were 11 European and 2 native ministers, and 6 catechists employed during the past year; the Mission has 13 chapels and preaching places, the average number of hearers attending which is stated to have been 1,140; while the number of accredited church members was 290.

Catholic Mission.

434. Three chapels were erected during the year; one at St. John's Hill, Bangalore, another at Chituldroog, and a third at Maggé, a village not far from Hassan. The dispensary at Sethalli in the Hassan District, which hitherto was solely maintained at the expense of the Mission, now receives a monthly grant-in-aid from Government, and sustains its reputation as an useful institution, much resorted to by both Europeans and natives in the neighbourhood requiring medical aid. An industrial school has been established at Bangalore in connection with this Mission for poor destitute women, who are thereby enabled to earn a livelihood.

435. There are 19 European and 5 native Roman-Catholic priests employed in Mysore, and the number of Roman Catholics in the Province is estimated at 20,200; upwards of 300 converts were made in the town of Bangalore during the year past.

Friend-in-need Society.

436. The expenditure during the year under all heads amounted to Rs. 7,680, leaving a balance in hand on the 31st December 1869 of Rs. 12,019, against

Rs. 9,857 of the previous year. The receipts, inclusive of the Government grant to this institution, amounted to Rs. 9,841, made up as follows:—

Government grant	5,400
Subscriptions, donations, &c.	3,777
Sale proceeds of manufactures, &c.	664
Rs.	9,841

437. The average number of inmates (regular and casual) was 88 per diem, and of out-door recipients 27, whose allowance aggregate Rs. 95 monthly. Rs. 299 were spent in providing railway tickets to paupers.

438. Aid was afforded to the new Roman Catholic Ladies' workshop in which indigent women obtain employment, their immediate necessities being met from the funds of the institution; also to the school at Saint John's Hill, where pauper children are educated and fed; and to the different orphanages, which gives the society the right of nomination to them of a proportion of orphans whose cases are brought before it.

439. The inmates of the asylum were principally employed in the manufacture of work baskets and other light ornamental work suited to their capacity, and which were easily disposed of to the benefit of the institution.

440. Several improvements were made during the year; a stove on an improved principle has been supplied for the better cooking of food. The diet is on a scale far more liberal and acceptable than before. In conservancy, substantial covered latrines on a plan suitable for the dry earth system were built, and lavatories are in course of erection.

441. With a view to the curtailment of street mendicancy, an overseer has been appointed for the purpose of exercising supervision over the vagrant habits of the out-door recipients of relief, and to bring to notice all persons of this class whom he may discover to be in the habit of soliciting alms from the public, or leading an improper life. On enquiry the aid is withdrawn from such as may on these grounds be found undeserving of relief. A few examples of this sort have dealt a salutary blow to practices which were an abuse of the charity of the institution.

442. Fixed rules for the interior administration and working of the asylum, the want of which was much felt, were laid down by the Executive Committee and adopted.

443. The flourishing state of the funds has suggested to the committee the feasibility of extending the operations of the society by purchasing the premises adjacent to the asylum, for the purpose of erecting cottages for out-door pensioners who can then be better supervised. It is also proposed to establish an industrial school where poor children can be taught useful trades suitable to their station in life.

444. The want of a home for cripples and incurables is felt, and the establishment of an asylum for paupers thus afflicted is recommended. Many European loafers come to Bangalore in search of employment which is not obtainable, and finally apply to the society for relief. Many of them come from Australia with horses, and the committee invite consideration to the expediency of restraining the colonies in their too frequent exportation of vagrants; but as these parties arrive in this country in charge of horses—the property of private persons, they cannot be regarded as vagrants exported by the colonies, though they too often become vagrants here. The establishment of a work-house for Europeans is urged, as the force of the Vagrancy Act, which has been extended to Bangalore, is to a great extent diminished in the absence of a work-house. The subject is under consideration.

9. MYSORE MUSEUM.

445. The Museum buildings have had extensive additions and improvements made to them during the year, which have rather more than doubled their accommodation. The report furnished shews that the number of visitors has diminished. The average daily number in 1869—70 was 461, against 690 in 1868—69. This is probably owing to the novelty of the institution having in some degree worn off, to the prevalence of cholera in September and October which deterred villagers from visiting Bangalore, and to the impediments caused by the building operations. The institution, however, still retains its popularity; several useful additions to the natural history department have been made, and a good many new specimens have been added; a few coins have also been collected. But against these the Museum has sustained a loss of 79 gold and 100 silver coins, aggregating in value about 270 Rs., by a robbery which took place in August last. The catalogue of the geological section has been completed.

10. ARCHÆOLOGY.

446. A very interesting collection was made some time ago of photographs of the "Shásanams" or stone and copper tablets on which inscriptions in Sanskrit and old Kanarese existed, shewing the eras in which the temples or other buildings had been erected, or in which grants of land, &c., had been assigned for their maintenance. Sixty of these inscriptions have been diciphered and rendered into modern Kanarese, from which translations into the English language have been made. Some of them bear date as far back as the year one of the Sálivahana era, which corresponds with Anno Domini 78.

447. Copies of these photographs have been lately submitted to the Government of India, for transmission to Her Majesty's Secretary of State for India, and the translations are now being carefully revised and printed; and will be accompanied by a descriptive memorandum.

11. TRADE RETURNS.

448. The analysis of the returns furnished by the District Officers gives the following results of the export and import trade of the Province during the year under report; but these returns can only be considered approximate, as all import and export duties have been abolished, and there are no means of collecting accurate statistics on the subject.

Export.

Articles.	Quantity exported. Tons.	Cwts.	lbs.	Value in Rupees.	Remarks.
Areca-nut	4,683	18	96	22,54,228	Grows principally in Shimoga and Kadoor Districts of Nagar Division, and exported to Mysore and other places in H. M.'s Territories.
Cardamom	8	10	88	57,746	Grows chiefly in Hassan, Shimoga and Kadoor Districts, and is exported to Dharwar, and Canara.
Chillies	804	13	8	1,16,883	Are grown chiefly in the Nandidroog Division, and exported to Mysore District, Bellary, and Canara.
Cocoanuts, dry ...	199	19	24	1,25,292	Produced in the Toomkoor and Chituldroog Districts, and exported to Bellary, Dharwar, and to other parts of the Province.
Coffee	2,758	15	0	11,58,088	The largest quantity is produced in the Hassan and Kadoor Districts and exported to the Malabar Coast.
Cotton	493	4	96	3,41,688	Chiefly grows in the Chituldroog District, exported to Madras.

Articles.	Quantity exported. Tons.	Cwts	lbs.	Value in Rupees.	Remarks.
Gingelly Oil ...	178	1	0	62,608	Manufactured chiefly in Ashtagram and Nandidroog, and exported to Bellary, Dharwar, and the Malabar Coast.
Gold	0	12	96	8,64,000	Exported to Madras and Bombay.
Gram, horse ...	4,822	1	0	1,86,099	Grows throughout the Province, and smal quantities exported to Ballary, &c.
Jawari or Chólam ...	1,840	1	0	49,790	Grows chiefly in Mysore and Chituldroog Districts, and exported to Goodloor, Canara and Chennagiri.
Jaggory	2,173	13	24	3,35,454	Manufactured mostly in Nandidroog Division, exported to Bellary and Cannanore, &c.
Opium	0	18	96	14,080	Chiefly produced in Nandidroog Division and exported to Madras.
Paddy, rice in husk ...	41,560	1	0	14,73,312	Grows in all the districts, the largest outturn being in the Ashtagram Division; exported to Dharwar, Canara, &c.
Rági	46,649	9	0	16,26,656	Grows throughout the Province, but chiefly in Nandidroog Division, and is exported to the Nilgiris, Mánandavádi, &c.
Rice	5,583	3	0	3,52,990	Exported to Bellary, Dharwar, and Nilgiris.
Silk	23	17	24	3,40,143	Produced chiefly in Nandidroog Division, but chiefly in Bangalore District, and exported to Salem, Coombakonum and Madras.
Sugar	271	1	48	1,26,000	It is manufactured chiefly in Nandidroog, and is exported to Kurnool and Bellary.
Tamarind	591	2	16	30,860	Grows throughout the Province, and exported to Canara, Bellary, and Madras.
Tobacco	849	8	88	2,55,369	Grows in all the districts, and exported to Bellary, Coorg, Canara, and Mangalore.
	No.				
Betel-leaves ...	1,942,015			43,329	Grows principally in Nandidroog and Ashtagram Division, exported to Hindoopoor Coorg, Goodloor and Bellary.
Piece goods	315,875			79,803	Largely manufactured in the Nandidroog Division, and exported to Bellary and other districts.
Coarse cloths ...	89,010			1,29,355	Are manufactured in Nandidroog Division, and exported to Dharwar.
Silk cloths	4,830			1,20,750	Principally in the Nandidroog Division and exported to Bellary and Coimbatore.
Cocoanuts, fresh ...	6,766,407			3,29,742	Grow principally in Nandidroog; are exported to Salem, Trichinopoly, &c.
Hides	49,352			21,849	Are prepared and exported from all the districts in the Province to Bellary and Madras.

Import.

Articles.	Quantity imported. Tons.	Cwts	lbs.	Value in Rupees.	Remarks
Bell-metal	32	3	32	17,766	Imported from Bellary, Dharwar, and Coombaconum into Mysore.
Brass	395	14	48	446,448	Imported from Sravanabelagula, Telecherry, Poona and other districts of H. M.'s Territories principally into Bangalore and Mysore.
Camphor	91	17	104	1,42,294	Imported very largely into all the districts in Mysore, from Madras, Telecherry and Canara.

Articles.	Quantity imported. Tons.	Cwts.	lbs.	Value in Rupees.	Remarks.
Chillies	628	19	24	1,13,083	Imported chiefly from Madras and Dharwar into the Nandidroog Division.
Cinnamon	4	9	40	6,982	Imported from Madras and other parts of H. M.'s Territories.
Cloves	22	15	52	7,981	Imported from Madras and Bellary into the Bangalore and Mysore Districts.
Cocoanut oil... ...	78	0	96	41,649	Largely imported from Salem and Madras into the Bangalore and Shimoga Districts.
Cocoanuts, dry ...	232	0	16	1,05,629	Imported from Telecherry.
Cotton	1,976	12	72	11,47,505	Imported from Bellary and Dharwar into the Nandidroog Division.
Cotton thread ...	351	8	88	4,06,945	Imported from Bellary and Madras
Copper	226	4	72	3,35,300	Imported from Hoobully, Combaconum and Telecherry chiefly into the Nandidroog Division.
Dál	2,120	14	0	1,67,383	Imported from Hindoopoor, Dharwar, &c.
Gold	1	19	90	28,32,843	Imported from Madras, Coompta and Canara.
Gram, Bengal ...	1,236	12	0	77,402	Imported rom Bellary, Dharwar, and Chituldroog.
Gram, Green ...	540	12	0	32,522	Imported from Mangalore, Chikkamagaluru, Dharwar, &c.
Gram, Black ...	603	3	0	63,644	Imported from Hassan, Attikuppa and H. M.'s Territories.
Indigo	27	6	24	54,685	Imports are from Madras and Salem.
Iron	998	2		2,05,911	Imported from Madras, Telecherry and Canara.
Pepper	109	18	16	44,997	Imported from Telecherry and Canara.
Potatoes	1,126	10	0	1,05,580	Imported entirely from the Nilgiris.
Rice	18,494	8	0	11,51,415	Imported from Salem.
Salt, sea	6,744	15	0	6,06,792	Imported from Madras and Western Coast.
Silk	33	1	8	4,17,100	Imported from Kollagala and Madras.
Silver	2	7	16	2,18,872	Imported from Bombay and Madras.
Steel	567	18	24	23,855	Imported from Hindoopoor, Telecherry, and Madras.
Sugar	718	16	24	1,37,373	Imported from Canara and Western Coast.
Sandal oil	0	2	49	3,430	Imported from Bombay, Mangalore, and Canara.
Sandal wood... ...	0	0	0	...	Not shewn.
Salt, earth	1,140	6	0	30,509	Imported from Hindoopoor, Sirá, and Hosadurga.
Tabacco	294	16	32	2,23,528	Imported from Trichnopoly, Dharwar, and Bellary.
Turmeric	86	15	8	31,497	Imports are occasionally made from Madras.
Wheat	2,344	19	0	2,71,295	Imports are principally from Bellary and Dharwar.
	No.				
Betel-leaves ...	8,486,961			1,95,796	Imported from H. M.'s Territories.
Piece goods	1,546,498			11575987	Imported from Salem, Dharwar, &c.
Coarse cloths ...	130,435			3,03,576	Imported from Bellary and Madras &c.
Cocoanuts, fresh ...	1,153,947			42,171	Imported from Madras, Dharwar, into the Nagar Division.
Silk cloths	14,679			1,67,882	Imported from Coimbatore & Kollagala.
Hides	32,000			20,000	Imported from Madras, Western Coast, &c.

449. The value of exports for the year is estimated at Rs. 1,21,16,608. On comparing the returns for the past two years it would appear that there has been a decrease in the export of areca-nut, coffee, jawari or chólam, paddy, (rice in husk) rice, tobacco,

Exports.

betel-leaves, and hides; whilst piece goods and coarse cloths, which are chiefly manufactured in the Nandidroog Division, shew a considerable increase, as also silk, rági, tamarinds, and fresh cocoanuts. The piece goods and coarse cloths are chiefly exported to Bellary and Dharwar. Silk cloths which are also principally manufactured in the Nandidroog Division, are exported to the same Districts, as also to Coimbatore in the south.

Imports.

450. The imports for the year were valued at Rs. 2,36,83,533; or Rs. 9,98,149 in excess of the year preceding. There was a large decrease in the importation of piece goods, salt (sea), and potatoes. There was also a falling off in chillies, cccoanuts (dry), cotton thread, gram, indigo, pepper, tobacco, turmeric and silk cloths.

451. There was on the other hand a considerable increase in cotton, earth-salt, and betel-leaves. The importations of iron, rice, and sugar were also in excess of those during the year previous.

12. RAILWAY.

452. The return furnished by the Agent and Manager of the Madras Railway Company, gives the following results of the passenger and goods traffic on the Bangalore Branch Line, comparatively, for the two past years.

		No. of Passengers.	Amount.
Passenger Traffic.	In 1868—69	186,266	1,98,307 8 0
	In 1869—70	195,814	2,04,156 12 0

453. The receipts per mile amounted to Rs. 2,401—13—6 in 1869—70, against Rs. 2,333—0—6 in the previous year.

454. The goods and merchandize, &c., traffic aggregated Rs. 3,52,265—3—0 in 1868—69, and Rs. 3,39,853—6—0 in 1869—70. The decrease cannot be attributed to any particular item of traffic, but is the result of the depression in trade generally in 1869. There was a considerable falling off in rice and other grains in 1869 as compared with the previous period, and a loss also in the cotton and coffee traffic with Bangalore.

455. The working expense of the Bangalore Branch Line is stated to have amounted to Rs. 4,17,902—0—0 in the past year, shewing an

increase of Rs. 63,398—0—0 over that of the previous year. The increased expenditure is due almost entirely to the cost of replacing wooden sleepers by iron pots over about 30 miles of the South West Line, a portion of which cost has fallen on the estimated working charges of the Bangalore Branch.

456. The net profits were Rs. 1,26,108—2—0, exhibiting a falling off of Rs. 69,960—9—0, which is of course the result of a decreased income, with an increased expenditure, as explained above.

457. It has been decided to carry out a Mysore State Railway between Bangalore and Mysore, and the surveys of three alternative lines to connect these towns are being vigorously pushed forward.

13. GOVERNMENT PRESS.

458. The value of the work done at the Government Press during the past year is estimated at Rs. 32,461 or Rs. 1,954 less than the previous year. The falling off is stated to be due to the large reduction in the demand for current forms aggregating Rs. 5,283 in those supplied to nine departments of the Administration, the orders complied with under this head in 1868—69 being unusually large. More new work is reported to have been executed by the Press during the past than the previous year. The net expenditure was Rs. 21,190 as compared with Rs. 20,021, the previous year, shewing a nominal profit on the year's working of Rs. 11,271 or about 52 per cent, which has been the average for about the last nine years.

459. The demands on the Press are very considerable, and require constant exertion on the part of the Superintendent and his establishment for their due compliance.

460. The Mysore vernacular series of books published by the Educational Department have all been printed and bound at the Government Press, as well as some English school books. A large Kanarese map of the World has also been engraved and printed here.

461. The type with which this report is printed was cast on the premises, as well as all the Kanarese type in use.

CONCLUDING REMARKS.

462. Mr. L. B. Bowring, C. S. I., who had filled the responsible Office of Head of this Administration since the 21st April 1862, proceeded on leave to Europe on the 7th February 1870, and Colonel R. J. Meade, C. S. I., Agent to the Governor General for Central India, assumed charge of the same on the 21st idem.

463. The pages of this Report are not a fitting place in which to review the measures of the former able Officer; but it may be remarked that the present system of Administration has been initiated and established wholly under his direction, and that to him is due the credit of the successful introduction, under the orders of the Government of India, of the great changes and reforms in every branch and department of the Government, which will, when completed, raise the Administration of this territory to a standard but little behind that of the neighbouring British Provinces.

464. Those who have had a like arduous task to carry out elsewhere can perhaps alone form an accurate opinion of the ceaseless labor and entire devotion to the duties of his post demanded of the Officer on whom the direction of a work of this nature devolves; and the peculiar circumstances of the Mysore State up to the period of the demise of the late Mahárája, must no doubt have seriously aggravated the difficulties that had to be surmounted in carrying out the many radical changes that were deemed to be absolutely necessary under the new system of government introduced by Mr. Bowring.

465. As regards the effect of these changes on the condition and progress of the people of Mysore, there can be little question that the results on the whole have been satisfactory, though there are certain classes of the community whose influences and interests have been affected by them unfavorably, and who therefore are probably disposed, not unnaturally, to view them with discontent.

466. The operations of the Inam Commission and the Survey Settlement have made fair progress during the year under report, and the definition and settlement of the questions connected with the tenure of land and the public revenue from that source, which forms two-thirds of the whole income of the State, that will be fixed and secured by these great measures, cannot but prove of the greatest benefit to the State

and the people generally, while they will greatly simplify and facilitate the revenue administration of the country hereafter.

467. The satisfactory result of the measures that have been adopted under the personal direction and care of the Guardian, Lieutenant Colonel Malleson, for the young Chief's education and training, have been already alluded to in the political section of this Report, and it is only necessary to add here that this able Officer's arrangements and management of his charge have been marked throughout by sound judgment and an entire devotion to the responsible duties connected with it, and cannot be too highly commended.

468. The following Officers merit special mention in this Report for their services under this Administration during the past year.

Heads of Departments.

Mr. J. R. Kindersley, officiating Judicial Commissioner, whose excellent supervision of his department, and efforts to raise and improve it in all its branches, have, on more than one occasion, been warmly acknowledged by Mr. Bowring.

Colonel C. V. Wilkieson, officiating Chief Engineer and Secretary in the Public Works Department, whose services have been separately noticed in the Public Works Progress Report.

Colonel T. Clerk, Inam Commissioner, under whose able direction the enquiries connected with the inam settlement in progress are being satisfactorily carried out.

Major C. J. Prescott, who efficiently directed the operations of the Revenue Survey and Settlement during Lt.-Colonel W. C. Anderson's absence in Europe, up to the 10th November 1869; and the last named Officer, who resumed his duties on that date, and under whose able and experienced control this important department will doubtless make rapid and satisfactory progress.

Mr. J. Garrett, Director of Public Instruction, whose services in the Educational Department in this Province have been most useful during many years past.

Mr. H. Hudson, Deputy Accountant General, and officiating Registrar General of Assurances, whose efficient control of his department has been as marked as in previous years.

Lieutenant G. J. van Someren, Conservator of Forests, who is a zealous and hardworking Officer.

Dr. Orr, C. B., Deputy Inspector General of the Mysore Circle, who supervised the medical arrangements of the Province during the year under report.

Mr. M. Amurthalingam Modaliar, Head of the Anché or Postal Department, who has performed his duties with credit.

The following Officers filled the important post of Superintendents of Divisions during the past year, and performed their responsible duties in a highly creditable manner.

Lieut.-Colonel. J. L. Pearse, Nandidroog Division.

Major. A. C. Hay, Nagar Division.

Major J. A. Campbell, Ashtagram Division.

The Deputy and Assistant Superintendents generally have given satisfaction by the efficient manner in which they have carried on their several duties.

The duties of Secretary were performed by Captain T. Clarke during the greater part of the year, and by Captain R. A. Cole during the last two months, on Captain Clarke's appointment to officiate as Superintendent of the Nandidroog Division. Both these Officers have given entire satisfaction by their efficient exertions in this laborious office, which merit special acknowledgment here.

The duties of Military Assistant, with the charge of the local force, were performed in an efficient and satisfactory manner by Captain R. C. Stewart.

The post of Surgeon to the Mysore Commission was efficiently filled by Dr. H. R. Oswald during the first half, and by Dr. J. Kirkpatrick during the rest of the year under report.

The services of Mr. A. R. Sabhápati Modaliar, Head Sheristadar, Mr. D. Séthu Rao, Treasury Bakshi, and Mr. J. F. Pereira, Head Assistant of the Chief Commissioner's Office, merit acknowledgment.

BANGALORE,
15*th October* 1870.

R. J. MEADE,
Chief Commissioner.

MYSORE

STATISTICAL RETURNS.

1869—70.

TABLE OF CONTENTS.

I.—STATISTICS OF PHYSICAL, POLITICAL, AND FISCAL GEOGRAPHY.

	Page.

B—Hospital Return	140—143
C—Vaccination Return	144

I.

STATISTICS OF PHYSICAL, POLITICAL, AND FISCAL GEOGRAPHY.

A.—PHYSICAL GEOGRAPHY OF THE TERRITORIES UNDER THE CIVIL AND POLITICAL CONTROL OF THE ADMINISTRATION OF MYSORE.

Mysore is situated between 11°36′ and 15°0′ north latitude and 74°42′ and 78°37′ east longtitude. Its extreme breadth from east to west is 230 miles, and its extreme length from north to south is 190 miles. Its area is 27,004 square miles. It is bounded on the north by the Bombay Collectorate of Dharwar and the Madras Collectorate of Bellary. On the south by the Districts of Salem and Coimbatore, both in the Madras Presidency. On the east by those of Cuddapa and North Arcot, also of Madras. On the west by Coorg and the Western Ghâts, which shut out Mysore from Malabar and Canara on the west coast.

The Province was surveyed for revenue purposes during the administration of Pûrnaiya between 1800 and 1810, and a topographical survey was carried out by Colonel Mackenzie in the years 1800—1807. A revenue survey on the Bombay system including the classification and assessment of the land, is now in progress.

1. *Area—Cultivated and Uncultivated, and Communications.*

2.—*Character of the Surface.*

Nature of different Tracts.	Names, Area, and Physical Description of each Tract.	Where situated, in British or Native Territory.	Prevailing Soils, Minerals and Products.
Mountains and Elevated Tracts.	The Mysore country above the ghâts is often called "the Table Land," a denomination very little descriptive of its appearance, as it is by no means plain or flat, but in some parts mountainous, and everywhere undulating. The Eastern Ghâts form the frontier by which it is separated from the Carnatic. They constitute the exterior of the east ranges of hills, which run along the whole length of the Peninsula from Cape Comorin, stretching up to the continent of Asia. In many parts the ascent over them into Mysore is very high and difficult, while in others it is more sloping and protracted. The country rises gradually from these ghâts towards Bangalore, which is situated in the most elevated portion of the Mysore plateau, and is 3,031 feet above the sea level.		The soils, in the order of their prevailing kinds, are as follow:— 1. Red soil mixed with loam and vegetable mould. 2. Inferior red sandy soil. 3. Black cotton, free from stones. 4. Stony and gravelly soil. 5. Rich garden soil. 6. White stiff loam. 7. Black cotton, but light and stony. 8. Soil impregnated with salt.
Plains.	The descent from Bangalore on all sides is perceptible though not rapid. On the north-west, after passing the Chituldroog range of hills, there is a gradual fall through the broad valley which leads to the river Tungábhadra, near which is the station of Harihara, probably the lowest point in Mysore, its altitude above the sea being only 1,800 feet. To the south-west and west, by Seringapatam and Hassan, there is perhaps a more marked descent, until it is abruptly terminated by the western range of ghâts comprising in this direction the Nílgiri and Coorg hills, and further north, the Manjarábád and Nagar ranges.		The great rock, which may be said to constitute the basis of the whole country, is a kind of sienite, composed for the most part of four different ingredients, *viz.*, quartz, felspar, hornblende and mica. The quartz has usually a dull greyish white color, and veins of it from 4 to 10 inches thick, often traverse the rock in different directions. The felspar varies in color from a silver white to a deep brick red, and is the most copious constituent of the rock. The hornblende is black, very abundant, and very much given to decomposition. The mica is easily distinguished from the hornblende, even when the stone is nearly in a state of disintegration. The hornblende in that state has assumed a brown ochre color, and has lost all lustre and cohesion, while the mica retains both its color, lustre and cohesion to the last, and becomes only more apparent by the progress of disintegration. This is particularly exemplified in the Mysore country, where the undulating high ground consists of sienite, decomposed into pipe clay, intermixed with micaceous shining particles and grains of quartz. From the structure of the country, which is entirely primitive, no coals could be expected.
	A marked feature of the country is the number of isolated hills called Durgás, on the most inaccessible of which the former pálégars or petty chiefs built forts, afterwards in many instances strengthened and improved by Hyder and Tippu, and still in good preservation, but now without guns.		Chlorite slate is found near Sírá, and drawing slate in the neighbourhood of Chituldroog. Other minerals are the following:— Clay Iron Stone. Schorl in Quartz. Mica Slate.
Forests.	The principal forests are found clothing the sides of the Western Mountains. They abound in teak, blackwood and other valuable kinds of timber. There are no forests in the Eastern Ghâts. Sandalwood grows in the country bordering the hills.		

2.—*Character of the Surface (Continued.)*

Nature of different Tracts.	Names, Area, and Physical Description of each Tract.	Where situated, in British or Native Territory.	Prevailing Soils, Minerals and Products.
Rivers.	The Tungá and Bhadra rise in the north-west of Mysore, and uniting, form the Tungábhadra, which flows northwards and eastwards till it joins the Kristna below Kurnool. The banks of the Tungábhadra are too high for irrigation purposes. The Kávéri rises in Coorg and passes through and out of Mysore in a south-easterly direction, after receiving the Hémávati, the Lókáni, the Shimsha, and the Arkávati from the north, and the Lakshmantirth and the Kabbani from the south. The Kávéri and its tributaries supply numerous irrigation channels and tanks. The Pennair, the Palar and Penar rise in the eastern part of Mysore, in their short course through which, their waters are detained and converted into chains of tanks. They become large rivers before they reach the sea.		Magnetic Iron Stone. Pot Stone. Actinolite. Ligniform Asbestos. Brown Spar. Common Salt. Carbonate of Soda. Gold is occasionally found near Bétmangala, by washing the alluvial soil; but in too small quantities to repay labor. The chief products are:—
	None of these rivers are suitable for navigation.		Paddy. Rági—The principal food of the people.
Lakes.	There are no natural lakes in Mysore; but there are nearly 20,000 artificial reservoirs, some of which are of considerable magnitude.		Ballar—A kind of small bean. Gram. Wheat. Millet.
Marshes.	None of any consequence.		Oil Seeds. Sugar-cane. Cotton. Hemp. Tobacco. Mulberry. Coffee. Cocoanuts. Betel nuts. Potatoes for export.

NOTE—1. In this and the other Statements numbered I to XX, only convicted criminal prisoners are to be included.

2. Debtors and others detained for default of Government revenue will appear in No. XXI.

3. Persons under trial will be given in No. XXII; persons committed for trial being included in the same heading.

4. The "Total," column 5, is obtained by adding together the totals of columns 3 and 4, and represents with

5. The "Total population," column 7, is the sum of column 5 *plus* 6, and necessarily includes many who are counted

6. The "Daily average number," column 8, is obtained by adding together the number present on each day of the

7. When prisoners are transferred from one jail to another on their way to undergo transportation beyond seas they be entered in column 6 B; when prisoners sentenced to transportation beyond seas are despatched from any jail, in column 11. It will be observed that "transportation" applies only to those prisoners sent *beyond seas.*

8. When gangs are employed extramurally under the orders of Government Nos. 1632-43, (see this year's Coorg Jail that is, of the place where they are employed, should be entered in italics in each Statement.

NOTE.—The periods noted in this Statement do not refer to the sentences, but to the length of imprisonment their time of imprisonment from the date of admission into the Jail in which they commenced

The "average term of residence," column 3, may be thus determined by Dr. Farr's method:—"Put A for of residence by this Rule:—Divide the mean population (P) by admissions to obtain mean term by $\frac{1}{4}$=91 days.

(*Vital.*)

GENERAL SUMMARY.

1. The rain-fall of the year 1870—71 was fully equal to the ordinary average, and was generally seasonable throughout the Province, except in some talooks of the Kolár District, which suffered from an almost entire failure of the early monsoon rains, though the fall in other parts of the same district was as copious and favorable as could have been desired.

2. The harvest was generally a most luxuriant one, and the price of grain of all kinds fell to a point which brought a full supply of good and wholesome food within the means of the poorest classes of the community. These low prices, which generally still obtain, though the prospects of the present harvest are reported* to be very unfavorable in a considerable portion of the Province, have, however, been productive of loss to the agricultural classes, who in some instances have experienced a difficulty in the disposal of the produce of their fields, without submitting to a heavy sacrifice, while none have realized the large profits to which the high prices of late years had accustomed them. There can, however, be no question of the great benefit to the mass of the population, and therefore to the country at large, of the ample supplies of cheap food with which the Province has thus been favored by a bountiful Providence.

* P. S. The abundant rain that has fallen since these remarks were written has effected a marked improvement in agricultural prospects which may now be said to be generally favorable. 16th October 1871.

3. The state of the public health during the year under report was not generally unfavorable, though the country was not altogether free from epidemics, the Bangalore and Kolár Districts having been visited by cholera, which lasted in the latter for upwards of six months, while a malarious fever of aggravated type prevailed to a serious extent in some talooks of the Bangalore District subsequent to the close of the monsoon.

4. The collection of vital statistics was carried out from 1st July 1870, under the system †ordered by the Government of India, and the mortuary returns for the six months included between that date and

†No. 523, dated 31st December 1869.

the close of the year place the mortality during that period at 33,948 for the whole Province, and assuming the same number of deaths for the first half of the year, at 67,896 for the entire year. This gives a death rate of 16·53 per mille, which is considered to be far too favorable, the mortality from fever alone in many parts of the Province being notoriously excessive.

5. The revenue for the year under all heads aggregated in round numbers Rs. 1,06,00,000, against Rs. 1,07,00,000 for 1869—70, and the expenditure similarly Rs. 1,02,15,000, against Rs. 1,07,52,749, shewing a decrease of revenue of Rs. 1,00,000, and a surplus of receipts over expenditure for the past year of Rs. 3,85,000.

£ 1,060,000.

£ 1,021,500.

£ 38,500.

6. The trade returns are not reliable, and it is impossible to state with any pretension to accuracy what was the total value of exports and imports, or of home manufactures for the whole Province. These returns, however, in the case of one of the three divisions in which the most care has been bestowed on the subject, furnish the following figures for that division, *viz* :—

		Rs.
£ 434,887.	Value of Exports . .	43,48,871.
£ 1,158,499.	„ Imports . .	1,15,84,989.
£ 620,248.	„ Manufactures . .	62,02,478.

The returns for the previous year gave the aggregate value of exports and imports for the whole Province as Rs. 3,58,00,000, and in the absence of more reliable information, this amount may be assumed as an approximate estimate under this head.

£ 3,580,000.

7. The criminal returns shew an increase of 2,313 offences, or 12·7 per cent, as compared with the previous year, the total number being 20,473. There was a decrease of offences against the State and public, and the increase consisted of crimes against the person and property and offences of a minor class. Under the head of murder there were 62 cases against 48 in 1869—70.

8. No change was made in the Police arrangements of the Province during the year, and the reformed system continued to be in force only in the Bangalore District, its proposed extension to the rest of the Province having been deferred pending further consideration as to its entire adaptation to the circumstances of the Mysore State, on which point a special report has been lately submitted to the Government of India.

9. The reformed Police in the Bangalore District, including the Town and Cantonment, numbered 1,011 men of all ranks, the gross authorized charge for the same under all heads being Rs. 1,55,066. The cost of the force averaged the annual rate of three annas nine pies per head of the population, the number being in the proportion of one constable to 652 persons and to 2·56 square miles. The actual expenditure during the year fell short, however, of the authorized expenditure by Rs. 13,462, making the actual cost per head of population three annas and five pies.

£ 15,506.
d. 5¾

The unreformed Police of the remaining seven districts numbered 5,865, maintained at a cost of Rs. 3,77,844, being at the annual rate of 1 *a.* 9 *p.* per head of the population, and in the proportion of one policeman to 588 persons and 5 square miles.

In addition to the above, the village Police numbered 14,000 persons; but their general condition is one of great inefficiency.

10. With regard to the operations of the Police—in the Bangalore District, 68·3 per cent of cognizable cases were brought to trial, and of persons arrested about 85·7 per cent were convicted. In the rest of the Province the proportion of convictions to arrests was only 24·6 per cent, shewing clearly, in this respect at least, the great superiority of the working of the revised system. The results were most unfavorable in the Ashtagram Division, in which the rate of convictions was only 12·5 per cent of arrests, and least so in the Nagar Division, in which it reached 37·7. The total percentage of convictions to arrests for the whole Province, including the Bangalore District, was 29·36, shewing that excepting in that district, the Police must have made many unnecessary arrests, and that the Magistrates did not exercise sufficient discretion in issuing processes for the apprehension or attendance of accused parties.

11. In the Judicial Department the proceedings of the Criminal Courts during the past year were not as satisfactory as could be desired, and the working of those of the Subordinate Magistrates is stated by the Judicial Commissioner to require a closer supervision on the part of the Superior Courts than has hitherto been exercised. The pending file at the close of the year was moderate, and the defects that have been brought to notice will doubtless be rectified by due care and attention on the part of the Superior Courts.

12. The Civil Courts were freely resorted to, the number of suits instituted (20,534) being 3,699, or 22 per cent, in excess of that of the previous year. The aggregate value of the property in litigation was Rs. 2,0C8,986, the average value of each suit being Rs. 103-14-6. The average duration of suits was excessive, being 28·77 days, though there was an improvement in this respect of 4 days on the average of the previous year. Appeals decreased from 884 in 1869 to 649 or 26·5 per cent in the year under report. The sales of property in execution of decrees amounted to nearly 3½ lacs.

£ s. d.
209,898—12—0
10— 7—9¾

£ 35,000

13. The total number of prisoners in the jails of the Province during the year was 5,205, being 87 less than in 1869. The daily average number was 1,619 as compared with 1,795 in the previous year. The mortality was ·73 per cent, against 1·76 in 1869. The gross cost per prisoner was Rs. 97—12—6, the estimated value of the labor of the prisoners and their average actual cash earnings being Rs. 39—10—5 and Rs. 3—6—11 per head respectively.

£ s. d.
9—15—6 ¾
3—19—3 ½
0— 6—10½

14. The following Acts of the Legislative Council of India were extended to the Province during the past year.

Act VII	of 1870,	The Court Fees' Act.
Act X	„	The Land Acquisition Act.
Act XXIII	„	The Indian Coinage Act.
Act XXVII	„	An Act to amend the Indian Penal Code.

15. The number of Government educational institutions of all classes was 97 more than in 1869—70. The total number of schools in the Province of all descriptions was 2,443, affording education to 43,307

pupils as compared with 38,960 pupils in the previous year. The progress of the hóbli (sub-talook) schools during the year was satisfactory, and the scheme for the establishment of this class of schools throughout the Province is fast approaching completion. The prejudices that up to a very recent period existed against female education are daily passing away, and excellent work is already being done in the Government and Mission female schools, at which 2,313 girls were receiving instruction during the past year. On the whole, the progress and prospects of education are very encouraging.

16. The outlay on all public works during the year was Rs. 16,75,970. £ 167,597

17. The new works included four talook cutcherries, a civil hospital and dispensary, two school houses, several anché (local post) houses, Police stations and choultries, and the enclosure of certain Christian burial grounds. The new jail at Shimoga was almost completed, and additions were made to the Mysore Jail, and the school houses at Kolár and Hassan.

18. In the Irrigation Department the Srírámadévara anicut on the Hémávati river and the Márchalli anicut on the Lakshamanatírtha river were satisfactorily finished. Several important channels have been brought under re-construction or repair, and the survey of the great Márikanavé project has been completed. The re-construction and repair of a large number of the numerous tanks studding the country was carried on as usual. The charge of the river irrigation channels generally was transferred from the Revenue to the Irrigation Department during the year, a change which promises to have satisfactory results.

19. Under the head of communications, the completion of the unfinished portion of the road connecting Bangalore with Mysore *viâ* the Kánakánahalli valley, was taken in hand, and a commencement was made on the system of roads it is proposed to carry out in the district of Nagar, which is at present isolated from the want of proper communications with the surrounding country. Fair progress was made with the line connecting the southern districts of Mysore with the Wynád *viâ* Gundlupété, and several new roads of more or less local importance were completed, while others were commenced on. The repair of the existing

roads was duly carried out, the minor lines being kept in fair trafficable order and the main ones fully up to first class standard. The condition of the roads generally throughout the Province was very satisfactory. The Sakalésapura bridge on the Hémávati river was completed and opened for traffic, the parapets of the fine bridge at Harihara, over the Tungabhadra river, were nearly finished, and many smaller useful works under this head were constructed.

20. Due attention continued to be paid to the planting of avenues along all the lines, and fair progress was made in this respect.

21. Under the head of miscellaneous public improvement, many useful works were carried out from municipal funds in the towns of Bangalore, Mysore, Hassan and Shimoga, and measures have been taken to improve the sanitary condition of many of the district towns.

22. The preliminary investigations and surveys of the most promising lines radiating from Bangalore to the chief centres of commerce in the surrounding districts—required in view to the selection of the most suitable line for the extension of the Railway System in Mysore, were carried out during the past year under the orders of the Government of India ; and after full enquiry and consideration, the line from Bangalore to Mysore was determined on as that most likely to prove successful, and its complete survey, with preparation of the necessary estimates, has been in progress since the close of the year. The proposed line will be on the 3′ 3″ gauge, and the cost of its construction will be borne by the Mysore State. Its length is estimated at 87¼ miles, and as there are no serious obstacles to retard its speedy construction, it is anticipated that, if finally sanctioned, it will be completed in between three and four years from the time of its commencement.

The expenditure on the preliminary surveys during the past year was Rs. 53,697.

£ 5,370.

The Bangalore Branch of the Madras Railway, of which about 85 miles fall within the limits of this Province, worked satisfactorily during the past year.

23. The operations of the Forest Department were carried on in a generally successful and satisfactory manner during the year under

report. The gross revenue realized, including value of stock remaining at the end of the year, was Rs. 4,06,512, and the total outlay Rs. 1,47,574, the net revenue being Rs. 2,58,938. The State forests in Mysore cover an area of 428 square miles, and the establishment of sandal-wood reserves and fuel plantations for the railway was in progress; 1,200 acres of land for the former and 4,270 for the latter purpose respectively were taken up during the year, and partially enclosed and prepared for planting, and arrangements are being made for the appropriation of much more extensive areas with the same object.

£ 40,651.
£ 14,757.
£ 25,893.

24. The question of the district forests and the ordinary fuel tracts of the country is in a most unsatisfactory condition in Mysore, the entire want of a proper system of conservation or care of these essentials to the comfort and convenience of the people having resulted in their almost absolute clearance in a large portion of the Province. Steps have been recently taken to check the indiscriminate waste of the resources of the country under these heads; but the destruction has been so great and general, and the measures that will be required to provide adequately for the wants of the people in this respect are of so important and extensive a character, that it is considered they can only be properly carried out under the direction of the Officers of the Forest Department, and the transfer of the control of the district forests to that Department has accordingly been recommended to the Government of India.

25. Much has yet to be done to place the sanitary condition of the Province on a satisfactory footing, though, as already stated, fair progress has been made in this respect at the principal stations and in the larger district towns.

The existing Government hospitals and dispensaries, nine in number, are most useful, and do excellent work; but they are quite inadequate for the requirements of so large a Province with a population of upwards of four millions, amongst whom fever of a serious kind is notoriously constantly prevalent, and numbers its victims by thousands annually. The extension of dispensaries to those parts of the country where they are most urgently required, has for some time engaged the

attention of the Government, and the requisite measures with this object will be adopted as soon as the services of duly qualified medical subordinates can be obtained for the purpose. The number of patients who received relief at the existing medical institutions during the past year was 76,540, or 4,000 in excess of that in the previous year.

26. Registration of deaths has been carried out under a new system, in accordance with the orders of the Government of India, since 1st July 1870, and the results are doubtless much more accurate than previously. Considerable improvement may, however, be still looked for in this respect. The registration of births has been commenced in Bangalore and Mysore.

27. The improvement of the water supply at Bangalore, and some other towns has engaged attention, and a project with this object for the former place was completed during the past year and approved by the Government of India. The want of funds has, however, prevented any steps being taken to carry it out.

28. Vaccination was carried on satisfactorily during the year under report; 96,570 persons were vaccinated, of whom 89·03 per cent were so successfully.

29. Revenue settlement operations were in progress in five districts, and included during the year, the measurement of 1,015,756 acres, and the classification of 526,568 acres. The operations have as yet only extended to 24 out of the 83 talooks of the Province, of which the settlement of 8 only has been fully completed.

30. The inám settlement was also in operation during the year, and the enquiries of its officers extended to the cases of 18,550 inám holdings. The proceedings of this settlement have as yet extended to 28 only of the 83 talooks of the Province, and are completed and closed in 6 only, in which the inám enquiries followed the revenue survey and settlement. The proceedings were complete in the remaining 22 talooks so far as the inám enquiries were concerned; but the final disposal of the ináms concerned is deferred, pending the survey measurement of the talooks.

35. The Province of Mysore has no political relations except with the British Government. The progress of the Young Chief, Mahárája Chámarájéndra Wadiyer Bahadúr, has been in all respects most satisfactory during the year under report, and the course of education adopted for him by the Guardian, Lieutenant-Colonel Malleson, and carried out under his own personal direction, promises to be as successful in its results as could be desired.

36. Mr. L. Bowring, C. S. I., having resigned the Chief Commissionership from the 11th August 1870, after an administration of the Province of nearly eight years, Colonel R. J. Meade, C. S. I., Agent, Governor General for Central India, and who had been officiating as Chief Commissioner for the previous six months, was permanently appointed his successor.

R. J. MEADE,
Chief Commissioner.

GENERAL REPORT

ON THE

ADMINISTRATION OF MYSORE,

FOR 1870–71.

PART I.

PHYSICAL, POLITICAL AND FISCAL GEOGRAPHY.

A.—PHYSICAL GEOGRAPHY.

1. AREA.—The Province of Mysore lies between 11°36 and 15°0 north latitude, and 74°42 and 78°37 east longitude. Its extreme breadth from east to west is 230 miles, and its extreme length from north to south is 190 miles. Its area has been variously computed in the absence of any systematic survey of the Province. As the result of a rough topographical survey carried out by Colonel Mackenzie between 1800—1807, the extent has been generally recorded as 27,000 square miles. The operations of the revenue survey which is now in progress, as well as the greater attention devoted to the definition of areas of the several districts, have however resulted in a large excess being found over former computations, and the area of the Province may be more accurately entered as 30,000 square miles. In the survey of six talooks in one district alone (Chituldroog), an excess of 136 square miles has been found, and a similar result occurs, more or less, in every talook now accurately surveyed for the first time.

2. In Appendix I. A, 1, the sum of the areas recorded for the past year for all the districts is shewn to be 29,717 square miles. Out of this 9,019 square miles, or rather less than one-third, are shewn as cultivated

and 4,600 square miles, or one-sixth nearly, as culturable, though waste. Out of the total of 20,697 square miles comprised under the head "waste," one-fifth only is culturable.

3. In the Chituldroog District, (the only one completely surveyed and settled,) out of 2,124,427 acres which comprise the area of the district, 780,000 acres, or upwards of one-third, were under cultivation during the past year. Of this extent, 9,822 acres were irrigated from private tanks and wells, and 21,322 acres from Government tanks. Out of the unculturable area, 263,962 acres consist of grazing lands.

4. The unappropriated culturable waste at the disposal of the State is shewn to be 3,098,111 acres, of which 153,399 acres have been brought under cultivation during the past year. These figures are necessarily subject to much qualification, pending the completion of the survey over the whole Province.

5. COMMUNICATIONS.—There are no rivers which are used for navigable purposes. The roads, which are for the most part supported from local funds, aggregate 2,857¼ miles in length. There are 48 miles of railway consisting of the Bangalore Branch of the south western Railway, which enters the Province from the direction of Madras.

6. CHARACTER OF SURFACE.—The details under this head are entered in Appendix I. A, 2.

7. CLIMATE.—The means of obtaining accurate meteorological statistics are as yet very imperfect. At Bangalore alone, an Observatory has been established under the supervision of the Government Astronomer at Madras. At the head quarters of districts, observations are also taken, but the arrangements made in respect of them at present are not such as to ensure the necessary degree of accuracy.

8. *Rain-fall.*—The total rain-fall at Bangalore for the year 1870—71, was registered at inches 31, cents 9. Of this 10 inches fell in one month—October, and inches 16, cents 72 during the south west monsoon months of June, July, August and September.

9. Taking the returns for the Province which, as before remarked, are not very reliable, the following results are exhibited, in comparison of the past with the preceding year.

	1869—70.		1870—71.	
	Inches.	Cents.	Inches.	Cents.
From January to May...	4	20	5	22½
„ June to September	19	43	90	97½
„ October to December	6	72	10	39
	30	35	36	59

10. *Temperature.*—The readings of the thermometer and rain register at the Bangalore Observatory for the past official year give the following results. The mean temperature was 73½°. The maximum was attained during the hot months of April and May when the maximum thermometer read 93° and 94° respectively, and the minimum 68° and 66.° From June to September, the maximum ranged from 81° to 82,° the minimum during the same period being 64° and 65.° In December, the maximum readings sunk to 78° and the minimum to 56.°

11. *Winds.*—The winds are subject to but little variation, and are regulated by the south west and north east monsoons, respectively. From November to March, the north east winds prevail with little or no intermission, and the south west winds are similarly prevalent from June to August. During the months of April and May, and those of September and October, the winds are variable at the change of the monsoons.

B.—POLITICAL RELATIONS WITH NATIVE STATES.

12. There are no Native States in political relation with this Administration.

13. The education of the Young Mahárája, Chámarájéndra Wadiyer Bahadúr, has made satisfactory progress during the year, under the supervision of the Guardian.

14. Colonel G. B. Malleson being compelled by ill-health to proceed on medical certificate to Europe, was relieved of his duties on the 27th March 1871, by Mr. J. D. Gordon, C. S. I., who had been appointed by the Government of India to act as Guardian during Colonel Malleson's absence.

15. At the invitation of His Excellency the Viceroy, some members of the Royal family of Mysore, namely, the Mahárája's brother and two cousins, were conveyed by Colonel Malleson to Calcutta, in December 1870, and from the success which attended this first attempt to induce a desire for travel among this class, and from the great pleasure and interest felt by the youths in the voyage by steamer from Madras to Calcutta, and in the new sensations and reflections experienced by them in visiting for the first time cities larger than Mysore, it is hoped that much benefit will result.

C.—CIVIL DIVISIONS OF TERRITORY.

16. *Administration Divisions.*—For administrative purposes, the Province is divided into three Divisions, which are again subdivided into eight Districts :—

1. Nandidroog Division comprises—	1. Bangalore District. 2. Kolár do 3. Toomkoor do
2. Ashtagram Division comprises—	1. Mysore District. 2. Hassan do
3. Nagar Division comprises—	1. Shimoga District. 2. Kadoor do 3. Chituldroog do

17. The average area of each Division may be roughly stated at 10,000 square miles, and that of each District 3,714 square miles. The *83 talooks (corresponding with Tahsíls in North India) have an average area of 358 square miles each.

*Excluding the Jahagír Talook of Yelandúru in the Mysore District.

18. There are 35,218 villages in the Province, of which however 11,785 have become depopulated. Of that number 31,941 are sarkár or Government villages, 836 are villages which have been granted free of assessment, and the remaining 2,440 villages are those which bear a permanently fixed assessment (known as Káyémgutta), or have been granted on easy rates of assessment.

19. *Principal Towns.*—The principal Towns in the Province are :—

Bangalore	with a population	including	that of the Cantonment	of 130,348
Mysore	do	do	do	50,135

20. *Land Revenue.*—The revenue from land during the past year was Rs. 72,91,498, and the gross revenue Rs. 1,05,66,657 (fractions omitted.)

D.—POPULATION.

21. The population of the Province, as shewn from the returns of the experimental census taken on the 8th December 1870, was 4,273,544. This gives an increase of 216,778 over the results obtained in the previous year from the ordinary returns furnished by the village accountants. Of the total population, 617,301, or upwards of one-sixth, are classed as agriculturists.

22. The following return shews the numbers of the several classes of which the population is composed. The figures cannot, however, be relied upon as accurate.

Christians.	Europeans	4,147
	East Indians and others of mixed descent	2,797
	Natives	7,991
Hindús		4,038,420
Musalmáns		206,781
Párs'ís		32
Jains		12,782
Other Classes		594
	Total.....	4,273,544

23. The ratio of population to area, computed for the whole Province, is 144 persons to the square mile. The proportion for individual districts is given below:—

Bangalore	District	244 per square mile.
Kolár	do	287
Toomkoor	do	146
Mysore	do	208
Hassan	do	379
Shimoga	do	101
Kadoor	do	37
Chituldroog	do	95

E.—FISCAL.

24. SURVEY AND SETTLEMENT.—A revenue survey and settlement of all land held under Government, though for many years previously in contemplation, was commenced in 1863-64. The system adopted was that which has been pursued with much success in the Bombay Presidency. The several operations of survey, classing and settlement are carried on successively by separate parties under the supervision of one Head, *viz.*, the Survey and Settlement Commissioner. The extension of the survey and settlement throughout the Province was estimated to occupy 20 years.

25. The actual area measured up from the commencement of survey operations in 1863—64 up to the close of the last season (31st October 1870), was 5,160,192 acres, or about 8,191 square miles, of which 325,376 acres were classified. The cost for both survey and classifying aggregated Rs. 8,67,502. The proportion of work performed in each year as well as the cost per acre, is subjoined.

Years.	Acres measured.	Acres classed.	Cost per acre of both operations.
			Rs. As. P.
1863—64	291,595	200,176	0 3 2·75
1864—65	507,238	248,244	0 2 9·50
1865—66	817,304	454,620	0 2 4·
1866—67	743,041	483,996	0 2 8·75
1867—68	789,780	669,521	0 2 9·90
1868—69	995,428	680,645	0 3 2·61
1869—70	1,015,716	526,567	0 3 9·67
Total.....	5,160,192	3,253,769	

26. Out of a total of 83 talooks in the Province, 24 only have as yet been taken in hand, and the measurement, classification and assessment of *8 talooks have been fully completed; of the remaining 16 talooks, 9 have been surveyed, and the measurement of the others is in progress.

Chituldroog District.
*1. Haribara.
2. Dávanagere.
3. Kanakuppa.
4. Chituldroog.
5. Hosadurga.
6. Hiriyúru.
7. Búdihálu.

Toomkoor District.
8. Sirá.

27. The following statement exhibits the progress during the season ending 31st October 1870, as compared with that for the previous season.

	Measurement and Test.				Classification and Test.			
	Measured.		Tested.		Classed.		Tested.	
	Survey field.	Acres.	Survey field.	Acres.	Survey field.	Acres.	Survey field.	Acres.
1868—69...	53,644	995,428	4,360	52,145	40,627	680,643	3,074	23,493
1869—70...	69,934	1,015,756	5,105	49,619	49,531	526,568	3,819	18,782
Increase. ...	16,290	20,328	745	...	8,904	...	745	...
Decrease....	...	...	...	2,526	...	154,077	...	4,711

28. The total cost of all operations during the season under report was Rs. 2,04,069-0-6 as compared with Rs. 1,82,078-11-3 in the previous year ; the excess being due to the increased strength of the Survey establishments at work during the past year.

29. The measuring establishments have been employed during the past year to a greater extent than previously in tracts abounding in rice and garden cultivation, and where the holdings are smaller in area than in districts where dry crop cultivation chiefly prevails. The difficulty of measuring was thus increased by the greater irregularity in the form of the holdings, each field or garden having to be reduced to numerous "waslas," (the vernacular term for rectangular or trapezoid figures) into which a field is broken up for purposes of measurement. This drawback combined with natural obstacles explains why, with increasing establishments and a considerably larger number of fields measured, the increase in the area measured was comparatively small.

30. In the classing branch also, while an increase is shewn in the number of fields operated upon, there was an actual decrease in acres as contrasted with the results of the previous season.

31. Detailed particulars will be found in Appendix I. E, 1.

32. VARIETIES OF TENURE.—The land tenures in the Province may be broadly divided into Sarkár or Government lands, and Inám lands.

33. Sarkár lands are held either on kandáyem or a fixed assessment or on batáyi* except in the settled talooks where the term of the settlement is fixed at 30 years. Kandáyem lands are held direct from Government on annual leases or pattás. These pattás are in practice renewed every five years or whenever changes occur in holdings.

* This term signifies the temporary occupation of Government lands, the cultivators of which pay no assessment and share the produce with the Government.

34. The batáyi system, though still greatly prevalent in the Nandidroog Division, is gradually being extinguished, and will disappear with the completion of the survey settlement in each talook.

35. Inám lands have not been granted subsequent to the assumption of the country except to a very small extent, under the rules which entitle the builder of a chatram or other charitable and public institution, to the grant of land of prescribed dimensions, on jódi or light assessment.

36. The following are the principal of the inám tenures :—

1. Sarvamányem villages—granted rent free.
2. Ardhamányem villages—granted at half the ordinary assessment.
3. Jódi villages and lands—granted on a light assessment.
4. Káyemgutta villages—granted on a fixed annual assessment in perpetuity.
5. Kodigi or kerebandi lands—granted on a permanent light assessment in consideration of services rendered in the construction or restoration of tanks, or on condition of their being maintained.

37. Further details under this head will be found in Appendix I. E, 2.

38. General Revenue.—The revenue demandfor the year 1870-71, excluding that which related to local funds, amounted to Rs. 1,05,66,657 2—7 which, added to the previous year's balance outstanding on the 31st March 1870, *viz.*, Rs. 15,78,662—7—8, made up the aggregate demand to Rs. 1,21,45,319—9—10.

39. *Collections.*—The amount collected during the official year was Rs. 91,36,198—3—3, being in the proportion of 75 per cent of the total demand. This proportion would have been larger but for the measure introduced during the preceding year, and described in paras 200 and

201 of the Administration Report for that year, by which the "Khists" or instalments of revenue, which were formerly payable before the end of March in each year, have been extended generally to the month of May. The official or financial year is thus to be distinguished for the revenue or fiscal year.

40. *Outstanding Balances.*—The amount outstanding at the close of the official year was Rs. 30,09,121—6—7. The returns received up to the 30th June 1871 shew however that, of that sum, Rs. 22,46,780—14—9 had been subsequently collected within the revenue year, leaving a balance of Rs. 7,62,340—7—10.

41. *Details of Revenue.*—The following is a comparative statement of the revenue under all heads, for the past and previous years :—

Items.	1869—70.	1870—71.
Land Revenue	72,69,272 9 0	72,91,497 15 7
Forests	3,70,805 7 5	4,41,819 10 8
Abkári	9,72,976 7 11	10,08,960 3 5
Assessed Taxes	3,36,984 5 8	3,24,831 5 3
Customs	7,57,210 15 1	7,50,178 0 4
Salt	13,200 2 2	13,388 0 5
Opium	500 0 0	500 0 0
Stamps	4,25,156 13 4	2,93,013 14 8
Post Office (Local) ...	39,974 11 1	41,250 5 4
Law and Justice	91,318 9 5	2,34,171 14 6
Police	1,698 13 9	1,243 1 3
Public Works	64,770 4 8	49,239 11 2
Mint	13,600 0 0	13,761 0 0
Miscellaneous	1,21,948 10 3	1,02,702 0 0
	1,04,79,453 13 9	1,05,66,657 2 7
Net Increase Rs.....		87,203 4 10

42. The causes of increase and decrease as above shewn under the various heads will be briefly explained.

43. LAND REVENUE.—The land revenue settlement for the year amounted to Rs. 72,91,497—15—7 as compared with Rs. 72,69,272-9-0 of the preceding year, the excess being Rs. 22,225—6—7.

44. The items of increase consist mainly of the proceeds from the annual sale of the grazing rights in the hulgával or pasture lands, especially in the Nagar Division, of the receipts from "hálat" or excise duty on coffee, which is incorporated in the land revenue, and of the results of the inám settlement in the imposition of quit-rent on inám lands.

45. A comparison of the returns of dry land under cultivation exhibit an increase of Rs. 26,635 of assessment over the previous year,

owing to fresh land taken up. On the other hand there is a decrease in the extent of wet land in occupation, owing to relinquishments of such land chiefly in the Toomkoor District from failure of water supply.

46. In the surveyed and settled talooks of the Nagar Division, the assessment of lands taken up during the year amounted to Rs. 18,519, against Rs. 10,356 assessment on lands resigned. In 1869-70 lands to the amount of Rs. 28,166 were resigned in the settled talooks, shewing that the people are getting more accustomed to the new survey rates. It is remarked that the survey settlement of a talook is generally attended at the outset by extensive resignation of holdings owing, in the opinion of the Superintendent of Nagar, to apprehensions of an enhancement of assessment; for, when the terms become known, the lands are usually taken up again. This view is, however, contested by the Survey Commissioner, who considers that the resignations of holdings is almost wholly due to the fall in prices of cereal produce, and the reaction from the over cultivation that was carried on under the stimulus of high prices up to 1866—67.

47. The following table shews the land revenue settlement for the several Divisions comparatively for the two years :—

Divisions.	1869—70.	1870—71.	Increase.	Decrease.
Nandidroog	29,42,759	29,10,087	...	32,672
Ashtagram	19,77,701	19,97,259	19,558	...
Nagar	23,48,812	23,84,151	35,339	...
Total	72,69,272	72,91,498	54,897	32,672
		Deduct Decrease	32,672	
		Net Increase	22,225	

48. *Forests.*—The revenue from forests amounted to Rs. 4,41,819-10-8, and exhibits an increase of Rs. 71,014-3-3 over the receipts of the previous year, due to larger sales of timber and sandalwood, as well as to the large proceeds obtained from the sale of minor forest products. Further details on this head are given in Section B. 2, Part III, of this Report.

49. *Abkári.*—The receipts under this head are subjoined.

	1870—71. Rs.	As.	P.
Toddy	5,12,971	12	4
Arrack	3,95,510	7	9
License fees	74,335	3	5
Sales of licenses to sell arrack ...	16,982	5	5
Gánja	9,046	0	0
Miscellaneous	314	6	6
Total Rs.....	10,08,963	3	5
Receipts for 1869—70...	9,72,976	7	11
Net Increase Rs.	35,986	11	6

The increase was caused chiefly under the head of arrack.

50. *Assessed Taxes.*—The following are the items and the revenue derived from each, comprised under this head.

	1870—71. Rs.	As.	P.
Tax on Houses	1,13,887	1	10
„ „ Shops	86,472	15	4
„ „ Looms	73,818	3	4
„ „ Oil mills	13,292	15	3
„ „ Carts	7,148	0	0
Recoveries from previous year...	212	1	6
Total Rs....	3,24,831	5	3
Receipts for 1869—70...	3,36,984	5	8
Decrease Rs....	12,153	0	5

51. The decrease under this head is not actual, but has resulted from the transfer of a sum of Rs. 18,370 to the credit of the town municipalities at Mysore, Kolár and Shimoga. There was otherwise an increase of receipts from house tax and carts.

52. *Houses.*—The total number of houses in the Province is computed at 971,998, of which 126,410 only are subject to taxation, the remainder being exempted as the property of cultivating ryots, and of certain other privileged classes who, under the ancient usage of the country, have hitherto enjoyed an immunity from this tax. The tax on houses varies from annas 8 to Rs. 9 per annum, the average being Rs. 1, 2, 3, per house. Houses are classed for purposes of taxation into the following 4 classes;—1st, terraced; 2nd tiled; 3rd, mud-roofed; and 4th thatched.

53. *Shops.*—The total number of shops is computed at 26,042, of which 323 being the property of village headmen and other privileged classes are exempted from taxation. The shop tax varies from Rs. 2 to Rs. 25 per annum, and gives on the average Rs. 3¾ per shop.

54. *Looms.*—The number of looms is estimated at 40,370, of which 915 are exempted. The tax on each loom ranges from As. 8 to Rs. 4 per annum, giving on an average Rs. 1—14—0 per loom.

55. *Oil Mills.*—There are 3,279 oil mills, of which 24 are exempted. The rates vary from Rs. 3 to Rs. 15 per mill, giving an average of Rs. 4⅛ for each.

56. *Customs.*—The collections under the head are shewn in the following statement:—

Items.	1870—71.		
1. Supári or betel nut ...	5,49,643	15	1
2. Tobacco	1,28,658	11	6
3. Opium	2,026	0	8
4. Pepper	4,537	11	4
5. Cardamoms	2,126	8	9
6. Cocoanuts, dry	6,594	5	2
7. Do green	30,843	13	4
8. Betel leaves	45,788	0	10
9. Cloths or piece goods ...	50,446	10	9
10. Octroi collections	41,283	3	11
11. Miscellaneous	6,621	13	10
Total Rs...	8,68,570	15	2
Receipts for 1869—70....	8,62,243	14	3
Increase.....	6,327	0	11

Of the above sum of Rs. 8,68,570—15—2, shewn as collections for the year, Rs. 81,283—0—6 were credited to municipalities, and a further sum of Rs. 37,109—14—4 was credited to the Sringéri Jahagír and other inámdars on whose behalf the Government collects the custom dues. The amount actually credited to the general funds of the Province was therefore Rs. 7,57,210—15—1, and, as compared with the receipts for 1869—70, exhibits a decrease of Rs. 7,032—14—9. The decrease is found chiefly under the head of tobacco and supári, in respect of which items, there was a diminished export.

57. The cost of collection amounted to Rs. 38,308—8—10, being above 5 per cent.

58. *Salt.*—The revenue from salt is derived from fees levied on the earth salt pans, and amounted to Rs. 13,388—0—5, against Rs. 13,200—2—2 in 1869—70.

59. The following is the number of salt pans at work in the several divisions.

	No.
Nandidroog Division	1,065
Ashtagram do	473
Nagar do	1,073
Total.....	2,611

60. *Opium.*—The customs revenue from opium is credited to the proper head. The sum of Rs. 500 separately shewn under this head, represents the contract entered into for the sale of the drug, which is a monopoly.

61. *Post Office, (Local).*—The receipts from the "Anché" or local Postal Department amount to Rs. 41,250—5—4, and exhibit an increase of Rs. 1,275—10—3 over those of the previous year, owing chiefly to the withdrawal of the privilege previously enjoyed by officers of the Commission of franking private letters.

62. *Law and Justice.*—The items comprised under this head are as follow :—

	Rs.	As.	P.
Court fee stamps ...	1,50,988	4	0
Magisterial fines ...	53,225	3	6
Registration fees ...	23,319	11	11
Sale of unclaimed property...	3,472	14	3
Sale proceeds of Jail manufactures.	2,355	2	11
Realized from convict labor...	258	8	0
Miscellaneous	552	1	11
Total Rs.....	2,34,171	14	6

63. The other heads of revenue call for no notice here.

64. INAM SETTLEMENT.—An investigation and settlement of the numerous inám holdings in the Province was determined upon first in 1863, incidently with the introduction of the revenue survey and settlement. The preliminary rules then laid down afforded a sufficient guide to the operations of the Revenue Survey Department until 1866, when the Inám Commission was appointed. The rules then drawn up were subsequently modified, however, in consequence of the altered policy of the imperial Government in respect of the future of the State, and the Inám Commission did not fairly commence its work till 1868.

65. *Principles of the Inám Settlement.*—The ináms coming under the operations of the Commission are classified as follows :—

I. Grants or endowments towards the support of religious or charitable institutions.

II. Personal or subsistence grants.

III. Grants made by former Governments for services no longer required.

Village service ináms form an additional class, but the investigation into these will be made by the Revenue Survey Department.

66. In dealing with these tenures, two primary considerations are kept in view :—

1st. The competency of the granter, irrespective of the duration of the inám, and—

2nd. The duration of the inám, irrespective of the competency of the granter.

67. Under the first head, are determined the validity of grants made by the late Mahárája prior to the assumption of the country in 1831, and under the second, that of all ináms, by whomsoever granted, the duration of which has been for 50 years and upwards.

68. Subject to the above, the following are the principles on which the settlement is conducted.

I. When sannads have been granted by the late Mahárája or by his predecessors, and when they convey full powers of alienation and are hereditary, the ináms are treated as heritable and alienable property.

II. When sannads emanating as above do not convey full powers of alienation, the ináms may be enfranchised by payment of a quit-rent equal to one-eighth of the assessment of the tenure.

III. When sannads have been granted by incompetent persons and when they are less than 50 years' old, a compulsory quit-rent equal to one half of the assessment is imposed. But in doubtful cases and where there is a probability that the inám has been enjoyed for fully 50 years, the quit-rent to be imposed is one-fourth of the assessment.

69. *Composition of the Inám Commission.*—The Inám Commission is now composed of 1 Inám Commissioner, 1 Special Assistant, and 3 Assistants on whom devolves the preliminary work of registering the ináms, talook by talook, and of collecting all the materials for their settlement.

70. *Operations of the Department.*—The inám settlement has up to the present time been extended to 28 talooks, out of the 83 talooks in the Province. In six *talooks the inám settlement followed the survey settlement, and is fully completed. In the other talooks, the settlement of the inám has preceded that of the revenue survey, and is so far defective that the excess found in the survey measurement of the máms has yet to be dealt with before the issue of title deeds.

*Harihara.
Dávanagere.
Kanakuppa.
Chituldroog.
Hosadurga.
Hiriyúru.

71. 18,550 cases were registered by the Assistants during the year, and of these 12,630 required the review and confirmation of the Inám Commissioner.

72. Including 4,897 cases pending from the previous year, 17,527 cases were submitted for the disposal of the Inám Commissioner during the year. Of these, 11,658 were disposed of, leaving a balance of 5,869 cases undisposed of on the 31st March 1871.

73. *Extent and Value of Ináms settled.*—The results of the inám settlement operations for the past and previous years comparatively are subjoined.

Ináms.	1869—70.	1870—71
Extent in acres	86,540	1,08,260
Assessment recorded	57,168	76,332
Jódi	20,732	20,543
Quit-rent	2,694	7,769

74. The increase in the amount of quit-rent arose from the circumstance that a larger number of personal ináms were enfranchised during the year than in 1869—70.

75. *Resumptions.*—The number of ináms resumed was larger than in the previous year; but their value and extent were smaller as shewn in the following figures.

	1869—70.	1870—71.
No. of Cases	345	532
Acres	2,645	1,748
Assessment	...Rs 3,746	Rs. 2,431
Jódi	... „ 1,692	„ 405
Net Value of Resumptions.....	2,054	2,026

76. *Ináms struck off the List.*—In 117 cases, ináms consisting either of unprofitable lands long ago abandoned, or of lands submerged or overgrown with jungle, were struck out.

77. The subjoined statement shews a satisfactory decrease in the number of personal ináms, the enfranchisement of which has been declined.

	1869—70.	1870—71.
No. of Cases	62	32
Acres	435	119
Assessment	Rs. 841	Rs. 263.
Jódi	316	...
Quit-rent	66	33

99 per cent of personal ináms have been enfranchised at the option of the holders.

78. *Financial Results.*—The financial results of the inám settlement for the year are as follow:—

	Rs.
Quit-rent upon enfranchised ináms ...	7,770
Resumptions	2,026
Total Rs.....	9,796

79. *Settlement of Muzaráyi Ináms.*—The number of cases disposed of during the year 1870—71 is 114, against 206 of the preceding year.

80. The value of resumptions for the year 1870—71 is Rs. 89-1-11, against Rs. 170—2—0 in the previous year, the revenue derived from attached ináms amounted to Rs. 32—4—8, against Rs. 426—12—0 in 1869—70.

81. Only one case of a personal inám of the value of Rs. 26—4—0 per annum, restricted by the late Sir Mark Cubbon to one life, was eliminated altogether from the Muzaráyi list by payment once for all under Section X, Clause 5, of the Money Inám Rules, of a lump sum at 11½ years' purchase of Rs. 301—14—0.

82. The subjoined statement contains the results of the Muzaráyi settlement during the year.

			1869—70.	1870—71.
Muzaráyi payments commuted into land	...	Rs.	53	...
Do merged in the jódi	...	„	71	106
Do resumed	...	„	170	89
Do confirmed	...	„	7,173	3,930
			7,467	4,125

83. *Total Realizations of the Inám Settlement Operations.*—Exclusive of miscellaneous receipts from fines, the financial results of the past three years' operations are given in the subjoined table.

ITEMS.	1868—69.	1869—70.	1870—71.	Total.
Permanent.	Rs.	Rs.	Rs.	Rs.
1. Quit-rent	4,334	2,694	7,770	14,798
2. Net value of ináms resumed	581	2,054	2,026	4,661
3. Muzaráyi resumptions...	...	226	89	315
Total Rs....	4,915	4,974	9,885	19,774

84. Under the head of sáyer and abkári Rs. 50—9—0 were deducted, as compensation for the resumption of certain items granted under ancient sannads from inám villages held on jódi and quit-rent tenure.

85. The existence of a class of inám styled "Dasvandam" was brought to notice by the Inám Commissioner, and instructions were issued for the mode of dealing with them.

86. A Dasvandam inám consists of a tenth-share of the land irrigated by the well or small tank, for the construction and maintenance of which the said share was granted in inám. This description of inám was assigned chiefly for up-keep of wells. It was ordered that these ináms should be confirmed on the existing tenure, excepting where the tank or well was found so dilapidated as to be useless and incapable of restoration, in which case their resumption was authorized.

87. *Estimated Value of Various Ináms.*—The value of the several descriptions of ináms as estimated on the formation of the Inám Commission, was as follows:—

	Whole Villages.		Minor Ináms.	
	Valuation.	Jódi or Light Assessment.	Valuation.	Jódi or Light Assessment.
	Rs.	Rs.	Rs.	Rs.
Ináms up to the termination of Diván Púrnaiya's Administration in 1810....	2,86,038	1,32,150	4,99,528	1,48,134
„ granted during the Mahárája's Administration.	3,19,167	62,435	35,025	...
„ by the Chief Commissioner of Mysore ...	...	...	18,500	8,000
Stal Ináms or Unauthorized Ináms	...	...	63,616	17,946
Total Rs.....	6,05,205	1,94,585	6,16,669	1,74,080

Total valuation of Minor Ináms and Ináms	12,21,874
Total Jódi (to be deducted)	3,68,665
Leaves as the total estimated valuation of the existing alienations in the Province	8,53,209

88. The number of ináms was calculated at 52,193; but this is exclusive of the "Stal" inám, and merely represents the number of inámdars, each of whom may possess ináms in more than one village or more ináms than one in the same village.

PART II.

PROTECTION.

A.—LEGISLATIVE.

89. The following Acts of the Legislative Council of the Government of India were extended to the Province by order of the Viceroy and Governor General in Council, during the year 1870—71.

Act VII of 1870,	The Court Fees' Act.
Act X of 1870,	The Land Acquisition Act.
Act XXIII of 1870,	The Indian Coinage Act.
Act XXVII of 1870,	An Act to amend the Indian Penal Code.

B.—JUDICIAL.

90. *Courts of Justice.*—There were at the close of the year 128 tribunals for the disposal of criminal, civil, and revenue cases in the Province, or about one tribunal to 31,068 persons. Of the officers who presided over these tribunals, 20 were European, (one Civil Covenanted, 16 Military and 3 Uncovenanted Officers) and 165 were natives.

91. Of the above Courts, 22 exercised criminal jurisdiction only, 10 exercised civil jurisdiction only, and 96 Courts exercised both civil and criminal jurisdiction. 22 Courts including the Court of the Judicial Commissioner and 3 Courts of Session exercised appellate as well as original jurisdiction in both civil and criminal cases.

92. *Cost of the Courts.*—The cost of these tribunals, inclusive of the Court of the Judicial Commissioner, are defrayed from the Mysore Revenue, and amounted to Rs. 9,60,304—1—4. Their net receipts from stamps yielded Rs. 1,85,297—15—10.

93. *Description and Powers of Courts.*—The following table shews the number of Courts and the powers exercised by the presiding officers.

No. of Courts.	Denomination of Presiding Officers.	Criminal Powers.	Civil Powers.
21	Sheristadars.... ...	2nd Class Sub-Magistrate ...	...
55	Péshkars	Do do ...	...
84	Amildars	Do do ...	Original suits up to 50 Rs.
2	Sar-Amins	Do do ...	...
2	Town Magistrates ...	Full powers of a Magistrate...	...
9	Judicial Assistants ...	... ...	Original suits from Rs. 50 to 3,000.
1	2 Judges of Small Cause Courts	... ...	Small Cause jurisdiction up to Rs. 1,000.
10	Assistant Supts. ...	1st Class Sub-Magistrate ...	...
8	Do do ...	Full powers of a Magistrate...	...
8	Deputy Superintendents	Do do ...	Original suits from above Rs. 3,000 to Rs. 10,000 and appeals from the decisions of Amildars.
3	Superintendents ...	Powers of a Session Judge ...	Original suits above Rs. 10,000 and appeals from decisions of Judicial Assistants.
1	Judicial Commissioner...	Powers of a High Court ...	Hears appeals from Superintendents and Deputy Superintendents, and special appeals from Judicial Assistants and Amildars; also exercises the powers of a Court of reference and revision.

94. CRIMINAL JUSTICE.—*No. and Classification of Offences.*—The following comparative statement shews the number of offences reported under each class during the past and previous years, and the percentage of increase and decrease.

	In 1869.	1870.	Increase.	Decrease.	Percentage of— Increase.	Decrease.
Class I.						
Against the State or public (chapters VI to XV, Indian Penal Code)... ...	938	847	...	91	...	9·7
Class II.						
Against the person (chapters XVI, XIX, XX to XXII.)	8,849	10,040	1,191	....	13·4	...
Class III.						
Against property (chapters XVII and XVIII)	6,897	7,552	655	...	9·5	...
Class IV.						
Not included in the above and under special laws	1,476	2,034	558	...	37·7	...
Total.....	18,160	20,473	2,313	...	...	...
Total percentage of increase.....	...	...	...	...	12·7	...

with the exception of offences under Class I, there has been a general increase in all the other classes of offences reported during the year.

95. *Class I.*—Under this class there has been an increase in the following offences; passing, &c., bad coins, false evidence, false claims, and affrays.

The increase under the last head is particularly marked in the Nandidroog and Nagar Divisions, the cases reported having amounted to 113, as against 86 in 1869.

96. *Class II.*—The increase of offences reported in Class II chiefly falls under the heads of murder, culpable homicide, hurt, wrongful restraint and wrongful confinement, assault and criminal intimidation.

The cases of murder amounted to 62 against 48 in the previous year. The increase is more marked in the Ashtagram Division in which 29 cases of murder were reported.

A decrease of offences under this class has occurred chiefly under the head of grievous hurt, and offences relating to marriage.

97. *Class III.*—The increase of crime in Class III falls under the heads of robberry, cattle theft, dishonest misappropriation of property, mischief, and criminal trespass; under the last head the number of cases has increased from 500 to 1,068. The increase is general throughout the Province; but is more marked in the Nandidroog Division, where 579 cases occurred as against 208 of the previous year.

There has been a slight increase in the total number of dacoities reported; but there is a marked difference in the number of cases which occurred in each division as shewn below:—

	1870.	1869.
Ashtagram	28	22
Nandidroog	23	12
Nagar	33	46

The returns do not shew how many of these dacoities were committed by professional gangs and how many were simple cases falling under the technical definition of the crime.

98. *Class IV.*—In Class IV the chief increase has occurred in offences under the Police Act V of 1861; these have amounted to 1,535 as against 1,014 in 1869.

A marked decrease on the other hand is observable in offences against the "Forest Act," which were 49 against 124 in the previous year.

99. The Judicial Commissioner reports that the practice of kidnapping female children for immoral purposes does not exist in this Province.

100. *Number of Offences brought to Trial.*—Of the 20,473 offences reported, 19,172 were brought to trial during the year, or 93·64 per cent.

101. The subjoined table shews the number of persons brought to trial, and the general results for the past and preceding years.

	1869.	1870.
Pending 1st January	140	277
Brought to trial	31,381	42,700
Total.....	35,521	42,977
Acquitted or discharged	20,727	30,072
Convicted	10,502	12,496
Died, escaped, transferred ..	15	97
Remaining under trial on 31st December...	277	312

102. Of the persons brought to trial, 18,133 were arrested by the Police or sent in under warrants, and 23,788 attended on summons. The latter figure differs but little from that of the previous year; but there is a large increase in the number of persons arrested by the Police or under warrants, amounting to 7·471.

103. The percentage of convictions to acquittals is 29·36 only, as compared with 33·63 in 1869 and 38·64 in 1868.

104. The number of persons discharged without trial amounted to 9,945, as against 5,778 in the previous year.

The officiating Judicial Commissioner, Mr. Mangles, observes—"that the results generally shew that the Police have made many unneces-"sary arrests or have been unsuccessful in their prosecutions, and that the "magisterial authorities have not exercised a wise or careful discretion in "issuing process on the receipt of complaints, which are too frequently "instituted with the object of causing vexation and annoyance."

105. *Cases disposed of by the Courts.*—The proportion of cases disposed of by the various classes of tribunals, and the ratio of persons convicted to trial before each class of Court, is shewn in the following table.

COURTS OF—	Cases disposed of.				Persons involved.				Ratio of persons convicted to trial.			
	1869.	1870.	Increase.	Decrease.	1869.	1870.	Increase.	Decrease.	1869.	1870.	Increase	Decrease.

Judicial Commissioner ...	13	16	3	...	24	23	...	1	91·67	86·97	...	4·70
Total.....	14,344	18,686	4,342	53	31,231	42,568	11,337	218	33·63	29·36	...	4·27

106. *Witnesses.*—Consequent on the larger number of cases tried, the number of witnesses examined by the Courts have increased from 47,658 in 1869 to 58,382 during the past year; the average number of witnesses examined being 3 to each case.

107. *Duration of Trials.*—In the annexed table the average duration of criminal trials before the several classes of Courts, during the past and previous years, is contrasted.

	1869, Days.	1870, Days.	Increase.	Decrease.
Péshkars	6·59	8·5	1·91	...
Sheristadars	...	9·4	9·4	...

Do. do. full power Magistrates...		8·26		
Deputy Superintendents	6·35	10·7	4·35	...
Do. do. with enhanced powers ...	8·0	7·16	...	·84
Session Judges	26·49	33·8	7·31	...
Judicial Commissioner	34·10	21·4	...	12·70
Total.....	7·83	8·65	0·82	...

108. *Session Trials.*—The number of cases disposed of by Session Judges has fallen from 178 in 1869 to 125 last year, and the number of persons involved from 362 to 311. The largest decrease occurred in the Nagar Division,

109. The result of the sessions trials and the percentage of convictions and acquittals is shewn in the following statement.:—

Session Judges.	No. of Cases.		No. of Persons.		Percentage convicted.		Percentage acquitted.	
	1869.	1870.	1869.	1870.	1869.	1870.	1869.	1870.
Judge of Ashtagram	30	30	61	93	51·55	59·14	48·45	40·86
„ Nandidroog	68	48	148	127	48·65	40·15	51·35	59·85
„ Nagar	80	47	153	91	60·77	61·54	39·23	38·46
Total.....	178	125	362	311	55·82	52·09	44·18	47·91

110. *Punishments.*—The following comparative statement shews the nature of punishments inflicted and the number of persons punished, during the past and previous years.

Punishments.	1869.	1870.	Increase.	Decrease.
Death	20	20	...	...
Transportation for life	7	12	5	...
„ for a term	...	...	...	...
Imprisonment, rigorous, with solitary confinement ...	4	23	19	...
„ „ without do.	1,828	1,165	69	...

Fine { without do	7,454	9,198	1,744	...
Whipping { In addition to other punishment	26	28	2	...
Whipping { In lieu of other do	104	103	...	1
Security to keep the peace	117	2	...	79
Recognizance...		6		
Security for good behaviour		30		
Total.....	10,513	12,496	2,053	80
Deduct Decrease.....			80	...
Net Increase.....	...	...	1,983	...

111. There has been a very large increase in the number of persons punished by fine only. With the exception of the increase in the number of sentences of transportation for life, there is a marked decrease in the severity of the terms of imprisonment adjudged. In the Nandidroog Division, in which the largest number of sentences of imprisonment were passed, 56 per cent of the persons sentenced to imprisonment were incarcerated for terms not exceeding 15 days, and 90 per cent for periods less than 6 months.

112. *Fines.*—During the year 10,378 persons were fined to the aggregate amount of Rs. 59,047, while in 1869, 8,407 persons were fined Rs. 55,875, or on an average Rs. 6—10—4, as against Rs. 5—11—0 in the past year.

113. Of the total fines imposed, a very large proportion, *viz.*, Rs. 42,065 was realized, and of this, Rs. 3,280 were paid away as compensation. The percentage of realizations was 71·24, as against 65·47 of the previous year.

114. *Trials with Assessors.*—One hundred and ninety cases were tried during the year with the aid of assessors, in the Courts of the Magistrates with enhanced powers under Section 445 A, of Act VIII of 1869, and in the Sessions Courts, the Judges concurred with the assessors in 167 cases, and differed from them in 23 cases. The average number of assessors employed in each case was three.

115. *Appeals.*—The following table shews the number of appeals preferred, disposed of, and pending in the Courts of the Province during the year, as compared with the previous year :—

FROM ORDER OF—	Referred and pending.		Disposed.								Remaining for trial.	
			1869.				1870.					
	1869	1870.	Before Judicial Commissioner.	Before Courts of Sessions.	Before Magistrates of Districts.	Full power Magistrates of Districts.	Before Court of the Judicial Commissioner.	Before Courts of Sessions.	Before Magistrates of Districts.	Full power Magistrates of Districts.	1869.	1870.
Session Judges ...	75	97	67	...	...	...	84	...	...	...	8	13
District Magistrates...	91	84	...	87	...	...	...	80	...	...	4	4
Subordinate do ...	127	230	...	...	125	...	...	...	226	...	2	4
	49	11	...	...	...	43	...	...	...	11	6	...
Total.....	342	422	67	87	125	43	84	80	226	11	20	21

116. The proportion of appeals from the decisions of Session Judges and District Magistrates was about the same as last year; but the proportion of appeals from the sentences of the Sub-Magistrates have somewhat increased. Of 12,476 persons, however, who were convicted by the Magistrates and Sessions Judges, only 726 or 5·9 per cent appealed to

the different appellate Courts, a result which, as remarked by the officiating Judicial Commissioner, speaks favorably for the character of the convictions generally.

117. *Result of Appeals.*—In appeals disposed of by the Judicial Commissioner, the orders in 82·14 per cent of the cases were confirmed. In appeals disposed of by the Sessions Judges, the orders were confirmed in 53·75 per cent of the cases, and in 29·20 per cent of the cases disposed of by the District Magistrates.

118. The general results of the criminal appeals preferred will be seen from the annexed table :—

Appeals.	1869.		1870.	
	Cases.	Persons.	Cases.	Persons.
Pending from last year	5	5	20	35
Received during the year	337	557	402	691
Received by transfer	...	...	...	...
Total.....	342	562	422	726
Appeals or applications rejected	60	81	76	114
Sentences confirmed	144	217	176	275
Sentences modified	43	67	37	82
Sentences reversed	72	159	102	179
Proceedings quashed	...	...	5	17
Further enquiry or evidence ordered	3	3	5	9
Total disposed of.....	322	527	401	676
Pending at the end of the year.....	20	35	21	50
Total.....	342	562	422	726

119. *Duration of Appeals.*—The general average duration of appeals was 20·97 days, against 24 days in 1869. The average duration of appeals in the Ashtagram Division has slightly increased as compared with the previous year. In the Nagar Division it fell from 23 to 18 days, and in the Nandidroog Division it was still more favorable, being 15 days only. The duration of appeals in the Court of the Judicial Commissioner was reduced to 25·5 from 39 days in the previous year. In order to facilitate the despatch of criminal appeals, the officiating Judicial Commissioner has directed that the records of cases should, in every instance, be transmitted with the petitions of appeals received from prisoners confined in jails and lock-ups.

120. *Sentences referred.*—The number of cases which came before the Court of the Judicial Commissioner for confirmation of sentence of death during the year was 20, including 3 cases pending on the 1st January, and the number of persons in these cases sentenced to death, subject to the confirmation of the Court, was 31. Of these, the sentence of death passed upon 20 persons was confirmed, 3 persons were acquitted, and 4 cases involving 8 persons were pending at the end of the year.

121. *Revision.*—Thirty cases came before the Court of the Judicial Commissioner, as a Court of Revision. Of these, 29 cases were referred by Session Judges, and one was called for by the Court on perusal of the calendar. In 4 of these the orders were confirmed, 1 was reversed, and in 25 cases the sentences were quashed.

122. CIVIL JUSTICE.—*Number of Original Suits instituted.*—The aggregate number of civil suits instituted in all the Courts of the Province during the past year amounted to 20,534, being 3,699 in excess of the number filed during the previous year. There has been an annual increase in the number of suits instituted for the year past; but the larger proportionate increase of the past year, which has occurred in every district, is attributed by the Judicial Commissioner to the relief afforded to the poorer classes of suitors by the introduction of the Court Fees' Act, which came into force in this Province on the 2nd July 1870.

123. *Courts of Talook Amildars.*—In May 1869, the pecuniary jurisdiction of the Courts of Amildars was reduced from Rs. 300 to Rs. 50; this has not, however, had the effect of reducing the number of cases on their files, the number of suits filed in their Courts having amounted during the past year to 7,410, being 404 in excess of the number of the previous year.

124. *Judicial Assistants' Courts.*—Eight Courts of Judicial Assistants, *viz.*, one for each district, were formed on the 1st of May 1869, and a 2nd Court was added to the Mysore District in October 1870. The total number of this class of Courts is therefore 9.

125. *Number of Suits instituted in each District.*—The number of suits instituted in each district of the Province and the percentage of increase, is shewn in the following comparative table:—

	1869.	1870.	Difference.	Percentage of increase.
Bangalore District	2,092	2,788	696	33·27
Small Cause Court	5,761	7,189	1,428	24·79
Kolár District	1,717	2,383	666	38·78
Toomkoor do	1,001	1,119	118	11·78
Mysore do	2,505	2,609	104	4·15
Hassan do	771	852	81	10·50
Shimoga do	1,407	1,607	200	14·21
Kadoor do	900	1,149	249	27·66
Chituldroog do	673	830	157	23·33

126. *No. of Suits disposed of.*—The number of each description of suits instituted during the year is shewn in the following statement. A comparison with previous years is impracticable, owing to alterations introduced in the form of the statement.

	1870.
On written obligation	11,512
On unwritten do	2,106
On account stated	914
Money had and received	184
Goods sold...	3,554
Breach of contract not mentioned above ...	284
Rent not falling under the Rent Law ...	294
Movable property or value thereof ..	661
Damages	110

Suits under the Rent Law.

Arrears of rent with or without ejectment or cancelment of lease	15
Relating to distraint	1
Damages for extortion or withholding receipts or on account of illegal restraint, or other cause	2
For Pattás or Kabúliyáts	3
For ejectment or recovery of possession ...	117
For recovery of money or accounts from agents	2
All other suits under the Rent Law... ...	4

Other Suits.

Suits for immovable property	412
Suits for specific performance of contract . .	88
„ to declare and establish rights to real property, including pre-emption, preclosure ...	81
„ to declare and establish personal rights	95
„ relating to religious endowments ...	10
„ to set aside judgments, contracts, &c., on the ground of fraud...	1
„ for dissolution of marriage... ...	2

	1870.
Suits for enforcement of matrimonial rights	16
„ for partition	41
„ relating to religion and caste ...	25
Total.....	20,534

127. Including 1,074 cases pending from the previous year, and 372 cases received by transfer and demand, the total number of suits for disposal during the year was 21,980, or 3,952 in excess of the number of the previous year. Of these, 20,543 including the transferred cases, were disposed of, leaving 1,437 suits pending at the close of the year. The number of suits disposed of in 1869 was 16,954, being less by 3,589 suits than the number disposed of in 1870.

128. The number of suits commenced, disposed of and pending at the close of the year in the various classes of Courts, is shewn below, as well as the average number of suits decided by the officers of each class of Court.

	Suits commenced.	Disposed of.	Pending.	Average No. of cases decided by the Officers of each class.
Small Cause Court Judge ...	7,443	7,165	278	3,582
Amildars	7,511	7,440	71	89
Judicial Assistants	6,946	5,875	1,071	652
Deputy Superintendents ...	63	52	11	6
Superintendents ...	17	11	6	4
Total.....	21,980	20,543	1,437	Including 342 suits transferred.

Of the 1,437 cases pending at the close of the year, 381 were pending over two months, and 95 over four months. The date of the oldest suit pending was the 19th July 1870.

129. *Value of Suits.*—The aggregate and average value of the suits disposed of is shewn in the following statement:—

AMOUNTS.	Number of Original Suits disposed of.	Aggregate Value of Suits.	Average Value of Suits.
Not exceeding Rupees 5	2,520	6,934 3 2	2 12 0
Do 20	5,708	63,053 6 11½	11 0 9
Do 100	8,124	3,96,292 7 4	48 12 5
Do 500	3,253	6,97,833 5 6½	214 8 4
Do 1,000	359	2,49,444 8 9	694 13 4
Do 5,000	219	4,29,416 14 8	1,960 12 11
Do 10,000	13	91,526 10 9	7,040 8 2
Do 1,00,000	5	1,64,485 1 4	32,897 0 3
Exceeding Rupees ... 1,00,000	...	... ...	... ...
Total.....	20,201	20,98,986 9 8	103 14 6

130. Notwithstanding the great increase of litigation, suits of a value exceeding Rs. 500 have decreased from 641 to 596. Of the suits disposed of during the year, 12·47 per cent were valued at sums below Rs. 5; 28·26 per cent at sums below Rs. 20; 40·22 per cent at sums below Rs. 100, and only 19·05 per cent at sums above Rs. 100.

131. The following comparative statement shews the percentage of cases disposed of under the several heads indicated :—

	1869.	1870.
Decided on merits ... ... For Plaintiffs	21·7	19·3
For Defendants	3·5	4·3
Plaints rejected or returned	30·7	3·7
Dismissed for default		9·5
Withdrawn with leave		3·2
Compromised	4·2	19·8
Decreed on confession	20·3	18·9
Decreed *exparte*	19·4	20·5
Dismissed *exparte*	...	0·5

132. It is noticed by the Judicial Commissioner that, notwithstanding the introduction of the Court Fees' Act, there has been a very large increase in the percentage of cases compromised; and that the large reduction in the percentage of cases dismissed for default and rejected, indicates that the more stringent procedure now in force, based on the provisions of Act VIII of 1859, has not been harshly enforced so as to cause hardship and injustice to the suitors.

133. *Percentage of Original Suits decided.*—The following comparative table shews the percentage of original suits decided by the several classes of Courts, and the average duration of contested and uncontested suits in each class of Courts.

No.	Officers.	1869.		1870.		Average Duration of Suits in days in 1870.	
		Cases.	Percentage.	Cases.	Percentage.	Contested.	Un-contested.
1	Péshkar	80	0·49	...	...	...	...
84	Amildars	6,537	40·67	7,437	36·82	50·45	25·31
1	Sar-Kházi of Mysore ...	126	0·78	...	...	...	..
...	Assistant Superintendents	143	0·89	...	...	...	...
9	Judicial Assistants ...	3,457	21·51	5,536	27·40	53·50	38·50
8	Deputy Superintendents...	62	0·39	52	0·26	129·35	44·0
3	Superintendents ...	3	0·2	11	0·08	315·0	86·0
2	Judges, Bangalore Small Cause Court... ...	5,665	35·25	7,165	35·47	14·0	13·0
	Total.....	16,073	100	20,201	100	43·97	24·0

134. *Duration of Suits.*—The average duration of original suits, both contested and uncontested, was 28·77 days, against 32·96 days of the previous year.

135. BANGALORE SMALL CAUSE COURT.—*Suits instituted and disposed of.*—The number of suits instituted in the Bangalore Court of Small Causes during the year was 7,189, against 5,761 in the year 1869, and the value of the suits was Rs. 2,44,485 or Rs. 31,358 in excess of the previous year. The number of suits disposed of was 7,165, against 3,665 in the previous year at an average duration of 14 days; 920 of the above cases were disposed of in favor of plaintiffs and in 264 cases judgment was given for defendants, 490 suits were dismissed for default, 167 were withdrawn, 694 were decreed on confession, 1,874 were decreed *exparte*, and 2,756 were compromised.

136. *Income and Expenditure of do.*—The income of the Court derived from commission and fees during the year amounted to Rs. 31,514—8—10, which, after meeting the expenses of establishment, leaves a surplus.

137. *Appeals.*—There has been a decrease in the number of appeals preferred to the various Courts in the year 1870, as compared with the previous year.

138. The total number of appeals preferred in 1869 was 884, against 649 in 1870. Inclusive of 99 appeals pending from 1869, and two received by transfer, there were altogether 750 appeals for disposal; of these 683 were disposed of, and two were transferred, leaving 65 pending at the close of the year.

139. Of the total number disposed of, 33 were dismissed for default, in 394 cases the decrees were confirmed, and in 99 cases modified. In 104 cases the orders were reversed, and 53 cases were remanded.

140. The work of the several appellate Courts and the average duration of appeals in each are shewn below, comparatively, for the two past years :—

Appellate Courts.	Appeals, 1869.	Disposed of, 1870.	Average Duration of each Appeal.	
			1869. Days.	1870. Days.
Assistant Superintendents	96	...	17	0
Deputy Superintendents	280	297	32	47
Superintendents...	153	226	71	62¼
Judicial Commissioner	208	160	34¾	43
Total.....	737	683	39½	51

141. The following table shews the number of appeals preferred to the appellate Courts from each class of subordinate Courts, the ratio of appeals to decisions, the number of decisions affirmed, and ratio of affirmed to decided cases.

Appeals from the original decisions of—	No of appeals preferred.	Ratio of appeals to decisions.	No. of decisions affirmed.	Ratio of affirmed to decided.
Amildars to Deputy Superintendents	260	3·4	146	49·2
Judicial Assistants to Superintendents	226	4·1	150	66·4
Deputy Superintendents to Judicial Commissioner	9	17·3	4	44·4
Superintendents to Judicial Commissioner. ...	7	63·6	4	66·6
Special appeals from the decisions of Deputy Superintendents and Superintendents ... to Judicial Commissioner	147	28·1	90	62·0

142. A comparison with the figures of 1869 shews that a larger proportion of appeal cases were confirmed during the last year than in the previous year. The remanded cases were reduced in number from 70 to 53, while in 1868 the number of cases remanded was 138.

143. *Execution Cases.*—The aggregate value of decrees for which execution was applied for in the year amounted to Rs. 16,28,320.

144. The aggregate value of decrees completely executed was Rs. 4,09,401—12—11, and those partially executed was Rs. 2,80,884—0—6. Of the total amount realized by execution, Rs. 1,32,829—8—1 were recovered by sale of movable property, and Rs. 1,56,965—4—11 by sale of immovable, and Rs. 59,073—14—4 by imprisonment of debtors.

REGISTRATION.

145. The prescribed statistical return is given in Appendix II. B, 12. The total number of documents of all kinds registered in 1870—71 was 8,178, against 7,470 in the previous year.

146. *Statistics of Compulsory and Voluntary Registration.*—Of instruments relating to immovable property of 100 rupees and upwards, the registration of which was compulsory, under Section 17 of the Act, 6,086 were registered, being an increase of 575 over the number registered in 1869-70, and of instruments relative to a similar description of property the registration of which was voluntary, 1,619 were registered, against 1,465 in 1869-70.

147. *Registration of Immovable Property.*—In the compulsory and optional classes of documents affecting immovable property registered in

1870-71, there has been an increase of about 10½ per cent on the whole over the preceding year. The value of the property dealt with is reported to have been Rs. 32,65,531, in relation to which the registration fees levied amount to about 7 As. per cent.

148. *Registration of Movable Property.*—There has been a slight decline since 1869-70 in the number of documents relating purely to movable property, such as money bonds, personal contracts, &c. The value of the property concerned in these instruments is reported to have amounted to Rs. 1,72,935, the fees being at the rate of annas 9 and 2 pies per cent.

149. *Unregistered Documents.*—52 documents were registered on payment of penalty, against 35 in 1869-70. The amount of penalties levied was Rs. 629—8—0.

150. *Specially registered Documents.*—Special registrations under Section 52 declined from 330 in 1869-70 to 259 in the past year ; the decrease is probably due, to some extent, to the provisions of the Court Fees' Act (Schedule III), which cancelled the privilege of presenting on a stamp of one fourth the ordinary value, any plaint relating to claims based on specially registered documents.

151. *Registration of Wills, &c.*—The number of wills registered does not indicate a growing appreciation of the provisions of the Act ; 11 only were registered, the smallest number in any year, and only one cover was opened.

152. *Memoranda of Court Decrees registered under Sections* 41 and 42.—There has been a diminution of memoranda of decrees received under Section 41 ; but a considerable increase in the number of such documents registered under Section 42,—due to greater attention to the subject on the part of the Courts. Under the new Registration Act, (VIII of 1871) which has force in this Province from 1st September 1871, the registration of decrees and orders under both these sections is declared to be optional on the part of the persons claiming under them.

153. *Refusals to register.*—The number of orders of refusal to register was 202 during the past year as compared with 71 in 1869—70. Of the former number, 117 occurred in one District, Hassan, and related to one class of documents, coffee land grants, which had not been presented within the time prescribed.

154. The average of fees levied on each document (excepting memoranda of decrees, wills, &c.,) amounted to Rs. 1—14—3, against Rs. 2—0—4 in 1869—70.

155. The financial results of the year have been unprecedently favorable, the total collections amounted to Rs. 23,008—9—9, and the expenditure to Rs. 17,342—2—6, leaving a surplus of Rs. 5,666—7—3. Of this increase, a sum of Rs. 648 was obtained from the registration of coffee grants which, under the orders issued in August 1870, were required to be registered. The remaining increase is due to the larger number of documents of all kinds registered during the year.

156. The expenditure has also been curtailed by the substitution of fixed establishments in the Registry Offices, for the commission formerly allowed.

C.—PRISONS.

157. *General Remarks.*—There are in the Province 8 jails, and 85 lock-ups, the statistics of which will be found in Appendix II. C, Statements No. 1 to 22.

158. The total number of prisoners incarcerated during the year in the jails and lock-ups was 5,205, being less by 87 than during the previous year, and the daily average number was 1,619 as compared with 1,795 in the previous year, shewing a decrease of 176; but there was an increase of 263 in the number received into jail, which indicates shorter sentences of imprisonment. The releases and removals from the jails, and lock-ups were as follows, leaving 1,614 persons in prison at the close of the year.

	No.
By acquittal on appeal	105
On expiry of sentence	3,002
On payment of fine	375
On account of sickness	4
For good conduct	6
Escaped	2
Transferred to other Jails	38
Executed	20
Died	39
Total....	3,591
Remaining in prison at the close of the year ...	1,614
	5,205

159. *Classes of Prisoners.*—The different classes of persons imprisoned during the past and previous year are shewn in the following comparative table :—

	1869.	1870.
Europeans	17	17
Eurasians	7	5
Native Christians	48	35
Mahomedans	573	626
Hindús	4,087	4,129
Other Classes	560	393
Total... ...	5,292	5,205

122 juvenile offenders were imprisoned as against 130 in the previous year, and 435 females as against 416.

160. *Imprisonment.*—The following is a classification of prisoners according to length and nature of sentence.

	No. of Convicts.
Not exceeding one month	2,534
Above 1 month and not exceeding six ...	828
Between 6 months and one year... ...	290
„ 1 and 3 years	436
„ 3 „ 5 „	389
„ 5 „ 10 „	562
Exceeding ten years	97
Transportation { For life	14
Transportation { For shorter periods ...	29
Sentenced to be executed	26
Total.....	5,205

Of the above, 1,430 were sentenced to simple imprisonment, 3,412 to hard labor, 276 to medium, and 87 to light labor.

161. *Reconvictions.*—The percentage of reconvicted prisoners to total admissions in all the jails is shewn as 5·53, as against 5·8 of the previous year.

162. *Escapes.*—Two convicts only effected their escape from talook lock-ups. Of 33 escaped convicts who remained uncaptured at the end of the year 1869, 2 were recaptured during 1870. Six under-trial prisoners effected their escape from different lock-ups during the year.

163. *Conduct and Discipline.*—There has been a marked improvement in the conduct and discipline of prisoners generally; 232 prisoners only were punished for breaches of jail rules as against 427 during the previous year. The total ratio of punishment per cent of average strength being 23·7 in 1869 as against 14·2 for the past year.

The proportion of prisoners who were punished for smoking, or possessing tobacco, quarrelling, using bad language, &c., is very nearly the same as that of 1869.

164. *Convict Warders.*—In all 95 prisoners were employed during the year as warders, guards and overseers, as against 80 in 1869. The practice of employing prisoners in this manner was restricted to the Bangalore (Central), Shimoga, Mysore and Kolár jails.

165. *Education.*—Of the total number of convicts 82·23 per cent were wholly unable to read or write, 14·85 per cent could read and write a little, and only 2·92 per cent could read and write well. Instruction was given to prisoners in the Bangalore, Mysore and Shimoga jails. In the two former the daily average number under instruction was 583 and 6 respectively. In all 925 prisoners were instructed to some extent in reading and writing.

166. *Expenditure.*—The total expenditure incurred in guarding and maintaining the prisoners in both jails and lock-ups amounted to Rs. 1,58,362, as against Rs, 1,44,769 in 1869, and the total cost per head of average strength amounted to Rs. 97—12—6, as against Rs. 80—10—8. The following is an abstract of the charge :—

Daily Average No. of Prisoners...	In 1870 1·619 In 1869 1·795	Total Cost.			Cost per Prisoner.		
		Rs.	A.	P.	Rs.	A.	P.
Rations		46,660	1	6	28	12	11
Fixed Establishment		49,796	7	10	30	11	11
Extra Establishment		9,345	9	4	5	12	3
Guards, Military or Police		37,288	5	6½	23	0	4
Hospital charges		2,322	5	11	1	6	11
Clothing		5,382	7	0	3	5	5
Contingencies		7,566	9	¾	4	10	9
Gross Cost of Maintenance.....		1,53,361	14	2¼	(Gross cost) 97	12	6
Deduct estimated Value of labor		64,220	8	0			
Net Total Cost of Maintenance		94,141	6	2¼	(Net) 58	2	1

167. *Jail Labor.*—The following statement shews that the estimated amount earned by the prisoners from all sources of industry was Rs. 64,220—8—0, the average per head being Rs. 40—7—0. There is a decrease of Rs. 4—11—0 per head in the average earnings of prisoners as compared with the returns of the previous year. The falling off is attributed by the Judicial Commissioner to the fact that there were 1,430 non-laboring prisoners in the jails last year, as compared with 1,354 in 1869, and also to the circumstance that the daily average number of prisoners was less by 176 than in 1869.

	Rs.	A.	P.
Estimated earnings of those employed as Jail servants	11,802	13	0
In building and repairing Jails	4,992	10	0
In grinding wheat, making clothing, &c.	5,324	4	0
In repairing roads, &c.	16,163	7	0
In Jail gardens	9,751	15	0
On Manufactures	16,185	7	0
Total Rs.	64,220	8	0

168. *Manufactures.*—During the year Rs. 5,327—11—4 were remitted to the treasury as cash profits derived from manufactures. The total cash receipts during the year were Rs. 26,339—3—1. Of outstanding bills due to the jails, the amounts were Rs. 5,434—3—4. The value in stock was Rs. 543—6—7, and in manufactured goods Rs. 4,228—2—7. The average actual cash earnings per head were Rs. 3—6—11.

169. *Diet.*—The average monthly cost of dieting each prisoner in all the jails was Rs. 2—6—5, as against Rs. 2—4—6 in 1869.

170. *Health.*—The ratio of deaths per cent of total jail population was 0·73 only, as against 1·76 in 1869. The general results are shewn in the following comparative table for the two years :—

	1869.	1870.
Admission into hospital during the year.	2,030	1,400
Daily average number of sick ..	64·69	46·291
Deaths	95	39
Ratio of deaths to total number of Jail population	1·76	73·

Fever, as in the previous year, was the prevailing disease. Notwithstanding that cholera made its appearance in the districts, no

single case of cholera occurred in any of the jails during the year. Out of 3,690 convicts discharged from all the jails in the past year, 3,296 gained, and 394 only lost weight.

171. *Civil Prisoners.*—The number of civil prisoners confined during the year was 240, against 140 in 1869. The average cost of each civil prisoner was Rs. 47—11—3.

172. *Prisoners under Trial.*—There were 9,559 persons in confinement under trial during the year, against 10,855 in 1869, the cost per head of average strength being Rs. 130—9—2, against Rs. 99—11—9 of the preceding year.

173. *Bangalore Central Jail.*—The report of the Superintendent of this jail, Dr. Henderson, which has hitherto been published as an appendix to the Administration Report of the Province, will hereafter be printed separately with the Departmental Reports.

D.—POLICE.

174. *General Remarks.*—The forms of returns prescribed by the Statistical Committee have been adopted for the Bangalore District only, in which the Police have been organized on the system which prevails in the Madras Presidency; the returns for the remaining districts in the Province have been drawn up according to the old forms.

175. In the Bangalore Cantonment and Town, the Police were organized and placed upon a footing somewhat similar to the Madras Mofussil Police, in the middle of May 1868; and the scheme was extended to the whole of the Bangalore District in April 1869.

176. In the other districts of the Province, the Police force is composed of the old established Kandáchár peons, who are placed under the direct control of the Amildars of talooks as heads of Police.

177. *The Strength, &c., of the Bangalore Police.*—The strength and cost of the regular Police of the Bangalore District is shewn in the following table.

Regular Police, Cost defrayed by the Mysore Revenue	Bangalore Cantonment Police	Superintendent of Police		1
		Assistant Superintendent of Police		1
		Inspectors		3
		European Chief Constables		10
		Native Head do.		7
		Sergeants		25
		Constables		208
	Bangalore District Police	Killédars		15
		Hóblidars		25
		Daffédars		80
		Peons		490
			Total	865
Municipal Police, (Cost defrayed from Municipal Funds)	Bangalore Town Police.	Inspector		1
		European Constable		1
		Native Head do.		4
		„ Sergeants		16
		Constables		124
			Total	146

Total Cost Rs. 1,14,684.

Total Cost Rs. 15,792.

178. *Cost of Police.*—The total cost on account of salaries for the above, amounts to Rs. 1,30,476, in addition to which the sum of Rs. 24,590 has been put down as the cost for office establishment, clothing, contingencies, and cost of construction, and repairs of Police buildings; thus making a Budget provision of Rs. 1,55,066 for the year 1870—71. Of this sum, the actual expenditure under all heads for the whole year amounted to Rs. 1,41,604 leaving a net saving from the Budget grant of Rs. 13,462.

179. *Cost to Population.*—In the Bangalore District, with a population estimated at 527,207 persons, and a Police strength of 614 officers, the proportion of Police to area is stated as 1 to 4·16 square miles, and the ratio of Police to population 1 to 858 persons. The above computation excludes the returns for the Bangalore Cantonment and Town. In the Bangalore Cantonment, with a population of 79,301, the proportion of Police to area and population is 12 police-men to 1 square mile, and 1 police-man to 329 persons respectively.

180. In the Bangalore Town or "Pété," with a population of 52,895 persons, the proportion of police to area and population is 22 police-men to 1 square mile, and 1 police-man to 398 persons respectively.

181. The cost of the Bangalore Police, inclusive of the Police entertained in the Town and Cantonment, is estimated at Rs. 0—3—9 per head of population. But taking the actual amount of expenditure during the year, *viz.*, Rs. 1,41,604 the cost per head of population is three annas and five pies.

182. *Working of the Police.*—The working of the Police in the Bangalore District during the year is exhibited in the following table:—

Description of Crime.	Cases.			Number apprehended.	Persons.					Persons Convicted.	
	Number of offences.	Brought to trial.			Discharged.		Acquitted.		Total discharged or committed.		
		No.	Per cent.		No.	Per cent.	No.	Per cent.		No.	Per cent.
Class I.											
Offences against the State..	24	12	50	35	7	20	9	25 71	16	19	54·28

Total.....	3,377	2306	68·28	3,376	265	7·85	125	3·70	390	2,893	85·69

183. *Police of the Kolár and Toomkoor Districts of the Nandidroog Division.*—The strength and cost of the Police at the close of the year in the Kolár and Toomkoor Districts, and the proportion of Police to area and population inclusive of the village Police is shewn below:—

	Strength	Cost. Rs.	As.	P.
Kolár	979	51,629	3	9
Toomkoor	778	38,368	11	11
Total.....	1,757	89,997	15	8

	Kolár.	Toomkoor.
Area in square miles ...	2,281	2,766
Population	479,243	491,599
Strength of Police ...	979	778
Proportion of Police to area	2·3	3·5
Proportion to population	489	632

184. The general results of the action taken by the Police in the above two districts for the past two years is shewn in the following comparative table :—

CLASS OF CRIME.	1869. Persons arrested without warrant.						1870. Persons arrested without warrant.					
	No. of persons arrested.	Released without trial.	Acquitted, including released on appeal or at Session.	Ordered to find security.	Finally convicted.	Percentage of convicted to total No. of persons arrested.	No. of persons arrested.	Released without trial.	Acquitted including released on appeal or at Session.	Ordered to find security.	Finally convicted.	Percentage of convicted to number of persons arrested.
Class I... Offences against the State, the public and justice. ...	21	4	8	...	9	42·9	73	5	58	...	10	13·7
Class II... Offences against the person	513	212	196	...	115	22·4	315	116	132	...	67	21·27
Class III... Offences against property ...	1,834	351	1,094	2	387	21·1	1,563	106	1,037	...	420	26·87
Class IV... Offences not included in the above, and breaches of special laws ...	373	4	26	...	35	9·4	139	4	88	1	46	33·1
Total.....	2,741	571	1,324	2	546	19·88	2,090	231	1,315	1	543	25·9

185. *Ashtagram Division Police.*—The strength of the Police in the Ashtagram Division at the end of the year was 2,187, and was distributed as follows :—

	No. of Officers.	No. of Men.	Total.
Mysore Town ...	7	300	307
Mysore District ...	14	1,137	1,151
Hassan District ...	10	719	729
Total.....	31	2,156	2,187

186. The total cost of the whole force including the Town and Talook Police, exclusive of the Village Police, amounted to Rs 1,42,042—8—9. Of this sum, Rs. 22,021—8—9 were defrayed from Municipal funds, and Rs. 1,20,021 from the Mysore revenues.

187. The result of the working of the Police in cognizable cases during the past two years is shewn in the following comparative table :—

Class of Crime.	1869. Persons arrested without warrant.						1870. Persons arrested without warrant.					
	No. of persons arrested.	Released without trial.	Acquitted, including released on appeal or at Session.	Ordered to find security.	Finally convicted.	Percentage of convicted to total No. of persons arrested.	No. of persons arrested.	Released without trial.	Acquitted, including released on appeal or at Session.	Ordered to find security.	Finally convicted.	Percentage of convicted to total No. of persons arrested.
Class I... Offences against the State, the public and justice ...	23	14	7	...	2	8·7	17	7	9	...	1	5·9
Class II... Offences against the person	272	128	94	...	50	18·4	407	87	275	6	39	9·58

Total.....	1,881	887	685	1	308	16·3	1,709	556	901	38	214	12·5

188. *Nagar Division Police.*—The total strength of the Police of all ranks in the Division was 2,096, exclusive of 2,600 Village Police.

189. *Cost of Police.*—The cost of the regular Police for the year was Rs. 1,32,883—10—7 ; of which Rs 1,30,397—3—1 were charged to the imperial, and Rs. 2,486—7—6 to the Local or Municipal Funds. The cost of the Village Police is shewn to be Rs. 33,781—8—7. The men of the regular and Village Police were distributed as follows in the three districts of this Division :—

	Regular Police.	Cost. Rs.	A.	P.	Village Police.	Cost. Rs.	A.	P.
Shimoga District ...	844	51,339	9	3	1,512	32,449	7	6
Kadoor District ...	552	37,384	1	4	1,088	1,332	1	1
Chituldroog District...	700	44,160	0	0	Not shewn.			

190. The results of the action of the Police in cognizable cases is shewn in the following comparative table for the past two years :—

CLASS OF CRIME.	1869. Persons arrested without warrant.						1870. Persons arrested without warrant.					
	Number of persons arrested.	Released without trial.	Acquitted including released on appeal or at Session.	Ordered to find security.	Finally convicted.	Percentage of convictions to number of persons arrested.	Number of persons arrested.	Released without trial.	Acquitted including released on appeal or at Session.	Ordered to find security. E.—MILITARY.

191. *Local Military Force.*—The Local Force is composed of six regiments of Sillédar Horse, and four regiments of Infantry or "Bár." These regiments are commanded by Native Officers termed "Regimentdars" in the Cavalry, and "Commandants" in the Infantry. The whole force is under the control of the Military Assistant to the Chief Commissioner, whose head quarters are at Bangalore.

192. The Mysore Horse consisted formerly of 7 regiments. The number was reduced in June 1867 to six, the immediate object of the reduction being to provide the means of increasing the pay of the men. The average strength of each regiment is 349 Non-Commissioned Officers and men, while there are 8 Native Officers to each.

193. The Mysore Horse numbers in all at present 48 Officers, and 2,098 Non-Commissioned Officers and men.

194. The pay of a trooper in the Mysore Horse, which was fixed at Rs. 20, has been raised successively to Rs. 22 in 1864, and to Rs. 26 in 1867.

195. The strength of the "Bár" or Infantry consists of 92 Native Officers, 281 Non-Commissioned Officers and 2,070 men, distributed over four regiments, the average strength in rank and file of each being 517.

196. The pay of a first class sepoy was in 1863 raised from Rs. 6—8—0 to Rs. 7, and in 1868 to Rs. 8 per mensem, and that of a second class sepoy from Rs. 5—8—0 to Rs. 6 in 1863, and to Rs. 7 in 1868. These increases extended to Havildars, whose pay for the two grades of that rank has been raised from Rs. 9 and Rs. 8 to Rs. 11 and Rs. 10 respectively.

197. *Cost of Force.*—The cost of the Cavalry for the past year including contingencies amounted to Rs. 8,17,968—7—0, and that of the Infantry to Rs. 2,93,160—15—5, making a total of Rs. 11,11,129—6—5 for the whole force.

198. *Establishment of Horses.*—The Cavalry horses on the 1st April 1871 numbered 2,146, of which 1,186 were horses, and 960 were mares.

An establishment of 41 stallions for breeding purposes in connection with the Sillédar Force has been kept up for some years. The number is considered in excess of that required for the object in view, and it at present consists of 27 horses of the several classes shewn in the *margin. The results of the arrangements in connection with this establishment are not considered to be very successful or satisfactory ; but it is hoped that the measures now in progress may place this important Department on a better footing in this respect.

* 2 English.
2 Cape.
3 Australian.
20 Arab.

199. *Arms.*—All the Mysore Horse are now armed with lances.

Remount Fund.—The Remount or "Chanda" Fund to which every individual of the Mysore Horse contributes 1½ Rs. monthly from his pay, in consideration of receiving Rs. 200 from the fund towards the purchase of a remount, is working well, and the men highly appreciate the benefits of the institution.

200 *Stables and Lines.*—The Local Force has as yet been only partially supplied with stables and lines, and the question of the completion of the accommodation under both heads is now under report to the Government of India.

PART III.

PRODUCTION AND DISTRIBUTION.

A.—FINANCE.

201. *Revenue and Expenditure.*—The detailed statements prescribed under these heads will be found in Appendix **III.** A, 1—3.

202. The financial results of the year 1870-71 exhibit an estimated surplus of income over expenditure amounting to Rs. 3,96,382.

£ 39,638.

203. *Receipts.*—The total receipts realized and brought to account within the year amounted to Rs. 91,97,042; of this sum, Rs. 14,65,446 should be deducted as comprising a portion of the land revenue and † mohatarfa for 1869-70 which were collected in 1870-71 under the orders referred to in para 208 of this report. The amount realized therefore from the demand for 1870-71 was Rs. 77,31,596. If to this latter sum be added the instalments of land revenue and mohatarfa assessments, the collection of which under the operation of the orders above quoted were not made till after the expiry of the official year 1870-71, *viz.*, Rs. 28,79,786, the income of the year may be taken at Rs. 1,06,11,382.

†For details of mohatarfa see para 211 of this Report.

204. *Expenditure.*—The expenditure of the year amounted to Rs. 1,02,15,000.

205. The surplus of the year is thus found to amount to Rs. 3,96,382; but as the amount of the postponed collections, *viz.*, Rs. 28,79,786 may not be fully realized, this estimate of surplus may undergo some modification.

206. *Abstract of Receipts.*—The following is an abstract of the receipts realized in 1870-71 under all the heads of revenue, as compared with the Budget estimates of the year.

Items.	1870—71.	Estimate.
Land Revenue including minor forest produce	60,07,315	75,47,100
Sáyer or customs on betel-nut and other dutiable articles	7,50,502	7,41,850
Forests	3,37,669	3,77,250
Abkári or excise on spirits, toddy, & gánja, &c.	10,14,103	9,58,100
Mohatarfa or assessed taxes on houses, shops, &c.	2,75,687	3,48,400
Salt	10,720	13,950
Stamps—receipts under General Stamp Act	2,92,976	4,09,550
Mint	13,761	...
Post Office, (Local Anché)	41,720	41,320
Law and Justice, (Courts)	2,08,639	53,550
	13,518	16,190
	23,403	22,000
Police contributions from Municipalities	17,458	21,200
Fines and forfeitures	1,180	2,990
Education, schooling fees	10,359	8,000
„ Sale of Books	15,563	18,000
„ Education Cess	12,369	...
Interest	426	...
Miscellaneous	82,004	66,150
Local Force	2,073	10,000
Public Works	65,597	44,000
Total Rs.....	91,97,042	10,70,000

207. With reference to the above statement the following points may be noticed.

208. *Land Revenue.*—The great discrepancy between the estimate and the income under this head, is accounted for by the postponement of the period of collecting the land revenue and mohatarfa assessments as previously noticed, the estimates having been framed prior to the promulgation of the orders issued in January 1870.

209. *Sáyer Customs.*—The realizations exceeded the estimates by Rs. 8,652 as well as the actuals for 1869-70, as the result of the circular orders issued in March and December 1870 prescribing more definite rules for the enforcement of the excise duty on betel-nut and tobacco.

210. *Abkári.*—The receipts aggregated Rs. 10,14,102, the highest amount yet obtained, exceeding the estimates by Rs. 56,002, and the actuals of the previous year by Rs. 34,264.

211. *Assessed Taxes, (Mohatarfa.)*—The deficiency in the estimates under this head were due to the assignment of the mohatarfa revenue, amounting in all to Rs. 17,500, to the Municipalities of the Towns of Mysore and Shimoga, to meet the cost of the Town Police.

212. *Stamps.*—The realizations credited under this head were from the sale of stamp paper and labels under the General Stamp Act, while the estimate, *viz.*, Rs. 4,09,550 provided for receipts from both judicial and general stamps.

The receipts from Court Fees' stamps, *viz.*, Rs. 1,41,571, have been credited however to law and justice. Though the gross stamp revenue has increased, the effect of the new Acts which have come into operation, *viz.*, the General Stamp Act from January 1870, and the Court Fees' Act from June 1870, has been to diminish the rates of increase, which was 24 per cent in 1868—69, 12 per cent in 1869—70, and barely 3 per cent in 1870—71.

213. *Mint.*—The receipts under this head were from the sale of obsolete Mysore copper coins, which were mutilated and sold as old copper.

214. *Anché.*—The collections exceeded the estimate by Rs. 400, notwithstanding the reduction in the rate of postage from April 1869.

215. *Law and Justice.*—The receipts largely exceeded the estimates for reasons explained in para 212 above.

216. *Registration.*—The income of the Registration Department from fees and penalties has progressively increased from Rs. 10,583 in 1866—67, to Rs. 23,402 in 1870—71.

217. *Education.*—The school fees shew Rs. 4,168 in the High School, against Rs. 3,213 in the previous year; a result which is due to the enhancement of the rates.

The sale proceeds of school books is equivalent to their cost to Government.

The education cess forms a new source of revenue to the Educational Department, and is derived from the local fund cess, of which one per cent is appropriated for educational purposes. The amount, *viz.*, Rs. 12,369, credited in 1870-71 includes accumulated cess from 1868-69.

218. *Interest.*—To this head has been credited the interest realized on Government of India securities belonging to the Mysore Government Savings' Bank.

219. *Miscellaneous*.—The aggregate amount of miscellaneous receipts is Rs. 82,004, against an estimate of Rs. 66,150. The following are some of the items comprised under this head:—

	Rs.
Revenue of the Island of Seringapatam	24,969
Miscellaneous fines, refunds, &c.	24,283
Fees on Money Orders	5,725
Subscriptions to the Mysore Gazette	2,336
Fees for occupation of staging Bungalows	5,223

220. *Expenditure*.—The total expenditure of the year was Rs. 1,02,14,955, as against the provision of Rs. 1,06,35,032 in the Budget estimate, and an actual expenditure of Rs. 1,07,52,749 in 1869—70.

221. The following is an abstract of the expenditure 1870—71, compared with that of 1869—70 and with the estimate.

Items.	1869—70.	1870—71.	
	Actuals.	Estimates.	Actuals.
2. Interest	...	...	337
3. Refunds	40,925	24,400	26,612
4. *Land Revenue*—

23. Stationery and Printing	6,222	68,922	65,888
25. Allowances and Assignments under Treaties, &c. ...	25,70,908	25,71,503	25,70,032
26. Miscellaneous	93,015	73,891	79,670
27. Superannuation and compassionate Grants	1,52,533	1,08,294	1,13,738
28. A. Local Force	11,23,636	11,09,387	10,96,516
B. Public Works Department	17,77,629	15,00,146	15,05,573
Total Disbursements.....	1,07,52,749	1,06,35,032	1,02,14,955

222. The principal items in the above statement may be shortly noticed.

223. *Land Revenue.*—The total grant under this head for the ordinary revenue establishments of Superintendents, Deputy Superintendents, and Assistant Superintendents, and other offices estimated on the sanctioned scale, was Rs. 6,66,905, and the expenditure was Rs. 6,54,132. In the year 1869-70 it was Rs. 6,87,069.

The fluctuations under this head are mainly owing to the Europe furlough allowances of officers drawn from the Secretary of State, which are adjusted whenever intimation of the payments made are received from the Financial Secretary or the Accountant General of Madras.

224. In talook establishments there was a net excess of charge over grant of Rs. 16,471, owing to certain contemplated reductions not having been fully carried into effect. Contrasted with 1869-70 the charges of talook establishments were less by Rs. 42,000.

225. In the Inám Commission there was a net saving on grant of Rs. 1,000 ; but the grant for salaries was exceeded by Rs. 5,016 on account of the acting allowance paid during the absence of the permanent incumbent on privilege leave, and also owing to the promotion of two Assistants.

226. In the Revenue Survey Department the grant was Rs. 2,25,000, and the actual outlay Rs. 2,17,368, which was Rs. 17,574 more than in 1869-70, owing to the increase of establishments consequent on the extension of operations.

227. In the Forest Conservancy Department there was a saving on the total grant of Rs. 14,258. The expenditure on conservancy and working was Rs. 81,135, against Rs. 44,252 in 1869-70, and the establishment and contingent charges were Rs. 65,907, against Rs. 59,998 in the previous year. The increase is due to the extension of operations and improved supervision.

228. *Miscellaneous.*—Total outlay Rs. 79,670, against Rs. 92,496 in 1869-70, which included Rs. 20,317 disbursed on account of a debt of the late Mahárája. The actual increase of Rs. 7,491 is explained by the following comparison :—

	1870—71.	1869—70.
Japan silk-worms	14,000	934
Bangalore Rifle Volunteers	9,536	6,753
Colonel Boddam on Special Duty	2,534	...
Repairs of Harihara Bridge	2,293	2,676
Rewards for destruction of wild animals	6,124	8,473
Books, Maps, and Advertisements	5,027	6,228
Purchase and repair of Tents	3,510	7,025
Planting Avenues	3,916	6,747
Fuel Plantation at Mysore	...	1,268
	46,940	
Difference in minor items	655	
	47,595	40,104

229. *Superannuation and Retired Allowance.*—The disbursements on account of pensions was Rs. 74,722, against a grant of Rs. 68,843 and an expenditure in 1869-70 of Rs. 68,555. The number of pensions sanctioned in the year was 98, amounting to Rs. 1,274—12—0 per mensem. The losses were 21 in number, involving a saving of Rs. 573—13—0 per mensem.

Gratuities to discharged servants amounted to Rs. 14,146, against a grant of Rs. 10,000. They amounted in 1869-70 to Rs. 37,919.

230. The total disbursements on this head were Rs. 1,13,738, against a grant of Rs. 1,08,294 and an expenditure of Rs. 1,32,563 in 1869-70.

231. *Mysore Local Force.*—The total charge was Rs. 10,96,546, against Rs. 11,19,564 in 1869-70, when the outlay on barracks and stables (now debited to the Public Works Budget) was Rs. 25,643.

232. *Mysore Invested Surplus Fund.*—The balance at the opening of the year was Rs. 27,50,748; of which Rs. 23,23,300 was in Government securities of the 4 per cent loan, and Rs. 2,00,000 on 5 per cent debentures. The interest accruing during the year and duly credited was Rs. 1,02,932.

233. The preliminary expenses of surveying lines for a projected railway, amounting to Rs. 53,922—8—0, were charged to this account under the sanction of the Government of India, leaving a balance of Rs. 27,99,811—8—3.

234. *Cash Balance.*—The cash balances were on 31st March 1870 .. .. 55,75,216-15-1½

	Total.....	58,487	2,07,117	2,08,927	56,677

237. The following statement exhibits the condition of the *local funds of the several districts.

*District Funds.

	Balance, 1st April 1870.	Receipts, 1870—71.	Expenditure, 1870—71.	Balance, 31st March 1871.
Bangalore District	13,707	11,938	16,805	8,841
Kolár „	13,070	9,710	11,379	11,401
Toomkoor „	17,049	9,999	8,731	18,317
Shimoga „	2683	33,308	25,533	1,458
Kadoor „	1,173	8,225	9,641	243 minus.
Chituldroog „	3,408	31,667	31,154	3,921
Mysore „	34,479	25,898	28,421	1,955
Hassan „	46,420	24,779	31,548	39,651
Total.....	1,31,989	1,55,524	1,63,212	1,24,301

238. In addition to the sums above shewn as credited to district funds and which are chiefly derived from a tax on ploughs (for which a uniform cess of half an anna in the rupee has since been substituted), a cess of one anna in the rupee on all occupied lands is levied for general local purposes in those talooks which have come under the operations of the survey settlement, and a further anna in the rupee is imposed on wet or irrigated lands for the purpose of meeting the outlay on current repairs and maintenance of tanks. Inám lands are subject to this cess in common with sarkár lands.

239. The one anna cess for local purposes yielded during the year Rs. 35,121 which, added to the balance at the close of the previous year, made the aggregate amount of Rs. 77,308. The expenditure was Rs. 42,058.

240. The unappropriated balance at credit of the cess fund on the 31st March 1871 was distributed among the undermentioned districts as follows :—

			Rs.
Nandidroog Division,	Toomkoor District	...	2,472
Nagar do	Shimoga „	...	6,227
	Kadoor „	...	284
	Chituldroog „	...	26,266
	Total.....		35,249 (fractions omitted.)

241. The one anna tank fund cess yielded an income of Rs. 5,824 during the year, with the balance of the previous year, *viz.*, Rs. 5,086; the whole amount at credit is Rs. 10,910, no portion having been as yet appropriated.

B.—PUBLIC WORKS.

242. *Staff.*—The Engineering Staff of the Public Works Department in the Province, exclusive of the Irrigation, Railway, and Forest branches, consisted of 1 Chief Engineer and Secretary in the Public Works Department, 11 Executive Engineers, of whom one acts as Assistant to the Chief Engineer, and 7 Assistant Engineers.

243. In the Irrigation Department, the Staff comprised 1 Superintending Engineer and Under-Secretary in this branch, 3 Executive Engineers and 5 Assistant Engineers.

244. The Forest Department consisted of 1 Conservator, 1 Deputy Conservator, 2 Assistant Conservators and 2 Sub-Assistant Conservators, the staff having been increased by 1 Assistant Conservator during the year.

245. *Expenditure.*—The following table exhibits the outlay incurred on all public works during the year under review, exclusive of the cost of the railway survey.

	General Revenue.	Local Fund.	Total.
Military Works	7,502	...	7,502
Civil Buildings	1,18,908	...	1,18,908
Irrigation Works	2,98,817	...	2,98,817
Communications	5,32,056	1,39,782	6,71,838
Miscellaneous Public Improvements	5,028	72,341	77,369
Forests	81,061	...	81,061
Total.....	10,43,372	2,12,123	12,55,495

246. In appendices full details are given of this expenditure, and the principal works of each class will now be shortly alluded to.

247. MILITARY WORKS.—The Cantonments of Bangalore and French Rocks not being subject to the Local Administration, the works providing for the accommodation of Her Majesty's troops at those stations need not be referred to here. The Mysore Administration has only to deal with the Local Force—known as the Mysore State Sawár and Bár establishments. For the troops quartered at Shimoga, huts and stables were commenced during the year, and at other stations a few works of minor importance were executed.

248. CIVIL BUILDINGS.—Four new talook cutcherries were built during the year.

249. *Post Office.*—Several small anché (local post) houses were constructed in the outlying districts.

250. *General.*—A civil hospital and dispensary was commenced at Hassan, and made fair progress. The buildings in the Bangalore fort formerly used as the Commissioner's Cutcherry, being in a dilapidated and unsafe condition, were dismantled, and the materials sold by public auction.

251. *Ecclesiastical.*—Enclosure walls have been erected round the Protestant Burial Ground at Shimoga, and the Roman Catholic Cemetery at Chikkamagalúru.

252. *Educational.*—Two new school houses have been built during the year at Srínivásapura and Yelahanka. The old ones at Kolár and Hassan have been enlarged.

253. *Judicial.*—The new jail at Shimoga has been nearly completed. A compound wall and dressers' quarters have been added to the jail at Mysore, and several new Police stations and choultries have been built.

254. IRRIGATION WORKS.—The Srírámadévara anicut has been finished, and has stood satisfactorily the test of an exceptionally high flood. The sanctioned improvements to its channels have also progressed fairly.

255. In the Hagari Division, the Bégúr, Nayáken, and Yakavahalli tanks have been restored, and the Kumbár Mardagere and Súlikere channel works have been pushed on vigorously; whilst the surveys in connection with the great Mári Kanavé project have been completed.

256. In the Kávéri Division the Márchalli anicut was satisfactorily completed, and a variety of minor works not calling for special notice were carried out on the Kávéri channels.

257. An important change was made during the year in connection with the river channels by their transfer from the Revenue Officers, who were formerly responsible for their maintenance, to the officers of the Public Works Department, and a partial re-organization of the establishment in charge thereof. This change, by which eventual material improvement in the condition of these important works is anticipated, has, in this respect, so far worked satisfactorily, though not altogether so to the ryots, who have shewn much discontent at the greater stringency of the arrangements under the new system.

258. The repair of the vast net work of tanks which extends over the Province occupied much of the time and attention of the establishment during the year, and a scheme providing for their future maintenance and for raising them all gradually to a fixed standard of safety was submitted to Government.

259. COMMUNICATIONS.—The roads in Mysore may be divided into two general classes; (1) those made and maintained from the general revenue, and known as imperial roads, comprising both metalled and unmetalled lines; and (2) those made and repaired from local funds, and designated "Plough Tax" roads. The former are solely in charge of Public Works Officers. They are the main or through lines of the Province, or the more important of the links between the various chief towns. The latter consist of the several country roads used for local traffic. They are worked by the Revenue authorities, with the assistance of Public Works Officers, wherever difficulties occur calling for special engineering knowledge.

260. *Imperial Roads.*—The most important new works of this class in hand during the year were the new road from Atchilbetta to Mallavalli, which will complete the connection between Bangalore and Mysore, *viâ* the Kánakánahalli valley, and the line from Gundlupété to Sultan's battery connecting the southern districts with the Wynád. Both of these made satisfactory progress.

261. A commencement was made during the year on the system of roads which it is proposed to carry out in the Nagar Division which, from want of proper roads, is at present cut off from communication with the surrounding districts. Several experimental traces were opened out, and ground was broken on the new Hyderghar Ghát, which will afford a much needed outlet into the low country of Canara.

262. Of works of less importance the improvement of the Nelamangala-Kunigallu road, and the continuation of the metalling of the Bangalore-Bellary road, need alone be noticed. The progress on these was not altogether satisfactory.

263. *District or Plough Tax Roads.*—Fair progress has been made in all the districts in opening out new lines, and in the extension or improvement of old ones.

264. In the Nandidroog Division four new roads of this class have been completed, *viz.*, from Jangamkóté to Hosakóté, from Śrínivásapura to Thádgóli, from Kunigallu to Huliyúrdurga, and from Gubbi to Hebbúru; whilst several minor works for cross drainage have been carried out on the old lines.

265. In the Ashtagram Division the Sargúru-Bégúru road has been completed, and satisfactory progress has been made in opening out lines from Chunchinkatté to Rámnáthpura, from Hassan to Háranahalli and from Attikuppa to Nágamangala. On the construction of those lying in the talooks of the Hassan District, the ryots have been induced by the influence of the District Officer to contribute their labor free, so that the cost of the masonry works only has fallen on the Government.

266. In the Nagar Division the Honnáli-Kumsi and Ságara-Śirálkoppa new roads have been pushed forward, and Hosadurga-Adjampura, with improvements to the Hosadurga-Huliyára roads, have been completed.

267. The condition of all the communications throughout the Province is on the whole very satisfactory. During the year under report the minor lines have been maintained in fair trafficable order, and the main ones have been kept fully up to first class standard.

268. *Arboriculture.*—Attention has been given to the planting of trees along all the lines, and fair progress in this respect can be reported.

269. *Bridges.*—The Sakaléspura bridge at the head of the Manjarábád Ghát, across the Hémávati river, was opened for traffic in May, and the remaining months of the year were employed in bringing the approaches up to form. The parapets of the great Harihara bridge were carried up nearly to completion, leaving only a few finishing touches to be given to the fine structure. Several small bridges were built on the road from Maddúru to the falls of the Kávéri, and on that between Kadoor and Chikkamagalúru.

270. *River Improvements.*—The rivers of Mysore are not navigable and the canals are not used for traffic. No works of this kind were therefore necessary.

271. *Accommodation for Travellers.*—No new works for this purpose were undertaken during the year, excellent accommodation being already available along nearly all the chief roads. For the first time in this Province fees were levied on travellers occupying the staging bungalows, to the improvement of which the funds thus realized will be appropriated.

272. MISCELLANEOUS PUBLIC IMPROVEMENTS.—At Bangalore, Mysore, Hassan, and Shimoga, many useful works were carried out from municipal funds in connection with the drainage, opening out of streets, formation of reservoirs, &c., and steps were taken to improve the sanitary condition of many of the district towns.

FORESTS.

273. The State forests in Mysore, which are under the direct control of the Forest Department, and consist of the most valuable timber, cover an area of 428 square miles. The extent of the "District forests," which contain less valuable wood and are worked by the local Revenue Officers with the occasional assistance of the Officers of the Forest Department, has not yet been accurately ascertained. A scheme has been prepared for the better management of these, by placing them under the direct supervision of the Forest establishment.

274. In addition to the above change, the formation of railway fuel plantations has been entrusted to the Department, and during the

year 4,270 acres of land have been taken up for this purpose ; of which 3,000 acres have been enclosed by ditches, and 1,520 acres prepared for planting.

275. The custody, collection and sale of sandalwood is an important part of the duties of the Department, the realization therefrom forming a large item of revenue. In view to the better preservation and more extended cultivation of this valuable product, a commencement has been made in the formation of sandal reserves, 500 acres of land having been enclosed for the purpose, and 700 acres selected for future operations.

276. An attempt was made to grow the blue gum (*Eucalyptus globulus*), but was unsuccessful, owing to a large quantity of the seed having lost its vitality, before its arrival in India. The experiment will, however, be continued. The planting up of new plantations of teak and other woods have also occupied the attention of Forest Officers during the year.

277. The question of the supply of wood for domestic use to Bangalore and other large towns, and its enhanced price, having been brought to notice, regulations have been introduced to check the indiscriminate felling and consequent gradual destruction of the jungles from which firewood is drawn.

278. The following table shews in detail the operations, income and outlay of the year under review : —

HEADS.	Direction.	Nagar Range.	Ashtagram Range.	Nandidroog Range.	Total	REMARKS.
1. Felled. Timber ...		2,603 logs.	1,381 logs.	...	3,934 logs.	
Sandalwood, Tons ...		384¼	378¾	117¾	880¼	
2. Brought to Depôts. Timber ...		59,044 c. f.	40,657 c. f.	...	99,701	
Sandalwood, Tons ...		384¼	378¾	117¾	880¼	
3. Sold. Timber ...		63,083 c. f.	19,956 c. f.	...	83,039	
Sandalwood, Tons ...		319½	363¾	108⅛	792⅛	
4. Average per cubic foot. Timber ...		0-3-5	0-6-11½	...	...	
Sandalwood, Tons ..		44-4 8	43-8-0	38-15 0	48-3-11	
5. Amount of sales under Head I ...		1,44,425	1,26,412	35,915	3,06,754	
6. Outstandings at end of year		2	3,341	508	3,851	
7. Estimated value of timber in depôt at end of year		81,558	1,35,445	11,370	2,28,371	
8. Estimated value of receipts in depôt during year		125,636	1,88,843	37,680	3,52,159	
9. Total expenditure for the year ...	15,794	53,734	52,085	23,829	1,45,442	
10. Acres planted with teak and other timber		17	100	6	123

12. Acres sown with Sandalwood ...		118*	250	...	368	

*Resown.

C.—RAILWAYS.

279. The subject of the extension of the Railway system to this Province having been taken up by the Government of India, an establishment was organized for the purpose of carrying out the necessary preliminary investigations, and surveys were made of the most promising lines radiating from Bangalore to the chief outlying centres of commerce. After careful deliberation, a system of light railways to connect Bangalore, Toomkoor, Tipátúru, Hassan and Mysore, was determined on as the most suitable, to meet the requirements of the country, and the Government of India, in March 1870, ordered the preparation of a project for that link of the chain which will connect Bangalore directly with Mysore—the Native Capital. From this branch the most favorable results are anticipated, and the staff has been since engaged in collecting data and in framing the necessary estimates. The expenditure incurred amounted to Rs. 53,698.

D.—AGRICULTURAL.

280. Particulars regarding crop and stock are given in Appendices III. D, 1 and 2.

281. The proportionate area cultivated with the various crops during the year was as follows:—

Rági	53·50	per cent.
Rice	25·	„
Coffee	2·14	„
Arecanut	·90	„
Cotton	·75	„
Sugar	·48	„
Tobacco	·49	„
Mulberry	·31	„
Vegetables...	1·10	„
Oil-seeds	2·63	„
Wheat	·13	„
Gram, Baller, and other grains ...	12·57	„

282. *Cereals.*—Rági is the principal grain consumed by the masses in this Province, and is grown throughout the country.

283. Rice cultivation prevails very generally over the whole Province in the Malnád or western talooks of the Nagar Division. Where the south-west monsoon rains are abundant, paddy is grown almost exclusively.

284. *Coffee.*—Coffee is grown chiefly in the western talooks of the Nagar Division, and of the Hassan District of the Ashtagram Division.

285. *Nagar Division.*—In the Nagar Division the revenue derived from this source was Rs. 38,910—8—11, or Rs. 640—2—0 over that realized in the previous year; the season for this crop appears to have been good owing to the fall of periodical rains.

286. The quantity of crops exported by Europeans was 1,182 kandís, 11 maunds, 11 seers, the duty on which was Rs. 5,912—13—5; the crops exported by native planters was 6,616 maunds, 10 seers, 16 tolas, or six times larger than the former, the duty on this being Rs. 33,167—9—6.

287. The total number of coffee gardens was 8,693, of which, 106 belonged to Europeans, and 8,587 to natives scattered over 55,237 acres and containing 63,389,230 trees.

288. There are 22 European and 4,760 native planters in the Division.

289. *Ashtagram Division.*—In the Hassan District of the Ashtagram Division the coffee estates are reported to be gradually recovering from the injury caused by successive years of drought and scarcity.

290. The excise duty or hálat of 4 annas per *maund was levied on 1,520 tons and 7 cwt of coffee during the year; of which 333 tons, 6 cwt were grown by Europeans, and 1,187 tons, 1 cwt, by natives, shewing an increase over the previous year of 51 tons, 1 cwt, in the outturn of European estates, and 36 tons, 14 cwt in that of native estates. The extent of land at present cultivated with coffee, in this district, is roughly estimated at 42,310 acres, and Europeans (about 32 in number) hold nearly half of this. They only, however, contributed Rs. 6,666—3—8 in *hálat* to Government, against Rs. 23,741—0—6 paid by natives.

*28 lbs.

291. *Cinchona.*—This plant has been experimentally cultivated for some years past on the Bábábuden Hills in the Nagar Division, and on the Biligiriraṅgam Hills in the Ashtagram Division.

292. On a report of the Madras Government Quinologist, Mr. J. Broughton, the proposal to extend the cultivation of cinchona on the Bábábuden Hills has been abandoned. The conclusion arrived at was that the yield of febrifuge alkaloids was inferior to that of trees of the same age grown on the Nílgirís, as shewn by the following comparison. (The amounts are in grammes, and in both cases express averages.)

	Trees grown on Bábábudens.	Trees grown on Nílgirís.
Branch bark	0·32	7·34
Trunk „	3·44	21·15
Total... ...	3·76	28·49

293. Again, an analysis of trunk bark of a single tree in the Bábábuden plantation averages 3·43 per cent of total alkaloids, and that of the mixed bark of three trees collected at the most favorable period for occurrence of alkaloids in the bark, gave 4 per cent of total alkaloids. On the other hand, the trunk bark of Nílgiri trees of the same age yield 6·49 per cent of total alkaloids.

294. It was Mr. Broughton's opinion that, in order to obtain the requisite conditions of a better soil and more abundant rain-fall, the advantages afforded by the present elevated site of the Bábábuden plantation might be relinquished in favor of one situated on the lower slopes of the hills and on the side exposed to the south-west monsoon.

295. The plantation in the Biligirirangam Hills consists of some 2,500 plants, which are in a thriving condition. No analysis of the bark in this plantation has, however, been made.

296. *Carolina Paddy.*—The cultivation of carolina paddy has everywhere proved a failure from causes which are not satisfactorily explained. It is certain that with ordinary care the crop will grow luxuriously, but the flour of the grain is said to be unpalatable, and the ryots allege that the straw is too coarse for their cattle. There is reason to believe that the general experiments made with this grain have not been conducted in a manner to ensure a successful result.

297. *China Grass.*—The china grass is reported to grow well in the Malnád and to any extent, so much so that the coffee planters are said to uproot it as a weed.

298. *Cardamoms.*—Cardamom plantations are still in their infancy; but the planters are beginning to turn their attention to the cultivation of this product which grows luxuriously in favorable localities in the Malnád.

299. *Cotton.*—The cultivation of cotton throughout the Province is very limited; it is considered by the ryots to be unremunerative, and they are indifferent to its culture, as they are becoming more dependent on foreign markets for their supply of cloth. Its cultivation is greatest in the Chituldroog District, where the total area under cotton was 34,271 acres, and the out-turn 55,763 *maunds and 11 seers, shewing a decrease of 12,164 acres in extent, and 62,511 maunds in out-turn as compared with 1869—70. The cotton crops are reported to have suffered from disease, unseasonable rain, and attacks of insects. The market price of a maund has fallen from 12 Rs. in the previous year, to Rs. 5 in this year.

*of 28 lbs per Maund.

300. *Stock.*—The following is an approximate enumeration of the live and other stock in the Province as shewn by the returns :—

Horned Cattle	2,778,000
Horses	5,500
Ponies	21,000
Donkeys	47,000
Sheep and Goats	2,108,200
Pigs	40,500
Carts	61,000
Ploughs	575,400

301. Endeavours to improve the breed of cattle throughout the Province have been made by distributing young bulls of the famous Amrat Mahal breed to large owners of herds on the payment of a nominal price, and with the condition that the animals are not sold or otherwise disposed of without express permission of the District Officer.

302. With a similar object prizes were distributed at a large cattle fair held in March 1871 in the neighbourhood of Nandidroog for the best cattle exhibited, and measures are in progress for making these exhibitions more general throughout the Province.

E.—PRICES OF PRODUCE AND LABOR.

303. As in last year, prices have continued to fall, and the decrease has affected all the staple articles of food. In one district (Hassan) the fall is so low as 40 per cent below the prices of last year. This diminution in the profits of cultivation has necessarily been severely felt by the cultivating and land holding classes. The following examples may be cited.

Rice, 1st sort, which averaged from 10 to 13 seers per rupee at the close of last year, fell in price to 11 and 17 seers.

Rági, which varied from 30 to 40 seers per rupee in last year, fell to an average of 53 seers.

304. Further details under this head will be found in Appendix III. E, 1.

305. *Labor.*—The rates of skilled labor varies according to the locality, from 6 to 12 annas per diem, and of unskilled labor, from 2 to 5 annas per diem.

306. The ordinary rate of hire for a cart drawn by bullocks is 11 annas, or somewhat higher in populous countries, but never exceeds one rupee per diem.

F.—MINES AND QUARRIES.

307. The return prescribed by the Calcutta Statistical Committee will be found in Appendix III. F.

308. *Metal and Ores.*—The principal metallic products of the Mysore Province are iron, iron sand, gold dust, emery stones, and small quartz crystals.

309. *Iron.*—In the Nandidroog Division iron ore is found in four talooks of the Bangalore, five talooks of the Kolár, and one talook of the Toomkoor Districts. There are 402 mines in this Division, and 6,502 maunds* of iron were produced during the year, being 196 more than the produce of the previous year. The duty levied on furnaces amounted to Rs. 2,443—6—3 in 1870—71.

* Of 28 lbs. per Maund.

310. Iron abounds in the Shimoga, Chennagiri, Tarikere, Kadoor, Hiriyúrú, Hosadurga, Chituldroog and Búdihálu Talooks of the Nagar Division, as well as in the Mysore District of the Ashtagram Division.

311. *Gold.*—Gold dust is found in the washings caused by the monsoon rains from the Hémagiri Hill in the Huliyúrdurga Talook of the Nandidroog Division; the washers are said to realize about four annas worth of gold in a day's washing.

312. Emery stones are to be found in the Tarikere Talook, and small quartz crystals near Nittáru.

313. In the Nagar Division flint, iron sand, granite stone, slate, potstone, and gypsum are the minerals found. Clay iron stone abounds in some ranges of hills near Chituldroog, and the hills north of Harihara; drawing slate is also found in the same region. Mica slate occurs often below the beds of marl in localities where cotton soil prevails. Iron sand is usually found in river beds after the rainy season.

314. *Salt.*—Common earth salt occurs in the Chituldroog Division in abundance. It is usually found in red soil upon the surface of which it effloresces. It is manufactured in talooks south of Chituldroog, and used by those natives who cannot afford to purchase sea salt.

315. *Building Materials.*—Granite, laterite, and other descriptions of stone suitable for building purposes, are procured in abundance throughout the Province; but laterite is mostly confined to the Malnád talooks bordering on the Western Ghâts.

Kunker or lime nodules formed in earth abounds in most places, and is extensively used in metalling roads.

Limestone of different descriptions is to be obtained in most of the hills in the Maidán talooks.

Potstone is produced in the Hassan District, and is well adapted for sculpture.

G.—MANUFACTURES.

316. The information given under this heading cannot be relied on as being altogether accurate.

317. The total value of the manufactures of the year in the Nandidroog Division is reported to be as follows:—

Silk	... 5,55,590
Cotton	... 2,795
Fibres	... 1,054
Paper	... 13,300
Iron	... 62,653
Brass and Copper	... 1,15,750
Leather	... 1,83,820
Dye	... 2,06,829
Oil	... 2,37,456
Jaggory and Sugar	...12,11,281
Arrack	... 4,70,342
Bangles	... 21,045
Blankets (country)	... 1,35,026
Bell Metal	... 15,540
Carpets	... 1,05,021
Chunam	... 3,99,954
Cloths	...19,96,070
Cotton	 1,06,742
Gunny	... 12,946
Opium	... 44,400
Snuff	... 69,640
Other Manufactures	... 2,36,274
Total.....	62,02,478

318. In nearly every part of this Division cotton cloths are woven. The silk manufacture is carried on to a considerable extent in Kengéri, Closepété, Chennapatna, Kánakánahalli, Nelamangala, Kólár, Málúru, Kunigallu and Huliyúrdurga.

319. In the out-turn of silk there is a recorded increase of 1,094 maunds during the year 1870—71, as compared with the previous year; but the branch of industry has much declined, owing to the great mortality among the silk-worms.

320. Gold and silver lace is manufactured at Bangalore to a moderate extent. Chikkanáyakanahalli in the Toomkoor District is noted for the manufacture of blankets. Iron and steel are largely manufactured in Koratagere, Maddagiri, Mágadi and Chennapatna, and is of a somewhat superior quality.

321. Chennapatna in the Bangalore District has long been noted for its wire used for musical instruments.

322. At Pálahalli in the Ashtagram Division, there has been for 10 years past a large sugar manufactory. Cloth, blankets, brass and copper vessels and oil, are the chief articles of manufacture throughout this Division. The number of looms and workmen employed in making cloths and cumblies, may be estimated at 10,730 and 32,240 respectively, and the annual out-turn at Rs. 6,42,800.

323. The manufactured products of the Nagar Division are much of the same description as mentioned above; and consist of blankets, cloths, and carpets, iron implements, brass and copper vessels, &c., coarse canvas called gunny, and hasvé pattés. Superior cloths, and handkerchiefs are manufactured at Molakálumúru, and these are much prized in Bangalore and Mysore.

H.—TRADE.

324. No system of registering the trade in this Province has yet been organized; but the returns from the Nandidroog Division give the following details.

325. The value of exports in this Division is reported to be Rs. 43,48,871, against Rs. 42,49,933, the previous year, and the value of imports Rs. 1,15,84,989, against Rs. 1,81,27,769, last year. The above does not include Railway traffic.

326. The following were the principal exports from the Division during the year:—

Arecanut—Maunds	...	...	61,421
Betel-leaves—Bundles	...	...	17,180
Castor Oil Seed—Kandís	...	...	2,500
Cocoanuts, fresh—Maunds	...	...	206,200
Cotton—Maunds	...	...	2,000
Chillies—Maunds	...	...	8,000
Dál—Kandís	...	...	1,500
Horse-gram—Kandís	...	...	7,000
Hides—Number	...	...	20,990

Iron—Maunds	2,154
Lac—Maunds	360
Paddy—Kandís	15,000
Potatoes—Maunds	53,240
Rági—Kandís	78,246
Rice—Kandís	720
Bangles—Number	2,585
Dry Cocoanut—Maunds	50
Country Blankets—Number	30,006
Ghee and Butter—Maunds	3,000
Country Cloths—Number	62,606
Cocoanut Oil—Maunds	800
Jaggory—Maunds	19,101
Sugar—Maunds	20,000
Sugar-candy—Maunds	6,000
Silk—Maunds	4,610
Opium—Kandís	80

The exports were chiefly to Madras, Bellary, Cuddapah and other places beyond Mysore.

327. The chief imports into the Division during the year were as follows:—

Arecanut—Maunds	73,980
Betel-leaves—Bundles	1,352,814
Cardamoms—Maunds	415
Castor Oil seed—Kandís	4,532
Cocoanut, dry—Maunds...	3,350
Cocoanut, fresh—Number	234,520
Coffee—Maunds	66,870
Cotton—Maunds	173,746
Chillies—Maunds	80,089
Dál—Kandís	12,094
Salted Fish—Maunds	16,150
Fuller's earth—Kandís	5,054
Gold—Maunds	90
Horse-gram—Kandís	3,343
Hides—Number	21,000
Iron—Maunds	25,425
Paddy—Kandís	9,723
Potatoes—Maunds	80,000
Rági—Kandís	88,788
Rice—Kandís	33,562
Tobacco—Maunds	3,802
Wheat—Kandís	10,552
Silver—Maunds	226
Brass—Maunds	10,547

Cloths—Number	...	...	212,000
Cotton Thread—Maunds	...	...	70,515
Jaggory—Maunds	...	...	74,087
Silk—Maunds	...	...	3,400
Sugar—Maunds	...	...	6,000
Sugar-candy—Maunds	...	...	3,000

The imports have been chiefly from Bombay, Madras, Bellary, Dharwar, Mysore, Shimoga, Chitaldroog, Salem, Combaconum and other places.

K.—CHARITABLE INSTITUTIONS.

328. The statistics of the charitable institutions of the Province are contained in the Appendices, Part III, Section K.

PART IV.

INSTRUCTION.

A.—ECCLESIASTICAL.

329. Clergymen of the church of England on the Madras establishment are posted at the stations of Bangalore and Mysore; 3 at the former, and 1 at the latter place. The minor stations of Hassan, Shimoga, and Toomkoor are visited quarterly by a clergyman of the additional clergy society, and the stations of Oosseor, Hunasúru, French Rocks and Pálhalli by the chaplains of Bangalore and Mysore.

330. There is one chaplain of the established church of Scotland at Bangalore.

331. The Wesleyan Mission has chapels at Bangalore, Mysore Shimoga, and Toomkoor.

332. The London Mission has two chapels at Bangalore, and there is one free communion baptist church at the same station.

333. There are in Bangalore four churches belonging to the Roman Catholic mission, three for native Christians, and one for Europeans and East Indians; the other stations at which this mission has chapels are Balláipura, Kommanahalli, Madagondapalli, Mattigeri, and Hárohalli, in the Nandidroog Division. In the Ashtagram Division there are chapels at Mysore, Hassan, Setthalli, and three other villages.

In the Nagar Division, there are Catholic chapels at Shimoga, Nagar Chikkamagalúru, and Chituldroog.

B.—EDUCATION.

334. The statistical returns of the educational establishments, under the control of the Director of Public Instruction in the Mysore Province, will be found in Appendices, Part IV, Section B, 1 and 2.

335. *Financial Statistics.*—The subjoined statement shews the income from various sources during the past three years:—

	1868—69.	1869—70	1870—71
From Imperial Revenue	2,53,25	2,49,183	2,79,648
From Local Sources, viz.,			
Endowments	1,532	28	159
Subscriptions and Donations	18,116	22,829	19,425
Fees	24,153	27,217	41,142
Private contributions and receipts in grant in-aid Institutions...	22,715	31,085	23,241
	66,516	81,159	83,967
	3,19,641	3,30,342	3,63,615

336. *Expenditure.*—The following statement shews the expenditure under this head during the same period:—

	8168—69.	1869—70.	1870—71.
Direction and its subsidiary charges	12,856	13,070	14,252
Inspection do	11,619	19,720	19,986
Government schools	91,218	1,06,944	1,21,087
Buildings	5,389	5,017	11,722
Government contributions to Grant-in-aid Institutions ...	32,966	35,166	34,592
Private do	61,142	74,636	88 051
Miscellaneous, including Central Book Depôt ...	17,688	29,957	33,216
	2,32,878	2,84,507	3,22,906

337. *Inspection.*—Besides the Director of Public Instruction there are two Inspectors, each of whom has a Circle of inspection. The 1st circle extends over the Bangalore, Kolár, Mysore and Hassan Districts, and Coorg. The 2nd circle includes Toomkoor, Shimoga, Chituldroog and Kadoor Districts. There is a Mahomedan Sub-Deputy Inspector of Hindustáni Schools, and 8 Sub-Deputy Inspectors of Hóbli Schools.

338. *Educational Institutions.*—The Educational Department has the control of the following institutions.

464 Government Educational Institutions.
76 Grant-in-aid do.
1,903 Unaided indigenous schools.

Total.. 2,443

339. These institutions comprise 7 higher class schools, *viz.*, 2 Government and 5 grant-in-aid, affording instruction up to the standard of the B. A. degree examination of the University of Madras.

5	District Government Schools of the same grade teaching up to the standard of the Matriculation examination of the University of Madras.
10	Talook Anglo-vernacular schools of the middle class.
9	Aided schools do. do.
435	Government vernacular schools of the lower class, (including hóbli schools.)
29	Aided schools do. do.
5	Government Female Schools.
33	Aided Female do.
4	Government Normal Schools.
3	Special Schools (including 1 Engineering and 2 Jail Schools.)
1,903	Unaided indigenous schools.
2,443	

340. Compared with 1869—70, the number of grant-in-aid schools of the lower class decreased in number from 78 to 76; on the other hand the number of lower class Government vernacular schools increased from 68 to 79; and that of the hóbli schools from 239 to 325.

341. The average attendance at the several classes of schools was as follows :—

Government Schools	4,685
Hóbli Schools	9,181
Grant-in-aid Schools	4,577
Indigenous Schools	24,864
	43,307

giving a total of 43,307 or 1 student to 93 persons.

342. Compared with 1869-70, the number of scholars shew an increase of 4,347; the increase being most marked in the case of the

Government schools of the lower class, and in the grant-in-aid girls' schools. The decrease in number of the Government schools of the higher and middle classes, is due to the reduction of three Anglo-vernacular schools of the middle class.

343. The average annual cost of educating each pupil in Government schools of the higher class was—

	Rs.		
In aided schools of the same grade ...	39	10	2
In Government schools of the middle class..	50	1	7
In aided schools of do ...	35	2	11
In Government schools of the lower class...	33	10	6
In aided schools of do ...	8	9	6
In Government Girls' Schools... ...	7	15	0
In aided female schools	13	5	0
In Government Normal Schools ...	23	0	5
In Government Engineering School ...	80	0	6
	305	5	10

344. *University Examinations.*—Bangalore is the only station in the Province at which a branch examination of the Madras University was held this year. There were 126 candidates, 98 being the number for the Matriculation test, and 28 for the First examination in Arts. The numbers were less than last year, but the results were nearly in the same proportion, 24 having passed the Matriculation and 8 the F. A. test.

345. *Bangalore High School.*—This school maintains its position as the highest educational institution in the Province, and notwithstanding the great increase in the rate of schooling fee, the numerical strength continues nearly the same as last year. The amount of fees collected was Rs. 4,114, against Rs. 3,148 in the previous year. Out of 5 candidates who went up for the F. A. test, 3 passed, and out of 12 matriculation candidates 8 were successful. A student from the High School has this year, for the first time since the institution of the University examinations, become eligible for one of the scholarships awarded by the Madras Government annually to fifteen out of the first twenty candidates. These scholarships are tenable for four years until the time of appearing for the B. A. degree; but under the rules of the Madras Government the Mysore student is not eligible to hold the scholarship.

346. *Schools below the Grade of Colleges.*— These consist of schools of the higher class, teaching up to the standard of the Madras

University Matriculation examination. At the end of the past official year 1870-71, there were 7 Government schools of the higher class, with an average attendance of 895 pupils, and 5 grant-in-aid schools of a similar grade, with an average attendance of 703 scholars; from these schools 126 candidates offered themselves for the First Arts and Matriculation examinations (98 for the Matriculation, and 28 for the First Arts) of whom 8 passed the First Arts, and 24 the Matriculation.

347. *Schools of the Middle Class.*—In these the following subjects are taught: English, Kanarese, arithmetic up to vulgar and decimal fractions, proportion, &c., geography and history.

There were 10 Government schools of the middle class, with an average attendance of 289, and 9 aided schools of the same grade, with an average attendance of 526.

348. *Lower Class Schools.*—In these instruction is given in reading, writing, and the elements of arithmetic, all in the vernacular. In the best of these schools an elementary knowledge of geography and history is acquired. These schools are either supported entirely by Government or from the educational cess, or are on the grant-in-aid system.

There were 435 schools of the lower class, with an average attendance of 12,365, and 29 aided schools, with an average attendance of 1,932. Of the lower class schools, those in the talooks take the highest place, as the boys remain for a longer period, and often acquire some knowledge of geography and history. The *hóbli schools are fairly answering the purpose for which they were established. The masters have all been at the Normal Training Schools and passed an examination before receiving their appointments. The attempt to diffuse education through the rural districts by means of these schools has been well seconded by the people themselves, who have in all cases either built or purchased school houses, or else rented suitable premises for the purpose. The general popularity of the schools is also shewn by the fact that all classes are represented in them. In some cases Brahmans are the most numerous; in others the children of laborers; in some schools the boys are all cultivators; in others Lingáyets, goldsmiths and weavers; while many of the schools shew a mixture of all classes.

*A Sub-division of a Talook.

349. *Grant-in-aid Schools.*—The expenditure under this head amounted to Rs. 34,592, distributed in the following proportions amongst the various denominations of schools :—

	Rs.	As.	P.
Protestant.			
Church of England	8,820	0	0
Church of Scotland	2,400	0	0
London Mission	2.880	0	0
Wesleyan Mission	6,936	0	0
Roman Catholics	5,520	0	0
Hindu	3,494	0	0
Mahomedan	4,542	0	0
	34,592	0	0

350. *Bishop Cotton School.*—The first school on the list, which receives the highest grant, is Bishop Cotton School at Bangalore. Owing to changes of head masters this institution did not, at the time of its last inspection, occupy the position it should have attained. None of the candidates sent up for the last University examinations were successful. The attendance of students, which at one period fell off, is understood to have lately increased, and the prospects of the school are now considered to be more promising.

351. *St. Andrew's School.*—This institution has also very recently come under the charge of a new master. One student succeeded in passing the last Matriculation examination of the Madras University.

352. *Mission Schools.*—Two candidates from the London Mission Institution were successful at the University examinations,—one in the First Arts, and one in the Matriculation—the former having obtained a place in the first class. In the Wesleyan Native Educational Institution two students passed the F. A. examination, and three matriculated. In the Wesleyan Mission School at Mysore two candidates passed the Matriculation test, and there are three students in the school preparing for the B. A. degree examination.

353. *Other Schools.*—Of the other schools receiving grants-in-aid, four are Anglo-vernacular; six Kanarese; two Tamil; five Sanskrit; and eighteen Mahomedan.

354. *Girls' Schools.*—There are also fifteen girls' schools that have grants-in-aid; and the total number of girls under instruction in both Government and aided schools is 2,313.

355. *Indigenous Schools.*—These are returned as 1,903 in number, with an attendance of 24,864. Most of these schools are very elementary. Some of them have been occasionally visited by the Inspectors or Sub-Deputy Inspectors, and with few exceptions it has been found that the instruction imparted was of the most meagre character, and the attendance very irregular.

356. *Girls' Schools.*—There are only 5 girls' schools in operation established by Government, with an average attendance of 124. The number might have been increased, if this Department had been in circumstances to afford aid when applications were made from the different localities, where a desire for their establishment had been created. There are also 33 aided schools of this class, with an average attendance of 2,093 pupils. The Inspectors frequently notice that the attention, intelligence and aptitude of the girls are more marked than that of the boys. The native prejudice against female education is daily becoming less.

357. *Jail Schools.*—The Central Jail and juvenile prison schools number 458 prisoners. In each school there are five classes, which include men in all stages of progress. The most advanced read the Second Book of lessons and Kanarese Arithmetic. The Superintendent of the Central Jail states "that the progress made is very fair, considering the subjects to be operated upon, and that there is no coercion, no prize for the first, and no stimulus for the laggard, and that the teachers (themselves prisoners) are quite untrained."

358. *Normal Schools.*—There were 4 normal schools, with an average attendance of 137. The one at Bangalore is the General Normal School with a Kanarese and Hindustáni branch attached to it, in which students are trained for appointment as head masters in the talook English and vernacular Government schools. The 3 others are expressly established, one in each Division of the Province, for the training of the "Pantójís" or hóbli school masters. During the past year 130 students obtained certificates and received appointments in Government talook and hóbli schools.

359. *Engineering School.*—This school was established with a view to provide educated subordinates, especially natives, for the Public Works Department. Two years ago ten scholarships were founded in connection with the school, for the purpose of attracting native students from distant parts of the country; four were assigned to the Ashtagram Division, four to the Nagar, and two to the Nandidroog Division, preference being given to the sons of Méstrís or practical workmen. But even this encouragement has not been sufficient to overcome the native repugnance to the active life of an engineer, and the school at present is a failure.

The arrangements required to place this institution on a better footing are under consideration. There were 16 pupils under instruction in it at the close of the official year.

C.—SCIENTIFIC AND LITERARY.

360. MYSORE GOVERNMENT MUSEUM.—In the geological department of the Museum a very complete collection has been formed of the rocks and minerals found throughout the country, and an excellent display is made of its arts and manufactures. The Museum possesses also an admirable collection of specimens of wood, all the more important varieties of timber being represented by longitudinal and cross sections, and the vegetable products of the country are fully exhibited in the several species of grain, pulses, oil, and fibres, &c.

361. The number of visitors has risen from 133,182 in the previous year to 162,135 in the present one,—the daily average being 551. The greatest number in any one day was 16,878, and the least 105.

362. A collection of the minerals usually associated with coal were received, as well as one specimen of gypsum.

363. 13 coins, *viz.*, 1 gold, 4 silver and 8 copper were added during the year.

364. 22 volumes have been added to the library, which now consists of 359 volumes.

365. The cost of this establishment for the past year amounted to Rs. 3,510—2—9, which included salaries, contingencies, purchase of specimens, and furniture.

366. *Archæology.*—A finely sculptured statue of Vishnu in black marble, 20 feet high, has been recently discovered at a place about 9 miles from Hassan; and also a number of cromlechs on the rising grounds near Hassan.

367. GOVERNMENT BOOK DEPOT.—This establishment is under the control of the Director of Public Instruction. During the year the number of books added to the stock was 36,041, at a cost of Rs. 23,218; of these 12,663 were English books, valued at Rs. 15,322, and 23,378 were vernacular books, valued at Rs. 7,890.

368. The number of books supplied to District Depôts and to head masters for sale was 16,000, valued at Rs. 11,500, shewing that the sales in the branch depôts formed in various parts of the country have increased in a greater ratio than those in the Central Depôt at Bangalore.

369. The amount paid into the Government Treasury on account of the sale proceeds of books during the year was Rs. 19,825.

370. MYSORE GOVERNMENT PRESS.—The following school books in English and Kanarese were published at the Government Press in the course of the year:—

	No.
Fist Book in Kanarese	... 20,000
Third Book in Kanarese	... 2,000
First Book in English	... 10,000
Karnátaka Vágvidhâyani	... 10,000
History of India	... 5,000
Abridged History of India (in part) ...	... 2,000
Brief Sketch of History of India ...	... 5,000
Kanarese and English Dictionary ...	... 2,000
Elements of Euclid in Kanarese ...	... 2,000
Kathá Manjari	... 5,000
Kanarese Arithmetic (in part) ...	... 5,000
Amara Kósha (in part)	... 5,000
Second Book in English	... 2,000

371. *Printing Presses.*—The number of presses at work in the Province at the close of the year was 13, exclusive of the Central Jail Press at Bangalore. Of these 5 are chiefly for English publications, and the remainder for vernacular literature.

372. *Newspapers.*—At the close of the year there were only two English and one vernacular newspaper published in the Province. The "Bangalore Herald" and the "Bangalore Spectator," are tri-weekly, and are published in Bangalore, and the "Khasim-ul-Akbar" (in Hindustáni), is published in the same place weekly. The other presses only publish books and do job work. The "Mysore Gazette," published at the Government Press, is an official weekly publication.

373. *Registration of Publications.*—The number of books registered during the year under Act XXV of 1867 was 73, of these,—

46 were Kanarese.
12 were Hindustáni.
1 was English and Hindustáni.
2 were Sanskrit and Kanarese.
1 was English and Kanarese.
1 was Sanskrit.
1 was Telugu.
1 was Latin and English.
1 was Kanarese and Latin.
7 were English.

PART V.
VITAL STATISTICS.

A.—BIRTHS AND DEATHS.

374. The vital statistics of the Province have been collected under the new forms laid down by the Government of India from the 1st July 1870, and the returns have been continued up to the close of the year.

375. *Births.*—The total births registered in the Province are 28,456, or including still born 29,178 ; this gives a per mille rate to the population of 7·1, which is manifestly erroneous.

376. In the Cantonment of Bangalore births have not yet been systematically registered, and in the Province registration is evidently largely evaded.

377. Of the registered live births, 14,826 are males, and 13,630 females, or in the proportion of 100 males to 91·9 females, the annual live births rate deduced from the returns for the six months is 14·2 per mille.

378. *Deaths.*—The deaths for the Province are 33,948, or in the ratio (for the six months) of 8·25 per mille; the annual death rate is thus 16·50, which, though a considerable increase upon any former reported annual rate, is still, it is believed, considerably below the fact

379. The deaths amongst males are 18,209, and amongst females 15,789, or in the proportion of 100 males to 86·4 females.

380. The mortality by months is as follows:—

Month.	Deaths.	Per Mille Rate.
July	5,797	1·41
August	5,955	1·45
September	5,578	1·36
October	5,272	1·28
November	5,263	1·27
December	6,083	1·48

381. The deaths caused by the following diseases, &c., amounted to 33,948, and are thus distributed :—

	No.
By cholera	366
Small-pox	398
Fevers	19,044
Bowel complaints	5,077
Injuries	789
Other causes	8,274
The deaths by injuries are :—	
Suicide	67
Wounding	72
Accident	506
Snake-bite, or killed by wild beasts	144

382. The several causes of deaths contributed to the total mortality of each month are as follows.—

	July.	August.	September.	October.	November.	December.
Cholera	122	114	51	29	47	3
Small-pox	103	96	54	60	24	61
Fever	2,953	3,118	2,945	2,955	3,104	3,969
Bowel complaints	1,127	1,012	905	739	641	653
Injuries	126	154	141	119	138	111
Other Causes	1,366	1,461	1,482	1,370	1,309	1,286

383. The deaths by classes are thus returned :—

Classes.	Deaths.	Per Mille Rate.	Annual Rate.
Christians	97	6·63	13·26
Mahomedans ...	1,488	7·94	15·88
Hindús	31,121	8·19	16·38
Other classes ...	1,242	11·64	23·28

384. The above figures are those obtained from the returns, but the death rate so shewn is still, it is believed, much below the real mortality, while the birth rate is quite unreliable.

385. Registration of deaths is clearly largely evaded in some districts, more so than in others; and the results do not at all agree with the generally accepted opinions as to the relative salubrity of the several districts of the Province.

B.—CIVIL HOSPITALS AND DISPENSARIES.

386. The following statement shews the comparative working of the civil hospital and dispensaries (exclusive of special hospitals) during the year under report and that immediately preceding.

	Treated.		
	In Hospital.	Out of Hospital.	Died.
1869—70 ...	2,711	69,830	267
1870—71 ...	3,046	73,494	302

387. The working of the civil hospitals and dispensaries during the year was satisfactory, the total number of patients treated being 76,540, or 4,000 in excess of that of last year; while the death rate amongst in-door patients has fallen from 12·07 to 9·9 per cent. The whole cost of these institutions is at present borne by the State, but it is intended that a fair proportion shall hereafter be provided from municipal or local funds or contributions.

388. *Bangalore Pété or Town Hospital.*—This institution shews an increase of 25 admissions amongst in-patients, but a decrease of 2,482 in the number of out-patients, which is attributed to an improved state of the public health of the town as compared with the previous year. The average daily sick of in-patients was 52·5, and the average daily attendance of out-patients 101·42; the mortality amongst in-patients was 7·89 per cent.

389. *Bowring Civil Hospital at Bangalore.*— This institution shews an increase in both the intern and extern departments; in the former to the extent of 70, and in the latter, of 1,091, admissions. The average daily sick of in-patients was 51·5, and of out-patients 88. The mortality amongst in-patients was 12·7 per cent.

390. *Mysore Hospital.*—The numbers attending this hospital was much the same as last year; the in-patients being 450 or ten less, and the out-patients 23,268 or 177 more; a proportion of the out-patients consists of men of the local troops, who resort freely to this hospital. The average daily attendance of out-patients has averaged 195·5, and 36 have been constantly sick in hospital. The death rate amongst in-patients is 13·3 per cent.

391. *Shimoga Hospital.*—This hospital shews an increase in both departments, the in-patients from 358 to 394, and out-patients from 4,972 to 5,670. The in-patients have a daily average of 22·25, and the out-door attendance has averaged 64.

392. *Hassan Dispensary.*—During the year under report this institution only afforded out-door relief. A new hospital is in course of erection, and will be soon opened. The out-patient list has increased from 711 in 1869—70, to 2,396 in 1870—71, and the average daily attendance has been 24·12.

393. *Kolár Dispensary.*—This also at present affords only out-door relief. It has increased its usefulness during the year, the numbers having risen from 3,191 to 3,721, with an average daily attendance of 38 persons.

394. *Toomkoor Dispensary.*—This is mostly a dispensary for out-door relief, but exceptional cases are admitted into hospital; 10 such were treated in 1870—71, against 26 in the previous year. The out-door patients have increased from 2,044 to 2,779; the average daily attendance has been 39·8: mortality of in-patients 10 per cent.

395. *Chituldroog Dispensary.*—During the year under report this institution has afforded in-door relief; 230 persons were treated, and the average daily sick was 8. The out-patient list has increased from 3,549 to 4,604, and the average daily attendance was 845. The mortality amongst in-patients was only 0·43 per cent.

396. *Chikkamagalúru Dispensary.*—The out-patient list increased from 1848 in 1869—70 to 2,113 in 1870—71, with an average daily attendance of 29·9. A hospital has since been opened for in-patients.

397. *Lunatic Asylum at Bangalore.*—The number of patients in the asylum has increased from 110 to 124, and the death rate was six per cent of the average strength, which is considerably less than that of the previous year. The expenditure was Rs. 13,464, against Rs. 13,257 in 1869—70, the average annual cost of each lunatic being 116—9—0.

398. *Leper Asylum at Bangalore.*—The number of patients in the leper asylum has fallen from 43 at the end of the previous year, to

39 at the end of the past year. The death rate during the year was 10 per cent on the total number of inmates. The expenditure was Rs. 1,865, or Rs. 227 less than that of 1869—70.

C.—VACCINATION.

399. The following table shews the results of vaccination in Mysore as compared with the previous year :—

	Total Operations in 1869—70.	Total Operations in 1870—71.	Successful.	Unsuccessful and Unknown.	Increase.	Decrease.	Proportion of successful in 1870—71.
Number ...	93,616	96,570	85,983	10,587	2,954	...	89·03
Cost Rs. ...	10,395	10,746 15/16	...	...	351 15/16	...	...

400. There is an increase of 2,954 operations principally in the Chituldroog District. In the Nandidroog Division only there is a decrease of 978 operations.

401. The population of the Province being 4,106,764, the total operations represent only 2·4 per cent.

402. The proportion of successful to unsuccessful cases or unknown results, is 89·3 per cent, or of failures or unknown results 10·7 per cent ; exclusive of "unknown results" the failures are only 5·9 per cent.

403. The cost of the establishment for the year was Rs. 10,746 —15—0, or Rs. 351—15—0 in excess of that for 1869—70. The cost of each operation being one anna and 9·3 pies.

404. The vaccine return prescribed by the Statistical Committee is given in Appendix V. C.

PART VI.

MISCELLANEOUS.

405. *The Anché or Local Post Expenditure.*—The total cost of the Anché or Local Post Department amounted to Rs. 1,51,102—14—6, against Rs. 1,45,151—3—5 in the preceding year, shewing an increase of Rs. 5,951—11—1, owing principally to additional establishments caused by the opening of two new post offices and certain changes and extensions of postal lines.

406. *Income.*—Taking credit for the postage exempted on service and franked letters, letters carried to and from Her Majesty's post offices, Gazette copies and parcels, &c., the following statement exhibits a surplus of Rs. 96,558—4—0 in favor of the Department, against Rs. 1,07,455 in 1869—70.

	Rs.	A.	P.
Amount of Postage on Service letters	1,51,608	4	0
„ „ on parcels	44,543	5	0
„ On letters, &c., carried to and from Her-Majesty's Post Office	10,255	10	0
„ On letters of His Highness the Rája's Dept.	43	0	0
„ On Gazettes	1,367	13	0
„ On franked letters and parcels ...	2,530	11	0
Total.....	2,06,351	11	0
Amount of Postage collected in Cash	41,309	7	6
Total.....	2,47,661	2	6
Deduct Expenditure.....	1,51,102	14	6
Balance Rs ..	96,558	4	0

407. *Correspondence.*—The total number of packets that passed through the anché offices was 2,323,734, being 45,962 less than for the year 1869—70.

Subjoined is a detail of the above number :—

	1870—71.
Chargeable packets	9,31,822
Service do	10,44,438
Franked do	18,957
His Highness the Rája's Department	327
Carried to and from Her-Majesty's Post Office	3,28,190
Total.....	23,23,734

The above figures compared with the returns of 1869—70 shew a falling off under franked packets, on account of the privilege granted to Officers of the Commission of franking private letters and parcels being cancelled. The increase shewn against letters carried to and from Her Majesty's post office is owing to the closing of the imperial post offices at Toomkoor, Chituldroog, Harihara and Shimoga.

408. *Unclaimed Letters.*—The number of unclaimed letters has considerably decreased, being 130, against 1,026 in the preceding year.

409. THE GOVERNMENT TELEGRAPH.—There are only two telegraph offices in the Province, one at Bangalore, and the other at the Town of Mysore.

410. MUNICIPALITIES.—Regularly organized Municipalities have now been established in most of the chief towns of the Province, and Boards have been formed, consisting of the most influential European and native members of the community under the presidency of a Government official selected by the Chief Commissioner. In Bangalore where municipal operations are conducted on a large scale, and require special attention, the President is a paid officer, and has no other duty to perform; but in the other municipalities no salary is attached to the office of President, one of the officials of the station undertaking the charge in addition to his other duties. In the smaller towns, where it has been found difficult to constitute regular boards, municipal regulations have, with great advantage, been introduced and enforced through the agency of the Revenue Officers.

411. In all the municipalities, the boards are responsible for the sanitary condition of the towns, for the state of the public thoroughfares, the proper conservancy of reservoirs, latrines, &c; and under their management all works of improvement or maintenance within municipal limits are carried out. Funds for these purposes are obtained chiefly from octroi duties levied by the boards on articles selected by them, with the consent of the Local Administration, the selection being restricted to such as are imported for home consumption. In some instances the octroi alone having been found insufficient to meet all requirements, the Mohatarfa or house tax, which was formerly appropriated to the general revenue, has been added to the municipal income, the municipalities in such cases undertaking the payment of the Town Police.

412. In a few of the towns objections having been raised to all octroi duties, it has been found better to substitute therefor a lightly assessed house tax.

413. Full details for each municipality are given in the Appendices, III. B, 2 and 3.

414. *Details of Municipal Operations.*—The outlay on municipal work in the talook municipalities of the Nandidroog Division amounted to Rs. 16,563—15—7, as follows:—

	Rs.	As.	P.
Bangalore	4,266	3	6
Kolár	5,053	2	0
Toomkoor	7,244	10	1
	16,563	15	7

This sum was devoted to various improvements, such as construction of drains in Kasabá towns, the erection of cattle pounds, opening new roads, cleaning out wells, repairing drains, and widening narrow streets, and compensation for land taken up for municipal purposes.

415. In the Ashtagram Division, regular municipalities are formed only in the towns of Mysore, Hassan, Hunasúru and Seringapatam. The expenditure under the heads of buildings, communications, sewage, water supply, miscellaneous and establishment, were as follows:—

	Rs.
Mysore	46,145
Hassan	4,558
Seringapatam	1,050
Hunasúru	1,689

416. In the Nagar Division, municipalities have been established at Shimoga, Chituldroog, and Chikkamagalúru, the expenditure from the Budget grants for these three head quarter towns of districts was as follows:—

	Budget Grant. Rs.	Expenditure. Rs	As.	P.
Shimoga	13,634	9,878	7	3
Chituldroog	1,764	1,498	14	8
Chikkamagalúru ...	5,540	3,059	0	0

Municipalities, with a small sanitary establishment, have been organized at the following kasabá towns of talooks:—

Ságara, Honnáli, Nyámti, Chennagiri, Shikáripura, Soraba Thírthahalli, Anantapura, Taríkere, Kadoor, Bánávára, Bírúru, Dávanagere and Harihara.

417. The municipal operations of the Town and Cantonment of Bangalore are noticed in Part III, Section B, Public Works.

I. STATISTICS OF PHYSICAL, POLITICAL, AND FISCAL GEOGRAPHY.

A. PHYSICAL GEOGRAPHY OF THE TERRITORIES UNDER THE CIVIL AND POLITICAL CONTROL OF THE ADMINISTRATION OF MYSORE.

Mysore is situated between 11°36′ and 15°0′ north latitude and 74°42′ and 78°37′ east longtitude. Its extreme breadth from east to west is 230 miles, and its extreme length from north to south is 190 miles. Its area is 27,00± square miles. It is bounded on the north by the Bombay Collectorate of Dharwar and the Madras Collectorate of Bellary. On the south by the Districts of Salem and Coimbatore, both in the Madras Presidency. On the east by those of Cuddapa and North Arcot, also of Madras. On the west by Coorg and the Western Ghâts, which shut out Mysore from Malabar and Canara on the West coast.

The Province was surveyed for revenue purposes during the administration of Púrnaiya between 1800 and 1810, and a topographical survey was carried out by Colonel Mackenzie in the years 1800—1807. A revenue survey on the Bombay system including the classification and assessment of the land, is now in progress.

I. A.—2. *Character of the Surface.*

Nature of different Tracts.	Names, Area, and Physical Description of each Tract.	Where situated, in British or Native Territory.	Prevailing Soils, Minerals and Products.
Mountains and Elevated Tracts.	The Mysore country above the ghâts is often called "the Table Land," a denomination very little descriptive of its appearance, as it is by no means plain or flat, but in some parts mountainous, and everywhere undulating. The Eastern Ghâts form the frontier, by which it is separated from the Carnatic. They constitute the exterior of the east ranges of hills, which run along the whole length of the Peninsula from Cape Comorin, stretching up to the continent of Asia. In many parts the ascent over them into Mysore is very high and difficult, while in others it is more sloping and protracted. The country rises gradually from these ghâts towards Bangalore, which is situated in the most elevated portion of the Mysore plateau, and is 3,031 feet above the sea level.		The soils, in the order of their prevailing kinds, are as follow :— 1. Red soil mixed with loam and vegetable mould. 2. Inferior red sandy soil. 3. Black cotton, free from stones. 4. Stony and gravelly soil. 5. Rich garden soil. 6. White stiff loam. 7. Black cotton, but light and stony. 8. Soil impregnated with salt.
Plains,	The descent from Bangalore on all sides is perceptible though not rapid. On the north-west after passing the Chituldroog range of hills, there is a gradual fall through the broad valley which leads to the river Tungabhadra, near which is the station of Harihara, probably the lowest point in Mysore, its altitude above the sea being only 1,800 feet. To the south-west and west, by Seringapatam and Hassan, there is perhaps a more marked descent until it is abruptly terminated by the western range of ghâts comprising in this direction the Nilgiri and Coorg hills, and further north, the Manjarábád and Nagar ranges. A marked feature of the country is the number of isolated hills called Durgás, on the most inaccessible of which the former Pálégars or petty chiefs built forts, afterwards in many instances strengthened and improved by Hyder and Tippu, and still in good preservation, but now without guns.		The great rock, which may be said to constitute the basis of the whole country, is a kind of sienite, composed for the most part of four different ingredients, *viz.*, quartz, felspar, hornblende and mica. The quartz has usually a dull greyish white color, and veins of it from 4 to 10 inches thick, often traverse the rock in different directions. The felspar varies in color from a silver white to a deep brick red, and is the most copious constituent of the rock. The hornblende is black, very abundant, and very much given to decomposition. The mica is easily distinguished from the hornblende, even when the stone is nearly in a state of disintegration. The hornblende in that state has assumed a brown ochre color, and has lost all lustre and cohesion, while the mica retains both its color, lustre and cohesion to the last, and becomes only more apparent by the progress of disintegration. This is particularly exemplified in the Mysore country, where the undulating high ground consists of sienite, decomposed into pipe clay, intermixed with micacious shining particles and grains of quartz. From the structure of the country, which is entirley primitive, no coals could be expected.
Forests	The principal forests are found clothing the sides of the Western Mountains. They abound in teak, blackwood and other valuable kinds of timber. There are no forests in the Eastern Ghâts. Sandalwood grows in the country bordering the hills.		Chlorite slate is found near Sirá, and drawing slate in the neighbourhood of Chituldroog. Other minerals are the following :— Clay Iron Stone. Schorl in Quartz. Mica Slate.

Rivers.	The Tungá and Bhadra rise in the north-west of Mysore, and uniting form the Tungabhadra, which flows northwards and eastwards till it joins the Krishna below Kurnool. The banks of the Tungabhadra are too high for irrigation purposes. The Kávéri rises in Coorg and passes through and out of Mysore in a south-easterly direction, after receiving the Hémávati, the Lókáni, the Shimsha, and the Arkávati from the north, and the Lakshmantírtha and the Kabbani from the south. The Kávéri and its tributaries supply numerous irrigation channels and tanks. The Pennair, the Palar and Penar rise in the eastern part of Mysore, in their short course through which, their waters are detained and converted into chains of tanks. They become large rivers before they reach the sea. None of these rivers are suitable for navigation.	Magnetic Iron Stone. Pot Stone. Actinolite. Ligniform Asbestos. Brown Spar. Common Salt. Carbonate of Soda. Gold is occasionally found near Bétmangala, by washing the alluvial soil; but in too small quantities to repay labor.
Lakes.	There are no natural lakes in Mysore; but there are nearly 20,000 artificial reservoirs, some of which are of considerable magnitude.	The chief products are:—
Marshes.	None of any consequence.	Paddy. Rági—The principal food of the people. Baller—A kind of small bean. Gram. Wheat. Millet. Oil Seeds. Sugar-cane. Cotton. Hemp. Tobacco. Mulberry. Coffee. Cocoanuts. Betel nuts Potatoes for export.

Bangalore Péte Municipality	89

GENERAL SUMMARY.

1. The rain-fall of the year 1871—72 was about 28¾ inches, or 6¾ inches below the average, as obtained from the mean of a series of years. There was a deficiency of rain in the early part of the monsoon in some of the talooks of the Hassan District, and, more or less so, in some other portions of the Province, especially on the eastern frontier, causing a failure of the grain and forage crops.

2. The mean temperature for the whole year was 73·3. During five years' observations at Bangalore, the maximum and minimum temperatures registered were 95° and 53° respectively.

3. The climate of the Mysore plateau is specially favorable for the production of fruits, flowers, and vegetables of almost every description, of all of which large quantities are grown at Bangalore, and exported by rail to Madras.

4. Subsequent to the close of the year, the Cochineal insect was introduced, through Her Majesty's Secretary of State for India, from Teneriffe, and the experiment promises to be a success, as the insect has taken kindly to the acclimatized cactus which grows freely all over the Province, and the climate appears to be well suited to it, though it requires care and protection during sudden changes of temperature from storms.

5. The harvest was generally good, except in the talooks in which there was a deficient rain-fall, and prices of grain of all sorts continued to decline below the rates current during the previous year. The wages of labor have not as yet been affected by the decrease in the cost of food.

6. The fall in the value of produce has, however, been attended by considerable relinquishments of land, chiefly on the part of speculators, who appear to have taken up land wherever it could be obtained during the period of high prices, and who doubtless in many instances, have found it no longer worth retaining. The total relinquishments during the year under report aggregated in value Rs. 2,20,743, but as fresh lands

valued at Rs. 1,41,293 were taken up, the net loss to Government was reduced to Rs. 79,450. The relative proportion of resigned and newly taken up lands in surveyed and unsurveyed talooks respectively was 2·1 and 1·9 per cent in the former, as against 3·1 and 1·3 per cent in the latter, which speaks favorably for the effect of the operations of the settlement in reducing the risks to which the land revenue is liable from this cause.

The great importance of introducing new articles of produce into the Province, which it will pay the ryots to cultivate in the place of the ordinary grains, instead of throwing up their lands, has for some time past, and is still receiving much attention.

7. The state of the public health during the past year was on the whole not unfavorable, though cholera was for some time epidemic in the Mysore District and parts of Kolár. It was especially bad in the town of Mysore and the island of Seringapatam, in which about 603 persons perished from this disease.

8. The collection of vital statistics was carried out during 1871 under the system ordered by the Government of India, but the results are not yet reliable. The mortuary returns for the year gave a total of 58,218 deaths, or 13·16 per mille of the population, as against 16·53 in 1870. The latter figure was considered far too favorable and that obtained from the returns for 1871, is clearly altogether unreliable. The number of births registered was only 33,921, but the progress made in obtaining accurate returns under this head has as yet been very unsatisfactory.

9. The population of the Province, according to the latest District returns which were based on the general census taken on the night of the 14th of last November, was 4,422,209 at the close of the year, being an increase of 148,665 on the figures given in the Report for 1870—71.

The estimated area of the Province was stated in that report at about 30,000 square miles; but recent enquiries tend to shew that 27,000 is probably nearer the mark, and this figure has accordingly been assumed in the statistical returns for the past year. The ratio of population to area according to the above figures was 163·8 souls per square mile.

The tabulation of the census returns is as yet incomplete, but as far as it has gone, it indicates a much larger population in some Districts than has hitherto been reported, the increase in Bangalore and Kolár being as high as 17 per cent.

10. The revenue for the year under all heads aggregated in round numbers Rs. 1,06,21,000, as against Rs. 1,06,11,000 for 1870—71.

£1,062,100.

The expenditure was similarly Rs. 1,01,91,000, as against Rs. 1,02,15,000, shewing an increase of revenue of Rs. 10,000, and a surplus of receipts over expenditure of Rs. 3,07,000.

£1,019,100.

£30,070.

The outstanding revenue balances under all heads, at the close of the past revenue year, aggregated Rs. 60,577, or about 0·57 per cent of the total demand for the year.

11. The returns of trade and manufactures are still incomplete and inaccurate, and their collection cannot be put on a proper footing until the village officials are restored to a condition of efficiency, when it is intended to require them to perform this as part of their duties.

The estimated value of the principal articles of export and import were as follows:—

	Rs.
Exports	1,09,42,000
Imports	1,06,97,000

£1,094,200.

£1,069,700.

The aggregate value of the whole export and import trade of the Province, may probably be fairly put down at about Rs. 35,000,000.

£3,500,000.

12. The criminal returns shew a decrease of 161 offences, or 0·72 per cent, as compared with those for 1870, the total number being 20,312 as against 20,473. There was a decrease in the past year of offences, (1) against the State and public, (2) against property, and (3) of a minor class, and an increase of those against the person. The cases of murder numbered 63, as against 62 in 1870.

13. The establishment throughout the Province of new Police arrangements based on the Village Police system, having been approved

and ordered by the Government of India, the requisite enquiries, in view to its introduction into each District as the settlement is completed therein, were carried on during the latter portion of the year, and are still in progress, and it is hoped that the measure will be finally adopted in the Chituldroog District during the current year.

In the mean time active efforts are being made in all the other Districts, to render the present Police more efficient and to prepare it, as far as may be possible, for the contemplated change: as the restoration of the Village Police, which is an essential part of the scheme, can, however, only be carried out as the settlement progresses, considerable delay must unavoidably occur before the new system can be adopted in its integrity throughout the Province.

14. The reformed Police in the Bangalore District, including the Town and Cantonment, numbered 1,036 men of all ranks; the actual cost of its maintenance during the year, under all heads, being Rs. 1,43,091. The proportion of Police to area and population was one constable to every 4 square miles, and 844 persons, as regarded the District; and 15 constables to every square mile, and one constable to every 322 persons in the Town and Cantonment. The actual cost of the force per head of population was three annas and $2\frac{3}{4}$ pies.

£14,309.

15. The un-reformed Police of the remaining seven Districts numbered 5,950 men maintained at a cost of Rs. 3,89,238, being at the annual rate of one anna and nine pie per head of population, and in the proportion of one Policeman to every 623 persons and 4·08 square miles.

16. The Village Police aggregated 27,399 men, maintained at an annual cost of Rs. 2,49,340; but their numbers are far from being complete, and their condition is one of general inefficiency. It is intended that as the survey settlement of each talook progresses, the Village Police and servants shall be revised, and their emoluments fixed and adjusted. The importance of restoring this class of Police to a condition of usefulness can hardly be over-estimated in the case of a State like Mysore, destined to be again placed under a native Government.

17. The operations of the Bangalore District Police shew that 2,872 or 99·8 per cent of cognizable cases were investigated either completely or partly by the Police; that 73 per cent of the persons arrested

in these cases were brought to trial, and that 78 per cent again of the latter were convicted.

In the rest of the Province the general proportion of convictions to arrests was only 21·5 per cent. In the two other Districts of the Nandidroog Division it was 20 per cent; in the Nagar Division it was 33·6 per cent; while in the Ashtagram Division it was only 13·4 per cent, or 1 per cent in excess of that of the previous year.

The total average percentage proportion of convictions to arrests for the whole Province, including the Bangalore District, was 37·6, as against 29·36 in 1870, shewing a considerable general improvement, though the ratio is still very low in some Districts, and highly unsatisfactory in those of the Ashtagram Division. The Judicial Commissioner has remarked, in his reports on the administration of the Police and Criminal Justice for the past year, that the returns on the above head have been made unduly unfavorable by their including in their figures the numerous false complaints, which were at once dismissed on their being investigated, and that the elimination of this class of cases would have greatly raised the percentage of convictions. There can, however, be no doubt that the Police and Subordinate Magistracy respectively are still but too much in the habit of making unnecessary arrests, and issuing processes for the attendance of accused parties without the exercise of due discretion.

It is only necessary to add here that much attention has been paid to this subject for some time past, and that every practicable effort has been, and shall be, made to check and remove the causes to which these unsatisfactory results are chiefly due.

19. In the Judicial Department, the proceedings of the Criminal Courts during the past year shewed a decided improvement in some respects on those of the previous year; but it is admitted, that there are still several defects in the procedure of the Courts of the Sub-Magistrates that require a more effective control and supervision on the part of the superior Courts. The measures that have been taken to ensure the attainment of this important object will, it is hoped, have the desired effect. The pending file in the Criminal Courts generally at the close of the year was moderate, and there was a marked improvement in the results of appeals to the several appellate Courts.

20. The number of suits instituted in the Civil Courts of the Province was 20,764, as against 20,534 in 1870. The aggregate value of the property in litigation was Rs. 23,64,852, as against Rs. 27,39,011 in the previous year. The average value of each suit was nearly Rs. 114. The average duration of both contested and uncontested suits was excessive, being 49 and 29 days respectively, or 5 days in excess of that of the previous year. These results were however in some degree, if not altogether, due to the extension last year to the Civil Courts presided over by the Judicial Assistants of the privilege of closing their Courts for two months annually. There were 740 appeals for disposal, as against 649 in 1870. 59 appeals remained pending at the close of the year. The sales of property in execution of decrees realized Rs. 17,23,280, or about 74·3 per cent of the total amount of the decrees put in execution.

£2,36,485.

£11—8.

21. The total number of prisoners in the jails of the Province during the past year was 5,318, as against 5,205 in 1870. The daily average number was 1,555 as against 1,619, and the mortality was 0·71 per cent against 0·73 per cent in the previous year. The gross cost of each prisoner for the year was Rs. 87—6—3, as against Rs. 97—12—6 in 1870, and the average actual cash earnings per head were Rs. 12-13-8, while the total estimated value of the prisoners' labor was Rs. 57,639. The health of the prisoners generally was good.

22. The following Acts of the Legislative Council of India were extended to Mysore during the past year.

Act XXVII of 1870, to amend the Indian Penal Code.
Act VIII of 1871, the Indian Registration Act.
Act IX of 1871, the Indian Limitation Act.
Act VII of 1867, to reduce the penalty for purchasing arms and ammunition from soldiers.
Act XXV of 1871, to amend the Railway Act.

23. The number of Government educational institutions of all classes in Mysore was 603, as against 464 in 1870—71. The total number of schools in the Province, of all descriptions, was 2,683 with an attendance of 48,601 pupils, as against 2,443 schools and 43,307 pupils in the previous year. The increase in the number of pupils was chiefly in the hóbli (talook sub-division) schools. The number of girls under instruction was 2,325.

The progress of education in the Province during the year under review was fairly satisfactory, and its prospects generally are highly encouraging.

24. The total outlay on public works under all heads during the past year was Rs. 18,38,831, of which sum Rs. 15,45,388 were provided from Provincial (or State) Funds.

£183,883.
£154,538.

25. The only work of importance under the head of civil buildings undertaken during the year was the new Government Printing Office, at Bangalore, which made good progress.

Three dispensaries, a Judicial Assistant's Court house, and a robing room at the Oosoor cemetery at Bangalore, were also under construction, and additions were carried out to the Executive Engineer's office at Mysore and the Division Jail at Shimoga, while numerous other minor works and repairs were executed. The total outlay on original works and repairs under this head was Rs. 70,690.

£7,069.

26. In the Irrigation Department, the channels of the Srírámadévara anicut were almost completed. This important work has as yet been entirely successful, and the supply of water from it has been more than ample for the lands irrigated therefrom. The Márchalli anicut was completed. The reconstruction and repair of a large number of tanks were carried on as usual, and satisfactory progress was made in the work connected with the improvement of the river irrigation channels. The total outlay on original works and repairs under this head was Rs. 3,03,236.

27. Under the head of communications, 234 miles of metalled road were constructed from Provincial (or State) and Local Funds, during the year under report; and the aggregate length of the existing lines of road at its close was 3,337½ miles, of which 2,009½ miles were maintained from Provincial and 1,328 miles from District or Local Funds.

Considerable progress was made in the works on the Hyderghar ghát in Nagar, and on the several lines of road under construction or repair throughout the Province, the total expenditure under this head from Provincial Funds having been Rs. 3,96,750, and from Local or District Funds Rs. 1,69,100, the aggregate from both amounting to Rs. 5,65,850.

£39,675.
£16,910.
£56,585.

The general condition of the roads was satisfactory, but some of the lines and especially some of the ghâts, were not in as good order as could have been desired, and considerable expenditure will be necessary to put the latter class of works into a condition of thorough efficiency.

28. The planting of avenues along the lines of road, and the formation of village tôpes received due attention during the past year. Some progress was also made in planting with suitable trees the margins and rear slopes of the bunds of tanks, and the banks of channels and water courses, the vast number of which furnish an extensive field for such plantings, which cannot but be, in the aggregate, of great value hereafter.

29. Under the head of miscellaneous public improvement, many useful works were carried out from Municipal Funds in Bangalore, Mysore and the other District Head Quarters Towns; and further progress was made in improving the sanitary condition of the principal talook towns. The improvements that have been lately effected or that are still in progress in some of the large towns of the Province are very marked, and reflect much credit on the officers and Municipal Boards through whose exertions they have been introduced.

30. The expenditure in completing the preliminary survey of the Mysore State Railway, during the past year, was Rs. 62,591, the total outlay on the work having been Rs. 1,16,235. The project has, for the present, been abandoned under the orders of Her Majesty's Secretary of State for India.

The working of the Bangalore branch of the Madras Railway, which traverses the Province for about 48½ miles, was satisfactory during the year under review.

31. The operations of the Forest Department were carried on with fair success during the past year. The gross revenue realized, including the value of the assets at the close of 1870—71, was Rs. 5,07,239, and the expenditure was Rs. 1,59,104. The total cash receipts during the year aggregated Rs. 3,18,635, and the actual net revenue of the year was Rs. 1,24,036. The value of the stock in hand and outstandings due at the close of the year was Rs. 1,88,604.

£50,724.

£15,910.

£31,863.

£12,403.

32. Fair progress was made in the demarcation of the State-forests, which now cover an area of 451⅔ square miles, and in taking up, preparing, and planting or sowing up land for sandalwood, timber and fuel plantations, the aggregate extent of which at the close of the year amounted to many thousands of acres.

33. The control of the District forests in Mysore has, under the sanction of the Government of India, been transferred from the Revenue to the Forest Department since the close of the past year, and active measures are in progress to give effect to this important measure, which will, it is confidently believed, result in very great permanent advantage to the interests of the State and the people, though it will necessarily take some time to carry it out completely and systematically for the whole Province.

34. The sanitary condition of the Districts generally was much the same as in the previous year; but fair progress was made in the improvement in this respect of the principal towns and stations.

35. Ten hospitals and dispensaries were open during the year, and afforded medical aid to 78,255 patients. The number is confessedly altogether inadequate for the requirements of a country like Mysore, with a population of, probably, not far short of 4½ millions; but it is impossible to take any steps towards raising it to a proper standard until the services of a sufficient number of duly qualified medical subordinates can be procured for the purpose. The Government of India having during the past year, sanctioned a project for the establishment of a local subordinate medical service with this object, a certain number of medical pupils have been entertained, and are now being trained at the several civil hospitals, whence at the close of their term of preliminary instruction thereat, they will be sent to complete their medical education at the Madras Medical College.

36. The lunatic and leper asylums at Bangalore are well managed and useful institutions. The number of patients under treatment in them during the past year was 165 and 50 respectively.

37. The number of vaccine operations performed by the vaccinators throughout the Province during the year was 96,529, of which 85,165 or

88·2 per cent are reported to have been successful. The average cost of each operation was 1 anna 9⅓ pie.

38. The operations of the revenue survey were in progress in six Districts, during the year under report; but they have as yet extended to only 28 of the 81 talooks into which the Province is sub-divided. The settlement has been fully completed in 11 talooks only. The operations during the survey year ending 31st October 1871, comprised the measurement of 972,819 acres and the classification of 998,142 acres, and during the 17 months from 1st November 1870 to the 31st March 1872, included 1,552,524 acres measured, and 1,271,830 acres classed.

39. The inám settlement was in progress in thirteen talooks, the operations of this Department having at the close of the year extended to 41 of the 81 talooks of the Province. The number of inám holdings under investigation by its officers, during the past year, was 14,531. 6,016 title deeds were issued, and the revenue realized under the settlement aggregated nearly Rs. 18,000.

The Department has been re-organized since the close of the year, the control of its operations having been transferred to the Survey and Settlement Commissioner.

40. The area of land under coffee cultivation at the close of the year was 112,840 acres, of which 30·4 per cent was held by European, and the rest by native planters. The total crop, as reported, was 3,747 tons, on which a hálat (or excise) duty of Rs. 74,948 was realized. The season was not generally considered a favorable one.

41. The progress of the youthful Chief, Mahárája Chámarájendra Wadiyer Bahadúr, during the year under review, was in all respects satisfactory, and the officiating Guardian, Mr. J. D. Gordon, C. S. I., has invariably reported favorably of his advancement in his studies and general education, the course of which has continued to be that adopted by Lieutenant Colonel Malleson, who proceeded on furlough to Europe in the beginning of the past year.

R. J. MEADE,
Chief Commissioner.

GENERAL REPORT

ON THE

ADMINISTRATION OF MYSORE,

FOR 1871–72.

PART I.

PHYSICAL, POLITICAL AND FISCAL GEOGRAPHY.

A.—PHYSICAL GEOGRAPHY.

1. AREA.—A general description of the physical geography of the Province will be found in Part I of the Administration Report for 1870—71. With regard to its area in square miles, it has been finally decided, after due consideration, that until the survey operations now in progress are concluded, the figures given in Appendix I. A, 1, which are based upon a rough trigonometrical survey, conducted by Colonel Mackenzie between 1800 and 1807, shall be accepted for all statistical purposes.

2. The area of the Districts according to these figures is as follows:—

Bangalore . . .	2,914
Kolár	2,576
Toomkoor . . .	3,608
Mysore . . .	4,052
Hassan . . .	3,292
Shimoga . .	3,798
Kadoor . . .	2,294
Chituldroog . .	4,470
Total	27,004

of which 9,106 or a little more than one-third are under occupancy, 4,498,

or slightly less than one-sixth, are arable though now unoccupied waste, and 13,399 are unculturable.

3. The difference between the figures exhibited in the statement for the past and previous official years, is owing chiefly to the area of the Province being now recognized at 27,004 instead of 29,717 square miles.

4. Out of 6,155,011 acres forming the survey area of the talooks into which the Survey Department had carried on measurement operations up to 31st October last, 1,199,593 acres, or slightly less than one-fifth, were culturable, and occupied by ryots in the year under review. Of this extent, 18,862 were irrigated from tanks and wells constructed by private enterprize, and 96,890 from Government works of irrigation. 914,685 acres were unculturable waste, 360,812 were pasture lands, and 3,679,921 acres remained unclassed.

5. It has been estimated that in all the talooks of the Province there were at the commencement of the year 2,946,318 acres of unoccupied arable land, of which only 110,961 acres were taken up in the year under report.

6. COMMUNICATIONS.—There are no water communications, but the Kávéri flows through the Province, and many of its tributaries, together with the north and south Pennar, the Palar and the Tungabhadra rivers, rise in, and traverse it. The last named river is made use of in the monsoons for floating timber from the Nagar forests.

7. The Bangalore branch of the Madras Railway enters Mysore by the Saidanúrghát approach from the plains, and is continued for a distance of 48½ miles to the town of Bangalore. 234 miles of metalled road were constructed and opened for traffic from imperial and local funds during the past year, and the total length of the made-roads in the Province up to 31st March last, was 3,072 miles.

8. CHARACTER OF SURFACE.—Appendix I. A, 2, contains a description of the character of the surface, similar to that given in the Report for 1870—71.

9. CLIMATE.—Appendix I. A, 3, gives the corrected observations recorded at the Government Observatory for each month of the calendar year. Similar returns were also forwarded from the Head Quarters of Districts; but they are not reliable.

10. A series of mean monthly observations extending over a period of five years, is also added, together with a chart illustrating the same.

11. The rain gauged at the Government Observatory at Bangalore was 29·12 inches, against 31·9 in the previous year. Of this, 22·15 fell during the south west, and 6·97 during the north east monsoons.

12. The amount of rain-fall at the Head Quarters of Districts is shewn in the margin. Though these results are not reliable, it will be seen that there was a general decrease of rain in all, except in the Shimoga and Kadoor Districts. During the south west monsoon, the fall was copious in parts of the Western Districts, and in the month of September it was in some places excessive, causing tanks to breach and other damage.

Rain-fall.

District.	1870.	1871.	Increase.	Decrease.
Bangalore ...	40·48	28·7	...	12·41
Kolár ...	35·40	22·45	...	12·95
Toomkoor ...	42·80	34·55	...	8·25
Mysore ...	34·99	27·38	...	7·61
Hassan ...	37·67	27·59	...	10·8
Shimoga ...	37·17	35·28	...	1·88
Kadoor ...	37·93	35·92	...	2·17
Chituldroog ...	26·29	18·85	...	7·45
Total.....	292·73	230·72	...	62·52
Average.....	36·59	28·70	...	7·83

13. On the eastern border there was only a scanty supply from both monsoons, and remissions were claimed for withered crops and fallow lands. There was a continued fall of rain in the Western Ghâts at the end of November, which caused a severe fresh in the Hémávati river; but from that time to the date of the cyclone in the beginning of May 1872, the weather was exceptionally dry.

14. Further particulars under this head are entered in Appendix I. A, 3.

15. *Temperature.*—The corrected mean annual temperature from the readings at the Government Observatory was 74·6, against 73·2 in the previous year.

16. The maxima were 91·9 and 90·6 in April and May, as against 93 and 94 in the same months of 1870—71.

17. During these hot months the minimum readings were, similarly, 68·7 and 68·5, as against 68° and 66.° The minimum for the year was 59,° as against 56° in 1870—71.

18. *Winds.*—The chart shews concisely the general direction of the wind in each month, which was subject to very little variation. It also shews at a glance, the mean temperature under various conditions, at different times of the year, and the average rain-fall ; and though not strictly correct, it is the most reliable record that exists on the subject at present.

B.—POLITICAL RELATIONS WITH NATIVE STATES.

19. There are no Native States in political relation with this Administration.

20. The education of the Young Mahárája, Chámarájéndra Wadiyer Bahadúr, has made satisfactory progress under the able direction of Mr. J. D. Gordon, C. S. I., who officiated as Guardian to His Highness during the year.

21. The Mahárája, who is 9 years' old, enjoys generally excellent health, and is attentive to his studies, and fond of his sports.

22. Towards the end of December, some of the members of the Mahárája's family and of the young Arsús, accompanied the officiating Guardian on a trip to Madras, which they greatly enjoyed. The results of such excursions promise to be highly useful and beneficial to those who share in them.

23. The following comparative statement shews the number of the blood relations and family connections of the Mahárája, who receive stipends from the State, as the same stood on the 31st March last :—

Detail.	Number.	On the 31st March 1871 Amount of Stipend.			Number.	On the 31st March 1872 Amount of Stipend.		
Arsús, Male	238	4,493	8	0	237	*5366	0	0
Do Female	48	1,080	0	0	48	1,080	0	0
Komárs, Male	185	3,222	0	0	180	3,132	0	0
Do Female	51	1,047	0	0	54	1,069	8	0
Siváchárs, Male	60	1,099	8	0	59	1,093	8	0
Do Female	24	451	8	0	22	433	8	0

* Includes the increase from Rs. 150 and 120 to Rs. 500 and 300 to the Mahárája's brothers, also from Rs. 150 to Rs. 500 to the Dalaváyi.

24. The Budget allotment for the Palace expenditure was Rs. 9,71,721, and the actual disbursements Rs. 8,73,137 as shewn below.

	Budget Allotment.	Actual Expenditure.	Difference. Increase.	Difference. Decrease.
Stipendiaries	1,82,796	4,90,765	7,969	...
Guardian and Controller...	48,000	53,992	5,992	...
Pensions	91,968	84,214	...	7,754
Palace Establishments	2,40,090	2,32,935	...	7,155
Supernumeraries	...	...	...	...
Supplies, ordinary and special, gifts and donations on the occasion of marriages and deaths.	2,32,209	2,05,100	...	27,109
Repairs and improvements of Palace... ...	1,29,000	56,593	...	72,407
Religious and charitable grants	22,594	32,715	10,121	...
Civil Pension Paymaster's Establishment ...	5,064	5,027	...	37
Extra charges	20,000	11,796	..	8,204
Total.....	9,71,721	8,73,137	24,082	1,22,666

C.—CIVIL DIVISIONS OF TERRITORY.

25. There has been no change in the Divisions or Districts; but the areas are given in para 2.

26. Their average areas are now 9,001 and 3,375 square miles respectively. The talooks have undergone a little change, their number having been reduced from 83 to 81 (exclusive of the Yelandúru Jahagír) by those of Yelahanka in the Bangalore and of Mysore Ashtagram in the Mysore District having been absorbed in the neighbouring talooks during the past year. Their average area is reckoned at a little more than 333 square miles.

27. *Principal Towns.*—The principal towns in the Province are Bangalore and Mysore, the former including the Cantonment, contains a population of 132,196, or, according to the rough calculations from the schedules of the recent census, nearly 150,000, and the latter 50,153. Shimoga, Toomkoor and Hassan are rising into importance.

28. *Land Revenue.*—The revenue from land, for the official year ending 31st March last, was Rs. 71,64,034, as against Rs. 72,91,498; and the gross revenue, exclusive of that from local and municipal funds, was Rs. 1,04,80,487, as against Rs. 1,05,66,657 for 1870—71.

D.—POPULATION.

29. The general census ordered to be taken on the 14th of November 1871 was completed during that night, except in the more hilly portions of the Province, where it necessarily occupied a longer period. On receipt of the forms from Government, a Committee was appointed to consider such points connected with them, as required examination, and to prepare brief and explicit instructions for the guidance of the talook, hóbli and village authorities, through whose agency it was taken.

30. Each enumerator was furnished with a printed schedule to be filled in, on which his instructions were endorsed, a certain number of houses being allotted to each according to circumstances. Villages were parcelled out into groups, the work being presided over by supervisors, who checked the enumerators' schedules by personally counting the inmates of a percentage of the houses in their range, and comparing the information so obtained with the returns. In some of the large towns, paid enumerators were employed at a trifling cost, in addition to the Government servants.

31. All the District Officers and the Presidents of the Bangalore and Mysore Municipal Boards report favorably of the general reliability of the returns; but it is at the same time admitted that some omissions may have occurred among the wandering tribes, and in a few instances among timid villagers in out of the way places, who were scared away from their houses, temporarily, by absurd and unfounded reports set afloat by designing persons regarding the ulterior intentions of Government in the matter of the census.

32. For tabulation of the result of the voluminous returns, a temporary establishment has been organized; but the condensed information will not be available until the close of the year, when a special report of the results will be submitted to the Government of India.

33. In the Kolár and *Bangalore Districts, with respective areas of 2,576 and 2,914 square miles, the tabulation of the returns for which has been completed, the population amounts to 618,954 and 685,832 souls, with an average of nearly $5\frac{3}{4}$ to one house, being an increase of more than $17\frac{1}{2}$ and 24 per cent over the old kháneshumári accounts of the year previous. Should a similar increase be found in the returns for other Districts, the Province will contain about three

*Town & Cantonment omitted.

fourths of a million more inhabitants, than estimated in the latest reports, previous to the general census.

34. The following statement shews the number of the various classes of which the population is composed :—

		No.
Christians.	Europeans	4,146
	East Indians and others of mixed descent	2,792
	Native	8,303
Hindús ...	... ...	4,191,927
Musalmáns ...	... ...	201,643
Pársís ...	... ...	32
Jains ...	... ...	12,772
Other Classes	... ...	594
	Total.....	4,422,209

35. The ratio of the population to the area of 27,004 square miles is 163·8 per square mile, against 144 of the previous year. The subjoined statement shews the proportion which the population of each District bears to each square mile of its area.

Bangalore	District		243·4
Kolár	do		221·
Toomkoor	do		134·6
Mysore	do		194·3
Hassan	do		192·3
Shimoga	do		123·
Kadoor	do		128·7
Chituldroog	do		106·2

36. The difference between these and the last year's figures, is partly owing to increased accuracy in the present returns, and to the reduction of the total extent of area already explained. Appendix D was prepared from the District returns, based chiefly upon the late census, and exhibits an increase of 148,665 souls ; but the census returns of the 14th November, when tabulated, will give more reliable figures.

37. *Emigration.*—99 men, 31 women and 8 children emigrated from Mysore during the year as shewn in the marginal statement ; but none returned to their homes in the same period.

Port of Embarkation.	Country belonging to.	Men.	Women.	Children.	Total.
Madras	Bangalore ...	4	1	...	5
	Mysore ..	1	...	...	1
Pondicherry... ...	Mysore ...	93	30	8	131
Karikal	Do.	1	...	...	1
	Total.....	99	31	8	138

Returned—*None.*

E.—FISCAL.

38. SURVEY AND SETTLEMENT.—The system of revenue survey and settlement introduced into the Province, and the progress of its operations up to 31st October 1870, were described in detail in paras 24 to 28 of the previous year's report.

39. The duration of the survey assessment was fixed under Section 25 of Bombay Act I of 1865, for periods of not more than 30, or less than 25 years, from the date of the introduction of the settlement in each case. Where special reason therefor exists, the term may be altered.

40. Of the 81 talooks of which the Province now consists, survey operations had been extended to 24 at the close of 1870, and to 28 at that of the year under report. Of this latter number, the settlement was completed in 11, and the work was still in progress in 17.

41. The subjoined comparative statement shews clearly the work performed by the measurement and classification branches of the Department, during the survey official year, from 1st November 1870 to 31st October 1871.

Year.	Measurement.						Classification.					
	Fields.			Acres.			Fields.			Acres.		
	Surveyed	Tested.	Per-centage	Surveyed	Tested.	Per-centage	Surveyed	Tested.	Per-centage	Surveyed	Tested.	Per-centage.
1869—70	69,934	5,105	7·3	1,015,756	49,619	4·9	49,531	3,819	7·7	526,568	18,782	3·5
1870—71	70,164	5,007	7·1	972,819	38,591	4·	43,112	3,319	7·7	998,142	29,142	2·9

42. The tests applied to these operations respectively shewed a mean average percentage error of 0·57 acre, against 0·62 in the previous year. The average cost of the tests applied to the measurement and classification work was 5 and 5½ pies per acre respectively.

43. The average cost per acre under both heads was 2 annas and 10¾ pies for measurement, as against nearly 2 annas and 7 pies in 1869—70, and 7¾ pies for classification, as against 1 anna 2¾ pies, shewing an increase under the former head of 3·8 pies per acre, and a decrease under the latter of nearly 7 pies per acre.

44. The results of the measurement work contrast unfavorably with those of 1869—70, as there were 9 parties at work, against 8 in the year previous; but the difficulties experienced in the Malnád talooks, as already brought to notice in para 29 of the last Annual Report, were the chief cause of the falling off. On the other hand, the classification work was very satisfactory, and the results of the tests applied shew that the work under each head was done with care.

45. The total expenditure of the year was Rs. 2,17,503, as against Rs. 2,04,069 in the previous year, shewing an increase of Rs. 13,434 which was due to the increase of one party in the year under report.

46. In addition to the figures given above, which are for the complete survey official year, there have been 579,705 acres measured and 2,73,638 acres classified, or a total number of 8,53,343 acres measured and classed, during the six months ending 31st March last; but the area operated upon cannot be considered completed, until the maps and papers have been examined during the monsoon recess; this work will appear in the report of the operations of the survey for the year ending 31st October 1872.

47. VARIETIES OF LAND TENURES.—These were fully described in paras 32 to 37 of last Annual Report. The Government land is held under the ryotwári tenure, on a money assessment, or on the batáyi system under which the Government dues are paid in kind as explained in previous reports.

48. Under the revenue survey settlement, the batáyi system, so far as the State is concerned, will wholly cease. In the meantime, the ryots can always convert their occupation of batáyi lands into that of the ordinary tenure if they please, and every encouragement to their so doing is afforded by the Government, which earnestly desires the entire abolition of this system.

49. GENERAL REVENUE.—The revenue for 1871—72, exclusive of that from local and municipal sources, was Rs. 1,04,80,487—11—9, which, with the addition of the previous year's balance of Rs. 30,09,059, raised the total demand to Rs. 1,34,89,547.

50. *Collections.*—The collection up to 31st March last amounted to Rs. 1,06,20,168—4—8, the proportion of collection on the total demand

being 78·7, as against 75 per cent for the previous year. The increase in the percentage of collections indicates increased exertions on the part of the Revenue Officers, or that the revenue has been realized more easily.

51. *Outstanding Balances.*—The outstanding balance on the 31st March last was Rs. 28,69,379—0—0, representing a percentage of 21·3, as against 25 for the previous year. This balance was composed of the items noted in the margin.

	Rs.		
Instalment for April	15,81,786	8	0
Do for May	11,86,339	14	0
Remissions granted	22,240	0	0
Forest revenue, &c.	79,012	10	0

52. Up to the 30th June, to which date the payment of revenue instalments has been extended, the collections on account of this balance amounted to Rs. 27,86,561, leaving a sum of Rs. 60,578 still outstanding, or 2·1 per cent upon the balance, as against 9 of the previous year.

53. Of property destrained for the realization of arrears of revenue, land to the value of Rs. 6,005 was actually sold, as against Rs. 2,959 in 1870—71.

54. 598,959 pattás were issued to 807,261 ryots, as against 617,303 to 823,193 in the previous year, the decrease being due to a large number of relinquishments of land in the year under review.

55 Pattás once issued stand for five years, except in the case of a change of holders, when they are renewed. Any alteration in the extent of a holding, by acquisition or relinquishment during the above time, is endorsed on the document.

56. No pattás are distributed for batáyi lands or land on which the crop is shared between the Government and the cultivator.

57. *Land Revenue.*—The land revenue was Rs. 71,64,034, against Rs. 72,91,498 of the previous year, the decrease being Rs. 1,27,464.

58. The subjoined figures shew at a glance the several items of increase and decrease under this head.

Decrease.	Rs.
Relinquishment	2,20,743
Batáyi rents	10,394
Amaráyi rents	20,810
Water-cess or Nírsarái ...	3,628
Sale of lands for building purposes, &c.	2,622
Miscellaneous	73,340
Total.....	3,31,537

Increase.	Rs.
Lands taken up	1,41,293
On account of survey operations in 4 Talooks ...	38,987
Sale of pastures	13,230
Inám Quit Rent, &c. ...	2,661
Coffee Hálat	5,173
Interest on arrears and fee for summons, notices, and distraint	2,729
Total.....	2,04,073

59. The main item of decrease was the relinquishment of land, being nearly double of that taken up in the year under review.

60. The following tabular statement shews the particulars of relinquishment, and acceptance of land in each District. It will be observed therefrom that while in all the other Districts the relinquishments were general and greater than the land newly taken up, the figures for the Toomkoor District shew the reverse. Of the land taken up in the year under report, amounting to Rs. 59,239—10—1, the Toomkoor Talook alone was credited with Rs. 49, 975. The increase appears to have been not the result of fresh applications for land, but due to the excess in the existing holdings discovered, and charged during the survey settlement.

District.	Land taken up.			Land relinquished.			Balance relinquished.			Balance taken up.		
Bangalore	4,973	3	6	45,547	5	1	40,574	1	7			
Kolár	6,294	15	0	36,589	11	1	30,294	12	1			
Toomkoor	59,239	10	1	32,719	14	10	...	...	...	26,519	11	3
Mysore	3,206	4	6	9,358	14	1	6,152	9	7			
Hassan	15,856	14	8	25,248	15	7	11,392	0	11			
Shimoga	20,499	15	3	23,561	14	5	3,061	15	2			
Kadoor	15,321	3	2	25,774	11	10	10,453	8	8			
Chituldroog	17,901	0	10	21,941	6	9	4,040	5	11			
Total.....	1,41,293	3	0	2,20,742	13	8	1,05,969	5	11	26,519	11	3

61. The large relinquishment of land in the Bangalore and Kolár Districts is explained by the Deputy Superintendent as having been due to a deficiency of rain, and a fall of prices, which latter circumstance made speculations in land less attractive in all the Districts than in previous years, in which the prices ruled so high that even an indifferent cultivator received a fair remuneration.

62. In the surveyed talooks, lands yielding a revenue of Rs. 21,498 were relinquished, being 2·1 per cent of the survey assessment. In the unsettled talooks lands valued at Rs. 1,99,244 were thrown up, the percentage being 3·1 of the assessment. The land newly taken up in the former, omitting the Toomkoor Talook, was of the value of Rs. 16,977 or 1·9 per cent of the assessment, as against 4·3 per cent in the previous year; and in the latter, Rs. 74,341 or 1·3 per cent, as against 2 per cent in 1870—71. These figures, as regards the unsurveyed talooks, must however, be considered as subject to qualification, since all the lands therein have not been assessed as in the surveyed talooks.

63. The following is a comparative statement of the revenue of the three Divisions for the last two years.

Divisions.	1870—71.	1871—72.	Increase.	Decrease.
Nandidroog	29,10,087	27,76,895	...	1,33,192
Ashtagram	19,97,259	19,74,589	...	22,670
Nagar	23,84,151	24,12,549	28,398	...
Total.....	72,91,497	71,64,033	28,398	1,55,862
Deduct Increase.....			...	28,398
Net Decrease.....			...	1,27,464

64. *Forests.*—The revenue under this head is made up of the following items.

Items.	1870—71	1871—72	Increase.	Decrease.
Proceeds from the sale of sandalwood and reserved timber ...	3,50,174	3,07,999	...	42,175
Seigniorage on timber	7,234	11,710	4,476	...
Amount realized from Pepper and Cardamom Jungles ...	7,389	8,250	861	...
Amount realized from fruit trees	14,979	14,226	...	753
Lac...	3,657	2,833	...	824
Wax and Honey	2,519	2,573	54	...
Pasturage	3,321	11,266	7,945	...
Iron	8,906	8,700	...	206
Miscellaneous	43,640	37,517	...	6,123
Total.....	4,41,819	4,05,074	13,336	50,081
Deduct Increase.....				13,336
Net Decrease.....				36,745

65. The decrease was chiefly in the proceeds of sandalwood, reserved timber, and fruit trees in the State forests.

66. The increase under the minor heads was due to the re-imposition of duty upon certain descriptions of coloring bark, and from the sale of pasture lands in the reserved forests. The net decrease was Rs. 36,745.

67. *Abkári.*—The abkári revenue was composed of the receipts from the items noticed below, all of which yielded an increase, as contrasted with the previous year.

Items.	1870—71.	1871—72.	Increase.	Decrease.
Toddy	5,12,972	5,32,864	19,892	...
Arrack	3,95,311	4,14,281	18,970	...
License fees	74,335	81,581	7,246	...
Sale of license to sell arrack	16,982	17,754	772	...
Gánja...	9,046	9,687	641	...
Miscellaneous	314	361	47	...
Total	10,08,960	10,56,528	47,568	...
Deduct Decrease			...	...
Net Increase			47,568	...

68. The increased revenue under this head was due—first, to the addition of one more distillery to the number existing in the previous year; secondly, to increased competition for the toddy contract in the Nandidroog Division; and thirdly, to the enhancement of the still head duty, from Rs. 2¾ to Rs. 3 per gallon in the Town and Cantonment of Bangalore, and from Rs. 1¼ to 1½ per gallon in the Bangalore District.

69. The arrack portion of the abkári revenue is worked under the Saddar Distillery system, which was introduced into Mysore in 1863, and the yield under it, during the past year, was the largest that has been realized since the introduction of this system, though it has not yet reached the amount of revenue derived from the renting system of former years.

70. The marginal statement shews the quantity of liquor distilled, and the amount of duty paid to Government during the year under review. Liquor paying a still head duty of Rs. 1—8—0 per gallon in the Bangalore District, is sold at Rs. 3, and arrack paying Rs. 3 per gallon in the Town and Cantonment of Bangalore is sold to the public at Rs. 4½ to 5 per gallon.

District.	Quantity.			Rate per gallon.	Amount.		
	G.	B.	D.				
Bangalore ...	123,406	4	3	1½ to 3 Rs.	2,87,363	12	7
Kolár ...	20,046	0	3	1—4—0	25,057	8	5
Toomkoor ...	6,464	0	0	1—0—0	6,464	0	0
Mysore ...	21,750	4	0	1—5—0 to 3 Rs.	28,852	10	0
Hassan ...	7,277	3	7	1—5—0 to 1½	10,237	15	3
Shimoga ...	26,877	2	4	0—14—0 to 1⅛	26,811	0	0
Kadoor ...	20,657	3	4	1 to 2 Rs.	19,851	8	1
Chituldroog ...	10,135	0	0	0-14-0 to 1 Rs.	9,642	15	0
Total.....	236,615	3	5	...	4,14,281	5	4

71. Toddy is extracted, in this Province, generally from the wild date, and in a few places from cocoanut and sago palm trees. Treessituated in inám and káyemgutta villages are excluded from the toddy contracts, but the owners of such villages are forbidden to draw toddy from the trees within their limits, except through the Government contractors to whom they are at liberty to lease the same. Where the abkári and sáyer, and similar descriptions of revenue were alienated in sannads granted by the late Mahárája, the privilege has been resumed, and compensation granted. These branches of the revenue are, therefore, now wholly managed as Government monopolies.

72. *Assessed Taxes.*—The subjoined comparative tabular statement shews the items under the head of assessed taxes.

Items.	1870—71.	1871—72.	Increase.	Decrease.
Tax on houses	1,43,887	1,58,548	14,661	...
„ shops	86,473	85,362	...	1,111
„ looms	73,818	74,742	924	...
„ oil-mills...	13,293	13,445	152	...
„ carts	7,148	34,053	26,905	...
Miscellaneous	212	544	332	...
	3,24,831	3,66,694	42,974	...
Deduct Decrease			1,111	1,111
Net Increase			41,863	

73. The increase was chiefly under the head of cart tax, which, till the year under report, had not, from some misconception, been levied throughout the Province. The tax is fixed at Rs. 2—0—0 on each cart owned by non-agricultural classes. The increase is also due to the * shikmi pattédars in the surveyed talooks having been charged with house tax, from which they had hitherto been exempted.

74. *Houses.*—The estimated number of houses was 1,005,373, against 971,998 for 1870—71, 141,629 of which, were alone subjected to the incidence of the house-tax. The number exempted from its payment was 863,744. These belong chiefly to the agricultural population and also to certain classes, who from immemorial custom have been exempted from the operation of this tax. The cess varies from 8 annas to Rs. 12—0—0 per house, the average rate being Rs. 1—2—0.

*Under or joint tenant.

75. *Shops.*—The total number of shops was 25,678, against 26,042 in 1870—71, the decrease being 364. Three hundred and fifty two shops belong to Shánbhógs, Patéls and other privileged classes exempted from the incidence of the tax.

76. The amount of the tax varied from Rs. ½ to Rs. 25—0—0 per shop, the average rate being Rs. 3—5—0.

77. *Looms.*—The number of looms at work in the year under report was 41,164, against 40,370 in 1870—71, the increase being 794. Of this number, 1,917, belonging to Patéls and Shánbhógs, were exempted from the cess. The amount of the tax ranged between 8 annas and Rs. 8—0—0, the average being Rs. 2—0—0 per loom.

78. *Oil-Mills.*—The number of oil-mills worked in 1871—72 was 3,288, against 3,279. Of this number, 4 owned by a few village headmen were exempted from the tax. The rates varied from Rs. 1 to 20, the average being Rs. 4—0—0 per mill.

79. *Customs.*—Under this head, duty on the following articles was collected and credited to Government.

Items.	1870—71	1871—72	Increase.	Decrease.
Supári or Arecanut	5,49,644	4,87,167	...	62,477
Tobacco	1,28,659	1,20,974	...	7,685
Opium	2,026	9,240	7,214	...
Pepper	4,538	3,008	...	1,530
Cardamom	2,126	3,734	1,608	...
Cocoanuts, dry	6,594	5,877	...	717
Do green	30,844	32,234	1,390	...
Betel leaves	45,788	44,196	...	1,592
Piece goods	50,447	51,319	872	...
Octroi	41,283	5,661	....	35,622
Miscellaneous	6,621	8,798	2,177	...
Total.....	8,68,570	7,72,208	13,261	1,09,623
Deduct Increase...			...	13,261
Net Decrease.....			...	96,362

80. The large amount of net decrease, *viz.*, Rs. 96,362, calls for some explanation.

81. The chief item of decrease was in the hálat, or duty on supári in the Shimoga District, the falling off, which was Rs. 64,752, was owing to diminished exports, arising from a fall in prices at the principal depôts of Bellary and Arcot, to which this commodity is chiefly exported.

82. The decrease in tobacco was nominal, as it represented the amount of duty transferred to the Bangalore and Mysore Municipalities, which in the previous year were paid only Rs. 2—8—0 of the total duty of Rs. 3—8—0, the balance of Rs. 1—0—0 per maund being retained by Government; whereas in the year under report, the whole of the duty was relinquished to them.

83. *Opium.*—The increase in opium is due to an order issued in May 1870, for the substitution of an *ad valorem* excise duty of 20 per cent upon this article, in lieu of that previously levied. There was also an increase of Rs. 716 from the proceeds of licenses for sale of the drug as a monopoly, and due to the extension of the system to the Chituldroog and Toomkoor Districts.

84. The decrease in the pepper revenue was owing to its non-exportation in the Nagar Division. The rate levied is 4 annas per maund of 24lbs.

85. The increase in the cardamom revenue was Rs. 1,607, the rate levied is Rs. 2 per maund.

86. There is on the whole a net increase in the duty on cocoanuts which is collected at 8 annas per hundred on green cocoanuts, and Rs. 0—7—6 per maund upon the dry fruit, when freed from the husk.

87. The duty on betel leaves is 2 pies per hundred in the towns of Bangalore and Mysore, and one pie elsewhere.

88. On piece goods the tax is an *ad valorem* one of five per cent.

89. The decrease in the octroi, as in the tobacco duty, was nominal, the collections under that head in the Cantonment and Town of Bangalore having been made over to the Municipality.

90. The increase in the item "miscellaneous" was due to the enforcement of the rule for the purchase of passes of from 1 to 4 pies for the transport of articles on which duty had been paid.

91. Of the amount of duty levied on arecanut and green cocoanuts, Rs. 30,618 was paid to the Sringéri Matha and other inámdars on whose behalf the same was collected in their villages, by the Government officers.

92. Rs. 18,720 was also paid to the Municipalities of certain towns from the duty realized upon arecanut and tobacco.

93. The cost of the Sáyer establishment was Rs. 37,697, against Rs. 38,308 in the previous year, the net decrease being Rs. 611—0—0. The salary of the paid establishment amounted to Rs. 29,535, and the balance of Rs. 8,162—0—0 was paid as an extra allowance to Shékdars, Shánbhógs and Patéls at 5 per cent of the collections made by them.

94. There was a small increase in the fixed establishments owing to the opening of new Kattes or Chaukís, and a corresponding decrease in the amount of remuneration paid in the shape of a percentage on collections.

95. *Salt.*—The number of salt pans worked in the year under report was 3,032, against 2,611 of 1870—1871; the increase was chiefly in the Chituldroog District, and calls for no remark. The revenue from the same was Rs. 14,244, and the rates vary from Rs. 0—1—1 to Rs. 90—0—0, which high figure obtains in only one talook.

96. *Post Office (Local).*—The Postal Department of this Government is known as the Mysore Anché. The revenue derived from it was Rs. 44,284, against 41,250 in 1870—71.

97. *Law and Justice.*—The following comparative statement shews the items of revenue under the head of law and justice.

	1870—71.	1871—72.	Increase.	Decrease.
Court Fees'Stamps	1,50,988	2,32,960	81,972	...
Magisterial fines	53,225	61,704	8,479	...
Registration fees	23,320	21,482	...	1,838
Sale of unclaimed property	3,472	3,172	...	300
Sale proceeds of Jail manufactures ...	2,355	6,456	4,101	...
Realized from convict labor	258	859	601	...
Miscellaneous	554	3,048	2,494	...
Total.....	2,34,172	3,29,681	97,647	2,138
		Deduct Decrease.....	2,138	
		Net Increase.....	95,509	

98. The net increase of Rs. 95,509 was chiefly due to the transfer to this head, of the revenue derived from the sale of Court Fees' stamps

from that of "Stamps" under which there is a corresponding decrease as explained in the next para.

99. *Stamps.*—Under the head of general stamps the revenue was Rs. 1,94,613, as against Rs. 2,93,013 in the previous year. The net decrease Rs. 98,400 was, as explained above, due to the transfer of the sale of Court Fees' stamps, from this head to that of law and justice and to a falling off of Rs. 13,000 in the sale of stamps in the year under report.

100. *Police.*—The receipts are Rs. 1,324, against Rs. 1,343 in the previous year.

101. *Public Works.*—The receipts amounting to Rs. 61,226 were composed of the items noted in the margin. Of the sum entered under the head of contributions, Rs. 13,270 was contributed by ryots in the Nandidroog Division, for the repair of works of irrigation and for the construction of a hospital at Kolár.

	Rs.
Refunds ...	27,453
Contributions ...	13,270
Miscellaneous ...	20,503
Total Rs...	61,226

102. *Mint.*—Rs. 15,525 were realized from the sale of mutilated old copper coins.

103. *Miscellaneous.*—The revenue under this item was Rs. 1,03,170, as against Rs. 1,02,702 in 1870—71.

104. INAM SETTLEMENT—*Principles.*—The principles on which the inám settlement has been based were fully explained in paras 64 to 68 of the report for the year previous, and it will only be necessary to notice briefly here the results of the operations during the year under review.

105. Since the close of the year, the Inám Department has been re-organized, the control of its proceedings being transferred to the Survey Commissioner, while the settlement is carried on under his direction by an officer styled Superintendent of Inám Settlements; under this scheme the judicial powers heretofore exercised by the Inám Officers have been withdrawn, and the charges of the Department have been reduced to Rs. 68,915—0—0.

106. The inám settlement had been previously extended to 28 talooks, and 13 as shewn in the margin were taken up during the year, raising the aggregate to 41 out of the 82 talooks, of which, including the Yelandúru Jahagír, the Province now consists.

1. Góribidanúru.
1. Chikka Ballápura.
1. Sidlaghatta.
1. Kolár.
1. Soraba.
1. Ságara.
1. Anantapura.
1. Nagar.
1. Kávaledurga.
1. Koppa.
1. Lakkuvalli.
1. Wastára.
1. Chikkamagalúru.

13.

107. 14,531 cases requiring review and confirmation by the Inám Commissioner were registered by the Assistants, as against 18,550 in the previous year.

108. The number of cases remaining on 31st March 1871 was 5,869, which, with the addition of 18,313 received from the Assistants during the year, formed a demand for the latter of 24,182 cases.

109. Of this number, 22,161 were checked and reviewed, but 18,446 only were confirmed by the Inám Commissioner.

110. The following comparative table shews the results of the inám operations during the past two years.

Ináms.	1870—71.	1871—72.
Extent in acres	108,260	88,361
Assessment Rupees	76,332	75,988
Jódi	20,343	17,504
Quit-rent	7,769	9,923

111 Although the extent and value of ináms operated upon was less than in the previous year, the quit-rent was larger, owing to the jódi being comparatively less, and certain kodagi ináms having been enfranchised at half of their assessment.

112. The particulars of sequestered ináms are shewn below with the previous year's resumptions.

	1870—70	1871—72.
Number of cases	532	1,534
Acres	1,748	3,208
Assessment Rs.	2,431	7,134
Jódi	405	482
Net value of Resumption	2,026	6,658

113. The increase was owing to a large number of resumptions of Chór Bávadi Dasavandam ináms appearing for the first time in the accounts of 1845. The nature and object of the Bávadi Dasavanda tenures was explained in paras 85 and 86 of the previous year's report.

114. The number of ináms struck off was 357, bearing an assessment of Rs. 1,628, against 117 assessed at Rs. 464 in 1870—71. These bring no revenue to the State, as the land has already been resumed, or does not exist, having been cut off by rivers, &c.

115. The annexed comparative statement shews the number and other particulars of unenfranchised personal ináms, the holders of which had the option of refusal, under the land Inám Rule VI, Clause C, and declined enfranchisement.

	1870—71.	1871—72.
Number of Cases	32	10
Acres	119	51
Assessment Rupees	263	81
Jódi	..	...
Quit-Rent	33	10

The results are gratifying, and testify to the growing popularity of the settlement.

116. The marginal statement shews the particulars of the kodagi ináms confirmed, and of those resumed owing to gross neglect on the part of the holders in carrying out their obligations for the due up-keep of the tanks, for which these ináms had been granted. The value of the resumptions has already been brought to book, but the quit-rent charged has not been levied, nor had the title deeds issued, pending the issue of the final orders on the subject of the abolition of the kodagi system, and the enfranchisement of the kodagi tenures.

	Confirmed.	Resumed.
Number of cases	.. 616	125
Acres ...	... 2,146	191
Assessment Rs.	... 7,780	1,164
Jodi ...	... 364	65
Quit-rent	... 3,134	1,099
		Net Value.

117. The financial results of the inám settlement for the year under review are as shewn below :—

Quit-rent upon enfranchised ináms ...	9,923
Net Resumptions ...	6,658
Total	16,581

118. The number of title deeds, which were delivered to inámdars was 6,016, against 7,302 in the previous year.

119. 180 cases were disposed of, against 114 in the previous year.

120. Ináms of the value of Rs. 71--3--0 were resumed, as against Rs. 89—1—11 in 1870—71.

121. The statement below exhibits the operation of the Muzaráyi settlement during the year under review.

	1870—71.			1871—72.		
Cases	114			180		
	Rs.	As.	P.	Rs.	As.	P.
Muzaráyi payments commuted into land	...	...	...	49	10	0
Do merged in jódi	106	0	0	8	12	0
Do resumed	89	0	0	71	3	0
Do confirmed	3,930	0	0	2,391	7	0
Total disposed of.....	4,125		0	2,521	0	0

122. The figures in the following statement shew the results for each year of the four years' settlements, exclusive of receipts from miscellaneous items, such as fines, savings, stamp duty, &c.

No.	Items. Permanent.	1868—69.			1869—70.			1870—71.			1871—72.			Total.		
		Rs.	As	P.	Rs.	As	P.	Rs.	As	P	Rs.	As	P	Rs.	As	P
1	Quit-Rent	4,334	0	0	2,694	0	0	7,770	0	0	9,923	0	0	24,721	0	0
2	Net value of land inám resumed	581	0	0	2,054	0	0	2,026	0	0	6,658	0	0	14,335	0	0
3	Muzaráyi resumptions ...	...	...	...	226	0	0	89	0	0	71	0	0	386	0	0
	Total.....	4,915	0	0	4,974	0	0	9,885	0	0	16,652	0	0	39,442	0	0

123. Several ancient and modern grants were examined during the year, the sannads in three cases conveyed full powers of alienation, and the holders were, therefore, exempted from enfranchisement at the inám settlement.

124. The cost of the Inám Department was Rs. 74,155, against Rs. 93,688 in the previous year. The aggregate value to Government of the results of the operations up to 31st March last, was Rs. 39,442 under the head of permanent revenue, which is more than 50 per cent of the cost of the Inám Department under its revised organization.

125. The particulars of the estimated value of the various classes of ináms in the Province are contained in the statement appended to para 87 of the previous year's report.

PART II.

PROTECTION.

A.—LEGISLATIVE.

126. The following Acts of the Legislative Council of the Government of India were extended to Mysore, during the year 1871—72.

Act XXVII of 1870,	"To amend the Indian Penal Code."
Act VIII of 1871,	"Indian Registration Act."
Act IX of 1871,	"Indian Limitation Act."
Act VII of 1867,	"To reduce the penalty for purchasing arms, and ammunition, &c., from soldiers."
Act XXV of 1871,	"To amend the Railway Act."

B.—JUDICIAL.

127. *Courts of Justice.*—At the close of the past year there were 124 tribunals in the Province for the disposal of criminal, civil, and revenue cases, or in the proportion of one tribunal to 34,464 persons. Of the officers presiding over them, 21 were European (one Civil Covenanted, 17 Military, and 3 Uncovenanted) and 166 were Natives.

128. Twenty of these Courts exercised criminal jurisdiction only, 10 civil jurisdiction only, and 94 Courts exercised both criminal and civil jurisdiction. Original and appellate jurisdiction was exercised by 16 Courts in criminal cases, including 3 Courts of Sessions, and by 11 Courts in civil cases.

129. *Change effected in the Small Cause Court.*—During the last quarter of the year, the Bangalore Court of Small Causes was reconstituted under Act XI of 1865, or the Mofussil Small Cause Court Act; the second judgeship being abolished and a Registrar appointed with jurisdiction over claims not exceeding 5 Rs. in value, which was, however, subsequently raised to Rs. 20.

130. *Cost of the Courts.*—The cost of all the tribunals was defrayed from the revenues of the Province, and amounted to Rs. 7,62,240—5—3.

The net receipts from stamps amounted to Rs. 2,26,614—0—7, against Rs. 1,85,297—15—10 in 1870.

131. *Description and Powers of Courts.*—The number of Courts and the powers exercised by the presiding officers are given below in detail.

No. of Courts.	Denominations of Presiding Officers.	Criminal Powers.	Civil Powers.
...	Péshkárs	2nd Class Sub-Magistrates ...	...
...	Sheristadars	Do do ...	...
82	Amildars	Do do ...	Original Suits up to Rs. 50
1	Sar Amin	Do do ...	...
2	Town Magistrates ...	Full powers of a Magistrate.	...
9	Judicial Assistants ..	...	Original Suits from Rs. 50 to 3,000.
1	Judge, Small Cause Court.	...	Small Cause jurisdiction up to Rs. 1,000.
8	Assistant Supts. ...	1st Class Sub-Magistrate ...	...
9	Do do ...	Full powers of a Magistrate.	...
8	Deputy Superintendents.	Do do ...	Original suits from above Rs. 3,000 to 10,000, and appeals from the decisions of Amildars.
3	Superintendents ...	Powers of a Session Judge ...	Original suits above Rs. 10,000 and appeals from the decisions of Judicial Assistants.
1	Judicial Commissioner.	Powers of a High Court ...	Hears appeals from the decisions of Superintendents and Deputy Superintendents, and special appeals from the decisions of Judicial Assistants and Amildars: also exercises the powers of Courts of reference and revision.

132. CRIMINAL JUSTICE.—*Number and Classification of Offences.*—The number of offences reported under each class during the past and previous years, and the percentages of increase and decrease are tabulated below, from which a general decrease will be seen, except in regard to class II, offences against the person, which shews an excess of 345.

CLASS.	1870.	1871	Increase.	Decrease.	Percentage of— Increase.	Decrease.
Class I.						
Against the State or public (chapters VI to XV, Indian Penal Code) ...	847	813	...	34	...	4·18
Class II.						
Against the person (chapters XVI, XIX, XX to XXII)	10,040	10,385	345	...	3·32	...
Class III.						
Against property (chapters XVII, and XVIII)	7,552	7,256	...	296	...	4·08
Class IV.						
Not included in the above and under special laws	2,034	1,858	...	176	...	9·42
Total.....	20,473	20,312	...	161	...	0·72

133. These offences are again classified and compared hereunder by Divisions, the result shewing that, of the total number reported, nearly half were in the Nandidroog Division, which includes the large town of Bangalore, and the smallest number in the Nagar Division.

Divisions.	Class I.		Class II.		Class III.		Class IV.		Totals.	
	1870	1871	1870	1871	1870	1871	1870	1871	1870	1871
Nandidroog	257	312	4,891	5,409	2,689	2,710	1,751	1,586	9,588	10,017
Ashtagram	265	303	3,249	3,100	3,084	2,633	138	65	6,736	6,101
Nagar	325	198	1,900	1,876	1,779	1,913	145	207	4,149	4,194
									20,473	20,312

134. With the exception of the Bangalore District, no system was in force in the Province during the year, for striking off false cases from the returns.

135. Under Class II, there has been an increase of offences reported n all the Districts, with the exception of Hassán and Shimoga; and similarly a decrease of crime under Class III, with the exception of Chitul-droog and Toomkoor.

136. The cases of murder amounted to 63, against 62 in the previous year.

137. Of 104 dacoities reported, 78 were actually perpetrated, against 97 in 1870, and in the Ashtagram, and Nandidroog Divisions they were chiefly committed or aided by organized or professional gangs of robbers. Their occurrence in each District is shewn thus:—

Division.	District.	Committed.	Reported.
Ashtagram.	Mysore	11	11
	Hassan	11	14
Nandidroog.	Bangalore	8	9
	Kolár	4	4
	Toomkoor...	19	24
Nagar.	Shimoga	6	19
	Kadoor	9	12
	Chituldroog	10	11
	Total.....	78	104

138. With the exception of one case in the town of Mysore, where the girl was promptly recovered by her parents, there have been no cases of kidnapping female children for immoral purposes.

139. *Number of offences brought to trial.*—Of the 20,312 offences reported, 18,102 or 89 per cent were brought to trial during the year, against 19,254 in 1870, shewing a decrease of 6 per cent; and the following figures shew the number of persons involved therein, with the general results of the trials for the past and preceding years:—

	1870.	1871.
Pending on 1st January	277	304
Brought to trial	42,692	39,741
Total.....	42,969	40,045
Acquitted or discharged	30,072	27,412
Convicted	12,496	12,474
Died, escaped or transferred... ...	97	13
Remaining under trial on 31st December	304	146

140. Of the 40,045 persons brought to trial, 18,257 were arrested by the Police or sent in under warrants, and 20,947 attended on summonses; as compared with the previous year, the result shews that there was an increase in the number of persons arrested of 124 or 0·68 per cent, and a decrease in that of persons who attended the Courts on summons of 2,841 or 13·56 per cent.

141. The percentage of convictions to acquittals is 31, as compared with 29·36 in 1870 and 33·63 in 1869.

142. The number of persons discharged without trial amounted to 10,233, against 9,945 in the previous year. The Judicial Commissioner attributes this evil to the fact of Péshkars and Sheristadars, (the Subordinates of Talook Sub-Magistrates) whose untried judgment and inexperience apparently unfit them to exercise magisterial powers, being empowered to receive and deal with complaints.

143. *Cases disposed of by the Courts.*—The proportion of cases disposed of by each class of Magistrates, and the ratio of persons convicted and committed to trial, is shewn to have been—

	Cases disposed of.				Persons involved.				Ratio of persons committed to trial.			
	1870.	1871.	Increase.	Decrease.	1870.	1871.	Increase.	Decrease.	1870.	1871.	Increase.	Decrease.
Péshkars ...	3,592	2,918	...	674	7,474	6,426	...	1,048	30·20	32·18	1·98	...
Sheristadars ...	39	1,132	1,093	...	200	2,722	2,522	...	20·50	26·67	6·17	...
Amildars ...	10,192	9,382	...	810	25,037	22,121	...	2,916	27·85	30·97	3·12	...
Sar-Amins ...	1,932	1,545	...	387	3,392	2,844	...	548	44·43	33·41	...	11·02
Town Magistrates	541	619	78	...	768	1,067	299	...	40·64	44·05	3·41	...
Asstt. Superintendents ...	2,319	1,862	...	457	5,639	4,426	...	1,213	32·05	37·12	5·07	...
Deputy Superintendents ...	315	304	...	11	642	780	138	...	52·32	52·31	...	·01
Total.....	18,930	17,762	1,171	2,339	43,152	40,386	2,959	5,725	30·86	32·45	1·59	...

144. The percentage of commitments and convictions, and of acquittals and discharges to the number of persons tried before the Magistrates' Courts throughout the Province, is shewn to have been—

	Convicted or Committed.	Acquitted and Discharged.		
No. of persons	13,232	19,976	9,944	in 1870.
Percentage	30·68	46·28	23·04	
No. of persons	13,106	17,047	10,233	in 1871.
Percentage	32·45	40·23	25·32	

145. *Witnesses.*—57,657 witnesses were examined by the Courts, against 57,310 in 1870; shewing an increase of 347, notwithstanding the decrease in the number of cases brought to trial. Of those who attended from May 1871 to the close of the year, 86·6 per cent were discharged on the first day, 12·2 per cent on the 2nd day, and about 0·8 per cent on the 3rd day. The remainder were detained for periods varying from 4 to 30 days.

146. *Duration of trials.*—The average duration of criminal trials before the several classes of Courts, during the past and previous years, is contrasted hereunder:—

	1870, Days.	1871, Days.	Increase.	Decrease.
Péshkars	8·5	8·1	...	·4
Sheristadars	9·4	7·	...	2·4
Amildars	7·7	10·	2·3	...
Sar-Amins	1·88	1·3	...	·58
Town and Cantonment Magistrate ...	4·3	4·9	·6	...
Assistant Superintendents	6·4	9·3	2·9	...
„ full power Magistrates... ...	8·2	10·2	2·	...
Deputy Superintendents	10·7	7·7	...	3·
„ with enhanced powers... ...	7·16	12·2	5·04	...
General Average.....	8·62	8·2	...	0·42

147. *Session Trials.*—The number of cases committed for trial to the Courts of Sessions during the year was 173, involving 382 persons, against 145 cases involving 352 persons in 1870. There has been a general increase in each Division, and a marked increase in the percentage of convictions in the Ashtagram and Nandidroog Divisions, as shewn below:—

	No. of Cases.		No. of Persons.		Percentage convicted.		Percentage acquitted.	
	1870.	1871.	1870.	1871.	1870.	1871.	1870.	1871.
Judge of Ashtagram	33	36	99	58	59·57	71·93	40·43	28·07
„ Nandidroog ...	58	74	137	186	44·12	63·93	55·88	36·07
„ Nagar	54	65	116	133	66·35	66·67	33·65	33·33
Total.....	145	173	352	382	55·34	67·19	44·36	32·81

148. *Punishments.*—The nature of punishments inflicted by the Courts, and the number of persons punished during the past and previous years, is given in the subjoined statement, which shews a slight decrease in 1871.

PUNISHMENTS.	1870.	1871.	Increase.	Decrease.
Death	25	32	7	...
Transportation for life...	12	23	11	...
Do for a term	...	...	...	...
Imprisonment, rigorous, with solitary confinement	23	13	...	10
Do do without do	1,165	1,216	51	...
Do simple	732	686	...	46
Forfeiture of property	...	...	...	...
Fine with imprisonment	1,177	1,207	30	...
Do without do	9,198	9,136	...	62
Whipping in addition to other punishment	28	18	...	10
Do in lieu of other do	103	77	...	26
Security to keep the peace	2	16	14	...
Recognizance	6	24	18	...
Security for good behaviour	30	26	...	4
Total.....	12,501	12,474	131	158
Deduct Increase.....				131
Net Decrease.....				27

149. *Fines.*—10,343 persons were fined in the aggregate sum of Rs. 84,202—7—0, while in 1870, 10,378 persons were fined to the amount of Rs. 59,047. The average being Rs. 8—1—11, against rupees 5—11—0 in the previous year.

150. Of the total fines imposed, Rs. 47,459—13—8 were realized, of which Rs. 3,559 were paid away as compensation. The percentage of realizations was 56·4, against 71·24 in the preceding year.

151. *Trials by Assessors.*—During the year 241 cases were tried with the aid of assessors, against 190 in 1870. Of these, 72 were tried by the District Magistrates exercising enhanced powers under Section 445, A, Act VIII of 1869; and in 68 instances the Magistrates concurred with the assessors. In the Sessions Courts, the Judges were aided by assessors in 169 cases, in 34 of which they differed from the assessors. The average number of assessors engaged in each trial was two in Courts of the Ashtagram and Nagar Divisions, and three in those of the Nandidroog Division.

152. *Appeals.*—The statement below shews the number of appeals preferred during the year to the several appellate Courts, and the ratio of appeals to the number of appealable original decisions.

Original Courts.	No. of appealable original cases decided during the year.	No. of appeals preferred from appealable cases.	Percentage of appeals to appealable decisions.
Subordinate Magistrates	6,866	361	5·2
Magistrates with full powers	616	71	11·4
Sub-Sessions Judges	48	20	41·7
Sessions Judges	129	85	65·9
Total.....	7,659	537	7·0

153. The number of appeals for disposal, including the number pending at the close of 1870, was 558, involving 970 persons, being an increase of 136 cases and 244 persons over the returns for 1870. Of the appeals preferred, the Bangalore Cantonment Magistrate disposed of 13, the Assistant Superintendents of Bangalore, Mysore and Hassan of 18, the Deputy Superintendents of 331, the Session Judges of 73, and the Judicial Commissioner of 114 cases, leaving 9 pending at the close of the year.

154. *Result of Appeals.*—In appeals disposed of by the Judicial Commissioner, the orders in 77·78 per cent were confirmed. In those disposed of by the Sessions Judges and by the District Magistrates, the orders were confirmed in 75·3 per cent, and 61·32 per cent of the cases

respectively, the general results of the criminal appeals preferred are tabulated below.

APPEALS.	1870.		1871.	
	Cases.	Persons.	Cases.	Persons.
Pending from last year	20	35	21	50
Received during the year	402	691	537	920
Total.....	422	726	558	970
Appeals or applications rejected	76	114	100	127
Sentences confirmed	176	275	266	446
Sentences modified	37	82	62	121
Do reversed	102	179	103	217
Proceedings quashed	5	17	2	12
Further enquiry or evidence ordered... ...	5	9	15	31
Cases referred for revision to High Court ...	...	...	1	1
Total.....	401	676	549	955
Pending at the end of the year	21	50	9	15
Total.....	422	726	558	970

155. *Duration of Appeals.*—The general average duration of appeals was 25·6 days, against 20·97 days in 1870. In the Courts of the Nagar and Ashtagram Divisions, the average has risen from 22 and 20 days respectively in 1870, to 41 and 33 days in 1871 ; but in the Nandidroog Division, the result has been favorable, the average being 15 days, against 22 in the preceding year. In the Court of the Judicial Commissioner the duration was 24 days, or 1 day less than in 1870.

156. The average duration of appeals to District and Division Magistrates throughout the Province was 11·7 days, as compared with 16 days of the year before.

157. *Sentences referred.*—25 cases, including 4 pending at the close of 1870, or 5 in excess of that year, were referred to the Court of the Judicial Commissioner for confirmation of the sentence of death passed by the Courts of Sessions on 40 prisoners. In 24 instances the sentence was confirmed, in 7 it was modified to transportation for life. In 8 instances the prisoners were acquitted, and one case (involving one prisoner) was pending at the close of 1871.

158. *Revision.*—Seven applications for revision, under Section 404 of the Criminal Procedure Code, were made during the year to the Judicial

Commissioner's Court as a Court of Revision, of which one was rejected, the orders in four cases were confirmed, one was quashed, and one was remanded for further enquiry.

159. Under Section 434, 25 references were made; of these, 7 were confirmed, 2 modified, 14 reversed, and 2 were remanded for further enquiry.

160. CIVIL JUSTICE.—*Number of Original Suits instituted.*—The number of civil suits instituted in all the Courts of Mysore during the past year was 20,764, or 230 more than were filed during 1870. The excess has occurred in the Ashtagram Division, where litigation has been steadily increasing for several years past, and is said to be due partly to the advancing condition of the people; partly to the greater facilities extended to the suitors in the prompt disposal of suits, owing to the establishment of the Judicial Assistants' Courts, and to the reduced rates of institution fees under the Court Fees' Act.

161. *Number of suits instituted in each District.*—The number of suits instituted in each district, (excluding 11 in the Superintendents' Courts) and the percentage of increase or decrease as compared with the figures of 1870 are thus shewn :—

	1870.	1871.	Difference.		Percentage of Increase.	Percentage of Decrease.
			Increase.	Decrease.		
Bangalore, including the Court of Small Causes	9,977	9,312	...	665	...	7·14
Kolár	2,383	2,824	441	...	15·62	...
Toomkoor	3,119	1,231	112	...	9·09	...
Mysore	2,609	2,802	193	...	6·88	...
Hassan	852	1,011	159	...	15·72	...
Shimoga	1,607	1,354	...	253	...	18·68
Kadoor	1,149	1,253	104	...	8·30	...
Chituldroog	830	966	136	...	14·07	...

162. *Description of suits instituted.*—The following comparative statement shews the number of each description of suits instituted during the past and previous years :—

	1870.	1871.
On written obligation...	11,512	11,407
On unwritten do	2,106	1,996
On account stated	914	1,005
Money had and received	184	230
Goods sold	3,554	3,335
Breach of contract not mentioned below	284	433
Rent not falling under the rent law	438	424
Movable property or value thereof	661	599
Damages	110	184
Other Suits.		
Suits for immovable property	412	602
„ for specific performance of contract	88	113
„ to declare and establish rights to real property including pre-emption, foreclosure, &c.	81	248
„ to declare and establish personal rights	95	69
„ for an account	...	5
„ relating to religious endowments	10	4
„ to set aside judgments, contracts or obligations on the ground of fraud	1	7
„ for dissolution of marriage	2	3
„ for enforcement of matrimonial rights	16	26
„ partition	41	63
„ relating to religion and caste...	25	11
Total.....	20,534	20,764

163. The number of suits for disposal, including 1,437 pending from the preceding year and 26 cases transferred from one Court to another, was 22,227, being 247 more than in 1870. Of this number, 21,253 cases were disposed of, or 710 in excess of the number disposed of in 1870, leaving a balance of 974 suits pending at the close of the year, against 1,437 at the close of 1870.

164. The number of suits for disposal, disposed of, and pending at the close of the year before each class of Court, as well as the average number of suits decided by the officers of each Court is given below :—

	Suits for disposal.	Disposed of	Pending.	Average No. decided by the Officers of each Court.
Bangalore Small Cause Court... ...	7,029	6,915	114	3,457
Amildars	8,192	8,106	86	99
Judicial Assistants	6,913	6,152	761	683
Deputy Superintendents	76	67	9	8
Superintendents	17	13	4	4
Total.....	22,227	21,253	974	204

Of the 974 cases remaining at the close of the year, 174 were pending over two months, and 54 over four months.

165. *Value of suits.*—The number and the aggregate and average value of suits disposed of are hereunder tabulated:—

Value.	Number of Original Suits disposed of.—	Aggregate Value of Suits.	Average Value of Suits.
Not exceeding Rs.... ... 5	2,436	7,585 5 5½	3 1 10
Do. 20	5,563	68,326 7 5½	15 3 6
Do. 100	8,990	4,35,048 8 1½	48 5 10
Do. 500	3,566	7,33,939 8 1	205 13 0
Do. 1,000	405	2,78,562 5 5	687 12 11
Do. 5,000	246	4,67,635 11 5	1,900 15 4
Do. 10,000	20	1,32,462 4 1	6,623 1 10
Do. 1,00,000	11	1,81,047 9 0	16,458 13 10
Exceeding Rs. 1,00,000	2	6,01,799 12 4	3,00,899 6 2
Total.....	21,239	29,06,407 7 3½	136 13 6
In 1870 the Totals were.....	20,201	20,98,986 0 0	103 0 0

Of the above, 37 per cent were valued at sums below 20 Rs., 42 per cent below 100 Rs., and only 21 per cent at sums above 100 Rs; but among the latter were 8 suits decided by the Superintendent of Ashtagram involving Rs. 7,03,996, two alone of which amounted in value to Rs. 6,01,799.

166. The percentage of these cases is given below under the several heads indicated:—

	1870.	1871.	
Decided on merits. ...	82	79	Per cent in favor of plaintiff.
	18	21	Do do defendant.
Uncontested.			
Plaints rejected or returned. ...	5	5	Per cent.
Dismissed for default ...	12	15	„
Withdrawn with leave ...	4	5	„
Compromised ...	26	21	„
Decreed on confession ...	25	25	„
Decreed *ex-parte* ...	27	28	„
Dismissed *ex-parte* ...	1	1	„

167. Of the aggregate number of suits disposed of, 23·4 per cent

were decided on the merits, and 76·6 were uncontested. This result is the same as in the preceding year.

168. *Average duration of suits decided.*—The average duration of suits in each class of Courts is compared below, with the figures of 1870:—

	Duration of contested suits in days.		Duration of uncontested suits in days.	
	1870.	1871.	1870.	1871.
Bangalore Small Cause Court	14	15	13	16
Amildars	50	38	25	25
Judicial Assistants	53	70	38	53
Deputy Superintendents	129	86	44	45
Superintendents	315	148	86	171
General Duration.....	44	49	24	29

169. The general average duration of suits in the several Courts as regards contested and uncontested suits was longer during 1871 by five days than in 1870, being 49 and 29 days, against 44 and 24 days respectively. This is chiefly owing to the fact that last year the Courts of the Judicial Assistants were for the first time closed for the two months' recess.

170. BANGALORE SMALL CAUSE COURT.—*Suits instituted and disposed of.*—During the year, 6,751 suits were instituted in the Bangalore Court of Small Causes, against 7,189 in the preceding year, shewing a decrease of 438 suits; the value of the suits was Rs. 2,47,604—14—10, against Rs. 2,44,485—5—9 in 1870, or Rs. 3,119—9—1 in excess. Including 278 cases pending at the end of the previous year, there were 7,029 suits for disposal, of which 6,915 were disposed of against 7,165 in 1870, at an average duration of 15 for contested and 16 for non-contested suits, against 14 and 13 days respectively in 1870. Of the above cases, 1,152 or 16·6 per cent of the whole were contested and disposed of on the merits, 75 per cent of which were in favor of plaintiffs; 5,763 suits were non-contested, of which about 41 per cent were compromised, 33 per cent were decreed *ex-parte*, 11 per cent on confession, and 11 per cent were dismissed for default.

171. In explanation of the decrease of the institutions in the Bangalore Small Cause Court, the Judicial Commissioner states that "the "Mofussil Small Cause Court Act of 1865, and the Court Fees' Act, "came into operation in the Court on the 1st October 1871, and the "falling off in the number of suits took place subsequent to the intro- "duction of these Acts."

172. *Income and Expenditure of the Small Cause Court.*—The income derived from commissions and fees amounted to Rs. 38,979—6—2, which, after deducting the cost of the establishment and other contingent expenses, left a surplus of Rs. 4,751—6—11, against Rs. 5,431—7—1 of the year previous.

173. *Appeals.*—The number of appeals preferred to the various Courts was 672, against 649 in 1870. The total number for disposal, inclusive of the appeals pending at the close of the preceding year, was 740; of these, 681 were disposed of, 1 was transferred, leaving 58 pending on the 31st December last.

174. Of the number disposed of, the orders in 403 cases were confirmed, 73 modified, 100 reversed, 56 remanded, and 49 were dismissed for default.

175. The work of the several appellate Courts and the average duration of appeals in each, for the two past years, is shewn hereunder:—

Appellate Courts.	Appeals, 1870.	Disposed of, 1871.	Average Duration of each Appeal.	
			1870, Days.	1871, Days.
Deputy Superintendents	297	277	47	35
Superintendents	266	253	62¼	70
Judicial Commissioner. Regular Appeals	160	13	43	29
Judicial Commissioner. Special Appeals...		138		37
Total.....	683	681	51	46

176. The number of appeals preferred to the appellate Courts from each class of subordinate Courts, the ratio of appeals to decisions, the number of decisions affirmed, and the ratio of affirmed to decided cases, is tabulated below:—

Appeals from the original decisions of—	No. of appeals preferred.	Ratio of appeals to decisions.	No. of decisions affirmed.	Ratio of affirmed to decided cases.
Amildars to Deputy Superintendents	282	3·18	144	51·9
Judicial Assistants to Superintendents ...	292	4·74	163	64·4
Deputy Superintendent and Superintendents } to Judicial Commissioner.	16	48·2	7	53·8
Special appeals from Deputy Superintendents and Superintendents. } to do do	150	28·3	89	64·4

177. The number of appeal cases confirmed was slightly in excess of the number for 1870. The remands were 56, against 53 in 1870 and 70 in 1869.

178. *Execution cases.*—The total amount realized in execution of decrees was Rs. 17,23,280—11—9, or about 74·3 per cent of the aggregate value of the decrees put into execution.

179. Of the total amount realized, Rs. 13,52,724—5—7 were recovered by complete execution of decrees, and Rs. 3,70,556—6—2 by partial execution.

180. The prescribed statistical return is given in Appendix II. B, 1—12.

REGISTRATION.

181. The new Indian Registration Act was introduced into Mysore from the 1st September 1871.

182. The aggregate number of deeds of all kinds registered was 7,281, against 8,178 in the preceding year.

183. *Statistics of Compulsory and Voluntary Registration.*—The number of compulsory registrations under Section 17 of the Act, relating to immovable property of Rs. 100 and upwards, was 5,239, against 6,086 in 1870—71, or a decrease of 847 ; and that of voluntary registrations under Section 18, relating to a similar description of property, was 1,612, against 1,619 in 1870—71.

184. *Registration of Immovable Property.*—Since 1870—71, there has been a decline of about 12 per cent in the number of documents affecting immovable property in the compulsory and optional classes. This is ascribed partly to a modification of the clause of the old Act

which prohibited an unregistered document, (if registrable compulsorily) from being acted on by any public officer; while Section 49 of the new Act only interdicts its being received as evidence of transactions affecting immovable property, or authorities to adopt; another cause of decline may be traced to the facilities afforded in most large towns in Mysore by new banking associations for obtaining loans without the security of immovable property. In Hassan, Kadoor and Shimoga, the coffee growing districts, the decrease is accounted for by the exemption of coffee grants from compulsory registration. The total value of the property dealt with is reported to have been Rs. 30,99,706, in relation to which the registration fees levied amounted to about 6½ annas per cent.

185. *Registration of Movable Property.*—In the number of documents relating to movable property, such as bonds, personal contracts, &c., there was also a slight falling off, which may be regarded as casual. The value of the property concerned was Rs. 4,55,196, the fees being at the rate of 3 annas and 9 pies per cent.

186. *Unregistered Documents.*—There were 56 registrations on payment of penalty, against 52 in the previous year, the amount of penalty levied was Rs. 655—2—0.

187. *Specially registered Documents.*—Under Section 52 of the old Act, 90 documents were specially registered, against 259 in the preceding year. Special registration has been abolished by the new law.

188. *Registration of Wills.*—There were 13 wills registered, and 2 deposits and one withdrawal of sealed covers. Under the operation of the new Act an extension of the practice of registering wills and authorities to adopt, may be expected, as it empowers Sub-Registrars in the talooks, and not Registrars at District Head Quarters only, to register such documents. The registration of authorities to adopt is made compulsory by the new Act.

189. *Memoranda of Court Decrees registered under Sections* 41 & 42. —As the new Act does not provide for the issue of memoranda of decrees, a marked diminution in the number of such documents has taken place. In lieu thereof certified copies of decrees are allowed to be registered at the

option of the holders, and 26 were so registered, after the introduction of the Act.

190. *Refusals to register.*—During the year the number of orders of refusal was 172, and of appeals 22, of which 12 cases were successful.

191. The average amount of fees on each document, excepting wills and decree memoranda, was Rs. 1—14—4, or one pie more than in 1870-71. The proportion of fees was Rs. 0—6—6 per cent on the value of immovable, and Rs. 0—3—9, of movable property.

192. *Financial Results.*—The aggregate receipts were Rs. 20,945—11—4, and the disbursements Rs. 17,371—15—5, leaving a surplus of Rs. 3,573—11—11, or Rs. 2,092—11—4 less than that realized in the exceptional year 1870—71, but better than any of the four years immediately preceding it. There has been no increase in the total expenditure of the Department, although the travelling charges were high, owing to the extended inspection of local offices.

C.—PRISONS.

193. *General Remarks.*—There are now in the Province 8 jails and 84 lock-ups: the statistics of which will be found in Appendix II. C, statement Nos. 1 to 22.

194. The total number of convicts (including 1,614 remaining at the close of the previous year) amounted to 5,463, against 5,365 in 1870.

Of these there were removed or released—

	No.
By acquittal on appeal	76
On expiry of sentence	3,124
On payment of fine	445
On account of sickness	6
For good conduct	5
Transported	21
Transferred to other Jails	207
Transferred to the Lunatic Asylum	2
Escaped	3
Executed	21
Died...	39
Remaining on the 31st December 1871 ...	1,514
Total....	5,463

195. *Classes of Prisoners.*—The comparative table below exhibits the different classes of persons imprisoned during the past and previous years:—

	1870.	1871.
Europeans	17	5
Eurasians	5	9
Native Christians	35	56
Mahomedans	626	535
Hindús	4,129	4,291
Other Classes	393	422

Compared with the previous year, the number of male convicts have increased by 146, and that of females by 33.

196. *Imprisonment.*—The classification of prisoners (exclusive of 145 received by transfer) according to length and nature of sentence is thus shewn :—

	No. of Convicts.
Not exceeding one year...	3,880
Above one year and not exceeding five years...	806
For terms exceeding five years	561
Transported for life	28
For shorter periods	18
Executed	25
Total.....	5,318

Of the above, 1,538 prisoners were sentenced to simple, and 3,780 to rigorous imprisonment. Of the latter number 88·7 per cent were kept to hard, 6·3 per cent to medium, and 5 per cent to light labor.

197. *Reconviction.*—The reconvictions amounted to 10 per cent of the total convictions, of which 6 per cent were males and 4 per cent females, against 5 and 3 per cent respectively in 1870.

198. *Escapes.*—Three convicts escaped against two in the preceding year; of these two escaped from District Jails, and one from a lock-up. One only was retaken, but one recapture was made of a convict who had escaped in former years.

199. *Conduct and Discipline.*—Only 178 convicts were punished for offences committed in jail, against 232 in 1870, shewing a further improvement in this respect. The ratio of those punished was 11·4 per cent

of the average total strength in all the jails, against 14·2 in 1870, and of those punished, ony 2 were females.

200. The greater proportion were thus punished—

	No.
For wilful disobedience	52
For idleness	21
For conspiring to escape, &c.	21
For criminal force and assault	18
For using insulting or threatening language ...	11
For wilfully disabling themselves	8
Contumaciously refusing to work	6
Causing wilful damage to prison property ...	8
For filing or cutting their prison bars ...	7
And the remaining 31 for minor offences.	

Of those, 135 were flogged, 30 suffered solitary confinement, and 6 reduction of diet, against 76, 100, and 54 respectively in 1870.

201. The good mark system is reported to have worked well ; but it has only been introduced in the Bangalore Central Jail, where closer supervision can be exercised than in the District Jails.

202. *Convict Warders.*—110 males and 3 females, who had undergone imprisonment for one year and upwards, were employed in the larger jails as prison officials, against 93 men and 2 women in 1870 ; of these, 53 males and 2 females were employed as warders, and the remainder as work overseers, and intramural and extramural guards.

203. *Education.*—Of a daily average of 1554·9 prisoners, 477·57 were under instruction, against 590·66 in 1870, being 30 per cent of the total average strength, or 6 per cent less than the preceding year.

204. Education was only imparted in the Central Jail at Bangalore and in those at Mysore and Shimoga.

205. Of the total number of prisoners received, 3,153 were quite illiterate, 378 could read and write indifferently, and 173 could read and write well. 885 received instruction ; and of these, 774 made indifferent, and 111 good progress.

206. *Expenditure.*—The total cost for the custody and maintenance of convicts amounted to Rs. 1,35,900—10—9 ; some errors having been corrected in the figures for the year 1870, the comparative table below will exhibit the total cost under the various heads :—

	Total Cost.						Cost per head of average strength.					
	1870.			1871.			1870.			1871.		
Rations	46,660	1	6	40,786	5	9	28	12	11	26	3	8
Fixed Establishment	35,057	9	4	33,564	12	9	21	9	7	21	9	5
Police Guards	44,452	14	5½	35,760	1	0	26	8	2	22	15	11
Extra Establishment	9,345	9	4	11,544	14	7	5	12	3	7	6	9
Hospital Charges	2,322	5	11	2,021	7	8	1	6	11	1	4	9
Clothing	5,382	7	0	6,419	15	0	3	5	5	4	2	1
Contingencies	7,566	9	¾	5,803	2	0	4	10	9	3	11	8
Total.....	1,50,787	8	7¼	1,35,900	10	9	92	2	0	87	6	3

207. *Jail Labor.*—The estimated earnings of the prisoners for the years 1870 and 1871 are compared below :—

	1870.			1871.		
Value of labor as Jail Servants	11,802	13	0	15,668	2	0
Building and repairing	4,992	10	0	2,085	3	0
Grinding rági, making cloths, &c, for prisoners	5,324	4	0	3,876	2	0
Employed on roads by P. W. D. or Municipalities	16,163	7	0	13,352	14	0
„ on Jail Gardens	9,751	15	0	8,794	4	0
On Manufactures	16,185	7	0	13,863	1	0
Total.....	64,220	8	0	57,639	10	0

208. The general falling off in the total estimated earnings is ascribed to a considerable reduction in the daily average strength of the prisoners, and also to the larger percentage of sick and infirm prisoners incapable of labor.

209. *Manufactures.*—The value of stock, &c., in the manufactories of all the jails at the close of the past and previous years was as follows :—

	1870.			1871.		
Raw materials ...	543	6	7	663	1	6
Manufactured goods ...	4,228	2	7	3,170	9	7
Plant and machinery ...	10,496	2	8	10,494	2	8
Total Rs.....	15,267	11	10	14,327	13	9

210. The average actual cash earnings per head of average number of prisoners sentenced to labor was Rs. 12—13—8.

211. In the Central Jail, great improvement has been made in the manufacture of woollen-pile carpets, from wool and dyes purchased in the local markets. The best Indian, Persian, and Turkish patterns have been

selected, or adapted, according to circumstances, and the carpets, so made, when sent to England, have commanded, even there, very high prices. The prisoners also turn out superior woollen horse clothing, and excellent tents in the Jubbulpore style, the cloth being woven, and all the necessary materials being made up by them. Neat and durable matting is also made from the coir, aloe and hemp-leaved Hibiscus fibres. Job printing of all kinds, and binding work, is neatly executed for Government purposes chiefly. The cultivation of the ground within the walls is attended to, and grain and good vegetables are grown for prison use. Mulberry plantations have been also formed, and experiments are being carried out with indigenous and foreign silkworms, with the view of reviving the depressed state of sericulture, by distributing to those engaged in it, cartoons of selected eggs, and by teaching them the absolute necessity that exists for the maintenance of a uniform temperature and for the observance of extreme cleanliness in all branches of this industry. The results of these experiments are, at present, in all respects most promising.

212. *Diet.*—The average monthly cost of dieting each laboring and non-laboring convict was Rs. 2—4—6 and 1—12—8 respectively.

213. Rági is the chief article of food, though rice is occasionally given in its stead, and to this cause together with the rise in market prices, is attributed the increase in dieting prisoners in the Kadoor District.

214. *Health*—The statement below exhibits the vital statistics of the prisoners for the two years:—

	1870.	1871.
Admission into Hospital	1,400	1,209
Daily average number of sick ...	46·291	38·668
Deaths	39	39
Ratio of deaths to total number of Jail population	0·73	0·71

215. Fever, dysentery, and diarrhœa were the prevailing diseases; only one case of cholera occurred in the Mysore District Jail. 1,434 prisoners gained and 324 lost weight during the year.

216. *Civil Prisoners.*—The number of civil prisoners confined during the year was 305, against 240 in 1870.

217. The total average annual cost for each civil prisoner for guard and establishment was Rs. 50—7—5, against 47—11—3.

218. *Prisoners under trial.*—There were 10,183 persons in confinement, under trial during the year, against 9,559 in 1870, and the annual cost for guard, establishment, rations and all other charges was Rs. 125 per head of average strength, against Rs. 130—9—2 in 1870.

219. BANGALORE CENTRAL JAIL.—The report of the Superintendent of this Jail, Dr. Henderson, has been printed separately with the Departmental Reports.

D.—POLICE.

220. *General Remarks.*—During the year, no changes have been made in the constitution of the Police in the Province.

221. In the Bangalore District only, where the Police were organized under the Madras Mofussil system, the new statistical forms (A to G.) have been adopted; the returns for the remaining Districts, where the old established Kandáchár peons compose the Police force, have been drawn up according to the old forms.

222. *The Strength, &c., of the Bangalore Police.*—The strength of the Bangalore District force is :—

1	District Superintendent.
1	Assistant do.
208	Subordinate Officials.
826	Constables of all Grades.
1,036	

Of these 11 were Europeans, 6 Eurasians, and the remainder natives. Nearly 68 per cent of the whole force were Hindús.

223. *Cost of Police.*—The actual expenditure on account of salaries, &c., for the Bangalore District Police, including the Cantonment and Péte, was Rs. 1,43,091—5—10, of which Rs. 1,23,843—10—0 were defrayed by the Mysore revenues, and Rs. 19,247—11—10 by the Péte Municipality.

224. *Proportion to Area and Population.*—The proportion of Police to area in this District was 1 man to every 4 square miles, and 15 men to every square mile in the Town and Cantonment of Bangalore. The proportion to population was 1 man to 844 inhabitants in the District, and to 322 inhabitants in the Town and Cantonment.

225. The comparative statement below exhibits the working of the Police during the past year :—

OFFENCES.	Reported to have been committed during the year and received by transfer.		Investigated.		Percentage of cases in which conviction was obtained to cases decided.		Number of cases struck off as false during the year.
	1870.	1871.	1870.	1871.	1870.	1871.	
Class I.							
Offences against the State, &c.	23	37	24	37	58·	57·	14
Class II.							
Serious offences against the person	128	167	118	177	56·	55·	89
Class III.							
Serious offences against person and property, or against property only	440	422	437	429	82·	77·	152
Class IV.							
Minor offences against the person	9	29	8	30	66·	33·	21
Class V.							
Minor offences against property	1,009	1,048	1,005	1,057	87·	77·	380
Class VI.							
Other offences not specified above	1,755	1,106	1,726	1,142	99·	79·	3
Total.....	3,364	2,809	3,318	2,872	95·	88·	659

226. *Police of the Kolár and Toomkoor Districts of the Nandidroog Division.*—The strength and cost of the Police in the Kolár and Toomkoor Districts, and the proportion of Police to area and population are as follows :—

	Strength.	Cost. Rs.	As.	P.
Kolár	950	59,640	0	0
Toomkoor	824	53,624	7	3
Total ...	1,774	1,13,264	7	3

	Kolár.	Toomkoor.
Area in square miles ...	2,335	2,340
Population	542,583	496,063
Strength of Police	959	824
Proportion of Police to Area ...	1 to 2·4	1 to 2·8
Ditto to Population ...	1 to 563	1 to 602

227. The operations of the Police in these two Districts, for the past two years, are tabulated below :—

Class of Crime.	1870. Persons arrested without warrant.						1871. Persons arrested without warrant.					
	No. of persons arrested.	Released without trial.	Acquitted including released on appeal or at Sessions.	Ordered to find security.	Finally convicted.	Percentage of convicted to total number of persons arrested.	No. of persons arrested.	Released without trial.	Acquitted including released on appeal or at Sessions.	Ordered to find security.	Finally convicted.	Percentage of convicted to total number of persons arrested.
Class I.												
Offences against the State, the public and justice ...	73	5	58	...	10	13·7	85	5	57	...	23	27·1
Class II.												
Offences against the person ...	315	116	132	...	67	21·27	297	70	166	5	40	13·4
Class III.												
Offences against property ...	1,563	106	1,037	...	420	26·87	1,520	417	722	...	316	20·8
Class IV.												
Offences not included in the above and breaches of special laws	139	4	88	1	46	33·1	18	...	11	...	7	38·8
Total.....	2,090	231	1,315	1	543	25·9	1,920	492	956	5	386	20·1

228. *Ashtagram Division Police.*—The strength and cost of the Police in this Division at the end of the year is shewn to be—

	Strength.	Cost. Rs.	As.	P.
Mysore Town	223	21,131	14	7
Seringapatam and Ganjám ...	56	4,044	0	0
Mysore District	1,079	68,637	0	0
Hassan do.	723	48,321	0	0
Total	2,081	1,42,133	14	7

Of this sum, Rs. 21,131—14—7 were defrayed from the Municipal funds, and the remainder from the revenues of the Province.

229. The general result of the working of the Police during the past and previous years is classed thus :—

CLASS OF CRIME.	1870. Persons arrested without warrant.						1871. Persons arrested without warrant.					
	No. of persons arrested.	Released without trial.	Acquitted including released on appeal or at Sessions.	Ordered to find security.	Finally convicted.	Percentage of convicted to total number of persons arrested.	No. of persons arrested.	Released without trial.	Acquitted including released on appeal or at Sessions.	Ordered to find security.	Finally convicted.	Percentage of convicted to total number of persons arrested.
Class I.												
Offences against the State, the public and justice ...	17	7	9	...	1	5·9	163	65	83	...	15	9·2
Class II.												
Offences against the person ...	407	87	275	6	39	9·58	553	257	229	3	64	11·6
Class III.												
Offences against property ...	1,187	443	557	32	155	13·05	1,954	915	757	3	279	14·3
Class IV.												
Offences not included in the above, and breaches of special laws	98	19	60	...	19	19·4	68	38	5	17	8	11·7
Total.....	1,709	556	901	38	214	12·5	2,738	1275	1,074	23	366	13·4

230. *Nagar Division Police.*—In this Division, the total strength of the Police of all ranks, exclusive of the Village Police, was 2,095 officers and men. The number of the Village Police was 9,757.

231. *Cost of Police.*—The cost of the Regular Police for the year was Rs. 1,33,839—8—1 and that of the Village Police Rs. 1,49,520—2—7, or a total cost of Rs. 2,83,359—10—8, as against Rs. 1,66,665—3—2 in 1870.

232. The distribution of the Regular and Village Police in the three Districts of this Division is as follows :—

	Regular Police.	Cost. Rs.	As.	P.	Village Police.	Cost. Rs.	As.	P.
Shimoga ...	848	53,292	9	6	1,508	32,449	7	6
Kadoor ...	558	36,386	14	7	1,081	1,332	1	1
Chituldroog ...	689	44,160	0	0	7,168	1,15,738	10	0

233. The comparative table below shews the results of the action of the Police for the past two years :—

Class of Crime.	1870. Persons arrested without warrant.						1871. Persons arrested without warrant.					
	No. of persons arrested.	Released without trial.	Acquitted including released on appeal or at Sessions.	Ordered to find security.	Finally convicted.	Percentage of convicted to total number of persons arrested.	No. of persons arrested.	Released without trial.	Acquitted including released on appeal or at Sessions.	Ordered to find security.	Finally convicted.	Percentage of convicted to total number of persons arrested.

Mysore Local Force.												
Distributed throughout the Province	...	...	6	2,161	...	...	...	...	4	2,597	...	...

* Including Head Quarters D. Brigade, R. H. A.

235. During the last cold season, the 16th (Queen's) Lancers proceeded from Bangalore to Secunderabad, to relieve the 18th Regiment of Hussars, which arrived in Bangalore on the 10th January 1872.

236. *Classes composing Local Forces.*—The men composing the Local Cavalry and Infantry are classed under the following denominations :—

Class or Caste.	Cavalry.	Infantry.	Total of both.
Christians ...	4	129	133
Mahomedans ...	1,132	1,621	2,753
Brahmans and Rajputs	198	142	340
Mahrattas ..	782	186	968
Gentús ...	2	37	39
Other Castes ...	43	482	525
Total ...	2,161	2,597	4,758

237. *Cost of Mysore Local Force.*—The cost of the Silédar (Cavalry) and Bár (Infantry) Regiments aggregated Rs. 11,08,308—1—1, against Rs. 11,11,129—6—5 in 1870.

238. The monthly pay of a Silédar trooper is Rs. 26, and of a first and second class Bár sepoy Rs. 8 and 7 respectively.

239. *Establishment of Horses.*—The total number of horses on the Silédar establishment on 31st March 1872 was 2,161, of which 922 were mares. Of the total number two-fifths are stated to have been bred in the force, and with the exception of about six per cent of other breeds, the remainder were either Kandahar, Persian or Mán horses.

240. Twenty-seven stallions were maintained during the year at the Kunigallu farm; of these two were English, 3 Australian, 1 Cape, and 21 Arabs.

241. The number of foals born during the year was only 71, which is considered to be a very unsatisfactory result. It has been decided to reduce the number of stallions to twenty, which will probably amply meet the present requirements on this head.

242. *Arms.*—No change was made during the year in the arms and accoutrements of either branch of the service.

243. *Chanda or Remount Fund.*—The chanda or remount fund, to which a monthly subscription of Rs. 1—8—0 is paid by each member of the mounted force and which entitles a trooper to a grant of Rs. 200 for a remount, worked very satisfactorily, and has greatly bettered the condition of this branch of the force.

PART III.

PRODUCTION AND DISTRIBUTION.

A.—FINANCE.

244. The financial results of the year 1871—72 were generally satisfactory. The revenue receipts under all heads amounted to Rs. 1,06,21,592, while the charges amounted only to Rs. 1,01,91,062. Balancing the two, inclusive of the receipts and disbursements under public debt, and adding the cash in all the treasuries of the Province on the 31st March 1871, the year under review commenced with a cash balance of Rs. 49,72,873, or Rs. 3,05,269 in excess of that on the 1st April 1871.

Revenue Receipts and Expenditure, 1871—72.

Revenue	...	1,06,21,592	
Charges	...	1,01,91,062	
			4,30,530
Public Debt.			
Receipts	...	2,08,16,408	
Disbursements	..	2,09,41,669	
			1,25,261
			3,05,269
Cash Balance, 31st March 1871			46,67,604
Cash Balance on 1st April 1872.			49,72,873

245. The surplus revenue, as obtained by deducting the expenditure incurred from the receipts realized within the year, was Rs. 4,30,530 as above noted, but basing the calculation on the assessments made for the revenue year, and excluding arrears, the result is an approximate surplus of Rs. 3,07,684 as shewn below:—

Total Receipts in 1871—72 ...			1,06,21,592
Deduct collections of Land Revenue in 1871—72 on account of arrears of 1870—71	27,49,075		
Do. on account of Mohatarfa	1,23,404		
		28,72,479	
Add outstanding at close of 1871—72 on account of Land Revenue assessment for the year ending 31st May 1872.	26,02,307		77,49,113
Do. on account of Mohatarfa	1,47,320		
		27,49,633	
Total Revenue of 1871—72			1,04,98,746
Total Expenditure			1,01,91,062
Estimated Surplus			3,07,684

Of the outstanding of 1871—72 above noted, about Rs. 25,85,030 on account of land revenue and Rs. 1,41,640 on account of mohatarfa were realized up to 31st July 1872.

246. *Land Revenue.*—The following is a summary of the receipts:—

247. The amount brought to account in the year, was Rs. 74,12,159, which included Rs. 27,49,076, arrears of 1870-71, and Rs. 86,877, minor forest produce, under the management of the Revenue Department, leaving unrealized at the close of the financial year Rs. 26,02,307, which was due on the amount of land revenue assessment for the revenue year, ending 31st May 1872.

248. The realizations were Rs. 7,23,155, or Rs. 27,000 less than in 1870-71. With the exception of the item of supári, the revenue from which, in one Division, (Nagar) fell from Rs. 4;64,000 in 1870-71 to Rs. 4,06,000 in the year under review, all the other items under this head contrast favorably, on the whole, with 1870-71, as will be seen in the margin.

	Sayer 1870-71.	Customs. 1871-72.
Tobacco	93,324	1,01,689
Piece Goods	46,287	49,964
Betel leaves	39,732	43,427
Cocoanuts, dry & fresh	37,705	37,709
Opium	2,007	9,596
Pepper & cardamom	6,351	6,295
Miscellaneous ...	5,012	8,324
Total.....	2,30,418	2,60,005

249. *Forests.*—The actuals were more than the estimates by Rs. 6,000; but the sale of timber realized Rs. 37,162 less than in 1870-71.

250. *Abkári* (*Excise on spirits and drugs.*)—This item of revenue which is steadily increasing, yielded Rs. 10,69,102, or Rs. 55,000 more than the amount realized in 1870-71.

251. *Assessed Taxes* (*Mohatarfa.*)—The receipts aggregated Rs. 3,42,772, or Rs. 67,000 in excess of 1870-71; of this sum, Rs. 17,900 was realized by the general enforcement, throughout the Province, of the tax on carts in use for trading purposes, which had previously been only partially levied.

252. *Salt.*—Rs. 14,844 were realized exceeding the actuals of 1870-71 by Rs. 4,100.

253. *Stamps.*—Under this head, Rs. 1,97,233 were realized, on account of general stamps, against 2,92,976 in the preceding year. The falling off under this head is however partly met by an increase in the revenue from Court Fees' stamps amounting to Rs. 86,667. It is satisfactory to note that under the operations of the two new Acts, the stamp revenue shews an increase of Rs. 7,000 in the year 1871-72.

254. Rupees 15,525 is credited, representing the amount realized by the sale of obsolete copper coins, when mutilated, and sold as old copper.

255. *Anché* (*Local Post Office.*)—The collections Rs. 44,368 including fines and refunds, and Rs. 415, sale of anché houses, exceed those of 1870-71, by Rs. 2,600.

256. *Law and Justice.*—The receipts under the several sub-heads, courts, jails and registration fees, amounted to Rs. 3,34,566, of which Rs. 2,28,238 were realized from Court Fees' stamps and Rs. 3,217 by stamp penalties.

257. *Police.*—Only Rs. 5,792 were credited in 1871-72, against Rs. 18,638 in the previous year. The decrease is owing to the Municipal contributions for the Bangalore Municipal Police, being excluded from the public accounts, along with the charges.

258. *Education.*—The total Rs. 34,733 includes school fees Rs. 10,164. Proceeds of school-books Rupees 14,036, educational cess Rs. 10,350, and miscellaneous items Rs. 183.

259. *Interest.*—Rs. 729 were realized from Government securities belonging to the Mysore Savings' Bank.

260. *Miscellaneous.*—Under this fluctuating head of revenue, Rs. 88,396 were credited in 1871-72, or about Rs. 6,400 more than in the previous year. The principal items are given in the margin.

	Rs.		Rs.
Gross revenue of Island of Seringapatam ...	18,100	Tolls on bridges	4,522
Fines and forfeitures ...	14,026	Staging bungalow fees ...	6,552
Savings and refunds ...	9,650	Value of private work, Government Press.	1,941
Sale proceeds of unserviceable articles ...	8,998	Subscription to Mysore Gazette	2,125
Commission fees for money orders ...	4,986	Produce of public gardens ...	1,630
		Transfer entry	7,653

261. *Local Force.—Public Works.*—These last two heads of revenue amounted respectively to Rs. 3,062 and Rs. 15,267.

262. *Expenditure.*—The gross charges against revenue in the financial year 1871-72 were less than the estimates by Rs. 5,29,689. The savings were principally under the following heads:—

		Rs.
Estimates of 1871-72	...	1,07,20,751
Charges	...	1,01,91,062
	...	5,29,689

	Estimates. Rs.	Charges. Rs.	Savings. Rs.
Land Revenue ...	11,95,998	11,19,456	76,542
Forests	1,86,600	1,59,103	27,497
Administration, Palace.	9,71,721	8,73,137	98,584
Law and Justice ...	10,65,667	9,88,645	77,022
Police	5,45,814	4,84,100	61,714
Education	2,89,768	2,52,589	37,179
Local Force... ...	11,19,408	10,96,641	22,767
Public Works ...	15,00,000	13,77,482	1,22,518

263. *Land Revenue.*—Although the savings are put down as above at Rs. 76,542, the charges, under some of the minor heads, were in excess of the estimates. The pay and allowances to Superintendents of Divisions and Deputy Superintendents of Districts amounted to Rs. 30,567 more than the sum provided, owing to the adjustment in arrears of furlough allowances paid by the Secretary of State to those officers who were absent on leave in Europe. But the excess was met by savings in the pay of Assistant Superintendents amounting to Rs. 30,827. In talook establishments, the saving was Rs. 14,500, and under revenue survey, while the provision was Rs. 2,68,500, the actual disbursements amounted only to Rs. 2,18,687.

264. *Forests.*—Under conservancy and working, the expenditure was Rs. 87,864, while the estimate amounted to Rs. 1,15,000.

265. *Administration (Palace.)*—Under the sub-head "Palace Supplies" a saving accrued on the grant of Rs. 27,000, and under "Repairs and Improvements of Palace," Rs. 72,000.

266. *Law and Justice and Police.*—The saving under law and justice was chiefly in the item "Jails," and amounted to Rs. 53,000. Under Police (Kandáchár) it was Rs. 35,000.

267. *Education.*—The amount estimated was Rs. 2,89,768, while the total charges were only Rs. 2,52,589. The savings were principally under district and village schools.

268. *Public Works.*—The ordinary grant was 15 lacs, against which Rs. 14,36,000 was advanced. The amount accounted for as expended was only Rs. 13,77,482.

269. *Public Debt.*—The credits and debits under this head amounted to Rs. 2,08,16,408, and Rs. 2,09,41,669, respectively, as already stated; an abstract of the several minor heads is subjoined. Only a few of the items call for remark.

Public Debt.

270. *Mysore Invested Surplus Account.*—The interest realized on the amount invested in Government securities was Rs. 1,01,945 in the year, after deducting income tax, which for the first time has been levied on the investments of this fund from 1871—72. The total balance at credit of the account, on the 31st March 1872, was Rs. 28,39,632.

271. *District Funds.*—The receipts under this head, during the year, amounted, in the aggregate, to Rs. 2,13,100, in which are included—

		Rs.
1.	Plough tax collections up to June 1871 ...	38,086
	Local Cess of half anna per rupee of assessment on un-surveyed lands in lieu of Plough Tax	91,239
2.	Amount transferred (namely 50 per cent) from one anna cess for local purposes in surveyed talooks...	41,310

272. The half anna cess on land revenue in unsurveyed talooks has, from the commencement of 1872—73, been credited to a separate head of "Miscellaneous Local Cesses," pending the issue of final orders for its appropriation.

273. *Miscellaneous Local Cesses.*—In addition to the half anna cess on land revenue above mentioned, a similar cess on the collections on account of sáyer, abkári, cardamom, coffee, forest produce, &c., was levied during the latter part of the year. The collections amounted to Rs. 9,466 as per following details, and have been credited to the head of miscellaneous local cesses for future appropriation.

		Rs.
Sáyer	... ...	7,851
Forest	... ...	38
Abkári	... ...	1,345
Salt	... ...	232
	Total.....	9,466

274. *One Anna Cess for local purposes.*—The collections in 1871—72 amounted to Rs. 62,584. The amount transferred to district funds for expenditure on roads was Rs. 41,310, being 50 per cent on the collections of the current and part of the previous year. Rs. 10,350 were assigned from this fund to education, the amount being computed at one per cent of the land revenue of the locality assessed.

275. *One Anna Tank Fund.*—The year's receipts were Rs. 16,760, and no charges having been incurred under this head, the accumulations up to 31st March 1872 amounted to Rs. 27,670.

276. *Advances Recoverable.*—The only exceptional items appearing under this head, are three separate loans of Rs. 30,000, Rs. 60,000 and Rs. 70,000, which were made under security of landed property with the sanction of the Supreme Government, to defray the debts of certain members of the Mahárája's family. The amount is recoverable by instalments during several years. That recovered during the year was Rs. 30,000.

277. *Cash Balances.*—The cash balances on the 31st March 1872 amounted as before stated to Rs. 49,72,873, and consisted of the following :—

Currency Notes	...	...	4,67,230
Gold, current	...	...	1,340
„ uncurrent	...	...	790
Rupees ...	...	...	41,28,757
Small Silver Coins	...	...	1,84,113
Uncurrent „	...	...	218
Copper, British	...	...	2,73,689
„ Mysore	...	...	42,528
			50,98,665
Deduct Amount appropriated to Public Works			1,25,792
			49,72,873

278. *District Savings' Banks.*—These appear to be as yet but little appreciated owing, it is believed, to the existence of local banks, which are more readily accessible, afford greater facilities for depositing money, and yield larger profits. The deposits in the Savings' Banks, during the year, amounted to Rs. 31,786, and the withdrawals to Rs. 24,813.

279. *Money Orders.*—The following table exhibits the comparative working of the money order system during the past and previous years :—

Orders issued, No.				Amount.	Orders paid, No.	Amount.
1870—71	9,859	...	...	5,16,592 0 0	8,001	3,52,297 0 0
1871—72	9,687	...	...	4,43,603 13 0	7,976	3,14,643 6 0
Decrease	172	...	...	72,988 3 0	25	37,653 10 0

280. The financial results of the operations carried on during the same periods were as follows:—

	Commission realized.	Amount of lapsed orders credited to Government.	Total.	Cost.	Net Profits.
1870—71.....	5,726 0 0	33 8 0	5,759 8 0	1,859 12 0	3,899 12 0
1871—72.....	4,985 14 0	156 3 0	5,142 1 0	1,922 9 0	3,219 8 0
Increase.....	...	122 11 0	...	62 13 0	...
Decrease.....	740 0 0	...	617 7 0	...	680 4 0

281. From the above it will be seen, that there has been a large falling off in the transactions of the Money Order Department, which is ascribed to a greater circulation of currency notes.

282. Of the net profits realized, Rs. 644—8—6 represents the moiety payable to Her Majesty's Government, as its share of the profits on the orders drawn in excess on British Money Order Offices; the Mysore share on similar orders drawn on this Circle being Rs. 31—11—4.

B.—PUBLIC WORKS.

283. STAFF.—The Engineering staff consisted as follows:—

Direction.—One Chief Engineer and Secretary, and one Executive Engineer as Assistant Chief Engineer and Assistant Secretary for direction and general duties. Also one Superintending Engineer and Under-Secretary for Irrigation.

Construction, &c.—

(*a*). *Roads and Buildings.*—11 Executive and Assistant Engineers, besides 7 on sick leave in Europe.
(*b*). *Irrigation.*—7 Executive and Assistant Engineers.
(*c*). *Railway.*—5 Executive and Assistant Engineers.
(*d*). *Accounts.*—Controller.
(*e*). *Forest Department.*—1 Conservator, 1 Deputy Conservator, 3 Assistant Conservators, 2 Sub-Assistant Conservators.

284. *Expenditure.*—The following was the total outlay, under all heads, during the year under review.

		Works including Tools and Plant.	Establishment.	Total.
I. Roads and Buildings.*	Military	1,940		
	Civil Buildings	70,689		
	Communications	4,96,751		
	Miscellaneous Public Improvements ...	24,746		
	Tools and Plant	27,925		
	Total.....	6,22,051	‡2,97,097	9,19,148
II. Irrigation ...	Ordinary	†3,06,835	1,50,327	4,57,162
	Extraordinary	707	...	707
III. Railway ...	... ...	6,087	56,505	62,592
IV. District Funds ...	Communications and Miscellaneous Public Improvements	1,33,453	28,065	1,61,518
V. Municipalities	... ...	1,11,960	1,45,879	2,57,839
VI. Forests ...	... ...	87,327	71,776	1,59,103
	Total.....	12,68,420	7,49,649	20,18,069

For details of expenditure see Appendices.

285. MILITARY WORKS.—The Mysore Administration has only to deal with the local force, known as the Sawár and Bár establishments. Owing to the non-receipt of final instructions from the Government of India in regard to the housing of the troops, only a trifling expenditure was incurred during the year under review.

286. CIVIL BUILDINGS.—The only work of importance here was the new Government Printing Office at Bangalore, which made good progress. A dispensary was finished at Hassan, and two others eleswhere proceeded with. Owing to non-receipt of orders on the subject from the Foreign Department, no new school-houses were built during the year

287. IRRIGATION WORKS.—*Srírámadévara Anicut and Channels.*—The anicut, as reported, was finished during the previous year; during that under review, the work on the first 26 miles of channel was nearly completed. The supply of water has been ample, and good rice-crops have been matured.

288. Work on the Mandigere channel was fairly started, and the approaches to the Anchéhalla aqueduct progressed fairly, though much difficulty was met with in the foundations. But little progress was un-

*Includes the outlay by Civil Officers.

†Of this, expenditure to the extent of Rs. 74,652 was supervised by the Officers of the Roads and Buildings' Divisions.

‡Inclusive of Direction (Chief Engineer) and Accounts.

avoidably made with the head-sluices to the Chikkadévara Ságara, Vijayánadi and Rámaswámi channels, as also with the Mosalehalla project.

289. Of original works to the tanks, the Kumbár Mardagere tank in the Hagari Division, and the Nágalápura tank in Chituldroog, were satisfactorily finished, and progress made with several others.

290. In the course of the year, difficulty was at first experienced from the opposition of the ryots to the working of the conservancy establishment on the Kávéri channels under the Department Public Works; but the measures taken proving completely successful, first rate crops were matured, and the ryots have expressed themselves perfectly satisfied with the arrangements made.

291. Considerable improvement has undoubtedly been effected in the conservancy of the large irrigation channels of this Province, under the new system followed under the Irrigation Department, and much more may safely be counted on hereafter, as to a great extent, these channels have now been surveyed, and levelled bench-marks, quarter-mile stones have been placed and gradient stones fixed, by which much of the useless excavation in clearances, which formerly went on, will be avoided. Waste of water will also be checked in a manner which has hitherto been impossible.

292. In regard to the repairs of the tanks upon which so much of the prosperity of the country depends, it will suffice to say, that 486 of these works were carried out by the Civil Officers, at a total outlay of Rs. 1,08,088, and 159 by Public Works Officers, at an expenditure of Rs. 77,266.

293. The Deputy Superintendents of Bangalore and Kolár carried out work under this head to the extent of Rs. 60,000 and Rs. 25,000, respectively, and some of the Irrigation Officers also made excellent progress in similar works.

294. One marked feature in the year's working was the increase of contributions towards the up-keep of tanks in both cash and labor. By the returns, no less than Rs. 15,147 were contributed in cash by ryots, and

worked out; and it has been estimated that labor to the value of probably Rs. 11,000, was also given with the same object.

295. The scheme for dealing systematically in series with the vast number of tanks in this Province, which has so long been under consideration, having now practically received the sanction of the Government of India, the responsibility of the cultivators in regard to the maintenance of these works, when once brought up to standard, will be rigidly enforced, till at length the revenues will be freed from at least the ordinary earth-work and revetment repairs.

296. COMMUNICATIONS.—On the main or so called "Imperial" roads under the Department Public Works, original work was chiefly confined to lines in the Ashtagram and Nagar Divisions. In the former, progress was made with the new line of road connecting Gundlupéte with Sultan's battery (in the heart of Wynád); but owing to difficulties about labor, and the excessive unhealthiness of that part of the Province, it was not satisfactory. The new road from Atchelbetta to Mallavalli was pushed on energetically to completion, by contract.

297. In the Nagar Division very good progress was made on the Hydergher ghát, which, with exception of some short rocky pieces near the top, was opened to 21 feet in width. This promises to be the easiest ghát for traffic in Mysore. Fair weather roads were to some extent opened between the head of the Hydergher ghát and the old city of Nagar, and again between Kúlúrkatte and Lakshmipura on the approach to the Kólúr ghát. A new road was also completed between Hándi and Aldúr, being the first instalment of the proposed through-line from Wastára to Hariharapura. Much work was also done on the new road connecting Kadoor and Chikkamagalúru. Minor bridges were completed, or taken in hand, in various parts of the Province. Several traces for new lines made, (especially in the Nagar Malnád, for opening which a comprehensive scheme has, for some years, been adopted, and is gradually being worked out); surveys executed, and estimates framed.

298. As a rule, the main provincial roads were maintained in good trafficable order, the cost for repairing the 2,009 miles classed as imperial lines, having been Rs. 2,80,871, or on an average 140 rupees per mile.

299. *District Roads.*—Good progress has been made in the various Districts in opening and extending roads.

300. In the Nandidroog Division the roads from Hosakóte to Jangamkóte, and from Tipatúru towards Hassan were completed.

301. The following were in progress, during the year, *viz* :—

The Sarjápura-Attibele road ; the Tyámagondal road to link the Bangalore and Toomkoor, with the Kolár and Sómapúr roads ; the road from Chikka Balláapura over the Manchénahalli pass to Góribidanúru, and from thence to the frontier in the direction of Hindupura ; also the roads from Gubbi to Hebbúru, and from Kunigallu to Huliyúrdurga, and on towards Maddúru.

302. In the Ashtagram Division, the Bettadapura-Rámanáthapura; the Attikuppa-Nágamangala ; Hassan-Gorúr; Chennaráyapatna-Sravana-belagula roads were all completed during the year. Good progress was made in the construction of the Kattáyi-Sukravársante road, and the Anemahal-Mudagere road was improved at a cost of Rs. 1,510.

Work has been executed by the ryots of the Hassan District in opening out roads from Hirésáve to Nuggihalli and from Malrájpatna to Yedatore, *viâ*., Kunchinkatte.

303. Four-hundred and twenty-six miles of road have been repaired within this Division, and are reported to be in fair order.

304. In the Nagar Division the roads from Honnáli to Kumsi, and from Ságara to Sirálkoppa were completed, and the road from Harihara to the Bellary frontier was undertaken during the year ; the remaining works consisted of repairs to existing roads, and the construction of various drains and tunnels.

305. The general return for the District-roads of the Province shews a total length of 1,328 miles, which were maintained in fair traffic-able order at a cost of Rs. 51,071, or a little more than an average of Rs. 38 per mile. The Appendix III. B, 4, shews the particulars of the receipts, disbursements and cash balances of the local-fund revenue for 1871—72.

306. *Arboriculture.*—The trees planted along the different lines of road, throughout the Province, are generally in a thriving condition, many of them being sufficiently advanced to require little further care.

307. The formation of groves in the vicinity of villages has progressed very satisfactorily, the ryots giving willing assistance in planting and conserving them.

308. In the Bangalore District the rear slopes of nearly all the tank bunds have been planted, without cost to Government, with the Hongé (*Pongamea Glabra*), of which seventy or eighty thousand are now living; the leaves of this tree are used as manure, and the seeds yield the carron oil of commerce. In this and the Kolár Districts, more than 2,000 village groves have been formed.

309. In the Ashtagram Division 248,161 seedlings and cuttings have been planted, and measures are being adopted to form village tópes in 5,217 villages.

310. In the Nagar Division, and especially in the drier Districts, great attention has been paid to planting avenue trees, and forming village tópes, which will be of great benefit hereafter; the banks of nullahs and edges of tanks have been also planted with trees suited to the locality.

311. *Accommodation for Travellers.*—The Province is already well provided in this respect, having 21 first, 42 second and 71 third-class travellers' bungalows. Crockery, &c., are supplied to, and fees are charged on, the first and second class buildings.

FORESTS.

312. During the year 40,120 acres (about 62⅔ square miles) of deciduous forests were demarcated as State-forests. These now cover a total estimated area, (corrected up to date as far as surveyed) of 451⅔ square miles, *viz*:—

Deciduous forests.		*Square Miles.*
Demarcated ..	...	$309\frac{2}{3}$
Blazed ...	...	97
		$406\frac{2}{3}$
Ever green forests	...	45
	Total.....	$451\frac{2}{3}$ square miles.

313. The work done in clearing demarcation lines during the year was—

New demarcations.	..	66 miles..
Clearing old lines.	..	31 „

314. In the Western ghâts 18 plots were set off for cardamom cultivation, aggregating 393 acres in area.

315. The Department now holds between 6,000 and 7,000 acres of land to be cultivated as fuel plantations. During the year 30,000 seedlings were transplanted, and 1,650 acres were sown over in pits, and about 3,000 acres enclosed with a ditch. Eight fuel blocks were also selected and handed over to the Department to conserve.

316. The timber plantation at Kumbárhalli was extended, and is thriving. Some 8,000 seedlings were put out and nurseries formed. In Ashtagram 50 acres were cleared and prepared for a teak plantation to be put out in 1872. In Nagar an experimental plantation was made at Hebbé. There were no extensions of existing plantations; that contemplated at Lakkuvalli being, necessarily, deferred, till the relinquishment of the operations of the Madras Irrigation Company in that neighbourhood, which it is hoped may not be much longer deferred.

317. Sandal reserves were again sown up, and an experiment to grow sandal with dál is to be made during the current year.

318. *Eucalyptus globulus* plantations were commenced in Nagar with poor success, as out of 6,490 seedlings transplanted 5,816 died.

319. The fellings in the forests were—

Range.	Teak.	Junglewood.	Bamboos.	Remarks.
Nagar	*2,974 logs ...	2,552 logs ...	7,300	* Includes fellings on land taken up under new Survey Rules.
Ashtagram ...	10,480 cubic feet.	19,090 cubic feet.	...	† For Railway sleepers.
	† 4,458 logs ...			
Nandidroog ...	Nil	Nil	18,836	

320. Collection at Dopôts and sales.

Range.	Collected.		Sold.	
	Timber.	Bamboos.	Timber.	Bamboos.
Nagar	31,380 cubic feet, 3,082 pieces.	7,300	18,530 cubic feet, 3,082 pieces.	7,300 miscellaneous & confiscated wood.
Ashtagram ...	39,636 cubic feet, 36 cart loads.	...	36,804 cubic feet, 16 cart loads.	Miscellaneous wood.
Nandidroog ...	...	18,836	...	15,761

321. Collection and sales of sandalwood.

Range.	Collection.	Sold.	Remarks.
	Tons.		
Nagar	340	379	Good wood.
	91	94	Inferior wood.
Ashtagram	176	213	Good wood.
	104	106	Inferior wood.
Nandidroog	137	149	Good wood.
	42	43	Inferior wood.
Total	890	984 or 741 tons of good and 243 tons of inferior wood.	

322. Four thousand four hundred and fifty eight pieces of teak were felled for railway sleepers, but the railway not having been sanctioned, the wood is brought on the departmental stock.

323. Of breaches of Forest Rules, 428 cases were reported, and 351 proved. The offenders in 68 cases were acquitted, and 9 were pending at the close of the year.

324. The financial results were—

		Rs.
I. Receipts in cash during the year. ...		3,18,635
Assets at the close of the year.—		
1. Value of timber ...	1,72,948	
2. Outstandings, &c. ...	15,656	
	1,88,604	
	Total Rs....	5,07,239
II. Expenditure during the year ...		1,59,104
Assets at close of 1870—71.—		
1. Value of timber ...	1,96,027	
2. Outstandings	28,072	
	2,24,099	
	Total Rs....	3,83,203
Net Revenue for 1871—72, Rs.....		1,24,036

C.—RAILWAYS.

325. The length of the branch line from the Jollarpett junction to Bangalore is 85 miles, of which the last 48½ are in the Mysore Province.

326. The following figures exhibit the traffic on the line, the terminal station of which is at Bangalore.

	1870—71.	1871—72.
Passengers during the year	186,636	170,444
Realizations from do Rs	1,88,675 9 0	1,75,279 9 0
Do. from merchandise	2,66,262 15 0	3,06,465 15 0
Do. from materials	609 13 0	285 10 0
Total.....	4,55,548 5 0	4,82,031 2 0
The working expenses were	3,41,093 15 0	3,04,864 5 0
And the net profits Rs	1,14,454 6 0	1,77,166 13 0
Total Rs.....	4,55,548 5 0	4,82,031 2 0

327. The construction of the metre-gauge Mysore State Railway (the expenditure on the survey, &c., of which during 1871—72, was Rs. 62,592) has been indefinitely postponed. The total expense incurred on this work since the commencement of these preliminary operations up to the close of the official year has been Rs. 1,16,235.

D.—AGRICULTURAL.

328. The following comparative statement shews the proportionate area of land cultivated with the undermentioned crops.

	1871—72.	1870—71.
Rági, Grám, Baller and other grains ...	66·04	66·07
Rice	24·5	25·
Coffee	2·3	2·14
Arecanut	1·	·90
Cotton	·78	·75
Sugar	·45	·48
Tobacco	·4	·49
Mulberry	·28	·31
Vegetables	1·9	1·1
Oil-seeds	2·1	2·63
Wheat	·25	·13

329. *Rági.*—There was a decrease during the year in the cultivation of rági, the staple dry crop food consumed by the masses.

330. *Rice.*—Rice is generally cultivated throughout the Province; but in the western talooks, where rains from the south-west monsoon are continuous, it is almost exclusively grown.

331. Coffee, for which the season was generally favorable, is chiefly cultivated on the slopes of the Western ghâts. The following comparative statement shews the particulars of its cultivation, the quantity exported, and the amount of revenue realized by Government.

Year.	Planters.	Estates.	Extent in Acres.	Number of trees.	Quantity in tons exported.	Duty paid	Pattás issued up to 31st March.	Remarks.
1	2	3	4	5	6	7	8

					Increase.	Increase.		
	Native ...	139	73	1,41,060	380	7,593	1,803	
					Net.	Net.		
	Total...	151	162	1,76,044	259	5,174	1,805	

332. The exports exhibited a marked increase, although the price of coffee fell during the year from Rs. 6—8—0 to Rs. 5—8—0 per maund of 28lbs.

333. The areas given in column 4 have not been scientifically surveyed, and are therefore only approximately correct.

334. The land on which coffee is grown is not assessed; but a hálat or excise duty of 4 annas per maund of 28 lbs is imposed on the quantity exported. In some cases, however, where it has been planted on assessed land, the assessment is levied in addition to the excise duty.

335. *Cinchona.*—The particulars regarding Cinchona cultivation,

and the results of the tests to which the bark from the Bábábuden plantation was subjected, were recorded in paras 292, 293, and 294 of the Administration Report for 1870—71.

336. This cultivation is carried on on the Biligirirangam hills in the Ashtagram, and on the Bábábuden hills in the Nagar Divisions, but it has not been extended.

337. Mr. Broughton, the Government Quinologist, has lately reported regarding the bark from the Biligirirangam plantation, which consisted entirely of C. succirubra, that its analysis gave in percentages of dry bark, total alkaloids 7·50 per cent; quinine 2·01, chinchonidine and chinchonine 5·49 per cent; pure sulphate of quinine obtained, crystallized 1·09 per cent, and other sulphates of quinine 4·84 per cent; that the bark was of high quality for C. succirubra and quite equalled that of the Nílgiri plantations. Efforts will be made to induce coffee planters and patéls to grow the C. succirubra on their lands.

338. *Carolina Paddy.*—The accounts received of the growth of Carolina paddy in the year 1871—72 are more encouraging than those of the year previous. There is little doubt that if given a fair trial in suitably prepared ground with good sub-soil drainage, it would thrive and prove a remunerative crop.

339. *Cardamoms.*—Instructions were issued in the beginning of the year 1871—72, to demarcate such tracts of jungle as were favorable for the growth of this spice.

340. The yield from cardamoms in the Province was 26 tons, valued at Rs. 1,71,000. The duty realized was Rs. 3,734 at Rs. 2 per maund, which is considered light, as the market price of the article varies from Rs. 50 to 80 per maund of 28 lbs. Previous to 1865 the duty was Rs. 4 per maund. It was then abolished and re-imposed at the present rate in 1868.

341. *Cotton.*—The cultivation of cotton is confined chiefly to the Chituldroog District, on the borders of the Dharwar and Bellary cotton fields, where more attention is paid to it than elsewhere. It is said, however, to be unremunerative, and the ryots are becoming more and more dependent on foreign markets for their supply of cloth.

342. The extent of land cultivated was 34,592 acres, and the out-turn 1,201 tons, valued at Rs. 6,47,716. The price did not fluctuate much in the year, being on the average Rs.7—8—0, against Rs. 8—8—0 in 1870—71, per maund of 24 lbs.

343. There is no indigo cultivation in the Province.

344. *Mulberry and Silk-worm.*—Mulberry is cultivated in all the districts of the Nandidroog, but only in that of Mysore of the Ashtagram Division. The total area in which this crop was raised was 13,681 acres, against 15,523 in the previous year, shewing a decrease of 1,839 acres chiefly in the Nandidroog Division, owing to the heavy rates of assessment on the mulberry lands, to mortality among the silk-worms, and to the generally depressed state of the silk industry. There are, however, indications of a possible revival, and measures have been adopted to regulate the assessment of the mulberry lands in the unsettled talooks. The first of the above causes has been wholly removed.

345. *Poppy.*—Opium is prepared in the usual manner from the poppy. The dried capsules are used for medicinal purposes, and the seeds, which are not narcotic, and known by the name of "Kaskas," are used in confectionary. They yield also a very fine oil which is as good as olive oil for culinary purposes.

346. The poppy crop was cultivated only in nine talooks of the Nandidroog Division. The total area under cultivation was 386 acres, and the yield of opium was estimated at 66,483 lbs.

347. *Tobacco.*—Tobacco is chiefly grown in the Mysore, Kadoor and Toomkoor Districts. The total area under cultivation was 19,719 acres, as against 24,689 acres in the previous year. The decrease of 4,970 acres occurred chiefly in the Hassan and Toomkoor Districts, and is attributed to the failure of seasonable rain.

348. *Virginia and Havanah Tobacco.*—Of these varieties, the exotic seed from America was successfully grown in the Lunatic Asylum and Government-house compounds at Bangalore.

349 At Yedatore in the Mysore District, three tolas weight of seed yielded an out-turn of 384 tolas. The Government Quinologist has

reported favorably, both on the exotic and native grown tobacco, but considers that the application of special manure in the shape of ashes of plants or wood would greatly improve them.

350. It is doubtful, however, if the exotic tobacco will be appreciated by the native consumers, as it is inferior in strength to the indigenous produce.

351. *Queensland Maize.*—This has been grown successfully in many of the Districts. The cobs and corn are of large size and very sweet, and the whole plant is valuable as fodder. It takes, however, five months to mature, while the indigenous kind, which is much smaller and not so sweet, ripens in three months. The corn is eaten by the natives while tender, and has not yet been tried in the shape of meal.

352. *Sorghum Saccharatum or Holcus saccharatus.*—This has also been very successfully grown as a "dry" crop during the local rains, and on a small scale with some irrigation, during the hot weather. This is being grown on an extended scale this year, as it proves excellent fodder for cattle.

353. The sorghum is allied to the Holcus, locally called "Káki jóla," which is cultivated extensively as a green crop for cattle food. It is drilled in with the rági, and cut for use as required. In Bangalore it is grown by the milk-men for their milch cows and buffaloes, as it is found greatly to increase the yield of milk. In low lying land, it may be seen as a luxuriant crop eleven or twelve feet in height.

354. It is not, however, stacked for use in the hot weather, which would be the most economical way of utilizing it. The sorghum saccharatum is being cultivated in the Government-house compound this year, with the object of shewing the advantage of storing it for use as dry fodder in the hot weather when green food is so scarce. A large quantity of the seed will be distributed in the hope eventually of its superseding the indigenous chólam, as it is said to grow more freely, and to be more valuable for food, in consequence of the greater quantity of saccharine matter that it contains.

355. *Seeds of Sun flower.*—A large kind of sun flower has been sown

with success in several parts of the Province, and the experiments are being extended.

356. Forty-two quarts of seed grown at Mysore were pressed in an ordinary oil-mill, and yielded one gallon of fine clear oil, after being duly filtered.

357. Dr. King, the Chemical Analyst at Madras, reports that it is quite pure, and contains no albumen; that it has drying properties, both boiled and unboiled, and is suitable for painting; that it tastes and smells agreeably, and would be a good substitute for the common food oils.

358. The refuse of oil-cake would serve also as cattle food, and perhaps for manure.

359. The cultivation of the several kinds of grass mentioned in the margin has been reported on favorably.

China grass.
Java grass.
Guinea grass.

360. *Oats.*—These have been lately grown in Bangalore from Australian seed without artificial irrigation. The yield, both in grain and straw, was fair, and the gentleman who raised the crop is sanguine that he will successfully introduce this valuable cereal into Mysore.

361. *Potatoes.*—Potatoes are extensively grown in the Bangalore, Dévanahalli and Chikka Ballápura Talooks. They are highly valued on account of their size and flavour.

362. Twenty potatoes were once exhibited at one of the market shows weighing 16 lbs. There are several varieties, and some of the new kinds from England and America have lately been successfully introduced by Government, and will be distributed generally as soon as the quantity available admits of such being done. Potatoes are largely exported by rail to Madras, Bellary, Salem, and all important places along the line, together with other vegetables and fruits that are so largely grown in and around Bangalore.

363. *Stock.*—The following is an approximate enumeration of the live and other stock in the Province as shewn by the returns.

	No.
Horned Cattle	2,729,877
Horses	5,423
Ponies	20,718
Donkeys	46,456
Sheep and Goats	2,124,198
Pigs	39,808
Carts	69,976
Ploughs	593,282

364. Although there have been casualties among the Amrat Mahal bulls that were distributed to owners of large herds, on payment of a moderate price, the experiment has been partially successful, and continued endeavours will be made to improve, in this way, the breed of cattle.

365. The show that took place near Nandidroog on the 12th March was very successful. The number of good cattle exhibited was large, the competition for the prizes was keen, and the awards of the influential committee that assembled to decide on the merits of the animals gave much satisfaction ; the money prizes being distributed by the President as soon as the selections were made. It is proposed to hold the show near Bangalore next year, when a larger gathering is expected. Measures also are in progress for the establishment of a Government farm, and for making exhibitions of the above kind more popular.

366. *Lál Bágh Government Garden.*—Here, great attention has been paid to the culture of suitable timber and ornamental trees and shrubs, and to the improvement of fruits and vegetables of all kinds likely to succeed ; 2,000 plants have been distributed of the grevillea robusta or silver oak, a hardy Australian tree of quick growth, that exudes a marketable gum, and which appears likely to become thoroughly acclimatized, and to be a valuable introduction. 800 graft mangoe, 300 graft apple, 110 cocoa, 500 vanille, and 130 Indore peach plants have been likewise distributed to the gardeners and others in and around Bangalore and to the neighbouring Districts. The Indore peach is in size and flavor superior to that grown here, some of the fruit weighing over 5 oz. from trees only 22 months' old. The leechee and wampee are being tried, and the experiments with nectarines and plums of various kinds, that have already been successfully made, will be further prosecuted. The Australian Prairie grass failed ; but on the other hand, the cultivation of Queensland maize and sorgho has been encouraging, and carefully extended

operations in this direction are being arranged for. Mulberry gardens of the Saint Helena, Cape, and Sultani varieties, and the culture of opuntia cochinilifera, which though originally imported now grows wild in many places, are being attended to, as food for the live cochineal insect recently imported, with success from Teneriffe. The insects appear healthy, and have multiplied. Many have been transferred to the acclimatized cactus, which grows most freely and appears to improve greatly under the care that has been bestowed upon it. Manilla, Mexican and Latakia tobacco has been grown, and selected seed of the most suitable kind has been distributed.

367. Interchanges have been made with Calcutta, Ootacamund, Madras and other places, and valuable contributions have been received of trees, shrubs, plants and seeds. The menageric too has had its additions.

368. The cost of the whole establishment was Rs. 9,734 or Rs. 1,146 below the Budget allotment.

369. During the year two shows were held in the Lál Bágh under the directions of the Agri-horticultural Society. The first, on the 28th September 1871, was chiefly for the display of flowers, &c., when roses and foliage plants were exhibited in very great perfection and variety. The 2nd on the 6th January 1872 was larger and more general, when valuable prizes, which were well competed for, were given for the best fruits, flowers, and vegetables, and for agricultural produce, stock and implements.

370. The Agri-horticultural Society was founded in 1867, since which time a most marked improvement has taken place in the condition of the native florists and gardeners, and in the produce they send to market, to which the exhibitions have largely contributed. After the first show a dozen packets of fresh English and Italian seeds were presented to each prize taker, the results of which were very visible at the succeeding show. Since then the gardeners have purchased fresh seed from or through the Society, while some of them deal direct with the best English houses.

E.—PRICES OF PRODUCE AND LABOR.

371. *Price of Produce.*—As in last year, prices of produce have continued to fall, and the decrease has affected the staple articles of food generally.

372. Further details under this head will be found in Appendix **III.** E. 1.

373. *Labor.*—The rates of skilled labor varied according to the locality from 4 annas to 1 rupee, and of unskilled labor from 2 to 8 annas per diem.

374. The ordinary rate of hire for a cart drawn by bullocks varied in different places, from 6 annas to 1½ rupee per diem.

375. Further details under this heading are given in Appendix **III.** E, 2.

F.—MINES AND QUARRIES.

376. The return prescribed by the Calcutta Statistical Committee will be found in Appendix **III.** F. The details are the same as in the last year.

G.—MANUFACTURES.

377. The information given under this head in the Division and District Reports is still very incomplete.

378. The value of the manufactures for the year is approximately shewn below :—

	Rs.
Silk	4,26,140
Cotton	11,24,914
Wool	1,90,406
Fibres	22,807
Paper	9,725
Wood	24,400
Iron	1,32,752
Brass and Copper	2,67,262
Building Materials	18,000
Oils	3,87,829
Sugar	1,17,136
Salt	8,040

379. The foregoing alone do not represent all the manufactures of the Province, but the information procurable on the subject is still very defective.

380. The places noted for special manufactures have been already mentioned in the previous year's report.

H.—TRADE.

881. The value of exports from the Province during the year under report was Rs. 1,09,42,353, against Rs. 1,02,82,054 in the previous year, the increase being Rs. 6,60,299 owing chiefly to an enhanced exportation of coffee and cotton amounting to Rs. 5,79,374.

382. The principal articles exported were,—arecanut, coffee, cotton, cardamom, dry cocoanut, paddy, rági, silk, and raw sugar, chiefly to Dharwar, Bellary, Canara, Malabar, Madras and Bombay.

383. The value of imports was rupees 1,06,97,135 against rupees 97,63,499 in the previous year.

384. The chief imports were,—iron, gold, pepper, salt, dál, and rice of a superior description, chiefly from the neighbouring Districts and from Madras and Bombay.

385. The articles mentioned in the margin are alone taxed, whether imported or exported into or from the Province. No other articles are subject to import or export duty, but some are to the ordinary excise duty when consumed in the Province.

Coffee.
Arecanut.

386. Further details on this head are given in Appendix **III.** H.

K.—CHARITABLE INSTITUTIONS.

387. The statistics of the charitable institutions of the Province are contained in the Appendix **III.** K, 1—2.

PART IV.

INSTRUCTION.

A.—ECCLESIASTICAL.

388. The number of chaplains of the Church of England and of the Scotch church was the same as in the previous year, *viz.*, 4 and 1 respectively. Of the former, 3 are posted at Bangalore, and 1 at Mysore; the out-stations of Oosoor, Hunasúre, French-Rocks and Pálhalli continuing to be visited by them periodically.

389. The number of ministers of other denominations was as follows:—

Denominations.	European.	Native.	Total.
Wesleyan Mission	12	2	14
London do	3	10	13
Roman Catholic do	14	5	19

390. A new Roman Catholic Chapel was in course of construction at Shimoga.

B.—EDUCATION.

391. The statistical returns of the Educational establishments, under the control of the Director of Public Instruction in the Mysore Province, will be found in Appendix IV. B, 1—2.

392. *Financial Statistics.*—The subjoined tabular statement shews the income from various sources during the past three years.

	1869—70.	1870—71.	1871—72.
From Imperial Revenues...	2,49,183	2,79,648	2,42,239
From Local Sources, viz—			
(1) Educational Cess	...	...	10,350
(2) Endowments	28	159	311
(3) Subscriptions and Donations	22,829	19,425	20,640
(4) Fees	27,217	41,142	46,734
(5) Private contributions and receipts in grant-in-aid Institutions	31,085	23,241	23,879
Total from Local Sources.....	81,159	83,967	1,01,914
Grand Total.....	3,30,342	3,63,615	3,44,153

393. The following statement shews the expenditure during the same period:—

	1869—70.	1870—71.	1871—72.
Direction and its subsidiary charges	13,070	14,250	13,980
Inspection do	19,720	19,986	21,024
Government Schools	1,06 944	1,21,087	1,34,867
Buildings	5,017	11,722	...
Government contributions to Grant-in-aid Institutions ...	35,166	31,592	55,183
Private do	74,6 6	88,051	87,492
Central Book Depôt	29,957	33,216	24,543
	2,84,507	3,22,906	3,37,094

394. *Inspection.*—There are two Inspectors, each of whom has a circle of his own; the First Circle extends over the Bangalore, Kolár, Mysore and Hassan Districts, and Coorg, and contains 592 schools, with 18,845 scholars. The Second Circle includes the Toomkoor, Shimoga, Chituldroog and Kadoor Districts, and contains 384 schools, with 8,090 scholars. There is also a Mahomedan Sub-Deputy Inspector of Hindustáni Schools, and eight Sub-Deputy Inspectors of Hóbli Schools.

395. *Educational Institutions.*—There were in the Mysore Province in 1871—72—

	603	Government Educational Institutions.
	90	Grant in aid do.
About	1990	Unaided Schools.
	2683	

396. The above institutions include—

5	High Class schools with College Departments, two Government and three grant-in-aid affording instruction up to the standard of the B. A. degree of the University of Madras.
5	District Government schools teaching up to the Matriculation standard.
2	Aided schools for Europeans teaching up to the Matriculation standard.
7	Talook Anglo-vernacular schools of the Middle Class.
9	Aided schools do do
87	Talook or Superior Vernacular schools.
487	Hóbli or village schools.
45	Aided schools of similar class.
8	Government female schools.
31	Aided female schools.
4	Government Normal schools.
3	Special schools.
1990	Unaided schools.
2683	

397. Compared with 1870—71 the number of grant-in-aid schools increased from 76 to 90, the number of Government superior vernacular schools from 80 to 87, and of hóbli or village schools from 355 to 487.

398. The total attendance at the several classes of schools was as follows:—

	No.
Government Schools	17,735
Grant-in-aid Schools	6,466
Unaided Schools	24,400
	48,601

giving a total of 48,601 or 1 student to 87 persons.

399. Compared with the previous year, the total increase of scholars was 5,294, the increase being chiefly in the village schools.

400. The average cost of educating each pupil in Government schools of the higher class was .. .. .. Rs. 30 2 11

In aided schools of the same grade ...	77	9	0
In Government schools of the middle class ...	31	2	3
In aided schools of do. ...	48	10	4
In Government schools of the lower class ...	8	10	8
In aided schools of do. ...	7	7	1
In Government Girls' schools	7	12	6
In aided Girls' schools	17	15	7
In Government Normal schools	104	6	0

401. *University Examinations.*—The branch examination of the Madras University is held annually in Bangalore in December. There were 135 candidates; 122 for the Matriculation test, and 13 for the First Examination in Arts. The results were striking, only 3 passed the F. A. test, while 55 succeeded in passing the Matriculation, or nearly double the number of any previous year. In the following February seven Under-graduates of this Province obtained the degree of B. A. Three of these were from the Government High School, and the other four from as many private institutions, one from each. The Director of Public Instruction is of opinion, that this state of things represents a great waste of teaching power, and a very unnecessary expenditure of money, and considers that two College Departments would meet all the requirements of the Province.

402. *Bangalore High School.*—A student from this institution has

again this year become eligible, by his position on the list, for one of the scholarships awarded by the Madras Government to the fifteen candidates who stand at the top of the list of Matriculates, and which are tenable for four years, until the time of appearing for the B. A. degree. The successful Mysore student cannot, however, hold the scholarship as he does not belong to the Madras Presidency. A small Mysore scholarship has however been sanctioned for each of the two successful youths, which will enable them to continue their studies. The High School has retained its popularity and high position. There has been a slight increase in the number of scholars, and the results of the various examinations have shewn satisfactory progress in the different classes.

403. There are also College Departments connected with the Rája's school in Mysore, Bishop Cotton's School, Bangalore, and with three Mission institutions. But it is understood, that they are not all to be continued. From the Rája's school, one student passed the F. A. and five the Matriculation examination.

404. *Schools below the grade of Colleges.*—These consist of higher class schools teaching up to the Matriculation or F. A. standard. At the close of the past official year, there were seven Government schools of this class, with an average attendance of 1,277 pupils, and five grant-in-aid schools of a similar grade, with an average attendance of 780 scholars; from all these schools, there were 122 candidates for the Matriculation, and 13 for the First Arts Examination, in December last; of whom 55 passed the former, and only 3 the latter.

405. *Schools of the Middle Class.*—In which the following subjects are taught; English, Kanarese, arithmetic, geography, and history. There were seven Government schools of this class, with an average attendance of 249; and nine aided schools of the same grade with 554 scholars.

406. *Lower Class Schools.*—In which the instruction is chiefly confined to reading, writing and arithmetic; all in the vernacular. In the talook schools, and some of the village schools, the geography and history of India are taught. This is also the case in some of the Mission vernacular schools. There were 574 Government schools of the lower class in operation, with an average attendance of 14,841; and 45 aided schools of the same grade, with an average attendance of 2,876.

407. The hóbli or village schools are increasingly popular: the number of scholars has increased to such an extent in some places, that assistant masters are required; the interest felt in them by the people generally is shewn by their eagerness to build or rent suitable premises for them, and by the fact that they are attended by all castes, and occupations.

408. *Grant-in-aid Schools.*—The expenditure under this head amounted to Rs. 55,183—0—0, distributed as follows:—

Protestant.	Rs.
Church of England	9,994
Church of Scotland	2,400
London Misssion	4,080
Wesleyan Mission	9,566
Roman Catholics	5,520
Hindu	3,280
Mahomedan	4,822
	39,662
Building Grants.	15,521
	55,183

409. *Bishop Cotton School.*—This school has a larger attendance now, than at any previous period, *viz.*, 109 boys and 60 girls. Four students passed the last Matriculation examination, and one obtained the degree of B. A.

410. *Saint Andrew's School.*—The new premises were occupied after the Christmas vacation, and there are 59 scholars, of whose progress the Inspector reports favorably; one passed the Matriculation examination.

411. *Mission Schools.*—Twelve students matriculated from the Wesleyan Native Educational Institution, last December; and four from the London Mission Institution. One from each obtained the degree of B. A. From the Mission School in Mysore, four matriculated, and one took the degree of B. A.

412. *Other Schools.*—Of the other schools receiving grants-in-aid, 4 are English, 9 are Anglo-vernacular, 14 Kanarese, 3 Tamil, 6 Sanskrit, and 18 Hindustáni.

413. *Female Schools*—The prospects of female education may be said to have greatly improved. There are now eight Government schools, with an attendance of 237 ; and thirty-one aided girls' schools, with an attendance of 2,088 ; of these 1,664 are Hindús, 159 Mahomedans and 502 Christians.

414. *Normal Schools.*—Of these, there are four; one in Bangalore, now expressly for the training of Mahomedan teachers; and three Hóbli Normal schools, for training vernacular masters for the village schools. The full complement of talook English, and Kanarese schools having been made up, the Head Master of the General Normal School, and his Kanarese assistant have been transferred to Coorg.

415. *Engineering School.*—As this school did not fully answer the purpose for which it was established, and young men who passed through it were frequently unwilling to take employment in remote Districts, the school was closed, as a special institution, and a class formed in the High School for teaching mensuration and surveying. At the same time arrangements were considered for giving instruction, in these subjects, at the District Head Quarter Schools, where the candidates thus being trained for employment in the Public Works Department may go also through the usual course of general study. The scholarships attached to the Engineering school were, accordingly, distributed among the District schools, (two being retained for the High School) to be given by preference to boys of the Méstri class, for whom they were originally designed.

416. Two subjects connected with education have been made prominent, in the course of the year.

417. One is the condition of the Mahomedan population of India, as regards education, to which attention was called by a Resolution of Government, under date Simla, the 7th August 1871. It was known to be true in Mysore, as in most parts of India, that the Mahomedans did not adequately avail themselves of the educational advantages that the Government offers. Measures have been, consequently, adopted for increasing the number, and improving the character of Hindustáni schools throughout the Province.

418. The other point is the feasibility of having simple, but carefully compiled agricultural treatises of the most rudimentary description, prepared in the vernacular, suited for India, and adapted to form part of the curriculum in the primary schools. Now that the ability to read and write is being acquired by so many of the rural population, it is thought that among the few simple class books used, there should be one giving the clearest, and most elementary account of vegetable physiology, the nature of soils, manures, &c., and that this would be a simple, and effectual mode of giving the subject a place in the general studies of the youth of the country, with the eventual object of promoting that reform in agriculture, referred to in a late note by Mr. A. O. Hume, Secretary to the Government of India, in the new Department of Agriculture. The preparation of such a work is about to be taken in hand.

C.—SCIENTIFIC AND LITERARY.

419. THE GOVERNMENT MUSEUM.—This institution, which was established in 1864, is regarded with increasing favor by the public, of whom 162,897 visited it during the year, in the proportion of about 2 males to 1 female. Of this number, which is 762 in excess of last year, nearly one-sixth signed their names in 19 different languages, the rest being counted by tally. The average daily attendance was 564, the largest concourse on any one day being 15,147, the smallest 65.

420. The Museum possesses many excellent illustrative collections which are being gradually extended and improved. 300 specimens were received during the twelve months, but only 6 were purchased, the remainder being presented by 39 donors, and collected by the establishment; the annual cost of which, including salaries, purchase of furniture, specimens, and all contingencies, was only Rs. 3,198—6—4, or Rs. 311 less than in the preceding year.

421. Among the contributions were 59 specimens of the fine carvings from Halébídu, and on receipt of others that are expected, it is in contemplation to reproduce a small portion of the celebrated ruin, as an attractive feature in the Museum. There were additions to the natural history, and numismatic collections, and of 39 new works to the library, which now contains 398 volumes.

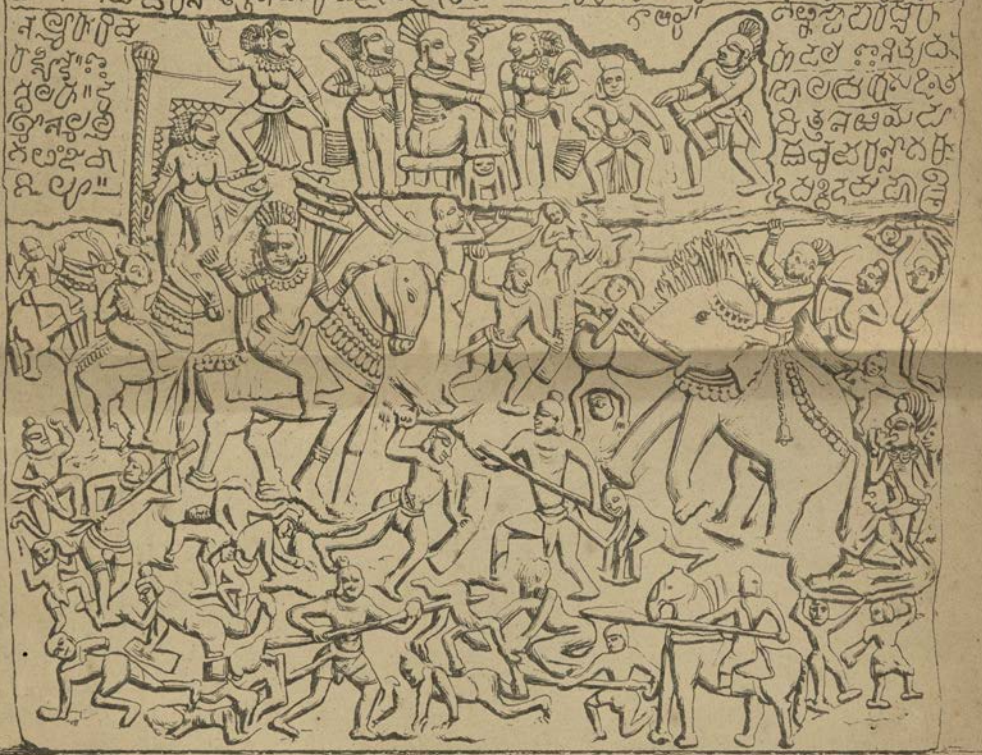
422. ARCHÆOLOGY.—The Province abounds, with inscriptions on stone or copper, recording royal benefactions, and other public gifts: the historical data derivable from which are perhaps the most authentic extant, while at the same time, they throw much light on the earlier forms of the language, and furnish other collateral information of considerable interest. But in the case of inscriptions of prior date to the year 1,000 of the era of Shálivâhana, or 800 years ago, a difficulty presents itself in the strange and obsolete characters of the writing. These are found in many cases to resemble the letters of the western cave, and old Gujerat inscriptions, of which the Bégúru stone,* in the Government Museum at Bangalore, may serve as a specimen. In others of Jain origin, as in the rock inscriptions of Shravana Belagola, they are more like the Lát and old Pali forms. Towards the east the Grantha character, with some admixture, is frequently met with, as in the Kolár Amma temple.

423. A number of these *shásanas* have been deciphered, and translated, from photographs. A catalogue is further being prepared of all inscriptions to be found in the country, with the view of selecting for translation, such as appear to be of most importance, or in greatest danger of defacement, by the hand of time. A similar register is stated to have been made in the reign of Chikka Déva Rája (1672—1704); but the collection was unfortunately either lost, or destroyed, when the Province came under Mahomedan rule.

424. At Shravana Belagola, famous for its colossal statue of the Jain god Gómatésvara, there are several inscriptions cut into the rock, on the top of the smaller of the two hills. The character is a very ancient form of Kanarese, fac-similes of which have been submitted to Pandits through the Editor of the Indian Antiquary. The following stones, with inscriptions of a similar character, have recently been discovered in the Nandidroog Division,—two stones at Bétmangala, which have been converted into village deities; two large slabs on the site of the ancient city of Aralkótu, near Srínivâspura, probably intermediate between the Sravana Belagola and Bégúru inscriptions; and a large slab of a more recent date on the site of old Bidalúru near Góribidanúru.

425. Some burrows of considerable dimensions have also been discovered in the Hassan District, but none have yet been opened.

* The lithograph drawing of this stone on the opposite page was taken from a photograph.



LITHOGRAPHED AT THE MYSORE GOVT. PRESS, BANGALORE--1972.

426. GOVT. BOOK DEPOT :—This establishment is under the control of the Director of Public Instruction. During the year, the number of books, added to the stock, was 51,860 at a cost of Rs. 22,085: of these 14,404 were English valued at Rs. 11,029, and 37,456 were vernacular valued at Rs. 11,056.

427. The number of books supplied to District Depôts and to Head Masters for sale was 32,917, valued at Rs. 6,691—6—8.

428. The amount paid into the Government Treasury on account of the sale proceeds of books was Rs. 16,782. The smallness of this sum, when contrasted with the value of the books added to the stock, is thus explained :—owing to the rapid increase of vernacular schools, very large editions of 10,000 or 20,000 copies are printed at a time; thus adding to the stock account a supply sufficient for two or three years. There is, however, no accumulation of unsaleable stock.

429. MYSORE GOVERNMENT PRESS.—The school books published at the Mysore Government Press, both in English and Kanarese, during the year, were as follows :—

		Copies.
Kathá Saptati ...	*Kanarese.*	... 10,000
Second Book ...	„	... 10,000
Amarakósa (in part) ...	„	... 5,000
Arithmetic (in part finished)	„	... 5,000
Padyasára ...	„	... 5,000
Elements of Euclid, Book II	„	... 1,000
Abridged History of India	*English.*	... 2,000
Manual of Conduct ...	„	... 2,000
English and Kanarese Dictionary		... 2,000

430. The estimated value of the work performed by this Press, during the year, amounted to Rs. 37,681—9—2, while the net disbursements under all heads were Rs. 25,599—11—10, shewing a surplus in favor of the Press of Rs. 12,081—13—4.

431. *Printing Presses.*—The number of presses for English publications and vernacular literature was the same as in the previous year, *viz.*, 5 and 8 respectively, exclusive of the Central Jail, and Government Presses.

432. *News-papers.*—The "Spectator" and "Herald," two tri-weekly journals, continue to be published in Bangalore, as well as the "Kásim-

ul-akbar, a weekly Hindustáni paper. The "Mysore Gazette," which is an official publication, is printed weekly at the Government Press.

433. *Registration of Publications.*—The number of books registered during the year under Act XXV of 1867 was 45 ; of these—

34	were	Kanarese.
2	„	Kanarese and English.
3	„	Sanskrit and Kanarese.
3	„	Sanskrit.
2	„	English.
1	was	Hindustáni

PART V.

VITAL STATISTICS.

A.—BIRTHS AND DEATHS.

434. The new forms prescribed by the Government of India have been adopted (as in six months of the previous year) for the tabulation of the vital statistics of the Province.

435. *Births.*—The number of births registered during the year aggregated 33,921, or in the ratio of 7·67 per mille of the population calculated at 4,422,209 souls; the proportion, according to sex, being 17,581 males, and 16,340 females.

436. *Deaths.*—On the other hand, the number of deaths registered during the same period was 32,109 males, and 26,109 females, making a total of 58,218, which gives a ratio of 13·16 per mille of the population. It appears, therefore, that the ratio of births was 5·49 below that of deaths for every thousand persons, an obviously incorrect result clearly indicating that the registration of a very large proportion of births continues to be still evaded.

437. The mortality in each month of the year was as follows:—

Months.	Deaths.	Per Mille Rate.
January...	5,487	1·24
February	4,691	1·06
March ...	5,339	1·20
April ...	5,955	1·34
May ...	5,543	1·25
June ...	5,388	1·22
July ...	4,552	1·03
August ...	4,620	1·04
September	4,135	·93
October ...	4,201	·97
November	4,045	·92
December	4,262	·96
	58,218	

The population has been calculated on the most recent revenue returns, based upon the census taken in November 1871, but the census tabulation when completed, will give more reliable figures.

438. The number of deaths from each of the diseases enumerated below was —

		No.	
By Cholera		4,297	
Small-Pox		1,494	
Fevers		32,797	
Bowel Complaints		5,798	
Other Causes		12,536	
Injuries.	Suicide	125	1,296
	Wounding	96	
	Accident	799	
	Snake-bite or killed by wild beasts	276	
	Total...	58,218	

439. The number of deaths in each month and their cause was as follows:—

Months.	Cholera.	Small Pox.	Fevers.	Bowel Complaints.	Injuries.	Other Causes.	Total.
January	4	92	3,630	529	1,296 distributed over the 12 months for which details have not been reported.	1,232	5,487
February	96	99	2,965	489		1,042	4,691
March	857	86	2,806	504		1,036	5,339
April	1,057	142	3,142	455		1,159	5,955
May	1,263	132	2,654	442		1,052	5,543
June	813	128	2,779	489		1,179	5,388
July	110	124	2,655	520		1,143	4,552
August	26	141	2,604	566		1,283	4,620
September	13	121	2,346	446		1,209	4,135
October	43	98	2,354	478		1,228	4,201
November	15	125	2,372	434		1,099	4,045
December	...	206	2,490	446		1,120	4,262
Total.....	4,297	1,494	32,797	5,798	1,296	12,536	58,218
					13,832		

440. According to classes, the deaths were as follows:—

	Deaths.	Per Mille Rate.
Christians	202	13·3
Mahomedans	2,897	14·4
Hindús	53,916	13·1
Other Classes	1,203	
Total.....	58,218	

B.—CIVIL HOSPITALS AND DISPENSARIES.

441. The following table illustrates the working of the civil hospitals and dispensaries (exclusive of the Lunatic and Leper Asylums at Bangalore); but as the returns for the year under report are for the calendar year, they cannot be strictly compared with those furnished for the past, and previous official years.

Years.	Treated.			Died.	
	In-Hospital.	Out of Hospital.	Total.	In Hospital.	Out of Hospital.
1869—70	2,711	69,830	72,541	267	...
1870—71	3,046	73,494	76,540	302	118
1871	3,010	75,245	78,255	277	320

442. The above figures shew that the working of the several Hospitals and dispensaries has been, on the whole, satisfactory; the total number of in-door and out-door patients, treated in 1871, being 78,255, or 1,715 in excess of that given for the official year 1870—71, or 5,714 in excess of the number treated in 1869—70.

443. Among the in-door patients the death rate averaged 9·2 per cent of sick, against 9·9 in 1870—71 and 12·07 in 1869—70.

444. The following statement exhibits the working of each of the institutions referred to.

Name of Institution.	Treated.		Average daily sick.		Died.		Remarks.
	In door.	Out-door.	In-door.	Out-door.	In-door.	Out-door.	
Bangalore Pête Hospital	702	16,888	45·03	120·82	65	2	
Bowring Hospital	1,182	12,780	54·25	97·50	122	...	
Mysore Hospital	447	20,206	34·50	165·5	61	294	
Shimoga Hospital and Dispensary ...	313	5,961	17·38	67·44	23	7	
Toomkoor Dispensary	...	3,264	...	35·9	...	4	
Kolár „	...	3,745	...	41·06	...	2	
Hassan „	...	3,965	...	·38	...	1	
Shethalli „	45	579	1·50	4·50	3	2	
Chikkamagalúru Hospital & Dispensary.	102	2,345	7·10	29·25	4	6	
Chituldroog „ „	219	5,512	9·50	76·75	1	2	
Total.....	3,010	75,245	169·26	637·84	279	320	
Grand Total.....	78,255		807·10		599		

445. From the above it will be seen that, (excluding the Shethalli Dispensary, which is supported by the Roman Catholic Mission assisted by a grant-in-aid from Government) of the nine institutions in the Province in which medical aid is dispensed, accommodation for the reception of patients was available in six. One hospital was under construction, in connection with the Kolár Dispensary, and another was completed at Hassan, but was not occupied during the year.

446. *Lunatic Asylum.*—There were 49 admissions into this institution, which, added to the number of inmates who remained on 1st January 1871, made a total of 165 patients under treatment during the year.

447. The charges of the asylum were Rs. 14,417—9—0, as against Rs. 13,464 in 1870—71, the average cost for each patient being Rs. 113—9—7, or Rs. 2—15—4 less than that in 1870—71.

448. *Leper Asylum, Bangalore.*—The number on the list in this institution on the 31st December 1870 was 41, and 9 were admitted during the year. Five of the inmates absconded, three were discharged at their own request, and four died, leaving 38 patients at the close of the year. The expenditure was Rs. 1,733—5—0, against Rs. 1,865 in 1870—71. The introduction of a system of diet, in lieu of the money allowance formerly made, was under consideration and trial during the year.

C.—VACCINATION.

449. The following statement shews the results of vaccination in Mysore in 1870—71, and in the calendar year under review:—

	Total Operations in 1870—71.	Total Operations in 1871.	Successful.		Unsuccessful and Unknown.		Proportion of successful cases including the number of unknown cases in	
			In 187—71.	In 1871.	In 1870—71.	In 1871.	1870—71.	1871.
Number.	96,570	96,529	85,983	85,165	10,587	11,364	89·03	88·22
Cost Rs.	10,746-15-0	10,718-0-7	...	...	...	...	...	...

450. There has been a very slight increase in the total number of operations performed. The heads "successful" and "unsuccessful and unknown" operations exhibit a decrease of 818, and an increase of 771 respectively.

451. The cost of the operations amounted to Rs. 10,718—0—7, against Rs. 10,746—15—0 in the previous year, giving an average of one anna and nine pie as the cost of each operation performed.

452. The usual vaccine return is given in Appendix V. C.

PART VI.

MISCELLANEOUS.

453. ANCHE OR PROVINCIAL POST—*Expenditure.*—The cost of the Anché or Provincial Postal Department amounted to Rs. 1,54,850 out of a Budget allotment of Rs. 1,58,507, shewing an increase over the preceding year of Rs. 3,747, owing principally to the entertainment of additional temporary road establishments, and the purchase of office furniture for some of the anché offices.

454. *Income.*—Taking credit for the postage exempted on service letters, and letters carried to and from Her Majesty's Post Offices, and copies of the local Gazette, the following statement exhibits a surplus of Rs. 1,13,285 in favor of the Department.

	Rs.
Amount of postage on official letters and parcels, &c.	2,10,447
Do on letters, &c., carried to and from Her Majesty's Post Offices.	10,480
Do do H. H. the Mahárája's Department	32
Do do Gazettes	3,078
Total.....	2,24,037
Do Collected in Cash	44,098
	2,68,135
Deduct Expenditure.....	1,54,850
Balance Rs.....	1,13,285

455. *Correspondence.*—The total number of packets of all descriptions that passed though the anché offices during the past year was 2,478,169 as shewn in the margin, being an increase of 6·6 per cent on the return for the previous year.

	No.
Chargeable packets	1,000,402
Service, &c.	1,142,435
Carried to and from Her Majesty's Post Offices	335,333
Total.....	2,478,169

456. *Unclaimed Letters.*—The number of unclaimed letters was 110, against 130 in the preceding year.

457. *Complaints.*—Complaints in two cases were preferred against the Anché officials for the non-delivery of registered letters, said to con-

tain Currency Notes in halves. The charges against the officials accused failed in both cases, and the senders were referred to the Commissioner of Currency at Madras.

458. *Robberies of Mails.*—There were no highway robberies of or attacks on Anche Mails, during the past year ; but the Imperial Mail was plundered on the night of the 13th July 1871, near Closepéte, while passing on the main line from Bangalore to Mysore. The perpetrators were, however, apprehended with the stolen bángís, &c., and were sentenced to rigorous imprisonment, for periods of from 5 to 7 years.

459. GOVERNMENT TELEGRAPH.—The Telegraph offices at Bangalore and Mysore continue to be maintained as in the previous year.

460. BANGALORE CANTONMENT MUNICIPALITY.—*Income and Expenditure.*—The statements of income and expenditure, during the past year, shew that the receipts were Rs. 24,716 less than the Budget estimate of Rs. 1,17,333, of which Rs. 16,454 was owing to the failure of the contractor for "octroi" collections to fulfil his engagements. A gross sum of Rs. 74,741 was, however, realized under this head, though the charges for establishment, consequent on the contractor's failure, reduced the amount by Rs. 6,091.

461. The total expenditure was Rs. 90,259 against a Budget estimate of Rs. 96,018.

462. BANGALORE PETE MUNICIPALITY.—The receipts during the year aggregated Rs. 59,332, against a Budget estimate of Rs. 72,654 ; the falling off in "octroi" collections, was due to the same cause as that mentioned above.

463. The expenditure under all heads aggregated Rs. 53,997, of which sum Rs. 15,314 represent the cost of the Police force maintained in the Péte.

464. The introduction of the new Code of Municipal Regulations for the Cantonment and Town of Bangalore has worked satisfactorily, and has conduced to establish a more systematic method of enquiry into, and dealing with, the requirements of each Municipal Division.

465. In the Ashtagram Division, regular Municipalities have been established in the Towns of Mysore, Hassan, Seringapatam, and Hunasúru.

466. At Mysore, a slaughter house, urinals, latrines and a Police station were constructed during the year; but the drainage of the town still continues to be very defective, but measures have been taken for its improvement.

467. At Shimoga, in the Nagar Division, the market, which is the largest work within the Municipality, was unfinished at the close of the year, and a Police station, and certain road works were completed.

468. The following is a summary of the Municipal collections and disbursements during the year, in the several Districts of the Province.

I. STATISTICS OF PHYSICAL, POLITICAL, AND FISCAL GEOGRAPHY.

A. PHYSICAL GEOGRAPHY OF THE TERRITORIES UNDER THE CIVIL AND POLITICAL CONTROL OF THE ADMINISTRATION OF MYSORE.

Mysore is situated between 11°36′ and 15°0′ north latitude and 74°42′ and 78°37′ east longitude. Its extreme breadth from east to west is 230 miles, and its extreme length from north to south is 190 miles. Its area is 27,004 square miles. It is bounded on the north by the Bombay Collectorate of Dharwar and the Madras Collectorate of Bellary. On the south by the Districts of Salem and Coimbatore, both in the Madras Presidency. On the east by those of Cuddapa and North Arcot, also of Madras. On the west by Coorg and the Western Ghâts, which shut out Mysore from Malabar and Canara on the west coast.

The Province was surveyed for revenue purposes during the administration of Púrnaiya between 1800 and 1810, and a topographical survey was carried out by Colonel Mackenzie in the years 1800—1807. A revenue survey on the Bombay system including the classification and assessment of the land, is now in progress.

I. A.—2. *Character of the Surface.*

Nature of different Tracts.	Names, Area, and Physical Description of each Tract.	Where situated, in British or Native Territory.	Prevailing Soils, Minerals and Products.
Mountains and Elevated Tracts.	The Mysore country above the ghâts is often called "the Table Land," a denomination very little descriptive of its appearance, as it is by no means plain or flat, but in some parts mountainous, and everywhere undulating. The Eastern Ghâts form the frontier, by which it is separated from the Carnatic. They constitute the exterior of the east ranges of hills, which run along the whole length of the Peninsula from Cape Comorin, stretching up to the continent of Asia. In many parts the ascent over them into Mysore is very high and difficult, while in others it is more sloping and protracted. The country rises gradually from these ghâts towards Bangalore, which is situated in the most elevated portion of the Mysore plateau and is 3,031 feet above the sea level.		The soils, in the order of their prevailing kinds, are as follow :— 1. Red soil mixed with loam and vegetable mould. 2. Inferior red sandy soil. 3. Black cotton, free from stones. 4. Stony and gravelly soil. 5. Rich garden soil. 6. White stiff loam. 7. Black cotton, but light and stony. 8. Soil impregnated with salt.
Plains.	The descent from Bangalore on all sides is perceptible though not rapid. On the north-west, after passing the Chituldroog range of hills, there is a gradual fall through the broad valley which leads to the river Tungabhadra, near which is the station of Harihara, probably the lowest point in Mysore, its altitude above the sea being only 1,800 feet. To the south-west, and west, by Seringapatam and Hassan, there is perhaps a more marked descent, until it is abruptly terminated by the western range of ghâts comprising in this direction the Nilgiri and Coorg hills, and further north, the Manjarábád and Nagar ranges. A marked feature of the country is the number of isolated hills called Durgás, on the most inaccessible of which the former Pállégars or petty chiefs built forts, afterwards in many instances strengthened and improved by Hyder and Tippu, and still in good preservation, but now without guns.		The great rock, which may be said to constitute the basis of the whole country, is a kind of sienite composed for the most part of four different ingredients, *viz.*, quartz, felspar, hornblende and mica. The quartz has usually a dull greyish white color, and veins of it from 4 to 10 inches thick, often traverse the rock in different directions. The felspar varies in color from a silver white to a deep brick red, and is the most copious constituent of the rock. The hornblende is black, very abundant, and very much given to decomposition. The mica is easily distinguished from the hornblende, even when the stone is nearly in a state of disintegration. The hornblende in that state has assumed a brown ochre color, and has lost all lustre and cohesion, while the mica retains both its color, lustre and cohesion to the last, and becomes only more apparent by the progress of disintegration. This is particularly exemplified in the Mysore country, where the undulating high ground consists of sienite, decomposed into pipe clay, intermixed with micacious shining particles and grains of quartz. From the structure of the country, which is entirely primitive, no coals could be expected.
Forests.	The principal forests are found clothing the sides of the Western Mountains. They abound in teak, blackwood and other valuable kinds of timber. There are no forests in the Eastern Ghâts. Sandalwood grows in the country bordering the hills.		Chlorite slate is found near Sirá, and drawing slate in the neighbourhood of Chituldroog. Other minerals are the following :— Clay Iron Stone. Schorl in Quartz. Mica Slate.

Rivers.	The Tungá and Bhadra rise in the north-west of Mysore, and uniting form the Tungabhadra, which flows northwards and eastwards till it joins the Krishna below Kurnool. The banks of the Tungabhadra are too high for irrigation purposes. The Kávéri rises in Coorg and passes through and out of Mysore in a south-easterly direction, after receiving the Hémávati, the Lokáni, the Shimsha, and the Arkávati from the north, and the Lakshmantírtha and the Kabbani from the south. The Kávéri and its tributaries supply numerous irrigation channels and tanks. The Pennair, the Palar and Penar rise in the eastern part of Mysore, in their short course through which, their waters are detained and converted into chains of tanks. They become large rivers before they reach the sea. None of these rivers are suitable for navigation.	Magnetic Iron Stone. Pot Stone. Actinolite. Ligniform Asbestos. Brown Spar. Common Salt. Carbonate of Soda. Gold is occasionally found near Bétmangala by washing the alluvial soil; but in too small quantities to repay labor.
	Lakes. There are no natural lakes in Mysore; but there are nearly 20,000 artificial reservoirs, some of which are of considerable magnitude.	The chief products are :—
Marshes.	None of any consequence.	Paddy. Rági—The principal food of the people. Baller—A kind of small bean. Gram. Wheat. Millet. Oil Seeds. Sugar-cane. Cotton. Hemp. Tobacco. Mulberry. Coffee. Cocoanuts. Betel nuts. Potatoes for Export.

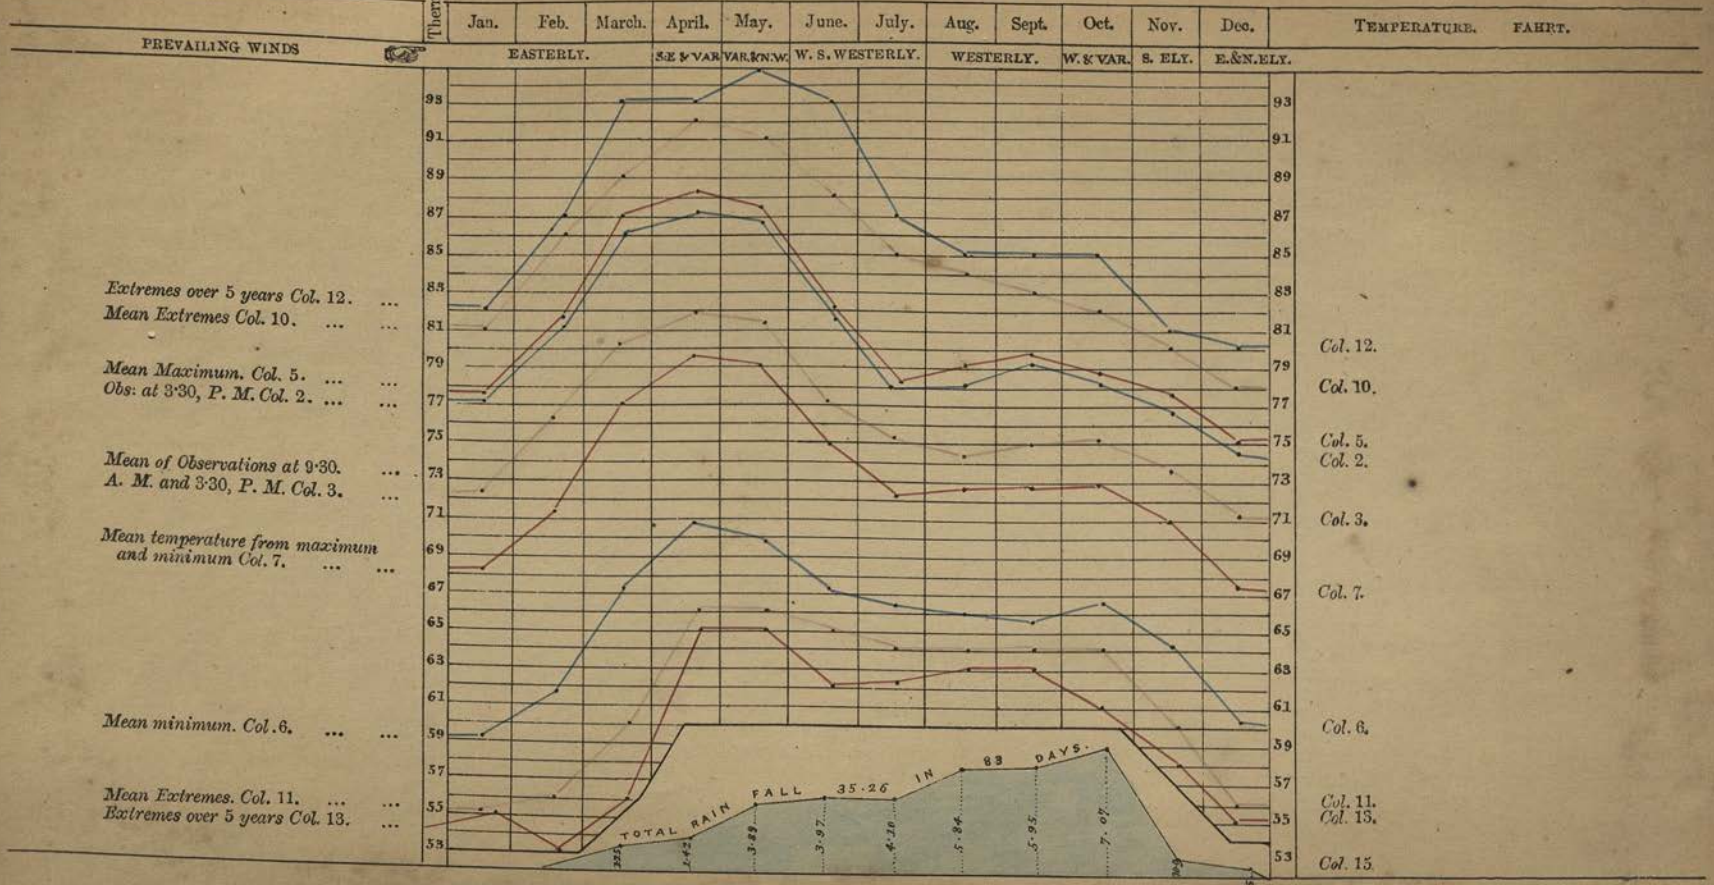
1. Column 3 gives a mean temperature which is as nearly as possible the average temperature at 11 A. M., *viz.* ... ... 76·2
2. Column 7 gives the mean temperature from the mean maximum and minimum observations ... ... 73·3
3. The mean of the extreme monthly readings is also the same. Columns 10 and 11 ... ... 73·3
4. Column 4 shews the difference between wet and dry bulbs at 3·30 P. M., nearly the hottest time of the day. During March, the driest month of the year, the difference is not ordinarily more than 20°. Excluding 1864, the average number of days when it reached 21, 22, 23 or 24 is only five. In 1864 the average for the month was 21·2 with 4 consecutive days at 25, one at 24 and 10 at 22, but then, the dry N. E. wind was exceptionally strong: the actual observed difference is given, as it is thought this best shews popularly, the excessive dryness of our climate.
5. 1866 was an exceptional year in every way, it was also the year of famine.
6. Prevailing winds.—In January the wind is occasionally high, in February and March proverbially so, with slight intermissions, depending apparently on a particular phase of the moon. In April, the wind, which for three months blows steadily from E. N. E. to E. S. E. chops about suddenly from easterly to westerly, and there are occasional thunder showers, the weather is sometimes sultry and oppressive; at other times, storms of wind and dust are prevalent; clouds often bank up heavily in the east and travel round to west and end, not in rain, but in a thick dust storm. May is generally sultry with variable airs and occasional high winds, and thunder storms; the wind settling in the S. S. W. towards the end of the month, in which quarter there is much sheet lightning. In June and July the weather is cloudy with a high S. W. or W. S. Westerly wind, very disadvantageous to horticulture. August, September and October are the rainiest months, with wind [occasionally high] from the westward; variable in October, and settling down to the eastward at the end of the month. November is generally a quiet month, with the wind from the S. S. E., which draws round to the northward of east, in December—the month of bright sunny days and cold foggy mornings.
7. All the observations from which this abstract has been made, were taken daily at stated times, by a person appointed to this duty. The same instruments, [Casella's best,] have been always used; they are suspended 4 feet from the ground in an appropriate building, and though completely sheltered from the sun, are freely exposed to the atmosphere on all sides. The observations are not *corrected* as they are only approximately read to half degrees; they are therefore registered as observed. A more scientific registry is now being made since the beginning of 1868, but failing this, these 5 years' observations may be accepted as the best record at present obtainable.

CHART TO ILLUSTRATE THE ABOVE TABLE.



I. C.—CIVIL DIVISIONS OF THE MYSORE TERRITORY.

The Government of the Province is administered by the Chief Commissioner in the name of the Mahárája. This officer was nominated in 1834 *as sole Commissioner in supersession of the Joint Commissioners originally appointed in* 1831—32. *In* 1843 *the duties of Resident were superadded, that office, as a separate post, being abolished.*
